So if in ancient time, one held of the king, as of a manor by knight's service, and the land return to the king by attainder, and then the king granteth it "tenend' per fidelitatem tantum," and it returneth the second time to the king, and the king granteth it "per servitia antehac consueta;" now because of the incertainty neither service shall take place, and the tenure shall be *in capite*, as was the opinion of you, my lord chief justice, where you were commissioner to find an office after Austin's death.

Austin's office.

So if the king grant land "tenend' de manerio de East Greenwich vel de honore de Hampton;" this is void for the non-certainty, and shall be held of the king *in capite.*

33 H. 9. f. 7. For the third branch, if the king limit land to be discharged of tenure, as "absque aliquo inde reddendo," this is a tenure *in capite;* and yet if one should go to the next, *ad proximum*, it should be a socage, for the least is next to none at all: but you may not take the king's grant by argument; but where they cannot take place effectually and punctually, as they are expressed, there you shall resort wholly to the judgment of the law.

14 H. 6. f. 12. So if the king grant land "tenend' si frankment come il en son corone," this is a tenure *in capite.*

Merefeild's case. If land be given to be held of a lordship not capable, as of Salisbury plain, or a corporation not *in esse*, or of the manor of a subject, this is a tenure *in capite.*

So if land be given to hold by impossible service, as by performing the office of the sheriff of Yorkshire, which no man can do but the sheriff, and fealty for all service, this is a tenure *in capite.*

For the fourth branch, which cometh nearest to our case; let us see where a seigniory was once, and is after extinguished; this may be in two manners, by release in fact, or by unity of possession, which is a release or discharge in law.

Vide 30 H. 8. Dyer. 8 H. 7. f. 13. And therefore let the case be, that the king releaseth to his tenant that holds of him in socage; this release is good, and the tenant shall hold now *in capite*, for the former tenure being discharged, the tenure in law ariseth.

1 E. 3. f. 4. fine accept. So the case, which is in 1 E. III. a fine is levied to J. S. in tail, the remainder ouster to the king, the state tail shall be held *in capite*, and the first tenancy, if it were in socage, by the unity of the tenancy, shall be discharged, and a new raised thereupon: and therefore the opinion, or rather the *query* in Dyer no law.

4 et 5 P. M. Thus much for my major proposition; now for the minor, or the assumption, it is this: first, that the land in question is discharged of tenure by the purchase of the manor; then that the reservation of the service upon the manor cannot possibly inure to the tenancy; and then if a corruption be of the first tenure, and no generation of the new; then cometh in the tenure *per normam legis*, which is *in capite.*

And the course of my proof shall be *ab enumeratione partium*, which is one of the clearest and most forcible kinds of argument.

If this parcel of land be held by fealty and rent *tantum*, either it is the old fealty before the purchase of the manor, or it is the new fealty reserved and expressed upon the grant of the manor; or it is a new fealty raised by intendment of law in conformity and congruity of the fealty reserved upon the manor; but none of these, *ergo*, &c.

That it should be the old fealty, is void of sense; for it is not *ad eosdem terminos.* The first fealty was between the tenancy and the manor, that tenure is by the unity extinct. Secondly, that was a tenure of a manor, this is a tenure in gross. Thirdly, the rent of 26*l.* 10*s.* must needs be new, and will you have a new rent with an old fealty? These things are *portenta in lege;* nay I demand, if the tenure of the tenancy, Low's tenure, had been by knight's service, would you have said that had remained? No, but that it was altered by the new reservation; *ergo*, no colour of the old fealty.

That it cannot be the new fealty is also manifest; for the new reservation is upon the manor, and this is no part of the manor: for if it had escheated to the king in an ordinary escheat, or come to him upon a mortmain, in these cases it had come in lieu of the seigniory, and been parcel of the manor, and so within the reservation, but clearly not upon a purchase in fact.

Again, the reservation cannot inure, but upon that which is granted; and this tenancy was never grant-

ed, but was in the tenant before; and therefore no colour it should come under the reservation. But if it be said, that nevertheless the seigniory of that tenancy was parcel of the manor, and is also granted; and although it be extinct in substance, yet it may be *in esse* as to the king's service: this deserveth answer: for this assertion may be colourably inferred out of Carr's case.

9 Eliz. Coke, Lib. 3. f. 30.

King Edw. VI. grants a manor, rendering 94*l.* rent in fee farm *tenendum de East Greenwich* in socage; and after, queen Mary granteth these rents amongst other things *tenendum in capite*, and the grantee released to the heir of the tenant; yet the rent shall be *in esse*, as to the king, but the land, saith the book, shall be deviseable by the statute for the whole, as not held *in capite*.

25 Ass. pl. 60.

And so the case of the honour of Pickeringe, where the king granted the bailywick rendering rent: and after granted the honour, and the bailywick became forfeited, and the grantee took forfeiture thereof, whereby it was extinct; yet the rent remaineth as to the king out of the bailywick extinct.

These two cases partly make not against us, and partly make for us: there be two differences that avoid them. First, there the tenures or rents are *in esse* in those cases for the king's benefit, and here they should be *in esse* to the king's prejudice, who should otherwise have a more beneficial tenure. Again, in these cases the first reservation was of a thing *in esse*, at the time of the reservation; and then there is no reason the act subsequent of the king's tenant should prejudice the king's interest once vested and settled: but here the reservation was never good, because it is out of a thing extinct in the instant.

But the plain reason which turneth Carr's case mainly for us, is; for that where the tenure is of a rent or seigniory, which is afterwards drowned or extinct in the land; yet the law judgeth the same rent or seigniory to be *in esse*, as to support the tenure: but of what? Only of the same rent or seigniory, and never of the land itself; for the land shall be held by the same tenure it was before. And so is the rule of Carr's case, where it is adjudged, that though the rent be held *in capite*, yet the land was nevertheless deviseable for the whole, as no ways charged with that tenure.

Why then, in our case, let the fealty be reserved out of the seigniory extinct, yet that toucheth not at all the land: and then of necessity the land must be also held; and therefore you must seek out a new tenure for the land, and that must be *in capite*.

And let this be noted once for all, that our case is not like the common cases of a menalty extinct, where the tenant shall hold of the lord, as the mean held before; as where the menalty is granted to the tenant, or where the tenancy is granted to the mean, or where the menalty descendeth to the tenant, or where the menalty is forejudged. In all these cases the tenancy, I grant, is held as the menalty was held before, and the difference is because there was an old seigniory in being; which remaineth untouched and unaltered, save that it is drawn a degree nearer to the land, so as there is no question in the world of a new tenure; but in our case there was no lord paramount, for the manor itself was in the crown, and not held at all, nor no seigniory of the manor *in esse;* so as the question is wholly upon the creation of a new seigniory, and not upon the continuance of an old.

For the third course, that the law should create a new distinct tenure by fealty of this parcel, guided by the express tenure upon the manor; it is the probablest course of the three: but yet if the former authorities I have alleged be well understood and marked, they show the law plainly, that it cannot be; for you shall ever take the king's grant *ad idem*, and not *ad simile*, or *ad proximum;* no more than in the case of the *absque aliquo reddendo*, or as free as the crown: who would not say that in those cases it should amount to a socage tenure? for *minimum est nihilo proximum;* and yet they are tenures by knight's service *in capite*. So if the king by one patent pass two acres, and a fealty reserved but upon the one of them, you shall not resort to this "ut expressum servitium regat, vel declaret tacitum." No more shall you in our case imply that the express tenure reserved upon the manor shall govern or declare the tenure of the tenancy, or control the intendment of law concerning the same.

Now will I answer the cases, which give some shadow on the contrary side, and show they have their particular reasons, and do not impugn our case.

First, if the king have land by attainder of treason, and grant the land to be held of himself, and of other lords, this is no new tenure *per normam legis communis;* but the old tenure *per normam statuti*, which taketh away the intendment of the common law; for the statute directeth it so, and otherwise the king shall do a wrong.

So if the king grant land parcel of the demesne of a manor *tenendum de nobis*, or reserving no tenure at all, this is a tenure of the manor or of the honour, and not *in capite:* for here the more vehement presumption controlleth the less; for the law doth presume the king hath no intent to dismember it from the manor, and so to lose his court and the perquisites.

So if the king grant land *tenendum* by a rose *pro omnibus servitiis;* this is not like the cases of the *absque aliquo inde reddendo*, or as free as the crown: for *pro omnibus servitiis* shall be intended for all express service: whereas fealty is incident, and passeth tacit, and so it is no impossible or repugnant reservation.

25 H. 6. f. 36 a

The case of the frankalmoigne, I mean the case where the king grants lands of the Templers to J. S. to hold as the Templers did, which cannot be frankalmoigne; and yet hath been ruled to be no tenure by knight's service *in capite*, but only a socage tenure, is easily answered; for that the frankalmoigne is but a *species* of a tenure in socage with a privilege, so the privilege ceaseth, and the tenure remains.

This is no frankalmoigne.

Wood's case.

To conclude therefore, I sum up my arguments

thus. My major is, where *calamus legis* doth write the tenure, it is knight's service *in capite*. My minor is, this tenure is left to the law; *ergo* this tenure is *in capite*.

For the second point, I will first speak of it according to the rules of the common law, and then upon the statutes of the duchy.

First I do grant, that where a seigniory and a tenancy, or a rent and land, or trees and land, or the like primitive and secondary interest, are conjoined in one person, yea though it be in *autre droit*; yet if it be of like perdurable estate, they are so extinct, as by act in law they may be revived, but by grant they cannot.

For if a man have a seigniory in his own right, and the land descend to his wife, and his wife dieth without issue, the seigniory is revived; but if he will make a feoffment in fee, saving his rent, he cannot do it. But there is a great difference, and let it be well observed, between *autre capacitie*, and *autre droit*; for in case of *autre capacitie* the interests are *contigua*, and not *continua*, conjoined, but not confounded. And therefore if the master of an hospital have a seigniory, and the mayor and commonalty of St. Alban's have a tenancy, and the master of the hospital be made mayor, and the mayor grant away the tenancy under the seal of the mayor and commonalty, the seigniory of the hospital is revived.

So between natural capacity and politic, if a man have a seigniory to him and his heirs, and a bishop is tenant, and the lord is made bishop, and the bishop before the statute grants away the land under the chapter's seal, the seigniory is revived.

The same reason is between the capacity of the crown and the capacity of the duchy, which is in the king's natural capacity, though illustrated with some privileges of the crown; if the king have the seigniory in the right of his crown, and the tenancy in the right of the duchy, as our case is, and make a feoffment of the tenancy, the tenure must be revived; and this is by the ground of the common law. But the case is the more strong by reason of the statute of 1 H. IV. 3 H. V. and 1 H. VII. of the duchy, by which the duchy-seal is enabled to pass lands of the duchy, but no ways to touch the crown: and whether the king be in actual possession of the thing that should pass, or have only a right, or a condition, or a thing in suspense, as our case is, all is one; for that seal will not extinguish so much as a spark of that which is in the right of the crown; and so a plain revivor.

And if it be said that a mischief will follow; for that upon every duchy patent men shall not know how to hold, because men must go back to the ancient tenure, and not rest in the tenure limited: for this mischief there grows an easy remedy, which likewise is now in use, which is to take both seals, and then all is safe.

Secondly, as the king cannot under the duchy-seal grant away his ancient seigniory in the right of his crown; so he cannot make any new reservation by that seal, and so of necessity it falleth to the law to make the tenure: for every reservation must be of the nature of that that passeth, as a dean and chapter cannot grant land of the chapter, and reserve a rent to the dean and his heirs, nor *e converso:* nor no more can the king grant land of the duchy under that seal, and reserve a tenure to the crown: and therefore it is warily put in the end of the case of the duchy in the commentaries, where it is said, if the king make a feoffment of the duchy land, the feoffee shall hold *in capite;* but not a word of that it should be by way of express reservation, but upon a feoffment simply, the law shall work it and supply it.

To conclude, there is direct authority in the point, but that it is *via versa;* and it was the bishop of Salisbury's case: The king had in the right of the duchy a rent issuing out of land, which was monastery land, which he had in the right of the crown, and granted away the land under the great seal to the bishop; and yet nevertheless the rent continued to the duchy, and so upon great and grave advice it was in the duchy decreed: so as your lordship seeth, whether you take the tenure of the tenancy, or the tenure of the manor, this land must be held *in capite*. And therefore, &c.

THE

CASE OF REVOCATION OF USES,

IN THE KING'S BENCH.

The Case shortly put, without names or dates more than of necessity, is this.

Sir John Stanhope conveys the manor of Burrough-ash to his lady for part of her jointure, and intending, as is manifest, not to restrain himself, nor his son, from disposing some proportion of that land according to their occasions, so as my lady were at no loss by the exchange, inserteth into the conveyance a power of revocation and alteration in this manner; provided that it shall be lawful for himself and his son successively to alter and make void the uses, and to limit and appoint new uses, so it exceed not the value of 20*l.* to be computed after the rents

then answered: and that immediately after such declaration, or making void, the feoffees shall stand seised to such new uses; *Ita quod* he or his son, within six months after such declaration, or making void, shall assure, within the same town, "tantum terrarum, et tenementorum, et similis valoris," as were revoked, to the uses expressed in the first conveyance.

Sir John Stanhope his son revokes the land in Burrough-ash, and other parcels not exceeding the value of 20*l.* and within six months assures to my lady and to the former uses Burton-joice and other lands; and the jury have found that the lands revoked contain twice so much in number of acres, and twice so much in yearly value as the new lands, but yet that the new lands are rented at 21*l.* and find the lands of Burrough-ash, now out of lease formerly made: and that no notice of this new assurance was given before the ejectment, but only that Sir John Stanhope had by word told his mother, that such an assurance was made, not showing or delivering the deed.

The question is, Whether Burrough-ash be well revoked? Which question divides itself into three points.

First, whether the *ita quod* be a void and idle clause? for if so, then there needs no new assurance, but the revocation is absolute *per se*.

The next is, if it be an effectual clause, whether it be pursued or no? wherein the question will rest, whether the value of the re-assured lands shall be only computed by rents?

And the third is, if in other points it should be well pursued, yet whether the revocation can work until a sufficient notice of the new assurance?

And I shall prove plainly, that *ita quod* stands well with the power of revocation; and if it should fall to the ground, it draws all the rest of the clause with it, and makes the whole void, and cannot be void alone by itself.

I shall prove likewise that the value must needs be accounted not a tale value, or an arithmetical value by the rent, but a true value in quantity and quality.

And lastly, that a notice is of necessity, as this case is.

I will not deny, but it is a great power of wit to make clear things doubtful; but it is the true use of wit to make doubtful things clear, or at least to maintain things that are clear, to be clear, as they are. And in that kind I conceive my labour will be in this case, which I hold to be a case rather of novelty than difficulty, and therefore may require argument, but will not endure much argument: but to speak plainly to my understanding, as the case hath no equity in it, I might say piety, so it hath no great doubt in law.

First, therefore, this it is, that I affirm, that the clause, *so that*, *ita quod*, containing the recompence governs the clause precedent of the power, and that it makes it wait and expect otherwise than as by way of inception, but the effect and operation is suspended, till that part also be performed: and if otherwise, then I say plainly, you shall not construe by fractions; but the whole clause and power is void, not *in tanto*, but *in toto*. Of the first of them I will give four reasons.

The first reason is, that the wisdom of the law useth to transpose words according to the sense; and not so much to respect how the words do take place, but how the acts, which are guided by those words, may take place.

Hill and Graunger's case comment. 171. A man in August makes a lease rendering 10*l.* rent yearly to be paid at the feast of Annunciation and Michaelmas; these words shall be inverted by law, as if they had been set thus, at Michaelmas and the Annunciation: for else he cannot have a rent yearly; for there will be fourteen months to the first year.

Hill and Graunger's case, com. f. 171.

Fitz-Williams's case, 2 Jac. Co. p. 6, f. 33, it was contained in an indenture of uses, that Sir William Fitz-Williams should have power to alter and change, revoke, determine, and make void the uses limited: the words are placed disorderly; for it is in nature first to determine the uses, and after to change them by limitation of new. But the chief question being in the book, whether it might be done by the same deed; it is admitted and thought not worth the speaking to, that the law shall marshal the acts against the order of the words, that is, first to make void, then to limit.

Fitz-Williams' case, 2 Jac. Co. p. 6. f. 33.

So if I convey land and covenant with you to make farther assurance, so that you require it of me, there though the request be placed last, yet it must be acted first.

So if I let land to you for a term, and say farther, it shall be lawful for you to take twenty timber-trees to erect a new tenement upon the land, so that my bailiff do assign you where you shall take them; here the assignment, though last placed, must precede. And therefore the grammarians do infer well upon the word *period*, which is a full and complete clause or sentence, that it is "complexus orationis circularis:" for as in a circle there is not *prius* nor *posterius*, so in one sentence you shall not respect the placing of words; but though the words lie in length, yet the sense is round, so as "prima erunt novissima, et novissima prima." For though you cannot speak all at once so, yet you must construe and judge upon all at once.

To apply this; I say these words, *so that*, though "loco et textu posteriora," yet they be "potestate et sensu priora:" as if they had been penned thus, that it shall be lawful for Sir Thomas Stanhope, so that he assure lands, &c. to revoke; and what difference between, so that he assure, he may revoke; or, he may revoke, so that he assure: for you must either make the *so that* to be precedent or void, as I shall tell you anon. And therefore the law will rather invert the words, than pervert the sense.

But it will be said, that in the cases I put, it is left indefinite, when the act last limited shall be performed; and so the law may marshal it, as it may stand with possibility; and so if it had been in this case no more but, *so that* Sir Thomas or John should assure new lands, and no time spoken of, the law might have intended it precedent. But in this case

it is precisely put to be at any time within six months after the declaration, and therefore you cannot vary in the times.

To this I answer, that the new assurance must be in deed in time after the instrument or deed of the declaration; but on the other side, it must be time precedent to the operation of the law, by determining the uses thereupon: so as it is not to be applied so much to the declaration itself, but to the warrant of the declaration. It shall be lawful, so that, &c. And this will appear more plainly by my second reason, to which now I come; for as for the cavillation upon the word *immediately*, I will speak to it after.

My second reason therefore is out of the use and signification of this conjunction or bond of speech, *so that:* for no man will make any great doubt of it, if the words had been *si*, if Sir Thomas shall within six months of such declaration convey; but that it must have been intended precedent; yet if you mark it well, these words *ita quod* and *si*, howsoever in propriety the *ita quod* may seem subsequent, and the *si* precedent, yet they both bow to the sense.

4 E. 6. Pl. Com. Colthurst's case.

So we see in 4 Edw. VI. Colthurst's case, a man leaseth to J. S. a house, "si ipse vellet habitare, et residens esse;" there the word *si* amounts to a condition subsequent; for he could not be resident before he took the state; and so *via versa* may *ita quod* be precedent, for else it must be idle or void. But I go farther, for I say *ita quod*, though it be good words of condition, yet more properly it is neither condition, precedent, nor subsequent, but rather a qualification, or form, or adherent to the acts, whereto it is joined, and made part of their essence, which will appear evidently by other cases. For allow it had been thus, *so that the deed of declaration be enrolled* within six months, this is all one, as by deed enrolled within six months, as it is said in

Digg's case. 42 Eliz. Co. P. I. f. 173.

Digg's case 42 Eliz. f. 173, that by deed indented to be enrolled is all one with deed indented and enrolled. It is but a *modus faciendi*, a description, and of the same nature is the *ita quod:* so if it had been thus, it shall be lawful for Sir Thomas to declare, so that the declaration be with the consent of my lord chief justice, is it not all one with the more compendious form of penning, that Sir Thomas shall declare with the consent of my lord chief justice? And if it had been thus, so that Sir John within six months after such declaration shall obtain the consent of my lord chief justice, should not the uses have expected? But these you will say are forms and circumstances annexed to the conveyance required: why surely any collateral matter coupled by the *ita quod* is as strong? If the *ita quod* had been, that Sir John Stanhope within six months should have paid my lady 1000*l.* or entered into bond never more to disturb her, or the like, all these make but one entire idea or notion, how that his power should not be categorical, or simple at pleasure, but hypothetical, and qualified, and restrained, that is to say, not the one without the other, and they are parts incorporated into the nature and essence of the authority itself.

The third reason is the justice of the law in taking words so, as no material part of the parties' intent perish: for, as one saith, "præstat torquere verba quam homines," better wrest words out of place, than my lady Stanhope out of her jointure, that was meant to her. And therefore it is elegantly said in Fitz-Williams's case, which I vouched before, though words be contradictory, and, to use the phrase of the book, "pugnant tanquam ex diametro;" yet the law delighteth to make atonement, as well between words as between parties, and will reconcile them so as they may stand, and abhorreth a *vacuum*, as well as nature abhorreth it; and as nature to avoid a *vacuum* will draw substances contrary to their propriety, so will the law draw words. Therefore saith Littleton, if I make a feoffment *reddendo* rent to a stranger, this is a condition to the feoffor, rather than it shall be void, which is quite cross; it sounds a rent, it works a condition, it is limited to a third person, it inureth to the feoffor; and yet the law favoureth not conditions, but to avoid a *vacuum*.

45 E. 3.

So in the case of 45 E. III. a man gives land in frank-marriage, the remainder in fee. The frank-marriage is first put, and that can be but by tenure of the donor; yet rather than the remainder should be void, though it be last placed, the frank-marriage being but a privilege of estate shall be destroyed.

So 33 H. VI. Tressham's case: the king granteth a wardship, before it fall; good, because it cannot inure by covenant, and if it should not be good by plea, as the book terms it, it were void; so that, no, not in the king's case, the law will not admit words to be void.

So then the intent appears most plainly, that this act of Sir John should be *actus geminus*, a kind of twine to take back, and to give back, and to make an exchange, and not a resumption; and therefore upon a conceit of repugnancy, to take the one part, which is the privation of my lady's jointure, and not the other, which is the restitution or compensation, were a thing utterly injurious in matter, and absurd in construction.

The fourth reason is out of the nature of the conveyance, which is by way of use, and therefore ought to be construed more favourably according to the intent, and not literally or strictly: for although it be said in Frene and Dillon's case, and in Fitz-Williams's case, that it is safe so to construe the statute of 27 H. VIII. as that uses may be made subject to the rules of the common law, which the professors of the law do know, and not leave them to be extravagant and irregular; yet if the late authorities be well marked, and the reason of them, you shall find this difference, that uses in point of operation are reduced to a kind of conformity with the rules of the common law, but that in point of exposition of words, they retain somewhat of their ancient nature, and are expounded more liberally according to the intent; for with that part the statute of 27 doth not meddle. And therefore if the question be, whether a bargain and sale upon con-

dition be good to reduce the state back without an entry? or whether if a man make a feoffment in fee to the use of John a Style for years, the remainder to the right heirs of John a Downe, this remainder be good or no? these cases will follow the grounds of the common law for possessions, in point of operation; but so will it not be in point of exposition.

For if I have the manor of Dale and the manor of Sale lying both in Vale, and I make a lease for life of them both, the remainder of the manor of Dale, and all other my lands in Vale to John a Style, the remainder of the manor of Sale to John a Downe, this latter remainder is void, because it comes too late, the general words having carried it before to John a Style. But put it by way of use, a man makes a feoffment in fee of both manors, and limits the use of the manor of Dale, and all other the lands in Vale, to the use of himself, and his wife for her jointure, and of the manor of Sale to the use of himself alone. Now his wife shall have no jointure in the manor of Sale, and so was it judged in the case of the manor of Odiam.

The case of the manor of Odiam.

And therefore our case is more strong, being by way of use, and you may well construe the latter part to control and qualify the first, and to make it attend and expect: nay, it is not amiss to see the case of Peryman, 41 Eliz. Coke, p. 5, f. 84, where by a custom a livery may expect; for the case was, that in the manor of Porchester, the custom was, that a feoffment of land should not be good, except it were presented within a year in the court of the manor, and there ruled that it was but *actus inchoatus*, till it was presented; now if it be not merely against reason of law, that so solemn a conveyance as livery, which keeps state, I tell you, and will not wait, should expect a farther perfection, *a fortiori* may a conveyance in use or declaration of use receive a consummation by degrees, and several acts. And thus much for the main point.

41 Eliz. Co. p. 5. f. 84.

Now for the objection of the word *immediate*, it is but light and a kind of sophistry. They say that the words are, that the uses shall rise immediately after the declaration, and we would have an interposition of an act between, namely, that there should be a declaration first, then a new assurance within the six months; and lastly, the uses to rise; whereunto the answer is easy; for we have showed before, that the declaration and the new assurance are in the intent of him that made the conveyance, and likewise in eye of law, but as one compounded act. So as *immediately after the declaration* must be understood of a perfect and effectual declaration, with the adjuncts and accouplements expressed.

So we see in 49 E. III. f. 11, if a man be attainted of felony, that holds lands of a common person, the king shall have his year, day, and waste: but when? Not before an office found: and yet the words of the statute of *prærogativa regis* are, "rex habebit catalla felonum, et si ipsi habent liberum tenementum, statim capiatur in manus domini, et rex habebit annum, diem, et vastum:" and here the word *statim* is understood of the effectual and lawful time, that is, after office found.

49 E. 3. f. 11.

So in 2 H. IV. f. 17, it appears that by the statute of Acton Burnell, if the debt be acknowledged, and the day past, that the goods of the debtors shall be sold *statim*, in French *maintenant*; yet nevertheless this *statim* shall not be understood, before the process of law requisite passed, that is, the day comprised in the extent.

2 H. 4. f. 17.

So it is said 27 H. VIII. f. 19, by Audly the chancellor, that the present tense shall be taken for the future; *a fortiori*, say I, the immediate future tense may be taken for a distant future tense; as if I be bound that my son being of the age of twenty-one years shall marry your daughter, and that he be now of twelve years; yet this shall be understood, when he shall be of the age of twenty-one years. And so in our case, "immediately after the declaration" is intended when all things shall be performed, that are coupled with the said declaration.

27 H. 8. f. 19.

But in this I doubt I labour too much; for no man will be of opinion, that it was intended that the lady Stanhope should be six whole months without either the old jointure or the new; but that the old should expect until the new were settled without any *interim*. And so I conclude this course of atonements, as Fitz-Williams's case calls it, whereby I have proved, that all the words, by a true marshalling of the acts, may stand according to the intent of the parties.

I may add *tanquam ex abundanti*, that if both clauses do not live together, they must both die together; for the law loves neither fractions of estates, nor fractions of constructions; and therefore in Jermin and Askew's case, 37 Eliz. a man did devise lands in tail with proviso, that if the devisee did attempt to alien, his estate should cease, as if he were naturally dead. Is it said there, that the words, "as if he were naturally dead," shall be void, and the words, that "his estate shall cease," good? No, but the whole clause shall be void. And it is all one reason of a *so that*, as of an *as if*, for they both suspend the sentence.

Jermin and Askew's case.

So if I make a lease for life, upon condition he shall not alien, nor take the profits, shall this be good for the first part, and void for the second? No, but it shall be void for both.

So if the power of declaration of uses had been thus penned, that Sir John Stanhope might by his deed indented declare new uses, so that the deed were enrolled before the mayor of St. Albans, who hath no power to take enrolments: or so that the deed were made in such sort, as might not be made void by parliament: in all these and the like cases the impossibility of the last part doth strike upwards, and infect, and destroy the whole clause. And therefore, that all the words may stand, is the first and true course; that all the words be void, is the second and probable; but that the revoking part should be good, and the assurance part void, hath neither truth nor probability.

Now come I to the second point, how this value

should be measured, wherein methinks you are as ill a measurer of values, as you are an expounder of words; which point I will divide, first considering what the law doth generally intend by the word *value*; and secondly to see what special words may be in these clauses, either to draw it to a value of a present arrentation, or to understand it of a just and true value.

The word *value* is a word well known to the law, and therefore cannot be, except it be willingly, misunderstood. By the common law there is upon a warranty a recovery in value. I put the case therefore that I make a feoffment in fee with warranty of the manor of Dale, being worth 20*l.* *per annum*, and then in lease for 20*s.* The lease expires, for that is our case, though I hold it not needful, the question is, whether upon an eviction there shall not be recovered from me land to the value of 20*l.*

So if a man give land in frank-marriage then rented at 40*l.* and no more worth; there descendeth other lands, let perhaps for a year or two for 20*l.* but worth 80*l.* shall not the donee be at liberty to put this land in hotchpotch?

So if two parceners be in tail, and they make partition of lands equal in rent, but far unequal in value, shall this bind their issues? By no means; for there is no calendar so false to judge of values as the rent, being sometimes improved, sometimes ancient, sometimes where great fines have been taken, sometimes where no fines; so as in point of recompence you were as good put false weights into the hands of the law, as to bring in this interpretation of value by a present arrentation. But this is not worth the speaking to in general; that which giveth colour is the special words in the clause of revocation, that the 20*l.* value should be according to the rents then answered; and therefore that there should be a correspondence in the computation likewise of the recompence. But this is so far from countenancing that exposition, as, well noted, it crosseth it; for "opposita juxta se posita magis elucescunt:" first, it may be, the intent of Sir Thomas, in the first clause, was double, partly to exclude any land in demesne, partly knowing the land was double, and as some say quadruple, better than the rent, he would have the more scope of revocation under his 20*l.* value.

But what is this to the clause of recompence? first, are there any words "secundum computationem prædictam?" There are none. Secondly, doth the clause rest upon the words "similis valoris?" No, but joineth "tantum et similis valoris:" confound not predicaments; for they are the mere-stones of reason. Here is both quantity and quality; nay, he saith farther, within the same towns. Why, marry, it is somewhat to have men's possessions lie about them, and not dispersed. So that it must be as much, as good, as near; so plainly doth the intent appear, that my lady should not be a loser.

[For the point of the notice, it was discharged by the court.]

THE

JURISDICTION OF THE MARCHES.

The effect of the first argument of the king's solicitor-general, in maintaining the jurisdiction of the council of the marches over the four shires.

THE question for the present is only upon the statute of 32 H. VIII. and though it be a great question, yet it is contracted into small room; for it is but a true construction of a monosyllable, the word *march*.

The exposition of all words resteth upon three proofs, the propriety of the word, and the matter precedent, and subsequent.

Matter precedent concerning the intent of those that speak the words, and matter subsequent touching the conceit and understanding of those that construe and receive them.

First therefore as to *vis termini*, the force and propriety of the word; this word *marches* signifieth no more but limits, or confines, or borders, in Latin *limites*, or *confinia*, or *contermina*; and thereof was derived at the first *marchio*, a marquiss, which was *comes limitaneus*.

Now these limits cannot be *linea imaginaria*, but it must have some contents and dimension, and that can be no other but the counties adjacent: and for this construction we need not wander out of our own state, for we see the counties of Northumberland, Cumberland, and Westmoreland, lately the borders upon Scotland. Now the middle shires were commonly called the east, west, and middle *marches*.

To proceed therefore to the intention of those that made the statute, in the use of this word; I shall prove that the parliament took it in this sense by three several arguments.

The first is, that otherwise the word should be idle; and it is a rule "verba sunt accipienda, ut sortientur affectum:" for this word *marches*, as is confessed on the other side, must be either for the counties' marches, which is our sense, or the lordships' marchers, which is theirs; that is, such lordships, as by reason of the incursions and infestation of the Welsh, in ancient time, were not under the constant possession of either dominion, but like the bateable ground where the war played. Now

if this latter sense be destroyed, then all equivocation ceaseth.

That it is destroyed, appears manifestly by the statute of 27 H. VIII. made seven years before the statute of which we dispute: for by that statute all the lordships' marchers are made shire ground, being either annexed to the ancient counties of Wales, or to the ancient counties of England, or erected into new counties, and made parcel of the dominion of Wales, and so no more marches after the statute of 27; so as there were no marches in that sense at the time of the making of the statute of 34.

The second argument is from the comparing of the place of the statute, whereupon our doubt riseth, namely, that there shall be and remain a lord president and council in the dominion of Wales and the marches of the same, &c. with another place of the same statute, where the word *marches* is left out; for the rule is, "opposita juxta se posita magis elucescunt." There is a clause in the statute, which gives power and authority to the king to make and alter laws for the weal of his subjects of his dominion of Wales: there the word *marches* is omitted, because it was not thought reasonable to invest the king with the power to alter the laws, which is the subjects' birthright, in any part of the realm of England; and therefore by the omission of the word *marches* in that place, you may manifestly collect the signification of the word in the other, that is to be meant of the four counties of England.

The third argument which we will use is this; the council of the marches was not erected by the act of parliament, but confirmed; for there was a president and council long before in E. IV. his time, by matter yet appearing; and it is evident upon the statute itself, that in the very clause which we now handle, it referreth twice to the usage, "as heretofore hath been used."

This then I infer, that whatsoever was the king's intention in the first erection of this court, was likewise the intention of the parliament in the establishing thereof, because the parliament builded upon an old foundation.

The king's intention appeareth to have had three branches, whereof every of them doth manifestly comprehend the four shires.

The first was the better to bridle the subject of Wales, which at that time was not reclaimed; and therefore it was necessary for the president and council there to have jurisdiction and command over the English shires; because that by the aid of them, which were undoubted good subjects, they might the better govern and suppress those that were doubtful subjects.

And if it be said, that it is true, that the four shires were comprehended in the commission of oyer and terminer, for the suppression of riots and misdemeanors, but not for the jurisdiction of a court of equity; to that I answer, that their commission of oyer and terminer was but *gladius in vagina*, for it was not put in practice amongst them; for even in punishment of riots and misdemeanors, they proceed not by their commission of oyer and terminer by way of jury, but as a council by way of examination.

And again it was necessary to strengthen that court for their better countenance with both jurisdictions, as well civil as criminal, for *gladius gladium juvat*.

The second branch of the king's intention was to make a better equality of commerce, and intercourse in contracts and dealings between the subjects of Wales and the subjects of England; and this of necessity must comprehend the four shires: for otherwise, if the subject of England had been wronged by the Welsh on the sides of Wales, he might take his remedy nearer hand. But if the subject of Wales, for whose weal and benefit the statute was chiefly made, had been wronged by the English in any of the shires, he might have sought his remedy at Westminster.

The third branch of the king's intent was to make a convenient dignity and state for the mansion and resiance of his eldest son, when he should be created Prince of Wales, which likewise must plainly include the four shires: for otherwise to have sent *primogenitum regis* to a government, which without the mixture of the four shires, as things then were, had more pearl than honour or command; or to have granted him only a power of lieutenancy in those shires, where he was to keep his state, not adorned with some authority civil, had not been convenient.

So that here I conclude the second part of that I am to say touching the intention of the parliament precedent.

Now touching the construction subsequent, the rule is good, "optimus legum interpres consuetudo;" for our labour is not to maintain an usage against a statute, but by an usage to expound a statute; for no man will say, but the word *marches* will bear the sense that we give it.

This usage or custom is fortified by four notable circumstances; first, that it is ancient, and not late or recent; secondly, it is authorized, and not popular or vulgar; thirdly, that it hath been admitted and quiet, and not litigious or interrupted; and fourthly, when it was brought in question, which was but once, it hath been affirmed *judicio controverso*.

For the first, there is record of a president and council, that hath exercised and practised jurisdiction in these shires, as well sixty years before the statute, namely, since 18 E. IV. as the like number of years since: so that it is *Janus bifrons*, it hath a face backward from the statute, as well as forwards.

For the second, it hath received these allowances by the practice of that court, by suits originally commenced there, by remanding from the courts of Westminster, when causes within those shires have been commenced here above; sometimes in chancery, sometimes in the star-chamber, by the admittance of divers great learned men and great judges, that have been of that council and exercised that jurisdiction: as at one time Bromley, Morgan, and Brook, being the two chief justices, and chief baron, and divers others; by the king's learned council, which always were called to the penning of the king's instructions; and lastly, by the king's instructions themselves, which though they be not always extant, yet it is manifest that since 17 H. VIII.

when princess Mary went down, that the four shires were ever comprehended in the instructions, either by name, or by that that amounts to so much. So as it appears that this usage or practice hath not been an obscure custom practised by the multitude, which is many times erroneous, but authorized by the judgment and consent of the state: for as it is *vera vox* to say, "maximus erroris populus magister;" so it is *dura vox* to say, "maximus erroris princeps magister."

For the third, it was never brought in question till 16 Eliz. in the case of one Wynde.

And for the fourth, the controversy being moved in that case, it was referred to Gerrard attorney, and Bromley solicitor, who was afterwards chancellor of England, and had his whole state of living in Shropshire and Worcester, and by them reported to the lords of the council in the star-chamber, and upon their report decreed, and the jurisdiction affirmed.

Lastly, I will conclude with two manifest badges and tokens, though but external yet violent in demonstration, that these four shires were understood by the word *marches;* the one the denomination of that council, which was ever in common appellation termed and styled *the council* of the *marches*, or in the *marches*, rather than the council of Wales, or in Wales, and *denominatio est a digniore.* If it had been intended of lordships' marchers, it had been as if one should have called my lord mayor, my lord mayor of the suburbs. But it was plainly intended of the four English shires, which indeed were the more worthy.

And the other is of the perpetual residance and mansion of the council, which was evermore in the shires; and to imagine that a court should not have jurisdiction where it sitteth, is a thing utterly improbable, for they should be *tanquam piscis in arido.*

So as upon the whole matter, I conclude that the word *marches* in that place by the natural sense, and true intent of the statute, is meant of the four shires.

The effect of that, that was spoken by serjeant Hutton and serjeant Harris, in answer of the former argument, and for the excluding of the jurisdiction of the marches in the four shires.

That, which they both did deliver, was reduced to three heads:

The first to prove the use of the word *marches* for lordships' marchers.

The second to prove the continuance of that use of the word, after the statute of 27, that made the lordships' marchers shire-grounds; whereupon it was inferred, that though the marches were destroyed in nature, yet they remained in name.

The third was some collections they made upon the statute of 34; whereby they inferred, that that statute intended that word in that signification.

For the first, they did allege divers statutes before 27 Hen. VIII. and divers book-cases of law in print, and divers offices and records, wherein the word *marches* of Wales was understood of the lordships' marchers.

They said farther, and concluded, that whereas we show our sense of the word but rare, they show theirs common and frequent: and whereas we show it but in a vulgar use and acceptation, they show theirs in a legal use in statutes, authorities of books, and ancient records.

They said farther, that the example we brought of marches upon Scotland, was not like, but rather contrary; for they were never called *marches* of Scotland, but the *marches* of England: whereas the statute of 34 doth not speak of the *marches* of England, but of the *marches* of Wales.

They said farther, that the county of Worcester did in no place or point touch upon Wales, and therefore that county could not be termed *marches.*

To the second they produced three proofs; first, some words in the statute of 32 H. VIII. where the statute, providing for a form of trial for treason committed in Wales, and the *marches* thereof, doth use that word, which was in time after the statute of 27; whereby they prove the use of the word continued.

The second proof was out of two places of the statute, whereupon we dispute, where the word *marches* is used for the lordships' marchers.

The third proof was the style and form of the commission of oyer and terminer even to this day, which run to give power and authority to the president and council there, *infra principalitat. Walliæ*, and *infra* the four counties by name, with this clause farther, "et marchias Walliæ eisdem comitatibus adjacent':" whereby they infer two things strongly, the one that the *marches* of Wales must needs be a distinct thing from the four counties; the other that the word *marches* was used for the lordships' marchers long after both statutes.

They said farther, that otherwise the proceeding, which had been in the four new erected counties of Wales by the commission of oyer and terminer, by force whereof many had been proceeded with both for life, and otherways, should be called in question, as *coram non judice*, insomuch as they neither were part of the principality of Wales, nor part of the four shires; and therefore must be contained by the word *marches*, or not at all.

For the third head, they did insist upon the statute of 34, and upon the preamble of the same statute.

The title being an act for certain ordinances in the king's Majesty's dominion and principality of Wales; and the preamble being for the tender zeal and affection that the king bears to his subjects of Wales; and again at the humble suit and petition of his subjects of Wales: whereby they infer that the statute had no purpose to extend or intermeddle with any part of the king's dominions or subjects but only within Wales.

And for usage and practice, they said, it was nothing against an act of parliament.

And for the instructions, they pressed to see the instructions immediately after the statute made.

And for the certificate and opinions of Gerrard and Bromley, they said they doubted not, but that if it were now referred to the attorney and solicitor, they would certify as they did.

And lastly, they relied, as upon their principal strength, upon the precedent of that, which was done of the exempting of Cheshire from the late

jurisdiction of the said council; for they said, that from 34 of Hen. VIII. until 11 of queen Eliz. the court of the marches did usurp jurisdiction upon that county; being likewise adjacent to Wales, as the other four are; but that in the eleventh year of queen Elizabeth aforesaid, the same being questioned at the suit of one Radforde, was referred to the lord Dyer, and three other judges, who, by their certificate at large remaining of record in the chancery, did pronounce the said shire to be exempted, and that in the conclusion of their certificate they gave this reason, because it was no part of the principality or marches of Wales. By which reason, they say, it should appear their opinion was, that the word *marches* could not extend to counties adjacent. This was the substance of their defence.

The reply of the king's solicitor to the arguments of the two serjeants.

Having divided the substance of their arguments, *ut supra*, he did pursue the same division in his reply, observing nevertheless both a great redundancy and a great defect in that which was spoken. For touching the use of the word *marches*, great labour had been taken, which was not denied: but touching the intent of the parliament, and the reasons to demonstrate the same, which were the life of the question, little or nothing had been spoken.

And therefore as to the first head, that the word *marches* had been often applied to the lordships' marchers, he said it was the sophism which is called *sciomachia*, fighting with their shadows; and that the sound of so many statutes, so many printed book-cases, so many records, were *nomina magna*, but they did not press the question; for we grant that the word *marches* had significations, sometimes for the counties, sometimes for the lordships' marchers, like as Northampton and Warwick are sometimes taken for the towns of Northampton and Warwick, and sometimes for the counties of Northampton and Warwick. And Dale and Sale are sometimes taken for the villages or hamlets of Dale and Sale, and sometimes taken for the parishes of Dale and Sale: and therefore that the most part of that they had said, went not to the point.

To that answer, which was given to the example of the middle shires upon Scotland, it was said, it was not *ad idem;* for we used it to prove that the word *marches* may and doth refer to whole counties; and so much it doth manifestly prove; neither can they deny it. But then they pinch upon the addition, because the English counties adjacent upon Scotland are called the *marches* of England, and the English counties adjacent upon Wales are called the *marches* of Wales; which is but a difference in phrase; for sometimes limits and borders have their names of the inward country, and sometimes of the outward country; for the distinction of *exclusivè* and *inclusivè* is a distinction both in time and place; as we see that which we call this day fortnight, excluding the day, the French and the law-phrase calls this day fifteen days, or *quindena*, including the day. And if they had been called the marches upon Wales or the marches against Wales, then it had been clear and plain; and what difference between the banks of the sea and the banks against the sea? So that he took this to be but a toy or cavillation, for that phrases of speech are "ad placitum, et recipiunt casum."

As to the reason of the map, that the county of Worcester doth no way touch upon Wales, it is true; and I do find when the lordships' marchers were annexed, some were laid to every other of the three shires, but none to Worcester. And no doubt this imboldened Wynde to make the claim to Worcester, which he durst not have thought on for any of the other three. But it falls out well that that, which is the weakest in probability, is strongest in proof; for there is a case ruled in that more than in the rest. But the true reason is, that usage must overrule propriety of speech; and therefore if all commissions, and instructions, and practices, have coupled these four shires, it is not the map that will sever them.

To the second head he gave this answer. First, he observed in general that they had not showed one statute, or one book-case, or one record, the commissions of oyer and terminer only excepted, wherein the word *marches* was used for lordships' marchers since the statute of 34. So that it is evident, that as they granted the nature of those marches was destroyed and extinct by 27; so the name was discontinued soon after, and did but remain a very small while, like the sound of a bell, after it hath been rung; and as indeed it is usual when names are altered, that the old name, which is expired, will continue for a small time.

Secondly, he said, that whereas they had made the comparison, that our acceptation of the word was popular, and theirs was legal, because it was extant in book-cases, and statutes, and records, they must needs confess that they are beaten from that hold: for the name ceased to be legal clearly by the law of 27, which made the alteration in the thing itself, whereof the name is but a shadow; and if the name did remain afterwards, then it was neither legal, nor so much as vulgar, but it was only by abuse, and by a trope or *catachresis*.

Thirdly, he showed the impossibility how that signification should continue, and be intended by the statute of 34. For if it did, it must be in one of these two senses, either that it was meant of the lordships' marchers made part of Wales, or of the lordships' marchers annexed to the four shires of England.

For the first of these, it is plainly impugned by the statute itself: for the first clause of the statute doth set forth that the principality and dominion of Wales shall consist of twelve shires: wherein the four new-erected counties, which were formerly lordships' marchers, and whatsoever else was lordships' marchers annexed to the ancient counties of Wales, is comprehended; so that of necessity all that territory or border must be Wales: then followeth the clause *immediately*, whereupon we now differ, namely, that there shall be and remain a president and council in the principality of Wales, and the marches of the same; so that the parliament

could not forget so soon what they had said in the clause next before: and therefore by the marches they meant somewhat else besides that which was Wales. Then if they fly to the second signification, and say that it was meant by the lordships' marchers annexed to the four English shires; that device is merely *nuper nata oratio*, a mere fiction and invention of wit, crossed by the whole stream and current of practice; for if that were so, the jurisdiction of the council should be over part of those shires, and in part not; and then in the suits commenced against any of the inhabitants of the four shires, it ought to have been laid or showed that they dwelt within the ancient lordships' marchers, whereof there is no shadow that can be showed.

Then he proceeded to the three particulars. And for the statute of 32, for trial of treason, he said it was necessary that the word *marches* should be added to Wales, for which he gave this reason, that the statute did not only extend to the trial of treasons which should be committed after the statute, but did also look back to treasons committed before: and therefore this statute being made but five years after the statute of 27, that extinguished the lordships' marchers, and looking back, as was said, was fit to be penned with words that might include the preterperfect tense, as well as the present tense; for if it had rested only upon the word *Wales*, then a treason committed before the lordship's marchers were made part of Wales, might have escaped the law.

To this also another answer was given, which was, that the word *marches* as used in that statute, could not be referred to the four shires, because of the words following, wherewith it is coupled, namely, in Wales, and the marches of the same, where the king's writ runs not.

To the two places of the statute of 34 itself, wherein the word *marches* is used for lordships' marchers; if they be diligently marked, it is merely sophistry to allege them; for both of them do speak by way of recital of the time past before the statute of 27, as the words themselves being read over will show without any other enforcement; so that this is still to use the almanack of the old year with the new.

To the commissions of oyer and terminer, which seemeth to be the best evidence they show for the continuance of the name in that tropical or abused sense, it might move somewhat, if this form of penning those commissions had been begun since the statute of 27. But we show forth the commission in 17 H. VIII. when the princess Mary went down, running in the same manner *verbatim*, and in that time it was proper, and could not otherwise be. So that it appeareth that it was but merely a fac simile, and that notwithstanding the case was altered, yet the clerk of the crown pursued the former precedent; hurt it did none, for the word *marches* is there superfluous.

And whereas it was said, that the words in those commissions were effectual, because else the proceeding in the four new-erected shires of Wales should be *coram non judice*, that objection carrieth no colour at all; for it is plain, they have authority by the word *principality of Wales*, without adding the word *marches*; and that is proved by a number of places in the statute of 34, where if the word *Wales* should not comprehend those shires, they should be excluded in effect of the whole benefit of that statute; for the word *marches* is never added in any of these places.

To the third head, touching the true intent of the statute, he first noted how naked their proof was in that kind, which was the life of the question, for all the rest was but *in litera et in cortice*.

He observed also that all the strength of our proof, that concerned that point, they had passed over in silence, as belike not able to answer: for they had said nothing to the first intentions of the erections of the court, whereupon the parliament built; nothing to the diversity of penning, which was observed in the statute of 34, leaving out the word *marches*, and resting upon the word *Wales* alone; nothing to the resiance, nothing to the denomination, nothing to the continual practice before the statute and after, nothing to the king's instructions, &c.

As for that, that they gather out of the title and preamble, that the statute was made for Wales, and for the weal and government of Wales, and at the petition of the subjects of Wales, it was little to the purpose: for no man will affirm on our part the four English shires were brought under the jurisdiction of that council, either first by the king, or after by the parliament, for their own sakes, being in parts no farther remote; but it was for congruity's sake, and for the good of Wales, that that commixture was requisite: and "turpis est pars, quæ non congruit cum toto." And therefore there was no reason, that the statute should be made at their petition, considering they were not *primi in intentione*, but came *ex consequenti*.

And whereas they say that usage is nothing against an act of parliament, it seems they do voluntarily mistake, when they cannot answer; for we do not bring usage to cross an act of parliament, where it is clear, but to expound an act of parliament, where it is doubtful, and evermore *contemporanea interpretatio*, whether it be of statute or Scripture, or author whatsoever, is of greatest credit: for to come now, above sixty years after, by subtilty of wit to expound a statute otherwise than the ages immediately succeeding did conceive it, is *expositio contentiosa*, and not *naturalis*. And whereas they extenuate the opinion of the attorney and solicitor, it is not so easy to do: for first they were famous men, and one of them had his patrimony in the shires; secondly, it was of such weight, as a decree of the council was grounded upon it; and thirdly, it was not unlike, but that they had conferred with the judges, as the attorney and solicitor do often use in like cases.

Lastly, for the exemption of Cheshire he gave this answer. First, that the certificate in the whole body of it, till within three or four of the last lines, doth rely wholly upon that reason, because it was a county Palatine: and to speak truth, it stood not with any great sense or proportion, that that place which was privileged and exempted from the jurisdiction of the courts of Westminster, should be

meant by the parliament to be subjected to the jurisdiction of that council.

Secondly, he said that those reasons, which we do much insist upon for the four shires, hold not for Cheshire, for we say it is fit the subject of Wales be not forced to sue at Westminster, but have his justice near hand; so may he have in Cheshire, because there is both a justice for common law and a chancery; we say it is convenient for the prince, if it please the king to send him down, to have some jurisdiction civil as well as for the peace; so may he have in Cheshire, as earl of Chester. And therefore those grave men had great reason to conceive that the parliament did not intend to include Cheshire.

And whereas they pinch upon the last words in the certificate, namely, that Cheshire was no part of the dominion, nor of the marches, they must supply it with this sense, not within the meaning of the statute; for otherwise the judges could not have discerned of it; for they were not to try the fact, but to expound the statute; and that they did upon those reasons, which were special to Cheshire, and have no affinity with the four shires.

And therefore, if it be well weighed, that certificate makes against them; for as "exceptio firmat legem in casibus non exceptis," so the excepting of that shire by itself doth fortify, that the rest of the shires were included in the very point of difference.

After this he showed a statute in 18 Eliz. by which provision is made for the repair of a bridge called Chepstow-bridge, between Monmouth and Glocester, and the charge lay in part upon Glocestershire; in which statute there is a clause, that if the justices of peace do not their duty in levying of the money, they shall forfeit five pounds to be recovered by information before the council of the marches; whereby he inferred that the parliament would never have assigned the suit to that court, but that it conceived Glocestershire to be within the jurisdiction thereof. And therefore he concluded that here is in the nature of a judgment by parliament, that the shires are within the jurisdiction.

The third and last argument of the king's solicitor in the case of the marches in reply to serjeant Harris.

This case groweth now to some ripeness, and I am glad we have put the other side into the right way; for in former arguments they laboured little upon the intent of the statute of 34 H. VIII. and busied themselves in effect altogether about the force and use of the word *marches:* but now finding that "litera mortua non prodest," they offer at the true state of the question, which is the intent: I am determined therefore to reply to them in their own order, "ut manifestum sit," as he saith, "me nihil aut subterfugere voluisse reticendo, aut obscurare dicendo."

All which hath been spoken on their part consisteth upon three proofs.

The first was by certain inferences to prove the intent of the statute.

The second was to prove the use of the word *marches* in their sense long after both statutes; both that of 27, which extinguished the lordships' marchers, and that of 34, whereupon our question ariseth.

The third was to prove an interruption of that practice and use of jurisdiction, upon which we mainly insist, as the best exposition of the statute.

For the first of these, concerning the intention, they brought five reasons.

The first was that this statute of 34 was grounded upon a platform, or preparative of certain ordinances made by the king two years before, namely, 32; in which ordinances there is the very clause whereupon we dispute, namely, That there should be and remain in the dominion and principality of Wales a president and a council: in which clause nevertheless the word *marches* is left out, whereby they collect that it came into the statute of 34, but as a slip, without any farther reach or meaning.

The second was, that the mischief before the statute, which the statute means to remedy, was, that Wales was not governed according to similitude or conformity with the laws of England. And therefore, that it was a cross and perverse construction, when the statute laboured to draw Wales to the laws of England, to construe it, that it should abridge the ancient subjects of England of their own laws.

The third was, that in a case of so great importance, it is not like that if the statute had meant to include the four shires, it would have carried it in a dark general word, as it were *noctanter*, but would have named the shires to be comprehended.

The fourth was, the more to fortify the third reason, they observed that the four shires are remembered and named in several places of the statute, three in number; and therefore it is not like that they would have been forgotten in the principal place, if they had been meant.

The fifth and last was, that there is no clause of attendance, that the sheriffs of the four shires should attend the lord president and the council; wherein there was urged the example of the acts of parliament, which erected courts; as the court of augmentations, the court of wards, the court of survey; in all which there are clauses of attendance; whereupon they inferred that evermore, where a statute gives a court jurisdiction, it strengtheneth it with a clause of attendance; and therefore no such clause being in this statute, it is like there was no jurisdiction meant. Nay, farther, they noted, that in this very statute for the justices of Wales, there is a clause of attendance from the sheriffs of Wales.

In answer to their first reason, they do very well, in my opinion, to consider Mr. Attorney's business and mine, and therefore to find out for us evidence and proofs, which we have no time to search; for certainly nothing can make more for us than these ordinances, which they produce; for the diversity of penning of that clause in the ordinances, where the word *marches* is omitted, and that clause in the statute where the word *marches* is added, is a clear and perfect direction what was meant by that word. The ordinances were made by force and in pursuance of authority given to the king by the statute of 27;

to what did the statute extend? Only to Wales. And therefore the word *marches* in the ordinances is left out; but the statute of 34 respected not only Wales, but the commixed government, and therefore the word *marches* was put in. They might have remembered that we built an argument upon the difference of penning of that statute of 34 itself in the several clauses of the same; for that in all other clauses, which concern only Wales, the word *marches* is ever omitted; and in that clause alone that concerneth the jurisdiction of the president and council, it is inserted. And this our argument is notably fortified by that they now show of the ordinances, where in the very self-same clause touching the president and council, because the king had no authority to meddle but with Wales, the word *marches* is omitted. So that it is most plain that this word comes not in by chance or slip, but with judgment and purpose, as an effectual word; for, as it was formerly said, "opposita juxta se posita magis elucescunt;" and therefore I may likewise urge another place in the statute which is left out in the ordinance; for I find there is a clause that the town of Bewdley, which is confessed to be no lordships' marcher, but to lie within the county of Worcester; yet because it was an exempted jurisdiction, is by the statute annexed unto the body of the said county. First, this shows that the statute of 34 is not confined to Wales, and the lordships' marchers, but that it intermeddles with Worcestershire. Next, do you find any such clause in the ordinance of 32? No. Why? Because they were appropriated to Wales. So that in my opinion nothing could enforce our exposition better than the collating of the ordinance of 32 with the statute of 34.

In answer to the second reason, the course, that I see often taken in this cause, makes me think of the phrase of the Psalm, "starting aside like a broken bow:" so when they find their reasons broken, they start aside to things not in question. For now they speak, as if we went about to make the four shires Wales, or to take from them the benefit of the laws of England, or their being accounted amongst the ancient counties of England: doth any man say that those shires are not within the circuits of England, but subject to the justices of Wales? or that they should send but one knight to the parliament, as the shires of Wales do? or that they may not sue at Westminster, in chancery, or at common law, or the like? No man affirms any such things; we take nothing from them, only we give them a court of summary justice in certain causes at their own doors.

And this is *nova doctrina* to make such an opposition between law and equity, and between formal justice and summary justice. For there is no law under heaven which is not supplied with equity; for "summum jus, summa injuria," or as some have it, "summa lex, summa crux." And therefore all nations have equity; but some have law and equity mixed in the same court, which is the worse; and some have it distinguished in several courts, which is the better. Look into any counties Palatine, which are small models of the great government of kingdoms, and you shall never find any but had a chancery.

Lastly, it is strange that all other places do require courts of summary justice, and esteem them to be privileges and graces; and in this cause only they are thought to be servitudes and loss of birthright. The universities have a court of summary justice, and yet I never heard that scholars complain their birthright was taken from them. The stannaries have them, and you have lately affirmed the jurisdiction; and yet you have taken away no man's birthright. The court at York, whosoever looks into it, was erected at the petition of the people, and yet the people did not mean to cast away their birthright. The court of wards is mixed with discretion and equity; and yet I never heard that infants and innocents were deprived of their birthright. London, which is the seat of the kingdom, hath a court of equity, and holdeth it for a grace and favour; how then cometh this case to be singular? And therefore these be new phrases and conceits proceeding of error or worse; and it makes me think that a few do make their own desires the desires of the country, and that this court is desired by the greater number, though not by the greater stomachs.

In answer to the third reason, if men be conversant in the statutes of this kingdom, it will appear to be no new thing to carry great matters in general words without other particular expressing. Consider but of the statute of 26 H. VIII. which hath carried estates tails under the general words of estates of inheritance. Consider of the statute of 16 R. II. of *præmunire*, and see what great matters are thought to be carried under the word *alibi*. And therefore it is an ignorant assertion to say that the statute would have named the shires, if it had meant them.

Secondly, the statute had more reason to pass it over in general words, because it did not ordain a new matter, but referreth to usage: and though the statute speaks generally, yet usage speaks plainly and particularly, which is the strongest kind of utterance or expressing. "Quid verba audiam, cum facta videam?"

And thirdly, this argument of theirs may be strongly retorted against them: for as they infer that the shires were not meant, because they were not included by name; so we infer that they are meant, because they are not excepted by name, as is usual by way of proviso in like cases: and our inference hath far greater reason then theirs, because at the time of the making of the statute they were known to be under the jurisdiction: and therefore that ought to be most plainly expressed, which should work a change, and not that which should continue things as they were.

In answer to their fourth reason, it makes likewise plainly against them; for there be three places where the shires be named, the one for the extinguishing of the custom of gavelkind; the second for the abolishing of certain forms of assurance which were too light to carry inheritance and freehold: the third for the restraining of certain franchises to that state they were in by a former statute. In these three places the words of the statute are, The lord-

ships' marchers annexed unto the counties of Hereford, Salop, &c.

Now mark, if the statute conceived the word *marches* to signify lordships' marchers, what needeth this long circumlocution? It had been easier to have said, within the *marches*. But because it was conceived that the word *marches* would have comprehended the whole counties, and the statute meant but of the lordships' marchers annexed; therefore they were enforced to use that periphrasis or length of speech.

In answer to the fifth reason, I give two several answers: the one, that the clause of attendance is supplied by the word *incidents;* for the clause of establishment of the court hath that word, "with all incidents to the same as heretofore hath been used:" for execution is ever incident to justice or jurisdiction. The other, because it is a court, that standeth not by the act of parliament alone, but by the king's instructions, whereto the act refers. Now no man will doubt but the king may supply the clause of attendance; for if the king grant forth a commission of oyer and terminer, he may command what sheriff he will to attend it; and therefore there is a plain diversity between this case and the cases they vouch of the court of wards, survey and augmentations: for they were courts erected *de novo* by parliament, and had no manner of reference either to usage or instructions; and therefore it was necessary that the whole frame of those courts, and their authority both for judicature and execution, should be described and expressed by parliament. So was it of the authority of the justices of Wales in the statute of 34 mentioned, because there are many ordinances *de novo* concerning them; so that it was a new erection, and not a confirmation of them.

Thus have I, in confutation of their reasons, greatly, as I conceive, confirmed our own, as it were with new matter; for most of that they have said made for us. But as I am willing to clear your judgments, in taking away the objections; so I must farther pray in aid of your memory for those things which we have said, whereunto they have offered no manner of answer; for unto all our proofs which we made touching the intent of the statute, which they grant to be the spirit and life of the question, they said nothing: as not a word to this; That otherwise the word *marches* in the statute should be idle or superfluous: not a word to this; That the statute doth always omit the word *marches* in things that concern only Wales: not a word to this; That the statute did not mean to innovate, but to ratify, and therefore if the shires were in before, they are in still: not a word to the reason of the commixed government, as that it was necessary for the reclaiming of Wales to have them conjoined with the shires; that it was necessary for commerce and contracts, and properly for the ease of the subjects of Wales against the inhabitants of the shires; that it was not probable that the parliament meant the prince should have no jurisdiction civil in that place, where he kept his house. To all these things, which we esteem the weightiest, there is *altum silentium*, after the manner of children that skip over where they cannot spell.

Now to pass from the intent to the word; first, I will examine the proofs they have brought that the word was used in their sense after the statute 27 and 34; then I will consider what is gained, if they should prove so much: and lastly, I will briefly state our own proofs, touching the use of the word.

For the first, it hath been said, that whereas I called the use of the word *marches* after the statute of 27, but a little chime at most of an old word, which soon after vanished, they will now ring us a peal of statutes to prove it; but if it be a peal, I am sure it is a peal of bells, and not a peal of shot; for it clatters, but it doth not strike: for of all the catalogue of statutes I find scarcely one, save those that were answered in my former argument; but we may with as good reason affirm in every of them the word *marches* to be meant of the counties' marches, as they can of the lordships' marchers: for to begin upwards:

The statute 39 Eliz. for the repair of Wiltonbridge, no doubt doth mean the word *marches* for the counties; for the bridge itself is in Herefordshire, and the statute imposeth the charge of reparation upon Herefordshire by compulsory means, and permitteth benevolence to be taken in Wales, and the marches; who doubts, but this meant of the other three shires, which have far greater use of the bridge than the remote counties of Wales?

For the statute 5 Eliz. concerning perjury, it hath a proviso, that it shall not be prejudicial to the council of the marches for punishing of perjury; who can doubt but that here *marches* is meant of the shires, considering the perjuries committed in them have been punished in that court as well as in Wales?

For 2 Ed. VI. and the clause therein for restraining tithes of marriage-portions in Wales and the marches, why should it not be meant of counties? For if any such customs had crept and encroached into the body of the shires out of the lordships' marchers, no doubt the statute meant to restrain them as well there as in the other places.

And so for the statute 32 H. VIII. which ordains that the benefit of that statute for distress to be had by executors, should not extend to any lordship in Wales, or the marches of the same where *mises* are paid, because that imports a general release; what absurdity is there, if there the marches be meant for the whole shires? for if any such custom had spread so far, the reason of the statute is alike.

As for the statutes of 37 H. VIII. and 4 Ed. IV. for the making and appointing of the *custos rotulorum*, there the word *marches* must needs be taken for limits, according to the etymology and derivation: for the words refer not to Wales, but are thus, "within England and Wales, and other the king's dominions, marches and territories," that is, *limits and territories;* so as I see no reason, but I may truly maintain my former assertion, that after the lordships' marchers were extinct by the statute of 27, the name also of marches was discontinued, and rarely if ever used in that sense.

But if it should be granted that it was now and then used in that sense, it helps them little; for

first it is clear that the legal use of it is gone, when the thing was extinct, for "nomen est rei nomen;" so it remains but *abusivè*, as if one should call *Guletta, Carthage*, because it was once *Carthage:* and next, if the word should have both senses, and that we admit an equivocation, yet we so overweigh them upon the intent, as the balance is soon cast.

Yet one thing I will note more, and that is, that there is a certain confusion of tongues on the other side, and that they cannot well tell themselves what they would have to be meant by the word *marches;* for one while they say it is meant for the lordships' marchers *generally*, another while they say that it is meant for the inward marches on *Wales side only;* and now at last they are driven to a poor shift, that there should be left some *little lordship marcher* in the dark, as *casus omissus*, not annexed at all to any county; but if they would have the statute satisfied upon that only, I say no more to them, but "aquila non capit muscas."

Now I will briefly remember unto you the state of our proofs of the word.

First, according to the laws of speech we prove it by the etymology or derivation, because *march* is the Saxon word for limit, and *marchio* is *comes limitaneus;* this is the opinion of Camden and others.

Next we prove the use of the word in the like case to be for counties, by the example of the marches of Scotland: for as it is prettily said in Walker's case by Gawdy, if a case have no cousin, it is a sign it is a bastard, and not legitimate; therefore we have showed you a cousin, or rather a brother, here within our own island, of the like use of the word. And whereas a great matter was made that the now middle shires were never called the marches of Scotland, but the marches of England against Scotland, or upon Scotland; it was first answered that that made no difference; because some times the *marches* take their name of the inward country, and sometimes of the out-country; so that it is but *inclusivè* and *exclusivè:* as for example, that which we call in vulgar speech this day *fortnight*, excluding the day, that the law calls *quindena*, including the day; and so likewise, who will make a difference between the banks of the sea, and the banks against the sea, or upon the sea? But now to remove all scruple, we show them Littleton in his chapter "Of grand serjeanty," where he saith, there is a tenure by cornage in the *marches* of Scotland: and we show them likewise the statute, of 25 Ed. III. "Of labourers," where they are also called the "marches of Scotland."

Then we show some number of bills exhibited to the council there before the statute, where the plaintiffs have the addition of place confessed within the bodies of the shires, and no lordships' marchers, and yet are laid to be in the *marches*.

Then we show divers accounts of auditors in the duchy from H. IV. downwards, where the indorsement is "in marchiis Walliæ," and the contents are possessions only of Hereford and Glocestershire, (for in Shropshire and Worcestershire the duchy hath no lands;) and whereas they would put it off with a "cuique in sua arte credendum," they would believe them, if it were in matter of accounts: we do not allege them as auditors, but as those that speak English to prove the common use of the word, "loquendum ut vulgus."

We show likewise an ancient record of a patent to Herbert in 15 E. IV. where Kilpeck is laid to be in "com. Hereford in marchiis Walliæ;" and lastly, we show again the statute of 27 E. III. where provision is made, that men shall labour in the summer where they dwell in the winter; and there is an exception of the people of the counties of Stafford and Lancashire, &c. and of the marches of Wales and Scotland; where it is most plain, that the marches of Wales are meant for counties, because they are coupled both with Stafford and Lancashire, which are counties, and with the marches of Scotland, which are likewise counties; and as it is informed, the labourers of those four shires do come forth of their shires, and are known by the name of Cokers to this day.

To this we add two things, which are worthy consideration; the one, that there is no reason to put us to the proof of the use of this word *marches* sixty years ago, considering that usage speaks for us; the other, that there ought not to be required of us to show so frequent an use of the word *marches* of ancient time in our sense, as they showed in theirs, because there was not the like occasion: for when a lordship marcher was mentioned it was of necessity to lay it in the *marches*, because they were out of all counties; but when land is mentioned in any of these counties, it is superfluous to add, in the marches; so as there was no occasion to use the word *marches*, but either for a more brief and compendious speech to avoid the naming of the four shires, as it is in the statute of 25 E. III. and in the indorsement of accounts; or to give a court cognisance and jurisdiction, as in the bills of complaint; or *ex abundanti*, as in the record of Kilpeck.

There resteth the third main part, whereby they endeavour to weaken and extenuate the proofs which we offer touching practice and possession, wherein they allege five things.

First, that Bristol was in until 7 Eliz. and then exempted.

Secondly, that Cheshire was in until 11 Eliz. and then went out.

Thirdly, they allege certain words in the instructions to Cholmley vice-president in 11 Eliz. at which time the shires were first comprehended in the instructions by name, and in these words, "annexed by our commission:" whereupon they would infer that they were not brought in the statute, but only came in by instructions, and do imagine that when Cheshire went out they came in.

Fourthly, they say, that the intermeddling with those four shires before the statute was but an usurpation and toleration, rather than any lawful and settled jurisdiction; and it was compared to that, which is done by the judges in their circuits, who end many causes upon petitions.

Fifthly, they allege Sir John Mullen's case, where it is said, "consuetudo non præjudicat veritati."

There was moved also, though it were not by

the council, but from the judges themselves, as an extenuation, or at least an obscuring of the proofs of the usage and practice, in that we show forth no instructions from 17 H. VIII. to 1 Mariæ.

To these six points I will give answer, and, as I conceive, with satisfaction.

For Bristol, I say it teacheth them the right way, if they can follow it; for Bristol was not exempt by any opinion of law, but was left out of the instructions upon supplication made to the queen.

For Cheshire, we have answered it before, that the reason was, because it was not probable that the statute meant to make that shire subject to the jurisdiction of that council, considering it was not subject to the high courts at Westminster, in regard it was a county Palatine. And whereas they said, that so was Flintshire too, it matcheth not, because Flintshire is named in the statute for one of the twelve shires of Wales.

We showed you likewise effectual differences between Cheshire and these other shires: for that Cheshire hath a chancery in itself, and over Cheshire the princes claim jurisdiction, as earl of Chester; to all which you reply nothing.

Therefore I will add this only, that Cheshire went out *secundo flumine*, with the good-will of the state; and this is sought to be evicted *adverso flumine*, cross the state; and as they have opinion of four judges for the excluding of Cheshire, so we have the opinions of two great learned men, Gerrard and Bromley, for the including of Worcester; whose opinions, considering it was but matter of opinion, and came not judicially in question, are not inferior to any two of the other; but we say that there is no opposition or repugnancy between them, but both may stand.

For Cholmley's instructions, the words may well stand, "that those shires are annexed by commission;" for the king's commission or instructions, for those words are commonly confounded, must cooperate with the statute, or else they cannot be annexed. But for that conceit that they should come in but in 11, when Cheshire went out, no man that is in his wits can be of that opinion, if he mark it: for we see that the town of Glocester, &c. is named in the instructions of 1 Mar. and no man, I am sure, will think that Glocester town should be in, and Glocestershire out.

For the conceit, that they had but *jurisdictionem precariam*, the precedents show plainly the contrary; for they had coercion, and they did fine and imprison, which the judges do not upon petitions; and besides, they must remember that many of our precedents, which we did show forth, were not of suits originally commenced there, but of suits remanded from hence out of the king's courts as to their proper jurisdiction.

For Sir John Mullen's case, the rule is plain and sound, that where the law appears contrary, usage cannot control law; which doth not at all infringe the rule of "optima legum interpres consuetudo;" for usage may expound law, though it cannot overrule law.

But of the other side I could show you many cases, where statutes have been expounded directly against their express letter to uphold precedents and usage, as 2 and 3 Phil. et Mar. upon the statute of Westminster, that ordained that the judges *coram quibus formatum erit appellum* shall inquire of the damages, and yet the law ruled that it shall be inquired before the judges of Nisi prius. And the great reverence given to precedents appeareth in 39 H. VI. 3 E. IV. and a number of other books; and the difference is exceedingly well taken in Slade's case, Coke's Reports, 4, that is, where the usage runs but amongst clerks, and where it is in the eye and notice of the judge: for there it shall be presumed, saith the book, that if the law were otherwise than the usage hath gone, that either the council or the parties would have excepted to it, or the judges *ex officio* would have discerned of it, and found it; and we have ready for you a calendar of judges more than sit at this table, that have exercised jurisdiction over the shires in that county.

As for exception, touching the want of certain instructions, I could wish we had them; but the want of them, in my understanding, obscureth the case little. For let me observe unto you, that we have three forms of instructions concerning these shires extant; the first names them not expressly, but by reference it doth, namely, that they shall hear and determine, &c. within any the *places* or *counties* within any of their commissions; and we have one of the commissions, wherein they were named; so as upon the matter they are named. And of this form are the ancient instructions before the statute 17 H. VIII. when the princess Mary went down.

The second form of instructions go farther, for they have the towns, and exempted places within the counties named, with *tanquam* as well within the city of Glocester, the liberties of the duchy of Lancaster, &c. as within any of the counties of any of their commissions; which clearly admits the counties to be in before. And of this form are the instructions 1 Mariæ, and so long until 11 Eliz.

And the third form, which hath been continued ever since, hath the shires comprehended by name. Now it is not to be thought, but the instructions which are wanting, are according to one of these three forms which are extant. Take even your choice, for any of them will serve to prove that the practice there was ever authorised by the instructions here. And so upon the whole matter, I pray report to be made to his Majesty, that the president and the council hath jurisdiction, according to his instructions, over the four shires, by the true construction of the statute of 34 H. VIII.

A DRAUGHT OF AN ACT

AGAINST

AN USURIOUS SHIFT OF GAIN, IN DELIVERING COMMODITIES INSTEAD OF MONEY.

WHEREAS it is an usual practice, to the undoing and overthrowing many young gentlemen and others, that when men are in necessity, and desire to borrow money, they are answered, that money cannot be had, but that they may have commodities sold unto them upon credit, whereof they may make money as they can: in which course it ever comes to pass, not only that such commodities are bought at extreme high rates, and sold again far under foot to a double loss; but also that the party which is to-borrow is wrapt in bonds and counter-bonds; so that upon a little money which he receiveth, he is subject to penalties and suits of great value.

Be it therefore enacted, by the authority of this present parliament, that if any man, after forty days from the end of this present session of parliament to be accounted, shall sell in gross sale any quantity of wares or commodities unto such a one as is no retailer, chapman, or known broker of the same commodities, and knowing that it is bought to be sold again, to help and furnish any person, that trades not in the same commodity, with money, he shall be without all remedy by law, or custom, or decree, or otherwise, to recover or demand any satisfaction for the said wares or commodities, what assurance soever he shall have by bond, surety, pawn, or promise of the party, or any other in his behalf. And that all bonds and assurances whatsoever, made for that purpose, directly or indirectly, shall be utterly void.

And be it further enacted, by the authority aforesaid, that every person, which shall after the time aforesaid be used or employed as a broker, mean, or procurer, for the taking up of such commodities, shall forfeit for every such offence the sum of one hundred pounds, the same to be, &c. and shall be farther punished by six months imprisonment, without bail or mainprise, and by the pillory.

A PREPARATION

TOWARD

THE UNION OF THE LAWS

OF ENGLAND AND SCOTLAND.

YOUR Majesty's desire of proceeding towards the union of this whole island of Great Britain under one law, is, as far as I am capable to make any opinion of so great a cause, very agreeable to policy and justice. To policy, because it is one of the best assurances, as human events can be assured, that there will be never any relapse in any future ages to a separation. To justice, because "dulcis tractus pari jugo:" it is reasonable that communication of privilege draw on communication of discipline and rule. This work being of greatness and difficulty, needeth not to embrace any greater compass of designment, than is necessary to your Majesty's main end and intention. I consider therefore that it is a true and received division of law into *jus publicum* and *privatum*, the one being the sinews of property, and the other of government; for that which concerneth private interest of *meum* and *tuum*, in my simple opinion, it is not at this time to be meddled with; men love to hold their own as they have held, and the difference of this law carrieth no mark of separation; for we see in any one kingdom, which is most at unity in itself, there is diversity of customs for the guiding of property and private rights; "in veste varietas sit, scissura non sit." All the labour is to be spent in the other part; though perhaps not in all the other part; for, it may be, your Majesty in your high wisdom, will discern that even in that part there will not be requisite a conformity in all points. And although such conformity were to be wished, yet

perchance it will be scarcely possible in many points to pass them for the present by assent of parliament. But because we that serve your Majesty in the service of our skill and profession, cannot judge what your Majesty, upon reason of state, will leave and take; therefore it is fit for us to give, as near as we can, a general information: wherein I, for my part, think good to hold myself to one of the parallels, I mean that of the English laws. For although I have read, and read with delight, the Scottish statutes, and some other collection of their laws; with delight, I say, partly to see their brevity and propriety of speech, and partly to see them come so near to our laws; yet I am unwilling to put my sickle in another's harvest, but to leave it to the lawyers of the Scottish nation; the rather, because I imagine with myself that if a Scottish lawyer should undertake, by reading of the English statutes, or other our books of law, to set down positively in articles what the law of England were, he might oftentimes err: and the like errors, I make account, I might incur in theirs. And therefore, as I take it, the right way is, that the lawyers of either nation do set down in brief articles what the law is of their nation, and then after, a book of two columns, either having the two laws placed respectively, to be offered to your Majesty, that your Majesty may by a ready view see the diversities, and so judge of the reduction, or leave it as it is.

Jus publicum I will divide, as I hold it fittest for the present purpose, into four parts. The first concerning criminal causes, which with us are truly accounted *publici juris*, because both the prejudice and the prosecution principally pertain to the crown and public estate. The second, concerning the causes of the church. The third, concerning magistrates, offices, and courts: wherein falleth the consideration of your Majesty's regal prerogative, whereof the rest are but streams. And the fourth, concerning certain special politic laws, usages, and constitutions, that do import the public peace, strength, and wealth of the kingdom. In which part I do comprehend not only constant ordinances of law, but likewise forms of administration of law, such as are the commissions of the peace, the visitations of the provinces by the judges of the circuits, and the like. For these in my opinion, for the purpose now in hand, deserve a special observation, because they being matters of that temporary nature, as they may be altered, as I suppose, in either kingdom, without parliament, as to your Majesty's wisdom may seem best; it may be, the most profitable and ready part of this labour will consist in the introducing of some uniformity in them.

To begin therefore with capital crimes, and first that of treason.

CASES OF TREASON.

Where a man doth compass or imagine the death of the king, if it appear by any overt act, it is treason.

Where a man doth compass or imagine the death of the king's wife, if it appear by any overt act, it is treason.

Where a man doth compass or imagine the death of the king's eldest son and heir, if it appear by any overt act, it is treason.

Where a man doth violate the king's wife, it is treason.

Where a man doth violate the king's eldest daughter unmarried, it is treason.

Where a man doth violate the wife of the king's eldest son and heir, it is treason.

Where a man doth levy war against the king and his realm, it is treason.

Where a man is adherent to the king's enemies, giving them aid and comfort, it is treason.

Where a man counterfeiteth the king's great seal, it is treason.

Where a man counterfeiteth the king's privy seal, it is treason.

Where a man counterfeiteth the king's privy signet, it is treason.

Where a man doth counterfeit the king's sign manual, it is treason.

Where a man counterfeits the king's money, it is treason.

Where a man bringeth into the realm false money, counterfeited to the likeness of the coin of England, with intent to merchandise or make payment therewith, and knowing it to be false, it is treason.

Where a man counterfeiteth any foreign coin current in payment within this realm, it is treason.

Where a man doth bring in foreign money, being current within the realm, the same being false and counterfeit, with intent to utter it, and knowing the same to be false, it is treason.

Where a man doth clip, wash, round, or file any of the king's money, or any foreign coin current by proclamation, for gain's sake, it is treason.

Where a man doth any ways impair, diminish, falsify, scale, or lighten the king's money, or any foreign moneys current by proclamation, it is treason.

Where a man killeth the chancellor, being in his place and doing his office, it is treason.

Where a man killeth the treasurer, being in his place and doing his office, it is treason.

Where a man killeth the king's justice in eyre, being in his place and doing his office, it is treason.

Where a man killeth the king's justice of assise, being in his place and doing his office, it is treason.

Where a man killeth the king's justice of oyer and terminer, being in his place and doing his office, it is treason.

Where a man doth persuade or withdraw any of the king's subjects from his obedience, or from the religion by his Majesty established, with intent to withdraw him from the king's obedience, it is treason.

Where a man is absolved, reconciled, or withdrawn from his obedience to the king, or promiseth his obedience to any foreign power, it is treason.

Where any Jesuit, or other priest ordained since the first year of the reign of queen Elizabeth, shall come into, or remain in any part of this realm, it is treason.

Where any person being brought up in a college of Jesuits, or seminary, shall not return within six months after proclamation made, and within two

days after his return submit himself to take the oath of supremacy, if otherwise he do return, or be within the realm, it is treason.

Where a man doth affirm or maintain any authority of jurisdiction spiritual, or doth put in use or execute any thing for the advancement or setting forth thereof, such offence, the third time committed, is treason.

Where a man refuseth to take the oath of supremacy, being tendered by the bishop of the diocess, if he be an ecclesiastical person; or by commission out of the chancery, if he be a temporal person; such offence, the second time, is treason.

Where a man committed for treason doth voluntarily break prison, it is treason.

Where a jailor doth voluntarily permit a man committed for treason to escape, it is treason.

Where a man procureth or consenteth to a treason, it is treason.

Where a man relieveth or comforteth a traitor, knowing it, it is treason.

The punishment, trial, and proceedings in cases of treason.

In treason, the corporal punishment is by drawing on a hurdle from the place of the prison to the place of execution, and by hanging and being cut down alive, bowelling, and quartering: and in women by burning.

In treason, there ensueth a corruption of blood in the line ascending and descending.

In treason, lands and goods are forfeited, and inheritances, as well entailed as fee-simple, and the profits of estates for life.

In treason, the escheats go to the king, and not to the lord of the fee.

In treason, the lands forfeited shall be in the king's actual possession without office.

In treason, there be no accessaries, but all are principals.

In treason, no benefit of clergy, or sanctuary, or peremptory challenge.

In treason, if the party stand mute, yet nevertheless judgment and attainder shall proceed all one as upon verdict.

In treason, bail is not permitted.

In treason, no counsel is to be allowed to the party.

In treason, no witness shall be received upon oath for the party's justification.

In treason, if the fact be committed beyond the seas, yet it may be tried in any county where the king will award his commission.

In treason, if the party be *non sanæ memoriæ*, yet if he had formerly confessed it before the king's council, and that it be certified that he was of good memory at the time of his examination and confession, the court may proceed to judgment without calling or arraigning the party.

In treason, the death of the party before conviction dischargeth all proceedings and forfeitures.

In treason, if the party be once acquitted, he shall not be brought in question again for the same fact.

In treason, no new case not expressed in the statute of 25 Ed. III. nor made treason by any special statute since, ought to be judged treason, without consulting with the parliament.

In treason, there can be no prosecution but at the king's suit, and the king's pardon dischargeth.

In treason, the king cannot grant over to any subject power and authority to pardon it.

In treason, a trial of a peer of the kingdom is to be by special commission before the lord high steward, and those that pass upon him to be none but peers; and the proceeding is with great solemnity, the lord steward sitting under a cloth of estate with a white rod of justice in his hand: and the peers may confer together, but are not any ways shut up: and are demanded by the lord steward their voices one by one, and the plurality of voices carrieth it. In treason, it hath been an ancient use and favour from the kings of this realm to pardon the execution of hanging, drawing, and quartering; and to make warrant for their beheading.

The proceeding in case of treason with a common subject is in the king's bench, or by commission of oyer and terminer.

MISPRISION OF TREASON.

Cases of misprision of treason.

Where a man concealeth high treason only, without any comforting or abetting, it is misprision of treason.

Where a man counterfeiteth any foreign coin of gold or silver not current in the realm, it is misprision of treason.

The punishment, trial, and proceeding in cases of misprision of treason.

The punishment of misprision of treason is by perpetual imprisonment, loss of the issues of their lands during life, and loss of goods and chattels.

The proceeding and trial is, as in cases of treason.

In misprision of treason bail is not admitted.

PETIT TREASON.

Cases of petit treason.

Where the servant killeth the master, it is petit treason.

Where the wife killeth her husband, it is petit treason.

Where a spiritual man killeth his prelate, to whom he is subordinate, and oweth faith and obedience, it is petit treason.

Where the son killeth the father or mother, it hath been questioned whether it be petit treason, and the late experience and opinion seemeth to weigh to the contrary, though against law and reason in my judgment.

The punishment, trial, and proceeding in cases of petit treason.

In petit treason, the corporal punishment is by drawing on a hurdle, and hanging, and in a woman burning.

In petit treason, the forfeiture is the same with the case of felony.

In petit treason, all accessaries are but in case of felony.

FELONY.

Cases of felony.

Where a man committeth murder, that is, homicide of prepensed malice, it is felony.

Where a man committeth manslaughter, that is, homicide of a sudden heat, and not of malice prepensed, it is felony.

Where a man committeth burglary, that is, breaking of a house with an intent to commit felony, it is felony.

Where a man rideth armed, with a felonious intent, it is felony.

Where a man doth maliciously and feloniously burn a house, it is felony.

Where a man doth maliciously and feloniously burn corn upon the ground, or in stacks, it is felony.

Where a man doth maliciously cut out another's tongue, or put out his eyes, it is felony.

Where a man robbeth or stealeth, that is, taketh away another man's goods, above the value of twelve-pence, out of his possession, with an intent to conceal it, it is felony.

Where a man embezzleth or withdraweth any of the king's records at Westminster, whereby any judgment is reversed, it is felony.

Where a man that hath custody of the king's armour, munition, or other habiliments of war, doth maliciously convey away the same, to the value of twenty shillings, it is felony.

Where a servant hath goods of his master's delivered unto him and goeth away with them, it is felony.

Where a man conjures, or invocates wicked spirits, it is felony.

Where a man doth use or practise any manner of witchcraft, whereby any person shall be killed, wasted, or lamed in his body, it is felony.

Where a man practiseth any witchcraft, to discover treasure hid, or to discover stolen goods, or to provoke unlawful love, or to impair or hurt any man's cattle or goods, the second time, having been once before convicted of like offence, it is felony.

Where a man useth the craft of multiplication of gold or silver, it is felony.

Where a man committeth rape, it is felony.

Where a man taketh away a woman against her will, not claiming her as his ward or bondwoman, it is felony.

Where any person marrieth again, her or his former husband or wife being alive, it is felony.

Where a man committeth buggery with a man or beast, it is felony.

Where any persons, above the number of twelve, shall assemble themselves with intent to put down enclosures, or bring down prices of victuals, &c. and do not depart after proclamation, it is felony.

Where a man shall use any words to encourage or draw any people together, *ut supra*, and they do assemble accordingly, and do not depart after proclamation, it is felony.

Where a man being the king's sworn servant, conspireth to murder any lord of the realm or any of the privy council, it is felony.

Where a soldier hath taken any parcel of the king's wages, and departed without licence, it is felony.

Where a man receiveth a seminary priest, knowing him to be such a priest, it is felony.

Where a recusant, which is a seducer, and persuader, and inciter of the king's subjects against the king's authority in ecclesiastical causes, or a persuader of conventicles, &c. shall refuse to abjure the realm, it is felony.

Where vagabonds be found in the realm, calling themselves Egyptians, it is felony.

Where a purveyor taketh without warrant, or otherwise doth offend against certain special laws, it is felony.

Where a man hunteth in any forest, park, or warren, by night or by day, with vizards or other disguisements, and is examined thereof and concealeth his fact, it is felony.

Where a man stealeth certain kinds of hawks, it is felony.

Where a man committeth forgery the second time, having been once before convicted, it is felony.

Where a man transporteth rams or other sheep out of the king's dominions, the second time, it is felony.

Where a man being imprisoned for felony, breaks prison, it is felony.

Where a man procureth or consenteth to a felony to be committed, it is felony, as to make him accessary before the fact.

Where a man receiveth or relieveth a felon, knowing thereof, it is felony, as to make him accessary after the fact.

Where a woman, by the constraint of her husband, in his presence joineth with him in committing of felony, it is not felony, neither as principal, nor as accessary.

The punishment, trial, and proceeding in cases of felony.

In felony, the corporal punishment is by hanging, and it is doubtful whether the king may turn it into beheading in the case of a peer or other person of dignity, because in treason the striking off the head is part of the judgment, and so the king pardoneth the rest: but in felony it is no part of the judgment, and the king cannot alter the execution of law; yet precedents have been both ways.

In felony, there followeth corruption of blood, except it be in cases made felony by special statutes, with a proviso that there shall be no corruption of blood.

In felony, lands in fee-simple and goods are forfeited, but not lands entailed, and the profits of estates for life are likewise forfeited: And by some customs lands in fee-simple are not forfeited;

"The father to the bough, son to the plough;"

as in gavelkind in Kent, and other places.

In felony, the escheats go to the lord of the fee, and not to the king, except he be lord: but the profits of estate for lives, or in tail during the life of tenant in tail, go to the king; and the king hath likewise, in fee-simple lands holden of common lords, *annum, diem, et vastum.*

In felony, the lands are not in the king before office, nor in the lord before entry or recovery in writ of escheat, or death of the party attainted.

In felony, there can be no proceeding with the accessary before there be a proceeding with the principal; which principal if he die, or plead his pardon, or have his clergy before the attainder, the accessaries can never be dealt with.

In felony, if the party stand mute, and will not put himself upon his trial, or challenge peremptorily above the number that the law allows, he shall have judgment not of hanging, but of penance of pressing to death; but then he saves his lands, and forfeits only his goods.

In felony, at the common law, the benefit of clergy or sanctuary was allowed; but now by statutes it is taken away in most cases.

In felony, bail may be admitted where the fact is not notorious, and the person not of evil fame.

In felony, no counsel is to be allowed to the party, no more than in treason.

In felony, no witness shall be received upon oath for the party's justification, no more than in treason.

In felony, if the fact be committed beyond the seas, or upon the seas, "super altum mare," there is no trial at all in the one case, nor by course of jury in the other case, but by jurisdiction of the admiralty.

In felony, if the party be "non sanæ memoriæ," although it be after the fact, he cannot be tried or adjudged, except it be in course of outlawry, and that is also erroneous.

In felony, the death of the party before conviction dischargeth all proceedings and forfeitures.

In felony, if the party be once acquitted, or in peril of judgment of life lawfully, he shall never be brought in question again for the same fact.

In felony, the prosecution may be either at the king's suit, by way of indictment, or at the party's suit, by way of appeal; and if it be by way of appeal, the defendant shall have his counsel, and produce witnesses upon oath, as in civil causes.

In felony, the king may grant "hault justice" to a subject, with the regality of power to pardon it.

In felony, the trial of peers is all one as in case of treason.

In felony, the proceedings are in the king's bench, or before commissioners of oyer and terminer, or of gaol delivery, and in some cases before justices of peace.

Cases of felonia de se, *with the punishment, trial, and proceeding therein.*

In the civil law, and other laws, they make a difference of cases of *felonia de se:* for where a man is called in question upon any capital crime, and killeth himself to prevent the law, they give the same judgment in all points of forfeiture, as if they had been attainted in their life-time: And on the other side, where a man killeth himself upon impatience of sickness or the like, they do not punish it at all: but the law of England taketh it all in one degree, and punisheth it only with loss of goods to be forfeited to the king, who generally granteth them to his almoner, where they be not formerly granted unto special liberties.

OFFENCES OF PRÆMUNIRE.

Cases of præmunire.

Where a man purchaseth or accepteth any provision, that is, collation of any spiritual benefice or living, from the see of Rome, it is case of præmunire.

Where a man shall purchase any process to draw any people of the king's allegiance out of the realm, in plea, whereof the cognisance pertains to the king's court, and cometh not in person to answer his contempt in that behalf before the king and his council, or in his chancery, it is case of præmunire.

Where a man doth sue in any court which is not the king's court, to defeat or impeach any judgment given in the king's court, and doth not appear to answer his contempt, it is case of præmunire.

Where a man doth purchase or pursue in the court of Rome, or elsewhere, any process, sentence of excommunication, bull, instrument, or other thing which touches the king in his regality, or his realm in prejudice, it is a case of præmunire.

Where a man doth affirm or maintain any foreign authority of jurisdiction spiritual, or doth put in use or execute any thing for the advancement or setting forth thereof; such offence, the second time committed, is case of præmunire.

Where a man refuseth to take the oath of supremacy, being tendered by the bishop of the diocess, if he be an ecclesiastical person; or by commission out of the chancery, if he be a temporal person, it is case of præmunire.

Where the dean and chapter of any church upon the *Congé d'elire* of an archbishop or bishop, doth refuse to elect any such archbishop or bishop as is nominated unto them in the king's letters missive, it is case of præmunire.

Where a man doth contribute or give relief unto any Jesuit or seminary priests, or to any college of Jesuits or seminary priests, or to any person brought up therein, and called home, and not returning, it is case of præmunire.

Where a man is broker of an usurious contract above ten in the hundred, it is case of præmunire.

The punishment, trial, and proceedings in case of præmunire.

The punishment is by imprisonment during life, forfeiture of goods, forfeiture of lands in fee-simple, and forfeiture of the profits of lands entailed, or for life.

The trial and proceeding is as in cases of misprision of treason; and the trial is by peers, where a peer of the realm is the offender.

OFFENCES OF ABJURATION AND EXILE.

Cases of abjuration and exile, and the proceedings therein.

Where a man committeth any felony, for the which at this day he may have privilege of sanctuary, and taketh sanctuary, and confesseth the felony before the coroner, he shall abjure the liberty of the realm, and choose his sanctuary; and if he commit any new offence, or leave his sanctuary, he shall lose the privilege thereof, and suffer as if he had not taken sanctuary.

Where a man not coming to the church, and, being a popish recusant, doth persuade any of the king's subjects to impugn his Majesty's authority in causes ecclesiastical, or shall persuade any subject from coming to church, or receiving the communion, or persuade any subject to come to any unlawful conventicles, or shall be present at any such unlawful conventicles, and shall not after conform himself within a time, and make his submission, he shall abjure the realm, and forfeit his goods and lands during life; and if he depart not within the time prefixed, or return, he shall be in the degree of a felon.

Where a man being a popish recusant, and not having lands to the value of twenty marks *per annum*, nor goods to the value of 40*l.* shall not repair to his dwelling or place where he was born, and there confine himself within the compass of five miles, he shall abjure the realm; and if he return, he shall be in the degree of a felon.

Where a man kills the king's deer in chases or forests, and can find no sureties after a year's imprisonment, he shall abjure the realm.

Where a man is a trespasser in parks, or in ponds of fish, and after three years' imprisonment cannot find sureties, he shall abjure the realm.

Where a man is a ravisher of any child within age, whose marriage belongs to any person, and marrieth the said child after years of consent, and is not able to satisfy for the marriage, he shall abjure the realm.

OFFENCE OF HERESY.

Cases of heresy, and the trial and proceeding therein.

The declaration of heresy, and likewise the proceeding and judgment upon heretics, is by the common laws of this realm referred to the jurisdiction ecclesiastical, and the secular arm is reached unto them by the common laws, and not by any statute for the execution of them by the king's writ "de hæretico comburendo."

CASES OF THE KING'S PREROGATIVE.

The king's prerogative in parliament.

1. The king hath an absolute negative voice to all bills that pass the parliament, so as without his royal assent they have a mere nullity, and not so much as *authoritas præscripta*, or *senatus consulta* had, notwithstanding the intercession of tribunes.

2. The king may summon parliaments, dissolve them, adjourn and prorogue them at his pleasure.

3. The king may add voices in parliament at his pleasure, for he may give privileges to borough towns, and call and create barons at his pleasure.

4. No man can sit in parliament unless he take the oath of allegiance.

The king's prerogative in matters of war and peace.

1. The king hath power to declare and proclaim war, and make and conclude peace.

2. The king hath power to make leagues and confederacies with foreign estates, more or less strait, and to revoke and disannul them at his pleasure.

3. The king hath power to command the bodies of his subjects for the service of his wars, and to muster, train, and levy men, and to transport them by sea or land at his pleasure.

4. The king hath power in time of war to execute martial law, and to appoint all officers of war at his pleasure.

5. The king hath power to grant his letters of mart and reprisal for remedy to his subjects upon foreign wrongs.

6. The king may give knighthood, and thereby enable any subject to perform knight's service.

The king's prerogative in matter of money.

1. The king may alter his standard in baseness or fineness.

2. The king may alter his stamp in the form of it.

3. The king may at his pleasure alter the valuations, and raise and fall moneys.

4. The king may by proclamation make moneys of his own current or not.

5. The king may take or refuse the subjects' bullion, or coin for more or less money.

6. The king by proclamation may make foreign money current, or not.

The king's prerogative in matters of trade and traffick.

1. The king may constrain the person of any of his subjects not to go out of the realm.

2. The king may restrain any of his subjects to go out of the realm into any special part foreign.

3. The king may forbid the exportation of any commodities out of the realm.

4. The king may forbid the importation of any commodities into the realm.

5. The king may set a reasonable impost upon any foreign wares that come into the realm, and so of native wares that go out of the realm.

The king's prerogative in the persons of his subjects.

1. The king may create any corporation or body politic, and enable them to purchase, to grant, to sue, and be sued; and with such restrictions and limitations as he pleases.

2. The king may denizen and enable any foreigner for him and his descendants after the charter; though he cannot naturalize, nor enable him to make pedigree from ancestors paramount.

3. The king may enable any attainted person, by

his charter of pardon, and purge the blood for time to come, though he cannot restore the blood for the time past.

4. The king may enable any dead person in the law, as men professed in religion, to take and purchase to the king's benefit.

A twofold power of the law.

1. A direction: In this respect the king is underneath the law; because his acts are guided thereby.

2. Correction: In this respect the king is above the law; for it may not correct him for any offence.

A twofold power in the king.

1. His absolute power, whereby he may levy forces against any nation.

2. His limited power, which is declared and expressed in the laws what he may do.

AN EXPLANATION

WHAT MANNER OF PERSONS THOSE SHOULD BE THAT ARE TO EXECUTE THE POWER OR ORDINANCE

OF

THE KING'S PREROGATIVE.

1. That absolute prerogative, according to the king's pleasure, revealed by his laws, may be exercised and executed by any subject, to whom power may be given by the king, in any place of judgment or commission, which the king by his law hath ordained: in which the judge subordinate cannot wrong the people, the law laying down a measure by which every judge should govern and execute; against which law if any judge proceed, he is by the law questionable, and punishable for his transgression.

In this nature are all the judges and commissioners of the land, no otherwise than in their courts, in which the king in person is supposed to sit, who cannot make that trespass, felony, or treason, which the law hath not made so to be, neither can punish the guilty by other punishment than the laws have appointed.

This prerogative or power, as it is over all the subjects, so being known by the subjects, they are without excuse if they offend, and suffer no wrong if they be justly punished; and by this prerogative the king governeth all sorts of people according unto known will.

2. The absolute prerogative, which is in kings according to their private will and judgment, cannot be executed by any subject; neither is it possible to give such power by commission; or fit to subject the people to the same; for the king, in that he is the substitute of God immediately, the father of his people, and head of the commonwealth, hath by participation with God, and with his subjects, a discretion, judgment, and feeling love towards those, over whom he reigneth, only proper to himself, or to his place and person; who, seeing he cannot in any others infuse his wisdom, power, or gifts, which God, in respect of his place and charge, hath enabled him withal, can neither subordinate any other judge to govern by that knowledge, which the king can no otherwise, than by his known will, participate unto him: and if any such subordinate judge shall obtain commission according to the discretion of such judge to govern the people, that judge is bound to think that to be his soundest discretion, which the law, in which is the king's known will, showeth unto him to be that justice which he ought to administer; otherwise he might seem to esteem himself above the king's law, who will not govern by it, or to have a power derived from other than from the king, which in the kingdom will administer justice contrary unto the justice of the land: neither can such a judge or commissioner under the name of the king's authority shroud his own high action, seeing the conscience and discretion of every man is particular and private to himself, so as the discretion of the judge cannot be properly or possibly the discretion or the conscience of the king; and if not his discretion, neither the judgment that is ruled by another man's only.

Therefore it may seem they rather desire to be kings than to rule the people under the king, which will not administer justice by law, but by their own will.

3. This administration in a subject is derogative to the king's prerogative; for he administereth justice out of a private direction, being not capable of a general direction how to use the king's subjects at pleasure, in causes of particular respect; which if no other than the king himself can do, how can it be so that any man should desire that which is unfit and impossible, but that it must proceed out of some exorbitant affection? the rather, seeing such places be full of trouble and altogether unnecessary, no man will seek to thrust himself into them but for

hopes of gain. Then is not any prerogative oppugned, but maintained, though it be desired, that every subordinate magistrate may not be made supreme, whereby he may seize upon the hearts of the people, take from the king the respect due unto him only, or judge the people otherwise than the king doth himself.

4. And although the prince be not bound to render any account to the law, which in person he administereth himself, yet every subordinate judge must render an account to the king, by his laws, how he hath administered justice in his place where he is set. But if he hath power to rule by private direction, for which there is no law, how can he be questioned by a law, if in his private censure he offends?

5. Therefore, it seemeth, that in giving such authority, the king ordaineth not subordinate magistrates, but absolute kings: and what doth the king leave to himself, who giveth so much to others, as he hath himself? Neither is there a greater bond to tie the subject to his prince in particular, than when he shall have recourse unto him, in his person, or in his power, for relief of the wrongs which from private men be offered; or for reformation of the oppressions which any subordinate magistrate shall impose upon the people. There can be no offence in the judge, who hath power to execute according to his discretion, when the discretion of any judge shall be thought fit to be limited, and therefore there can be therein no reformation; whereby the king in this useth no prerogative to gain his subjects right; then the subject is bound to suffer helpless wrong; and the discontent of the people is cast upon the king; the laws being neglected, which with their equity in all other causes and judgments, saving this, interpose themselves and yield remedy.

6. And to conclude, custom cannot confirm that which is any ways unreasonable of itself.

Wisdom will not allow that, which is many ways dangerous, and no ways profitable.

Justice will not approve that government, where it cannot be but wrong must be committed.

Neither can there be any rule by which to try it, nor means of reformation of it.

7. Therefore, whosoever desireth government must seek such as he is capable of, not such as seemeth to himself most easy to execute; for it is apparent, that it is easy to him that knoweth not law nor justice, to rule as he listeth, his will never wanting a power to itself: but it is safe and blameless, both for the judge and people, and honour to the king, that judges be appointed who know the law, and that they be limited to govern according to the law.

THE OFFICE OF CONSTABLES,

ORIGINAL AND USE OF

COURTS LEET, SHERIFF'S TURN, ETC.

WITH THE ANSWERS TO THE QUESTIONS PROPOUNDED BY SIR ALEXANDER HAY, KNT. TOUCHING THE OFFICE OF CONSTABLES. A. D. 1608.

1. Question. "What is the original of constables?"

Answer. To the first question of the original of constables it may be said, "caput inter nubila condit;" for the authority was granted upon the ancient laws and customs of this kingdom practised long before the Conquest, and intended and executed for conservation of peace, and repression of all manner of disturbance and hurt of the people, and that as well by way of prevention as punishment; but yet so, as they have no judicial power, to hear and determine any cause, but only a ministerial power, as in the answer to the seventh article is demonstrated.

As for the office of high or head constable, the original of that is yet more obscure; for though the high constable's authority hath the more ample circuit, he being over the hundred, and the petty constable over the village; yet I do not find that the petty constable is subordinate to the high constable, or to be ordered or commanded by him; and therefore, I doubt, the high-constable was not *ab origine*; but that when the business of the county increased, the authority of justices of peace was enlarged by divers statutes, and then, for conveniency sake, the office of high constable grew in the use for the receiving of the commandments and prescripts from the justices of peace, and distributing them to the petty constables: and in token of this, the election of high-constable in most parts of the kingdom is by the appointment of the justices of the peace, whereas the election of the petty constable is by the people.

But there are two things unto which the office of constable hath special reference, and which of necessity, or at least a kind of congruity, must precede the jurisdiction of that office; either the things themselves, or something that hath a similitude or analogy towards them.

1. The division of the territory, or gross of the shires, into hundreds, villages, and towns; for the

high constable is officer over the hundred, and the petty constable is over the town or village.

2. The court leet, unto which the constable is attendant and minister; for there the constables are chosen by the jury, there sworn, and there that part of their office which concerneth information is principally to be performed: for the jury being to present offences and offenders, are chiefly to take light from the constable of all matters of disturbance and nuisance of the people; which they, in respect of their office, are presumed to have best and most particular knowledge of.

The jurisdiction of the court-leet is to three ends.

1. To take the ancient oath of allegiance of all males above twelve years.

2. To inquire of all offences against the peace; and for those that are against the crown and peace both, to inquire of only, and certify to the justices of gaol delivery; but those that are against the peace simply, they are to inquire of and punish.

3. To inquire of, punish, and remove all public nuisances and grievances concerning infection of air, corruption of victuals, ease of chaffer, and contract of all other things that may hurt or grieve the people in general, in their health, quiet, and welfare.

And to these three ends, as matters of policy subordinate, the court-leet hath power to call upon the pledges that are to be taken of the good behaviour of the resiants that are not tenants, and to inquire of all defaults of officers, as constables, ale-tasters, and the like: and likewise for the choice of constables, as was said.

The jurisdiction of these leets is either remaining in the king, and in that case exercised by the sheriff in his Turn, which is the grand leet, or granted over to subjects; but yet it is still the king's court.

2. Quest. Concerning the election of constables?

Answ. The election of the petty constable, as was said, is at the court-leet by the inquest that make the presentments; and election of head constables is by the justices of the peace at their quarter sessions.

3. Quest. How long is their office?

Answ. The office of constable is annual, except they be removed.

4. Quest. Of what rank or order of men are they?

Answ. They be men, as it is now used, of inferior, yea, of base condition, which is a mere abuse or degenerating from the first institution; for the petty constables in towns ought to be of the better sort of resiants in the same; save that they be not aged or sickly, but of able bodies in respect of keeping watch and toil of their place; nor must they be in any man's livery. The high constables ought to be of the ablest freeholders, and substantialest sort of yeomen, next to the degree of gentlemen; but should not be encumbered with any other office, as mayor of a town, under-sheriff, bailiff, &c.

5. Quest. What allowance have the constables?

Answ. They have no allowance, but are bound by duty to perform their office gratis; which may the rather be endured because it is but annual, and they are not tied to keep or maintain any servants or under-ministers, for that every one of the king's people within their limits are bound to assist them.

6. Quest. What if they refuse to do their office?

Answ. Upon complaint made of their refusal to any one justice of peace, the said justice may bind them over to the sessions, where if they cannot excuse themselves by some allegation that is just, they may be fined and imprisoned for their contempt.

7. Quest. What is their authority or power?

Answ. The authority of the constable, as it is substantive, and of itself, or substituted, and astricted to the warrants and commands of the justices of the peace; so again it is original, or additional: for either it was given them by the common law, or else annexed by divers statutes. And as for subordinate power, wherein the constable is only to execute the commands of the justices of peace, and likewise the additional power which is given by divers statutes, it is hard to comprehend them in any brevity; for that they do correspond to the office and authority of justices of peace, which is very large, and are created by the branches of several statutes: but for the original and substantive power of constables, it may be reduced to three heads: namely.

1. For matter of peace only.

2. For peace and the crown.

3. For matter of nuisance, disturbance, and disorder, although they be not accompanied with violence and breach of the peace.

First, for pacifying of quarrel begun, the constable may, upon hot words given, or likelihood of breach of the peace to ensue, command them in the king's name to keep peace, and depart, and forbear: and so he may, where an affray is made, part the same, and keep the parties asunder, and arrest and commit the breakers of the peace, if they will not obey; and call power to assist him for that purpose.

For punishment of breach of peace past, the law is very sparing in giving any authority to constables, because they have not power judicial, and the use of his office is rather for preventing or staying of mischief, than for punishment of offences; for in that part he is rather to execute the warrants of the justices; or, when sudden matter ariseth upon his view, or notorious circumstances, to apprehend offenders, and to carry them before the justices of peace, and generally to imprison in like cases of necessity, where the case will not endure the present carrying of the party before the justices. And so much for peace.

Secondly, For matters of the crown, the office of the constable consisteth chiefly in these four parts:

1. To arrest.

2. To make hue and cry.

3. To search.

4. To seize goods.

All which the constable may perform of his own authority, without any warrant from the justices of the peace.

1. For, first, if any man will lay murder or felony to another's charge, or do suspect him of murder or felony, he may declare it to the constable, and the

constable ought, upon such declaration or complaint, to carry him before a justice of peace; and if by common voice or fame any man be suspected, the constable of duty ought to arrest him, and bring him before a justice of peace, though there be no other accusation or declaration.

2. If any house be suspected for receiving or harbouring of any felon, the constable, upon complaint or common fame, may search.

3. If any fly upon the felony, the constable ought to raise hue and cry.

4. And the constable ought to seize his goods, and keep them safe without impairing, and inventory them in presence of honest neighbours.

Thirdly, for matters of common nuisance and grievances, they are of very variable nature, according to the several comforts which man's life and society requireth, and the contraries which infest the same.

In all which, be it matter of corrupting air, water, or victuals, stopping, straitening, or endangering of passages, or general deceits in weights, measures, sizes, or counterfeiting wares, and things vendible; the office of constable is to give, as much as in him lies, information of them, and of the offenders, in leets, that they may be presented; but because leets are kept but twice in the year, and many of those things require present and speedy remedy, the constable, in things notorious and of vulgar nature, ought to forbid and repress them in the mean time: if not, they are for their contempt to be fined and imprisoned, or both, by the justices in their sessions.

8. Quest. What is their oath?

Answ. The manner of the oath they take is as followeth:

"You shall swear that you shall well and truly serve the king, and the lord of this law-day; and you shall cause the peace of our sovereign lord the king well and truly to be kept to your power; and you shall arrest all those that you see committing riots, debates, and affrays in breach of peace: and you shall well and truly endeavour yourself to your best knowledge, that the statute of Winchester for watching, hue and cry, and the statutes made for the punishment of sturdy beggars, vagabonds, rogues, and other idle persons coming within your office be truly executed, and the offenders be punished: and you shall endeavour, upon complaint made, to apprehend barreters and riotous persons making affrays, and likewise to apprehend felons; and if any of them make resistance with force, and multitude of misdemeanors, you shall make outcry and pursue them till they be taken; and shall look unto such persons as use unlawful games; and you shall have regard unto the maintenance of artillery; and you shall well and truly execute all process and precepts sent unto you from the justices of the peace of the county: and you shall make good and faithful presentments of all bloodsheds, out-cries, affrays, and rescues made within your office: and you shall well and truly, according to your own power and knowledge, do that which belongeth to your office of constable to do, for this year to come. So help," &c.

9. Quest. What difference is there betwixt the high constables and petty constables?

Answ. Their authority is the same in substance, differing only in the extent; the petty constable serving only for one town, parish, or borough; the head constable for the whole hundred: nor is the petty constable subordinate to the head constable for any commandment that proceeds from his own authority; but it is used, that the precepts of the justices be delivered unto the high constables, who being few in number, may better attend the justices, and then the head constables, by virtue thereof, make their precepts over to the petty constables.

10. Quest. Whether a constable may appoint a deputy?

Answ. In case of necessity a constable may appoint a deputy, or in default thereof, the steward of the court-leet may; which deputy ought to be sworn before the said steward.

The constable's office consists in three things:

1. Conservation of the peace.
2. Serving precepts and warrants.
3. Attendance for the execution of statutes.

Of the Jurisdiction of Justices itinerant in the Principality of Wales.

1. They have power to hear and determine all criminal causes, which are called, in the laws of England, pleas of the crown; and herein they have the same jurisdiction that the justices have in the court of the king's bench.

2. They have power to hear and determine all civil causes, which in the laws of England are called common-pleas, and to take knowledge of all fines levied of lands or hereditaments, without suing any *dedimus potestatem*; and herein they have the same jurisdiction that the justices of the common-pleas do execute at Westminster.

3. They have power also to hear and determine all assizes upon disseisin of lands or hereditaments, wherein they equal the jurisdiction of the justices of assize.

4. Justices of oyer and terminer therein may hear all notable violences and outrages perpetrated within their several precincts in the said principality of Wales.

The prothonotary's office is to draw all pleadings, and entereth and engrosseth all the records and judgments in all trivial causes. *These offices are in the king's gift.*

The clerk of the crown, his office is to draw and engross all proceedings, arraignments, and judgments in criminal causes.

The marshal's office is to attend the persons of the judges at their coming, sitting, and going from their sessions or court. *These offices are in the judges' disposition.*

The crier is "tanquam publicus præco," to call for such persons whose appearances are necessary, and to impose silence to the people.

The Office of Justice of Peace.

There is a commission under the great seal of England to certain gentlemen, giving them power to preserve the peace, and to resist and punish all turbulent *The office of justice of peace.*

persons, whose misdemeanors may tend to the disquiet of the people; and these be called justices of the peace, and every of them may well and truly be called *Eirenarcha.*

The chief of them is called *Custos rotulorum*, in whose custody all the records of their proceedings are resident.

Others there are of that number called justices of peace and *quorum*, because in their commission they have power to sit and determine causes concerning breach of peace and misbehaviour. The words of their commission are conceived thus, *Quorum*, such and such, *unum vel duos, etc. esse volumus;* and without some one or more of the *quorum*, no sessions can be holden; and for the avoiding of a superfluous number of such justices, (for through the ambition of many it is counted a credit to be burthened with that authority,) the statute of 38 H. VIII. hath expressly prohibited that there shall be but eight justices of the peace in every county. These justices hold their sessions quarterly.

Justices of peace appointed by the lord keeper.

In every shire where the commission of the peace is established, there is a clerk of the peace for the entering and engrossing of all proceedings before the said justices. And this officer is appointed by the *custos rotulorum.*

The Office of Sheriffs.

Every shire hath a sheriff, which word, being of the Saxon English, is as much as to say shire-reeve, or minister of the county: his function or office is twofold, namely,

1. Ministerial.
2. Judicial.

34 H. 8. cap. 16.

1. He is the minister and executioner of all the process and precepts of the courts of law, and therefore ought to make return and certificate.

2. The sheriff hath authority to hold two several courts of distinct natures: 1. The *Turn*, because he keepeth his turn and circuit about the shire, holdeth the same court in several places, wherein he doth inquire of all offences perpetrated against the common law, and not forbidden by any statute or act of parliament; and the jurisdiction of this court is derived from justice distributive, and is for criminal offences, and held twice every year.

2. The *County Court*, wherein he doth determine all petty and small causes civil under the value of forty shillings, arising within the said county, and therefore it is called the county court.

The jurisdiction of this court is derived from justice commutative, and is held every month. The office of the sheriff is annual, and in the king's gift, whereof he is to have a patent.

The Office of Escheator.

Every shire hath an officer called an Escheator, which is to attend the king's revenue, and to seize into his Majesty's hands all lands escheated, and goods or lands forfeited, and therefore is called escheator; and he is to inquire by good inquest of the death of the king's tenant, and to whom the lands are descended, and to seize their bodies and lands for ward, if they be within age, and is accountable for the same; he is named or appointed by the lord treasurer of England.

The Office of Coroner.

Two other officers there are in every county called Coroners; and by their office they are to inquest in what manner, and by whom, every person dying of a violent death, came so to their death; and to enter the same of record; which is matter criminal, and a plea of the crown: and therefore they are called coroners, or crowners, as one hath written, because their inquiry ought to be *in corona populi.*

These officers are chosen by the freeholders of the shire, by virtue of a writ out of the chancery *de coronatore eligendo:* and of them I need not to write more, because these officers are in use every where.

General Observations touching Constables, Gaolers, and Bailiffs.

Forasmuch as every shire is divided into hundreds, there are also by the statute of 34 H. VIII. cap. 26, ordered and appointed, that two sufficient gentlemen or yeomen shall be appointed constables of every hundred.

Also there is in every shire a gaol or prison appointed for the restraint of liberty of such persons as for their offences are thereunto committed, until they shall be delivered by course of law.

In every hundred of every shire the sheriff thereof shall nominate sufficient persons to be bailiffs of that hundred, and under-ministers of the sheriffs: and they are to attend upon the justices in every of their courts and sessions.

Note. Archbishop Sancroft notes on this last chapter, written, say some, by Sir John Dodderidge, one of the justices of the king's bench, 1608.

THE

ARGUMENT OF SIR FRANCIS BACON, KNIGHT,

HIS MAJESTY'S SOLICITOR GENERAL,

IN THE CASE OF

THE POST-NATI OF SCOTLAND,

IN THE EXCHEQUER CHAMBER,

BEFORE THE LORD CHANCELLOR, AND ALL THE JUDGES OF ENGLAND.

MAY IT PLEASE YOUR LORDSHIPS,

THIS case your lordships do well perceive to be of exceeding great consequence. For whether you do measure that by place, that reacheth not only to the realm of England, but to the whole island of Great Britain; or whether you measure that by time, that extendeth not only to the present time, but much more to future generations,

Et nati natorum, et qui nascentur ab illis:

And therefore as that is to receive at the bar a full and free debate, so I doubt not but that shall receive from your lordships a sound and just resolution according to law, and according to truth. For, my lords, though he were thought to have said well, that said that for his word, *Rex fortissimus;* yet he was thought to have said better, even in the opinion of the king himself, that said, *Veritas fortissima, et prævalet:* And I do much rejoice to observe such a concurrence in the whole carriage of this cause to this end, that truth may prevail.

The case no feigned or framed case; but a true case between true parties.

The title handled formerly in some of the king's courts, and freehold upon it; used indeed by his Majesty in his high wisdom to give an end to this great question, but not raised; *occasio*, as the schoolmen say, *arrepta, non porrecta.*

The case argued in the king's bench by Mr. Walter with great liberty, and yet with good approbation of the court: the persons assigned to be of counsel on that side, inferior to none of their quality and degree in learning; and some of them most conversant and exercised in the question.

The judges in the king's bench have adjourned it to this place for conference with the rest of their brethren. Your lordship, my lord chancellor, though you be absolute judge in the court where you sit, and might have called to you such assistance of judges as to you had seemed good; yet would not forerun or lead in this case by any opinion there to be given; but have chosen rather to come yourself to this assembly; all tending, as I said, to this end, whereunto I for my part do heartily subscribe, *ut vincat veritas*, that truth may first appear, and then prevail. And I do firmly hold, and doubt not but I shall well maintain, that this is the truth, that Calvin the plaintiff is *ipso jure* by the law of England a natural-born subject, to purchase freehold, and to bring real actions within England. In this case I must so consider the time, as I must much more consider the matter. And therefore, though it may draw my speech into farther length, yet I dare not handle a case of this nature confusedly, but purpose to observe the ancient and exact form of pleadings; which is,

First, to explain or induce.

Then, to confute, or answer objections.

And lastly, to prove or confirm.

And first, for explanation. The outward question in this case is no more, but, Whether a child, born in Scotland since his Majesty's happy coming to the crown of England, be naturalized in England, or no? But the inward question or state of the question evermore beginneth where that which is confessed on both sides doth leave.

It is confessed, that if these two realms of England and Scotland were united under one law and one parliament, and thereby incorporated and made as one kingdom, that the *Post-natus* of such an union should be naturalized.

It is confessed, that both realms are united in the person of our sovereign; or, because I will gain nothing by surreption, in the putting of the question, that one and the same natural person is king of both realms.

It is confessed, that the laws and parliaments are several. So then, Whether this privilege and benefit of naturalization be an accessory or dependency upon that which is one and joint, or upon that which is several, hath been and must be the depth of this question. And therefore your lordships do see the

state of this question doth evidently lead me by way of inducement to speak of three things: The king, the law, and the privilege of naturalization. For if you well understand the nature of the two principals, and again the nature of the accessory; then shall you discern, to whether principal the accessory doth properly refer, as a shadow to a body, or iron to an adamant.

And therefore your lordships will give me leave, in a case of this quality, first to visit and open the foundations and fountains of reason, and not begin with the positions and eruditions of a municipal law; for so was that done in the great case of mines; and so ought that to be done in all cases of like nature. And this doth not at all detract from the sufficiency of our laws, as incompetent to decide their own cases, but rather addeth a dignity unto them, when their reason appearing as well as their authority doth show them to be as fine moneys, which are current not only by the stamp, because they are so received, but by the natural metal, that is, the reason and wisdom of them.

And master Littleton himself in his whole book doth commend but two things to the professors of the law by the name of his sons; the one, the inquiring and searching out the reasons of the law; and the other, the observing of the forms of pleadings. And never was there any case that came in judgment that required more, that Littleton's advice should be followed in those two points, than doth the present case in question. And first of the king.

It is evident that all other commonwealths, monarchies only excepted, do subsist by a law precedent. For where authority is divided amongst many officers, and they not perpetual, but annual or temporary, and not to receive their authority but by election, and certain persons to have voice only to that election, and the like; these are busy and curious frames, which of necessity do pre-suppose a law precedent, written or unwritten, to guide and direct them: but in monarchies, especially hereditary, that is, when several families, or lineages of people, do submit themselves to one line, imperial or royal, the submission is more natural and simple, which afterwards by laws subsequent is perfected and made more formal; but that is grounded upon nature. That this is so, it appeareth notably in two things; the one the platforms and patterns, which are found in nature of monarchies; the original submissions, and their motives and occasions. The platforms are three:

The first is that of a father, or chief of a family; who governing over his wife by prerogative of sex, over his children by prerogative of age, and because he is author unto them of being, and over his servants by prerogative of virtue and providence, (for he that is able of body, and improvident of mind, is *natura servus*,) that is the very model of a king. So is the opinion of Aristotle, lib. iii. Pol. cap. 14, where he saith, "Verum autem regnum est, cum penes unum est rerum summa potestas: quod regnum procurationem familiæ imitatur."

And therefore Lycurgus, when one counselled him to dissolve the kingdom, and to establish another form of estate, answered, "Sir, begin to do that which you advise first at home in your own house:" noting, that the chief of a family is as a king; and that those that can least endure kings abroad, can be content to be kings at home. And this is the first platform, which we see is merely natural.

The second is that of a shepherd and his flock, which, Xenophon saith, Cyrus had ever in his mouth. For shepherds are not owners of the sheep; but their office is to feed and govern: no more are kings proprietaries or owners of the people; for God is sole owner of people. "The nations," as the Scripture saith, "are his inheritance:" but the office of kings is to govern, maintain, and protect people. And that is not without a mystery, that the first king that was instituted by God, David, for Saul was but an untimely fruit, was translated from a shepherd, as you have it in Psalm lxxviii. "Et elegit David, servum suum, de gregibus ovium sustulit eum,—pascere Jacob servum suum, et Israel hæreditatem suam." This is the second platform; a work likewise of nature.

The third platform is the government of God himself over the world, whereof lawful monarchies are a shadow. And therefore both amongst the heathen, and amongst the christians, the word, sacred, hath been attributed unto kings, because of the conformity of a monarchy with the Divine Majesty: never to a senate or people. And so you find it twice in the lord Coke's Reports; once in the second book, the bishop of Winchester's case; and his fifth book, Cawdrie's case; and more anciently in the 10 of H. VII. fol. 18, "Rex est persona mixta cum sacerdote;" an attribute which the senate of Venice, or a canton of Swisses, can never challenge. So, we see, there be precedents or platforms of monarchies, both in nature, and above nature; even from the Monarch of heaven and earth to the king, if you will, in a hive of bees. And therefore other states are the creatures of law; and this state only subsisteth by nature.

For the original submissions, they are four in number: I will briefly touch them: The first is paternity or patriarchy, which is when a family growing so great as it could not contain itself within one habitation, some branches of the descendants were forced to plant themselves into new families, which second families could not by a natural instinct and inclination but bear a reverence, and yield an obeisance to the eldest line of the ancient family from which they were derived.

The second is, the admiration of virtue, or gratitude towards merit, which is likewise naturally infused into all men. Of this Aristotle putteth the case well, when it was the fortune of some one man, either to invent some arts of excellent use towards man's life, or to congregate people, that dwelt scattered, into one place, where they might cohabit with more comfort, or to guide them from a more barren land to a more fruitful, or the like; upon these deserts, and the admiration and recompence of them, people submitted themselves.

The third, which was the most usual of all, was

conduct in war, which even in nature induceth as great an obligation as paternity. For as men owe their life and being to their parents in regard of generation, so they owe that also to saviours in the wars in regard of preservation. And therefore we find in chap. xviii. of the book of Judges, ver. 22, "Dixerunt omnes viri ad Gideon, Dominare nostri, tu et filii tui, quoniam servasti nos de manu Madian." And so we read when it was brought to the ears of Saul, that the people sung in the streets, "Saul hath killed his thousand, and David his ten thousand" of enemies, he said straightways: "Quid ei superest nisi ipsum regnum?" For whosoever hath the military dependence, wants little of being king.

The fourth is an enforced submission, which is conquest, whereof it seemed Nimrod was the first precedent, of whom it is said: "Ipse cœpit potens esse in terra, et erat robustus venator coram Domino." And this likewise is upon the same root, which is the saving or gift as it were of life and being; for the conqueror hath power of life and death over his captives; and therefore where he giveth them themselves, he may reserve upon such a gift what service and subjection he will. All these four submissions are evident to be natural and more ancient than law.

To speak therefore of law, which is the second part of that which is to be spoken of by way of inducement. Law no doubt is the great organ by which the sovereign power doth move, and may be truly compared to the sinews in a natural body, as the sovereignty may be compared to the spirits: for if the sinews be without the spirits, they are dead and without motion; if the spirits move in weak sinews, it causeth trembling: so the laws, without the king's power, are dead; the king's power, except the laws be corroborated, will never move constantly, but be full of staggering and trepidation. But towards the king himself the law doth a double office or operation: the first is to entitle the king, or design him: and in that sense Bracton saith well, lib. 1, fol. 5, and lib. 3, fol. 107. "Lex facit quod ipse sit Rex;" that is, it defines his title; as in our law, That the kingdom shall go to the issue female; that it shall not be departable amongst daughters; that the half-blood shall be respected, and other points differing from the rules of common inheritance. The second is that whereof we need not fear to speak in good and happy times, such as these are, to make the ordinary power of the king more definite or regular: for it was well said by a father, "plenitudo potestatis est plenitudo tempestatis." And although the king, in his person, be *solutus legibus*, yet his acts and grants are limited by law, and we argue them every day.

But I demand, Do these offices or operations of law evacuate or frustrate the original submission, which was natural? Or shall it be said that all allegiance is by law? No more than it can be said, that *potestas patris*, the power of the father over the child, is by law; and yet no doubt laws do diversely define of that also; the law of some nations having given fathers power to put their children to death; others, to sell them thrice; others, to disinherit them by testament at pleasure, and the like. Yet no man will affirm, that the obedience of the child is by law, though laws in some points do make it more positive: and even so it is of allegiance of subjects to hereditary monarchs, which is corroborated and confirmed by law, but is the work of the law of nature. And therefore you shall find the observation true, and almost general in all states, that their lawgivers were long after their first kings, who governed for a time by natural equity without law: so was Theseus long before Solon in Athens: so was Eurytion and Sous long before Lycurgus in Sparta: so was Romulus long before the Decemviri. And even amongst ourselves there were more ancient kings of the Saxons; and yet the laws ran under the name of Edgar's laws. And in the refounding of the kingdom in the person of William the Conqueror, when the laws were in some confusion for a time, a man may truly say, that king Edward I. was the first lawgiver, who enacting some laws, and collecting others, brought the law to some perfection. And therefore I will conclude this point with the style which divers acts of parliaments do give unto the king: which term him very effectually and truly, "our natural sovereign liege lord." And as it was said by a principal judge here present when he served in another place, and question was moved by some occasion of the title of Bullein's lands, that he would never allow that queen Elizabeth (I remember it for the efficacy of the phrase) should be a statute queen, but a common-law queen: so surely I shall hardly consent that the king shall be esteemed or called only our rightful sovereign, or our lawful sovereign, but our natural liege sovereign; as acts of parliament speak: for as the common law is more worthy than the statute law; so the law of nature is more worthy than them both. Having spoken now of the king and the law, it remaineth to speak of the privilege and benefit of naturalization itself; and that according to the rules of the law of England.

Naturalization is best discerned in the degrees whereby the law doth mount and ascend thereunto. For it seemeth admirable unto me, to consider with what a measured hand and with how true proportions our law doth impart and confer the several degrees of this benefit. The degrees are four.

The first degree of persons, as to this purpose, that the law takes knowledge of, is an alien enemy; that is, such a one as is born under the obeisance of a prince or state that is in hostility with the king of England. To this person the law giveth no benefit or protection at all, but if he come into the realm after war proclaimed, or war in fact, he comes at his own peril, he may be used as an enemy: for the law accounts of him but, as the Scripture saith, as of a spy that comes to see the weakness of the land. And so it is in 2 Ric. III. fol. 2. Nevertheless this admitteth a distinction. For if he come with safe-conduct, otherwise it is: for then he may not be violated, either in person or goods. But yet he must fetch his justice at the fountain-head, for none of the conduit-pipes are open to him; he can have no remedy in any of the king's courts; but he must

complain himself before the king's privy council: there he shall have a proceeding summary from hour to hour, the cause shall be determined by natural equity, and not by rules of law; and the decree of the council shall be executed by aid of the chancery, as in 13 Ed. IV. And this is the first degree.

The second person is an alien friend, that is, such a one as is born under the obeisance of such a king or state as is confederate with the king of England, or at least not in war with him. To this person the law allotteth this benefit, that as the law accounts that the hold it hath over him is but a transitory hold, for he may be an enemy, so the law doth endue him but with a transitory benefit, that is, of movable goods and personal actions. But for freehold, or lease, or actions real or mixt, he is not enabled, except it be in *autre droit*. And so it is 9 E. IV. fol. 7, 19 E. IV. fol. 6, 5 Mar. and divers other books.

The third person is a denizen, using the word properly, for sometimes it is confounded with a natural born subject. This is one that is but *subditus insitivus*, or *adoptivus*, and is never by birth, but only by the king's charter, and by no other mean, come he never so young into the realm, or stay he never so long. Mansion or habitation will not indenize him, no, nor swearing obedience to the king in a leet, which doth in-law the subject; but only, as I said, the king's grace and gift. To this person the law giveth an ability and capacity abridged, not in matter, but in time. And as there was a time when he was not subject, so the law doth not acknowledge him before that time. For if he purchase freehold after his denization, he may take it; but if he have purchased any before, he shall not hold it: so if he have children after, they shall inherit; but if he have any before, they shall not inherit. So as he is but privileged *a parte post*, as the schoolmen say, and not *a parte ante*.

The fourth and last degree is a natural born subject, which is evermore by birth, or by act of parliament; and he is complete and entire. For in the law of England there is *nil ultra*, there is no more subdivision or more subtile division beyond these: and therein it seemeth to me that the wisdom of the law, as I said, is to be admired both ways, both because it distinguisheth so far, and because it doth not distinguish farther. For I know that other laws do admit more curious distinction of this privilege; for the Romans had, besides *jus civitatis*, which answereth to naturalization, *jus suffragii*. For although a man were naturalized to take lands and inheritance, yet he was not enabled to have a voice at passing of laws, or at election of officers. And yet farther they have *jus petitionis*, or *jus honorum*. For though a man had voice, yet he was not capable of honour and office. But these be the devices commonly of popular or free estates, which are jealous whom they take into their number, and are unfit for monarchies; but by the law of England, the subject that is natural born hath a capacity or ability to all benefits whatsoever; I say capacity or ability: but to reduce *potentiam in actum*, is another case. For an earl of Ireland, though he be naturalized in England, yet hath no voice in the parliament of England, except he have either a call by writ, or creation by patent; but he is capable of either. But upon this quadripartite division of the ability of persons I do observe to your lordships three things, being all effectually pertinent to the question in hand.

The first is, that if any man conceive that the reasons for the *Post-nati* might serve as well for the *Ante-nati*, he may by the distribution which we have made plainly perceive his error. For the law looketh not back, and therefore cannot, by any matter *ex post facto*, after birth, alter the state of the birth; wherein no doubt the law hath a grave and profound reason; which is this, in few words, "Nemo subito fingitur; aliud est nasci, aliud fieri:" we indeed more respect and affect those worthy gentlemen of Scotland whose merits and conversations we know; but the law that proceeds upon general reason, and looks upon no men's faces, affecteth and privilegeth those which drew their first breath under the obeisance of the king of England.

The second point is, that by the former distribution it appeareth that there be but two conditions by birth, either alien, or natural born, "nam tertium penitus ignoramus." It is manifest then, that if the *Post-nati* of Scotland be not natural born, they are alien born, and in no better degree at all than Flemings, French, Italians, Spanish, Germans, and others, which are all at this time alien friends, by reason his Majesty is in peace with all the world.

The third point seemeth to me very worthy the consideration; which is, that in all the distributions of persons, and the degrees of abilities or capacities, the king's act is all in all, without any manner of respect to law or parliament. For it is the king that makes an alien enemy, by proclaiming a war, wherewith the law or parliament intermeddles not. So the king only grants safe-conducts, wherewith the law and parliament intermeddle not. It is the king likewise that maketh an alien friend, by concluding a peace, wherewith law and parliament intermeddle not. It is the king that makes a denizen by his charter, absolutely of his prerogative and power, wherewith law and parliament intermeddle not. And therefore it is strongly to be inferred, that as all these degrees depend wholly upon the king's act, and no ways upon law or parliament; so the fourth, although it cannot by the king's patent, but by operation of law, yet that the law, in that operation, respecteth only the king's person, without respect of subjection to law or parliament. And thus much by way of explanation and inducement: which being all matter in effect confessed, is the strongest ground-work to that which is contradicted or controverted.

There followeth the confutation of the arguments on the contrary side.

That which hath been materially objected, may be reduced to four heads.

The first is, that the privilege of naturalization followeth allegiance, and that allegiance followeth the kingdom.

The second is drawn from that common ground, "cum duo jura concurrunt in una persona, æquum

est ac si essent in duobus;" a rule, the words whereof are taken from the civil law; but the matter of it is received in all laws; being a very line or rule of reason, to avoid confusion.

The third consisteth of certain inconveniences conceived to ensue of this general naturalization, *ipso jure*.

The fourth is not properly an objection, but a preoccupation of an objection or proof on our part, by a distinction devised between countries devolute by descent, and acquired by conquest.

For the first, it is not amiss to observe that those who maintain this new opinion, whereof there is *altum silentium* in our books of law, are not well agreed in what form to utter and express that: for some said that allegiance hath respect to the law, some to the crown, some to the kingdom, some to the body politic of the king: so there is confusion of tongues amongst them, as it commonly cometh to pass in opinions that have their foundations in subtility and imagination of man's wit, and not in the ground of nature. But to leave their words, and to come to their proofs; they endeavour to prove this conceit by three manner of proofs: first, by reason; then, by certain inferences out of statutes; and lastly, by certain book-cases, mentioning and reciting the forms of pleadings.

The reason they bring is this; that naturalization is an operation of the law of England; and so indeed it is, that may be the true *genus* of it.

Then they add, that granted, that the law of England is of force only within the kingdom and dominions of England, and cannot operate but where it is in force. But the law is not in force in Scotland, therefore that cannot endure this benefit of naturalization by birth in Scotland.

This reason is plausible and sensible, but extremely erroneous. For the law of England, for matters of benefit or forfeitures in England, operateth over the world. And because it is truly said that "respublica continetur pœna et præmio," I will put a case or two of either.

It is plain that if a subject of England had conspired the death of the king in foreign parts, it was by the common law of England treason. How prove I that? By the statute of 35 H. VIII. cap. 2, wherein you shall find no words at all of making any new case of treason which was not treason before, but only of ordaining a form of trial; ergo, it was treason before: and if so, then the law of England works in foreign parts. So of contempts, if the king send his privy seal to any subject beyond the seas, commanding him to return, and he disobey, no man will doubt but there is a contempt, and yet the fact enduring the contempt was committed in foreign parts.

Therefore the law of England doth extend to acts or matters done in foreign parts. So of reward, privilege, or benefit, we need seek no other instance than the instance in question; for I will put you a case that no man shall deny, where the law of England doth work and confer the benefit of naturalization upon a birth neither within the dominions of the kingdom, nor king of England. By the statute of 25 E. III. which, if you will believe Hussey, is but a declaration of the common law, all children born in any parts of the world, if they be of English parents continuing at that time as liege subjects to the king, and having done no act to forfeit the benefit of their allegiance, are *ipso facto* naturalized. Nay, if a man look narrowly into the law in this point, he shall find a consequence that may seem at the first strange, but yet cannot be well avoided; which is, that if divers families of English men and women plant themselves at Middleborough, or at Roan, or at Lisbon, and have issue, and their descendants do intermarry amongst themselves, without any intermixture of foreign blood; such descendants are naturalized to all generations: for every generation is still of liege parents, and therefore naturalized; so as you may have whole tribes and lineages of English in foreign countries.

And therefore it is utterly untrue that the law of England cannot operate or confer naturalization, but only within the bounds of the dominions of England.

To come now to their inferences upon statutes; the first is out of this statute which I last recited. In which statute it is said, that in four several places there are these words, "born within the allegiance of England;" or again, "born without the allegiance of England;" which, say they, applies the allegiance to the kingdom, and not to the person of the king. To this the answer is easy; for there is no trope of speech more familiar than to use the place of addition for the person. So we say commonly, the line of York, or the line of Lancaster, for the lines of the duke of York, or the duke of Lancaster.

So we say the possessions of Somerset or Warwick, intending the possessions of the dukes of Somerset or earls of Warwick. So we see earls sign, Salisbury, Northampton, for the earls of Salisbury or Northampton. And in the very same manner the statute speaks, allegiance of England, for allegiance of the king of England. Nay more, if there had been no variety in the penning of that statute, this collection had had a little more force; for those words might have been thought to have been used of purpose and in propriety; but you may find in three other several places of the same statute, allegiance and obeisance of the king of England, and especially in the material and concluding place, that is to say, children whose parents were at the time of their birth at the faith and obeisance of the king of England. So that it is manifest by this indifferent and promiscuous use of both phrases, the one proper, the other improper, that no man can ground any inference upon these words without danger of cavillation.

The second statute out of which they infer, is a statute made in 32 Hen. VIII. touching the policy of strangers tradesmen within this realm. For the parliament finding that they did eat the Englishmen out of trade, and that they entertained no apprentices but of their own nation, did prohibit that they should receive any apprentice but the king's subjects. In which statute is said, that in nine several places there is to be found this context of words,

" aliens born out of the king's obedience;" which is pregnant, say they, and doth imply that there be aliens born within the king's obedience. Touching this inference, I have heard it said, " qui hæret in litera, hæret in cortice;" but this is not worthy the name of *cortex*, it is but *muscus corticis*, the moss of the bark. For it is evident that the statute meant to speak clearly and without equivocation, and to a common understanding. Now then there are aliens in common reputation, and aliens in precise construction of law; the statute then meaning not to comprehend Irishmen, or Jerseymen, or Calaismen, for explanation' sake, lest the word alien might be extended to them in a vulgar acceptance, added those farther words, " born out of the king's obedience." Nay, what if we should say, that those words, according to the received laws of speech, are no words of difference or limitation, but of declaration or description of an alien, as if it had been said with a *videlicet*, aliens; that is, such as are born out of the king's obedience? they cannot put us from that construction. But sure I am, if the bark makes for them, the pith makes for us; for the privilege of liberty which the statute means to deny to aliens of entertaining apprentices, is denied to none born within the king's obedience, call them aliens or what you will. And therefore by their reason, a *post-natus* of Scotland shall by that statute keep what stranger apprentices he will, and so is put in the degree of an English. The third statute out of which inference is made, is the statute of 14 E. III. cap. solo, which hath been said to be our very case: and I am of that opinion too, but directly the other way. Therefore to open the scope and purpose of that statute: After that the title to the crown of France was devolute to K. E. III. and that he had changed his style, changed his arms, changed his seal, as his Majesty hath done, the subjects of England, saith the statute, conceived a fear that the realm of England might become subject to the realm of France, or to the king as king of France. And I will give you the reasons of the double fear, that it should become subject to the realm of France. They had this reason of fear; Normandy had conquered England, Normandy was feudal of France, therefore because the superior seigniory of France was now united in right with the tenancy of Normandy, and that England, in regard of the conquest, might be taken as a perquisite to Normandy, they had probable reason to fear that the kingdom of England might be drawn to be subject to the realm of France. The other fear, that England might become subject to the king as king of France, grew to doubt of this foresight, that the kings of England might be like to make their mansion and seat of their estate in France, in regard of the climate, wealth, and glory of that kingdom; and thereby the kingdom of England might be governed by the king's mandates and precepts issuing as from the king of France. But they will say, whatsoever the occasion was, here you have the difference authorized of subjection to a king generally, and subjection to king as king of a certain kingdom: but to this I give an answer threefold:

First, it presseth not the question: for doth any man say that a *post-natus* of Scotland is naturalized in England, because he is a subject of the king as king of England? No, but generally because he is the king's subject.

Secondly, the scope of this law is to make a distinction between crown and crown; but the scope of their argument is to make a difference between crown and person. Lastly, this statute, as I said, is our very case retorted against them; for this is a direct statute of separation, which presupposeth that the common law had made an union of the crowns in some degree, by virtue of the union in the king's person: if this statute had not been made to stop and cross the course of the common law in that point, as if Scotland now should be suitors to the king, that an act might pass to like effect, and upon like fear. And therefore if you will make good your distinction in this present case, show us a statute for that. But I hope you can show no statute of separation between England and Scotland. And if any man say that this was a statute declaratory of the common law, he doth not mark how that is penned: for after a kind of historical declaration in the preamble, that England was never subject to France, the body of the act was penned thus: " The king doth grant and establish;" which are words merely introductive *novæ legis*, as if the king gave a charter of franchise, and did invest, by a donative, the subjects of England with a new privilege or exemption, which by the common law they had not.

To come now to the book-cases which they put: which I will couple together, because they receive one joint answer.

The first is 42 E. III. fol. where the book saith, exception was taken that the plaintiff was born in Scotland at Ross, out of the allegiance of England.

The next is 22 H. VI. fol. 38, Adrian's case; where it is pleaded that a woman was born at Bruges, out of the allegiance of England.

The third is 13 Eliz. Dyer, fol. 300, where the case begins thus: " Doctor Story qui notorie dignoscitur esse subditus regni Angliæ." In all these three, say they, that is pleaded, that the party is subject of the kingdom of England, and not of the king of England.

To these books I give this answer, that they be not the pleas at large, but the words of the reporter, who speaks compendiously and narratively, and not according to the solemn words of the pleading. If you find a case put, that it is pleaded a man was seised in fee-simple, you will not infer upon that, that the words of the pleading were *in feodo simplici*, but *sibi et hæredibus suis*. But show me some precedent of a pleading at large, of " natus sub ligeantia regni Angliæ;" for whereas Mr. Walter said that pleadings are variable in this point, he would fain bring it to that; but there is no such matter; for the pleadings are constant and uniform in this point: they may vary in the word *fides* or *ligeantia*, or *obedientia*, and some other circumstances; but in the form of *regni* and *regis* they vary not; neither can there, as I am persuaded, be any one instance showed forth to the contrary. See

9 Eliz. 4, Baggot's Assize, fol. 7, where the pleading at large is entered in the book; there you have "alienigena natus extra ligeantiam domini regis Angliæ." See the precedents in the book of entries, pl. 7, and two other places, for there be no more: and there you shall find still "sub ligeantia domini regis," or "extra ligeantiam domini regis." And therefore the forms of pleading, which are things so reverend, and are indeed towards the reasons of the law, as *palma*, and *pugnus*, containing the reason of the law, opened or unfolded, or displayed, they make all for us. And for the very words of reporters in books, you must acknowledge and say, "ilicet obruimur numero." For you have 22 Ass. pl. 25, 27 Ass. the prior of Shell's case, pl. 48, 14 H. IV. fol. 19, 3 H. VI. fol. 35, 6 H. VIII. in my lord Dyer, fol. 2. In all these books the very words of the reporters have "the allegiance of the king," and not, the allegiance of England. And the book in the 24 Edw. III. which is your best book, although while it is tossed at the bar, you have sometimes the words "allegiance of England," yet when it comes to Thorp, chief justice, to give the rule, he saith, "we will be certified by the roll, whether Scotland be within the allegiance of the king." Nay, that farther form of pleading beateth down your opinion: That it sufficeth not to say that he is born out of the allegiance of the king, and stay there, but he must show in the affirmative under the allegiance of what king or state he was born. The reason whereof cannot be, because it may appear whether he be a friend or an enemy, for that in a real action is all one: nor it cannot be because issue shall be taken thereupon; for the issue must arise on the other side upon *indigena* pleaded and traversed. And therefore it can have no other reason, but to apprize the court more certainly, that the country of the birth is none of those that are subject to the king. As for the trial, that it should be impossible to be tried, I hold it not worth the answering; for the *venire facias* shall go either where the natural birth is laid, although it be but by fiction, or if it be laid according to the truth, it shall be tried where the action is brought, otherwise you fall upon a main rock, that breaketh your argument in pieces; for how should the birth of an Irishman be tried, or of a Jerseyman? nay, how should the birth of a subject be tried, that is born of English parents in Spain or Florence, or any part of the world? For to all these the like objection of trial may be made, because they are within no counties: and this receives no answer. And therefore I will now pass on to the second main argument.

It is a rule of the civil law, say they, "Cum duo jura," etc. when two rights do meet in one person, there is no confusion of them, but they remain still in the eye of law distinct, as if they were in several persons: and they bring examples of one man bishop of two sees, or one person that is rector of two churches. They say this unity in the bishop or the rector doth not create any privity between the parishioners or dioceseners, more than if there were several bishops, or several persons. This rule I allow, as was said, to be a rule not of the civil law only but of common reason, but receiveth no forced or coined, but a true and sound distinction or limitation, which is, that it evermore faileth and deceiveth in cases where there is any vigour or operation of the natural person; for generally in corporations the natural body is but *suffulcimentum corporis corporati*, it is but as a stock to uphold and bear out the corporate body; but otherwise it is in the case of the crown, as shall be manifestly proved in due place. But to show that this rule receiveth this distinction, I will put but two cases; the statute of 21 H. VIII. ordaineth that a marquis may retain six chaplains qualified, a lord treasurer of England four, a privy-counsellor three. The lord treasurer Paulet was marquis of Winchester, lord treasurer of England, and privy-counsellor, all at once. The question was, whether he should qualify thirteen chaplains? Now by the rule "Cum duo jura" he should; but adjudged, he should not. And the reason was, because the attendance of chaplains concerned and respected his natural person; he had but one soul, though he had three offices. The other case which I will put is the case of homage. A man doth homage to his lord for a tenancy held of the manor of Dale; there descendeth unto him afterwards a tenancy held of the manor of Sale, which manor of Sale is likewise in the hands of the same lord. Now by the rule "Cum duo jura," he should do homage again, two tenancies and two seigniories, though but one tenant and one lord, "æquum est ac si esset in duobus:" but ruled that he should not do homage again: nay in the case of the king he shall not pay a second respect of homage, as upon grave and deliberate consideration it was resolved, 24 Hen. VIII. and *usus scaccarii*, as there is said, accordingly. And the reason is no other but because when a man is sworn to his lord, he cannot be sworn over again: he hath but one conscience, and the obligation of this oath trencheth between the natural person of the tenant and the natural person of the lord. And certainly the case of homage and tenure, and of homage liege, which is one case, are things of a near nature, save that the one is much inferior to the other; but it is good to behold these great matters of state in cases of lower element, as the eclipse of the sun is used to be in a pail of water.

The third main argument containeth certain supposed inconveniences, which may ensue of a general naturalization *ipso jure*, of which kind three have been specially remembered.

The first is the loss of profit to the king upon letters of denization and purchases of aliens.

The second is the concourse of Scotsmen into this kingdom, to the enfeebling of that realm of Scotland in people, and the impoverishing of this realm of England in wealth.

The third is, that the reason of this case stayeth not within the compass of the present case; for although it were some reason that Scotsmen were naturalized, being people of the same island and language, yet the reason which we urge, which is, that they are subject to the same king, may be applied to persons every way more estranged from us than they are; as if in future time, in the king's descendants,

there should be a match with Spain, and the dominions of Spain should be united with the crown of England, by one reason, say they, all the West Indies should be naturalized; which are people not only *alterius soli*, but *alterius cœli*.

To these conceits of inconvenience, how easy is it to give answer, and how weak they are in themselves, I think no man that doth attentively ponder them can doubt: for how small revenue can arise of such denizations, and how honourable were it for the king to take escheats of his subjects, as if they were foreigners, for seizure of aliens' lands are in regard the king hath no hold or command of their persons and services, every one may perceive. And for the confluence of Scotsmen, I think, we all conceive the spring-tide is past at the king's first coming in. And yet we see very few families of them throughout the cities and boroughs of England. And for the naturalizing of the Indies, we can readily help that, when the case comes; for we can make an act of parliament of separation if we like not their consort. But these being reasons politic, and not legal, and we are not now in parliament, but before a judgment-seat, I will not meddle with them, especially since I have one answer which avoids and confounds all their objections in law; which is, that the very self-same objections do hold in countries purchased by conquest. For in subjects obtained by conquest, it were more profit to indenizate by the poll; in subjects obtained by conquest, they may come in too fast. And if king Henry VII. had accepted the offer of Christopher Columbus, whereby the crown of England had obtained the Indies by conquest or occupation, all the Indies had been naturalized by the confession of the adverse part. And therefore since it is confessed, that subjects obtained by conquest are naturalized, and that all these objections are common and indifferent, as well to case of conquest as case of descent, these objections are in themselves destroyed.

And therefore, to proceed now to overthrow that distinction of descent and conquest. Plato saith well, the strongest of all authorities is, if a man can allege the authority of his adversary against himself: we do urge the confession of the other side, that they confessed the Irish are naturalized; that they confess the subjects of the isles of Jersey and Guernsey, and Berwick, to be naturalized, and the subjects of Calais and Tournay, when they were English, were naturalized; as you may find in the 5 Eliz. in Dyer, upon the question put to the judges by Sir Nicholas Bacon, lord keeper.

To avoid this, they fly to a difference, which is new coined, and is, (I speak not to the disadvantage of the persons that use it; for they are driven to it "tanquam ad ultimum refugium;" but the difference itself,) it is, I say, full of ignorance and error. And therefore, to take a view of the supports of this difference, they allege four reasons.

The first is, that countries of conquest are made parcel of England, because they are acquired by the arms and treasure of England. To this I answer, that it were a very strange argument, that if I wax rich upon the manor of Dale, and upon the revenue thereof purchase a close by it, that it should make that parcel of the manor of Dale. But I will set this new learning on ground with a question or case put. For I oppose them that hold this opinion with this question, If the king should conquer any foreign country by an army compounded of Englishmen and Scotsmen, as it is like, whensoever wars are, so it will be, I demand, Whether this country conquered shall be naturalized both in England and Scotland, because it was purchased by the joint arms of both? and if yea, Whether any man will think it reasonable, that such subjects be naturalized in both kingdoms; the one kingdom not being naturalized towards the other? These are the intricate consequences of conceits.

A second reason they allege is, that countries won by conquest become subject to the laws of England, which countries patrimonial are not, and that the law doth draw the allegiance, and allegiance naturalization.

But to the major proposition of that argument, touching the dependency of allegiance upon law, somewhat hath been already spoken, and full answer shall be given when we come to it. But in this place it shall suffice to say, that the minor proposition is false; that is, that the laws of England are not superinduced upon any country by conquest; but that the old laws remain until the king by his proclamation or letters patent declare other laws, and then if he will he may declare laws which be utterly repugnant, and differing from the laws of England. And hereof many ancient precedents and records may be showed, that the reason why Ireland is subject to the laws of England is not *ipso jure* upon conquest, but grew by a charter of king John; and that extended but to so much as was then in the king's possession; for there are records in the time of king E. I. and II. of divers particular grants to sundry subjects of Ireland and their heirs, that they might use and observe the laws of England.

The third reason is, that there is a politic necessity of intermixture of people in case of subjection by conquest, to remove alienations of mind, and to secure the state; which holdeth not in case of descent. Here I perceive Mr. Walter hath read somewhat in matter of state; and so have I likewise; though we may both quickly lose ourselves in causes of this nature. I find by the best opinions, that there be two means to assure and retain in obedience countries conquered, both very differing, almost in extremes, the one towards the other.

The one is by colonies, and intermixture of people, and transplantation of families, which Mr. Walter spoke of; and it was indeed the Roman manner: but this is like an old relic, much reverenced and almost never used. But the other, which is the modern manner, and almost wholly in practice and use, is by garrisons and citadels, and lists or companies of men of war, and other like matters of terror and bridle.

To the first of these, which is little used, it is true that naturalisation doth conduce, but to the latter it is utterly opposite, as putting too great pride and means to do hurt in those that are meant to be kept short and low. And yet in the very first case,

of the Roman proceeding, naturalization did never follow by conquest, during all the growth of the Roman empire; but was ever conferred by charters, or donations, sometimes to cities and towns, sometimes to particular persons, and sometimes to nations, until the time of Adrian the emperor, and the law "In orbe Romano:" and that law or constitution is not referred to title of conquest and arms only, but to all other titles; as by the donation and testament of kings, by submission and dedition of states, or the like: so as this difference was as strange to them as to us. And certainly I suppose it will sound strangely in the hearing of foreign nations, that the law of England should *ipso facto* naturalize subjects of conquests, and should not naturalize subjects which grow unto the king by descent: that is, that it should confer the benefit and privilege of naturalization upon such as cannot at the first but bear hatred and rancour to the state of England, and have had their hands in the blood of the subjects of England, and should deny the like benefit to those that are conjoined with them by a more amiable mean; and that the law of England should confer naturalization upon slaves and vassals, for people conquered are no better in the beginning, and should deny it to freemen: I say, it will be marvelled at abroad, of what complexion the laws of England be made, that breedeth such differences. But there is little danger of such scandals; for this is a difference that the law of England never knew.

The fourth reason of this difference is, that in case of conquest the territory united can never be separated again. But in case of descent, there is a possibility; if his Majesty's line should fail, the kingdoms may sever again to their respective heirs; as in the case of 8 Hen. VI. where it is said, that if land descend to a man from the ancestor on the part of his father, and a rent issuing out of it from an ancestor on the part of the mother; if the party die without issue, the rent is revived. As to this reason, I know well the continuance of the king's line is no less dear to those that allege the reason, than to us that confute it. So as I do not blame the passing of the reason: but it is answered with no great difficulty; for, first, the law doth never respect remote and foreign possibilities, as notably appeared in the great case between Sir Hugh Cholmley and Houlford in the exchequer, where one in the remainder, to the end to bridle tenant in tail from suffering a common recovery, granted his remainder to the king; and because he would be sure to have it out again without charge or trouble when his turn was served, he limited it to the king during the life of tenant in tail. Question grew, whether this grant of remainder were good, yea or no. And it is said to be frivolous and void, because it could never by any possibility execute; for tenant in tail cannot surrender; and if he died, the remainder likewise ceased. To which it was answered, that there was a possibility that it might execute, which was thus: Put case, that tenant in tail should enter into religion, having no issue; then the remainder should execute, and the king should hold the land during the natural life of tenant in tail, notwithstanding his civil death. But the court *una voce* exploded this reason, and said, that monasteries were down, and entries into religion gone, and they must be up again ere this could be; and that the law did not respect such remote and foreign possibilities. And so we may hold this for the like: for I think we all hope, that neither of those days shall ever come, either for monasteries to be restored, or for king's line to fail. But the true answer is, that the possibility subsequent, remote or not remote, doth not alter the operation of law for the present. For that should be, as if in case of the rent which you put, you should say, that in regard that the rent may be severed, it should be said to be *in esse* in the mean time, and should be grantable; which is clearly otherwise. And so in the principal case, if that should be, which God of his goodness forbid, "cessante causa cessat effectus," the benefit of naturalization for the time to come is dissolved. But that altereth not the operation of the law; "rebus sic stantibus." And therefore I conclude, that this difference is but a device full of weakness and ignorance; and that there is one and the same reason of naturalizing subjects by descent, and subjects by conquest; and that is the union in the person of the king; and therefore that the case of Scotland is as clear as that of Ireland, and they that grant the one cannot deny the other. And so I conclude the second part, touching confutation.

To proceed therefore to the proofs of our part, your lordships cannot but know many of them must be already spent in the answer which we have made to the objections. For "corruptio unius, generatio alterius," holds as well in arguments, as in nature, the destruction of an objection begets a proof. But nevertheless I will avoid all iteration, lest I should seem either to distract your memories, or to abuse your patience; but will hold myself only to these proofs which stand substantially of themselves, and are not intermixed with matter of confutation. I will therefore prove unto your lordships that the *post-natus* of Scotland is by the law of England natural, and ought so to be adjudged, by three courses of proof.

1. First, upon point of favour of law.

2. Secondly, upon reasons and authority of law.

3. And lastly, upon former precedents and examples.

1. Favour of law, what mean I by that? The law is equal, and favoureth not. It is true, not persons; but things or matters it doth favour. Is it not a common principle, that the law favoureth three things, life, liberty, and dower? And what is the reason of this favour? This, because our law is grounded upon the law of nature. And these three things do flow from the law of nature, preservation of life natural; liberty which every beast or bird seeketh and affecteth naturally; the society of man and wife, whereof dower is the reward natural. It is well, doth the law favour liberty so highly, as a man shall enfranchise his bondman when he thinketh not of it, by granting to him lands or goods; and is the reason of it "quia natura omnes homines erant liberi;" and that servitude or villenage doth cross and abridge the law of nature? And doth

not the self-same reason hold in the present case? For, my lords, by the law of nature all men in the world are naturalized one towards another; they were all made of one lump of earth, of one breath of God; they had the same common parents: nay, at the first they were, as the Scripture showeth, "unius labii," or one language, until the curse; which curse, thanks be to God, our present case is exempted from. It was civil and national laws that brought in these words, and differences, of *civis* and *exterus*, alien and native. And therefore because they tend to abridge the law of nature, the law favoureth not them, but takes them strictly; even as our law hath an excellent rule, That customs of towns and boroughs shall be taken and construed strictly and precisely, because they do abridge and derogate from the law of the land. So by the same reason all national laws whatsoever are to be taken strictly and hardly in any point wherein they abridge, and derogate from the law of nature. Whereupon I conclude that your lordships cannot judge the law for the other side, except the case be *luce clarius*. And if it appear to you but doubtful, as I think no man in his right senses but will yield it to be at least doubtful, then ought your lordships, under your correction be it spoken, to pronounce for us because of the favour of the law. Farthermore, as the law of England must favour naturalization as a branch of the law of nature, so it appears manifestly, that it doth favour it accordingly. For is it not much to make a subject naturalized? By the law of England, it should suffice, either place or parents, if he be born in England it is no matter though his parents be Spaniards, or what you will. On the other side, if he be born of English parents it skilleth not though he be born in Spain, or in any other place in the world. In such sort doth the law of England open her lap to receive in people to be naturalized; which indeed showeth the wisdom and excellent composition of our law, and that it is the law of a warlike and magnanimous nation fit for empire. For look, and you shall find that such kind of estates have been ever liberal in point of naturalization; whereas merchant-like and envious estates have been otherwise.

For the reasons of law joined with authorities, I do first observe to your lordships that our assertion or affirmation is simple and plain: that it sufficeth to naturalization, that there be one king, and that the party be "natus ad fidem regis," agreeable to the definition of Littleton, which is: Alien is he which is born out of the allegiance of our lord the king. They of the other side speak of respects, and *quoad*, and *quatenus*, and such subtilties and distinctions. To maintain therefore our assertion, I will use three kinds of proof.

The first is, that allegiance cannot be applied to the law or kingdom, but to the person of the king, because the allegiance of the subject is more large and spacious, and hath a greater latitude and comprehension than the law or the kingdom. And therefore it cannot be a dependency of that without the which it may of itself subsist.

The second proof which I will use is, that the natural body of the king hath an operation and influence into his body politic, as well as his body politic hath upon his body natural; and therefore that although his body politic of king of England, and his body politic of king of Scotland, be several and distinct, yet nevertheless his natural person, which is one, hath an operation upon both, and createth a privity between them.

And the third proof is the binding text of five several statutes.

For the first of these, I shall make it manifest, that the allegiance is of a greater extent and dimension than laws or kingdom, and cannot consist by the laws merely; because it began before laws it continueth after laws, and it is in vigour where laws are suspended and have not their force. That it is more ancient than law, appeareth by that which was spoken in the beginning by way of inducement, where I did endeavour to demonstrate, that the original age of kingdoms was governed by natural equity, that kings were more ancient than lawgivers, that the first submissions were simple, and upon confidence to the person of kings, and that the allegiance of subjects to hereditary monarchies can no more be said to consist by laws than the obedience of children to parents.

That allegiance continueth after laws, I will only put the case, which was remembered by two great judges in a great assembly, the one of them now with God: which was; That if a king of England should be expulsed his kingdom, and some particular subjects should follow him in flight or exile in foreign parts, and any of them there should conspire his death; that, upon his recovery of his kingdom, such a subject might by the law of England be proceeded with for treason committed and perpetrated at what time he had no kingdom, and in place where the law did not bind.

That allegiance is in vigour and force where the power of law hath a cessation, appeareth notably in time of wars, for "silent leges inter arma." And yet the sovereignty and imperial power of the king is so far from being then extinguished or suspended, as contrariwise it is raised and made more absolute; for then he may proceed by his supreme authority, and martial law, without observing formalities of the laws of his kingdom. And therefore whosoever speaketh of laws, and the king's power by laws, and the subject's obedience or allegiance to laws, speak but of one half of the crown. For Bracton, out of Justinian, doth truly define the crown to consist of laws and arms, power civil and martial, with the latter whereof the law doth not intermeddle: so as where it is much spoken, that the subjects of England are under one law, and the subjects of Scotland are under another law, it is true at Edinburgh or Stirling, or again in London or York; but if Englishmen and Scotsmen meet in an army royal before Calais, I hope, then, they are under one law. So likewise not only in time of war, but in time of peregrination: If a king of England travel or pass through foreign territories, yet the allegiance of his subjects followeth him: as appeareth in that notable case which is reported in Fleta, where one of the

train of king Edward I. as he passed through France from the Holy Land, embezzled some silver plate at Paris, and jurisdiction was demanded of this crime by the French king's counsel at law, *ratione soli*, and demanded likewise by the officers of king Edward *ratione personæ;* and after much solemnity, contestation, and interpleading, it was ruled and determined for king Edward, and the party tried and judged before the knight marshal of the king's house, and hanged after the English law, and execution in St. Germain's meadows. And so much for my first proof.

For my second main proof, that is drawn from the true and legal distinction of the king's several capacities; for they that maintain the contrary opinion do in effect destroy the whole force of the king's natural capacity, as if it were drowned and swallowed up by his politic. And therefore I will first prove to your lordships, that his two capacities are in no sort confounded. And secondly, that as his capacity politic worketh so upon his natural person, as it makes it differ from all other the natural persons of his subjects; so *e converso*, his natural body worketh so upon his politic, as the corporation of the crown utterly differeth from all other corporations within the realm.

For the first, I will vouch you the very words which I find in that notable case of the duchy, where the question was, whether the grants of king Edward VI. for duchy lands should be avoided in point of nonage? The case, as your lordships know well, is reported by Mr. Plowden as the general resolution of all the judges of England, and the king's learned counsel, Rouswell the solicitor only excepted; there I find the said words, Comment. fol. 215. "There is in the king not a body natural alone, nor a body politic alone, but a body natural and politic together:" "corpus corporatum in corpore naturali, et corpus naturale in corpore corporato." The like I find in the great case of the lord Berkley set down by the same reporter, Comment. fol. 234. "Though there be in the king two bodies, and that those two bodies are conjoined, yet are they by no means confounded the one by the other."

Now then to see the mutual and reciprocal intercourse, as I may term it, or influence, or communication of qualities, that these bodies have the one upon the other: the body politic of the crown endueth the natural person of the king with these perfections: That the king in law shall never be said to be within age: that his blood shall never be corrupted: and that if he were attainted before, the very assumption of the crown purgeth it. That the king shall not take but by matter of record, although he take in his natural capacity as upon a gift in tail. That his body in law shall be said to be as it were immortal; for there is no death of the king in law, but a demise, as it is termed: with many other the like privileges and differences from other natural persons too long to rehearse, the rather because the question laboureth not in that part. But on the contrary part let us see what operations the king's natural person hath upon his crown and body politic: of which the chiefest and greatest is, that it causeth the crown to go by descent, which is a thing strange and contrary to the course of all corporations, which evermore take in succession, and not by descent; for no man can show me in all the corporations of England, of what nature soever, whether they consist of one person, or of many; or whether they be temporal or ecclesiastical, any one takes to him and his heirs, but all to him and his successors. And therefore here you may see what a weak course that is, to put cases of bishops and parsons, and the like, and to apply them to the crown. For the king takes to him and his heirs in the manner of a natural body, and the word successors is but superfluous: and where that is used, that is ever duly placed after the word heirs, "the king, his heirs, and successors."

Again, no man can deny but "uxor et filius sunt nomina naturæ." A corporation can have no wife, nor a corporation can have no son: how is it then that it is treason to compass the death of the queen or of the prince? There is no part of the body politic of the crown in either of them, but it is entirely in the king. So likewise we find in the case of the lord Berkley, the question was, whether the statute of 35 Henry VIII. for that part which concerned queen Catharine Par's jointure, were a public act or no, of which the judges ought to take notice, not being pleaded; and judged a public act. So the like question came before your lordship, my lord chancellor, in serjeant Heale's case: whether the statute of 11 Edward III. concerning the entailing of the dukedom of Cornwall to the prince, were a public act or no; and ruled likewise a public act. Why? no man can affirm but these be operations of law, proceeding from the dignity of the natural person of the king; for you shall never find that another corporation whatsoever of a bishop, or master of a college, or mayor of London, worketh any thing in law upon the wife or son of the bishop or the mayor. And to conclude this point, and withal to come near to the case in question, I will show you where the natural person of the king hath not only an operation in the case of his wife and children, but likewise in the case of his subjects, which is the very question in hand. As for example, I put this case: Can a Scotsman, who is a subject to the natural person of the king, and not to the crown of England; can a Scotsman, I say, be an enemy by the law to the subjects of England? Or must he not of necessity, if he should invade England, be a rebel and no enemy, not only as to the king, but as to the subject? Or can any letters of mart or reprisal be granted against a Scotsman that shall spoil an Englishman's goods at sea? And certainly this case doth press exceeding near the principal case; for it proveth plainly, that the natural person of the king hath such a communication of qualities with his body politic, as it makes the subjects of either kingdom stand in another degree of privity one towards the other, than they did before. And so much for the second proof.

For the five acts of parliament which I spoke of, which are concluding to this question.

The first of them is that concerning the banishment of Hugh Spencer in the time of king Edward

II. in which act there is contained the charge and accusation whereupon his exile proceeded. One article of which charge is set down in these words: "Homage and oath of the subject is more by reason of the crown than by reason of the person of the king, so that if the king doth not guide himself by reason in right of the crown, his lieges are bound by their oath to the crown to remove the king."

By which act doth plainly appear the perilous consequence of this distinction concerning the person of the king and the crown. And yet I do acknowledge justly and ingenuously a great difference between that assertion and this, which is now maintained: for it is one thing to make things distinct, another thing to make them separable, "aliud est distinctio, aliud separatio;" and therefore I assure myself, that those that now use and urge that distinction, do as firmly hold, that the subjection to the king's person and to the crown are inseparable, though distinct, as I do. And it is true that the poison of the opinion and assertion of Spencer is like the poison of a scorpion, more in the tail than in the body: for it is the inference that they make, which is, that the king may be deposed or removed, that is the treason and disloyalty of that opinion. But by your leave, the body is never a whit the more wholesome meat for having such a tail belonging to it: therefore we see that is *locus lubricus*, an opinion from which a man may easily slide into an absurdity. But upon this act of parliament I will only note one circumstance more, and so leave it, which may add authority unto it in the opinion of the wisest; and that is, that these Spencers were not ancient nobles or great patriots that were charged and prosecuted by upstarts and favourites: for then it might be said, that it was but the action of some flatterers, who used to extol the power of monarchs to be infinite: but it was contrary; a prosecution of those persons being favourites by the nobility; so as the nobility themselves, which seldom do subscribe to the opinion of an infinite power of monarchs, yet even they could not endure, but their blood did rise to hear that opinion, that subjection is owing to the crown rather than to the person of the king.

The second act of parliament which determined this case, is the act of recognition in the first year of his Majesty, wherein you shall find, that in two several places, the one in the preamble, the other in the body of the act, the parliament doth recognise that these two realms of England and Scotland are under one imperial crown. The parliament doth not say under one monarchy or king, which might refer to the person, but under one imperial crown, which cannot be applied but to the sovereign power of regiment comprehending both kingdoms. And the third act of parliament is the act made in the fourth year of his Majesty's reign, for the abolition of hostile laws: wherein your lordships shall find likewise in two places, that the parliament doth acknowledge, that there is an union of these two kingdoms already begun in his Majesty's person: so as by the declaration of that act, they have not only one king, but there is an union in inception in the kingdoms themselves.

These two are judgments in parliament by way of declaration of law, against which no man can speak. And certainly these are righteous and true judgments to be relied upon; not only for the authority of them, but for the verity of them; for to any that shall well and deeply weigh the effects of law upon this conjunction, it cannot but appear, that although *partes integrales* of the kingdom, as the philosophers speak, such as the laws, the officers, the parliament, are not yet commixed; yet nevertheless there is but one and the self-same fountain of sovereign power depending upon the ancient submission, whereof I spake in the beginning; and in that sense the crowns and the kingdoms are truly said to be united.

And the force of this truth is such, that a grave and learned gentleman, that defended the contrary opinion, did confess thus far: That in ancient times, when monarchies, as he said, were but heaps of people without any exact form of policy; that then naturalization and communication of privileges did follow the person of the monarch; but otherwise since states were reduced to a more exact form; so as thus far we did consent; but still I differ from him in this, that these more exact forms, wrought by time, and custom, and laws, are nevertheless still upon the first foundation, and do serve only to perfect and corroborate the force and bond of the first submission, and in no sort to disannul or destroy it.

And therefore with these two acts do I likewise couple the act of 14 Edward III. which hath been alleged of the other side. For by collating of that act with this former two, the truth of that we affirm will the more evidently appear, according unto the rule of reason: "opposita juxta se posita magis elucescunt." That act of 14 is an act of separation. These two acts formerly recited are acts tending to union. This act is an act that maketh a new law; it is by the words of grant and establish. These two acts declare the common law as it is, being by words of recognition and confession.

And therefore upon the difference of these laws you may substantially ground this position: That the common law of England, upon the adjunction of any kingdom unto the king of England, doth make some degree of union in the crowns and kingdoms themselves; except by a special act of parliament they be dissevered.

Lastly, the fifth act of parliament which I promised, is the act made in the 42 of E. III. cap. 10, which is an express decision of the point in question. The words are, "Item, (upon the petition put into parliament by the commons,) that infants born beyond the seas in the seigniories of Calais, and elsewhere within the lands and seigniories that pertain to our sovereign lord the king beyond the seas, be as able and inheritable of their heritage in England, as other infants born within the realm of England, it is accorded that the common law and the statute formerly made be holden."

Upon this act I infer thus much; first, that such as the petition mentioneth were naturalized, the

practice shows: then if so, it must be either by common law or statute, for so the words report: not by statute, for there is no other statute but 25 E. III. and that extends to the case of birth out of the king's obedience, where the parents are English; ergo it was by the common law, for that only remains. And so by the declaration of this statute at the common law, all infants, born within the lands and seigniories (for I give you the very words again) that pertain to our sovereign lord the king, (it is not said, as are the dominions of England,) are as able and inheritable of their heritage in England, as other infants born within the realm of England." What can be more plain? And so I leave statutes and go to precedents; for though the one do bind more, yet the other sometimes doth satisfy more.

For precedents, in the producing and using of that kind of proof, of all others it behoveth them to be faithfully vouched; for the suppressing or keeping back of a circumstance, may change the case: and therefore I am determined to urge only such precedents, as are without all colour or scruple of exception or objection, even of those objections which I have, to my thinking, fully answered and confuted. This is now, by the providence of God, the fourth time that the line and kings of England have had dominions and seigniories united unto them as patrimonies, and by descent of blood; four unions, I say, there have been inclusive with this last. The first was of Normandy, in the person of William, commonly called the Conqueror. The second was of Gascoigne, and Guienne, and Anjou, in the person of king Henry II.: in his person, I say, though by several titles. The third was of the crown of France, in the person of king Edward III. And the fourth of the kingdom of Scotland, in his Majesty. Of these I will set aside such as by any cavillation can be excepted unto. First I will set aside Normandy, because it will be said, that the difference of countries accruing by conquest, from countries annexed by descent, in matter of communication of privileges, holdeth both ways, as well of the part of the conquering kingdom, as the conquered; and therefore that although Normandy was not a conquest of England, yet England was a conquest of Normandy, and so a communication of privileges between them. Again, set aside France, for that it will be said that although the king had a title in blood and by descent, yet that title was executed and recovered by arms, so as it is a mixed title of conquest and descent, and therefore the precedent not so clear.

There remains then Gascoigne and Anjou, and that precedent likewise I will reduce and abridge to a time, to avoid all question. For it will be said of them also, that after they were lost and recovered *in ore gladii*, that the ancient title of blood was extinct; and that the king was in upon his new title by conquest; and Mr. Walter hath found a book-case in 13 Hen. VI. abridged by Mr. Fitzherbert, in title of *Protection, placito* 56, where a protection was cast, *quia profecturus in Gasconiam* with the earl of Huntingdon, and challenged because it was not a voyage royal; and the justices thereupon required the sight of the commission, which was brought before them, and purported power to pardon felonies and treason, power to coin money, and power to conquer them that resist: whereby Mr. Walter, finding the word *conquest*, collected that the king's title at that time was reputed to be by conquest; wherein I may not omit to give *obiter* that answer, which law and truth provide, namely, that when any king obtaineth by war a country whereunto he hath right by birth, that he is ever in upon his ancient right, not upon his purchase by conquest; and the reason is, that there is as well a judgment and recovery by war and arms, as by law and course of justice. For war is a tribunal-seat, wherein God giveth the judgment, and the trial is by battle, or duel, as in the case of trial of private right: and then it follows, that whosoever cometh in by eviction, comes in his *remitter*; so as there will be no difference in countries whereof the right cometh by descent, whether the possession be obtained peaceably or by war. But yet nevertheless, because I will utterly take away all manner of evasion and subterfuge, I will yet set apart that part of time, in and during the which the subjects of Gascoigne and Guienne might be thought to be subdued by a re-conquest. And therefore I will not meddle with the prior of Shelley's case, though it be an excellent case; because it was in the time of 27 E. III. neither will I meddle with any cases, records, or precedents, in the time of king H. V. or king H. VI. for the same reason; but will hold myself to a portion of time from the first uniting of these provinces in the time of king H. II. until the time of king John, at what time those provinces were lost; and from that time again unto the seventeenth year of the reign of king E. II. at what time the statute of *prærogativa regis* was made, which altered the law in the point in hand.

That both in these times the subjects of Gascoigne, and Guienne, and Anjou, were naturalized for inheritance in England, by the laws of England, I shall manifestly prove; and the proof proceeds, as to the former time, which is our case, in a very high degree *a minore ad majus*, and as we say, *a multo fortiori*. For if this privilege of naturalization remained unto them when the countries were lost, and became subjects in possession to another king, much more did they enjoy it as long as they continued under the king's subjection.

Therefore to open the state of this point. After these provinces were, through the perturbations of the state in the unfortunate time of king John, lost and severed, the principal persons which did adhere unto the French were attainted of treason, and their escheats here in England taken and seized. But the people, that could not resist the tempest when their heads and leaders were revolted, continued inheritable to their possessions in England; and reciprocally the people of England inherited and succeeded to their possessions in Gascoigne, and were both accounted *ad fidem utriusque regis*, until the statute of *prærogativa regis*; wherein the wisdom and justice of the law of England is highly to be commended. For of this law there are two grounds of reason, the one of equity, the other of policy;

that of equity was, because the common people were in no fault, but as the Scripture saith in a like case, "quid fecerunt oves istæ?" It was the cowardice and disloyalty of their governors that deserved punishment, but "what had these sheep done?" And therefore to have punished them, and deprived them of their land and fortunes, had been unjust. That of policy was, because if the law had forthwith, upon the loss of the countries by an accident of time, pronounced the people for aliens, it had been a kind of cession of their right, and a disclaimer in them, and so a greater difficulty to recover them. And therefore we see the statute which altered the law in this point, was made in the time of a weak king, that, as it seemed, despaired ever to recover his right, and therefore thought better to have a little present profit by escheats, than the continuance of his claim, and the countenance of his right, by the admitting of them to enjoy their inheritance as they did before.

The state therefore of this point being thus opened, it resteth to prove our assertion; that they were naturalized; for the clearing whereof I shall need but to read the authorities, they be so direct and pregnant. The first is the very text of the statute of *prærogativa regis*. "Rex habebit escætas de terris Normannorum, cujuscunque feodi fuerint, salvo servitio, quod pertinet ad capitales dominos feodi illius: et hoc similiter intelligendum est, si aliqua hæreditas descendat alicui nato in partibus transmarinus, et cujus antecessores fuerunt ad fidem regis Franciæ, ut tempore regis Johannis, et non ad fidem regis Angliæ, sicut contigit de baronia Monumetæ," etc.

By which statute it appears plainly, that before the time of king John there was no colour of any escheat, because they were the king's subjects in possession, as Scotland now is; but only it determines the law from that time forward.

This statute, if it had in it any obscurity, it is taken away by two lights, the one placed before it, and the other placed after it; both authors of great credit, the one for ancient, the other for late times: the former is Bracton, in his cap. *De exceptionibus, lib.* 5, *fol.* 427, and his words are these: "Est etiam et alia exceptio quæ tenenti competit ex persona petentis, propter defectum nationis, quæ dilatoria est, et non perimit actionem, ut si quis alienigena qui fuerit ad fidem regis Franciæ, et actionem instituat versus aliquem, qui fuerit ad fidem regis Angliæ, tali non respondeatur, saltem donec terræ fuerint communes."

By these words it appeareth, that after the loss of the provinces beyond the seas, the naturalization of the subjects of those provinces was in no sort extinguished, but only was in suspense during the time of war, and no longer; for he saith plainly, that the exception, which we call plea, to the person of an alien, was not peremptory, but only dilatory, that is to say, during the time of war, and until there were peace concluded, which he terms by these words, "donec terræ fuerint communes:" which, though the phrase seem somewhat obscure, is expounded by Bracton himself in his fourth book, fol. 297, to be of peace made and concluded, whereby the inhabitants of England and those provinces might enjoy the profits and fruits of their lands in either place *communiter*, that is, respectively, or as well the one as the other: so as it is clear they were no aliens in right, but only interrupted and debarred of suits in the king's courts in time of war.

The authority after the statute is that of Mr. Stamford, the best expositor of a statute that hath been in our law; a man of reverend judgment and excellent order in his writings; his words are in his exposition upon the branch of the statute which we read before. "By this branch it should appear, that at this time men of Normandy, Gascoigne, Guienne, Anjou, and Britain, were inheritable within this realm, as well as Englishmen, because they were sometimes subjects to the kings of England, and under their dominion, until king John's time, as is aforesaid: and after his time, those men, saving such whose lands were taken away for treason, were still inheritable within this realm till the making of this statute; and in the time of peace between the two kings of England and France, they were answerable within this realm, if they had brought any action for their lands and tenements."

So as by these three authorities, every one so plainly pursuing the other, we conclude that the subjects of Gascoigne, Guienne, Anjou, and the rest, from their first union by descent, until the making of the statute of *prærogativa regis*, were inheritable in England, and to be answered in the king's courts in all actions, except it were in time of war. Nay more, which is *de abundanti*, that when the provinces were lost, and disannexed, and that the king was but king *de jure* over them, and not *de facto*; yet nevertheless the privilege of naturalization continued.

There resteth yet one objection, rather plausible to a popular understanding than any ways forcible in law or learning, which is a difference taken between the kingdom of Scotland and these duchies, for that the one is a kingdom, and the other was not so; and therefore that those provinces being of an inferior nature, did acknowledge our laws and seals, and parliament, which the kingdom of Scotland doth not.

This difference was well given over by Mr. Walter; for it is plain that a kingdom and absolute dukedom, or any other sovereign estate, do differ *honore*, and not *potestate*: for divers duchies and countries that are now, were sometimes kingdoms: and divers kingdoms that are now, were sometimes duchies, or of other inferior style: wherein we need not travel abroad, since we have in our own state so notorious an instance of the country of Ireland, whereof king Hen. VIII. of late time was the first that writ himself king, the former style being lord of Ireland, and no more; and yet kings had the same authority before, that they have had since, and the same nation the same marks of a sovereign state, as their parliaments, their arms, their coins, as they now have: so as this is too superficial an allegation to labour upon.

And if any do conceive that Gascoigne and Guienne were governed by the laws of England:

First, that cannot be in reason; for it is a true ground, That wheresoever any prince's title unto any country is by law, he can never change the laws, for that they create his title: and therefore no doubt those duchies retained their own laws; which if they did, then they could not be subject to the laws of England. And next, again, the fact or practice was otherwise, as appeareth by all consent of story and record: for those duchies continued governed by the civil law, their trials by witnesses, and not by jury, their lands testamentary, and the like.

Now for the colours that some have endeavoured to give, that they should have been subordinate to the government of England; they were partly weak, and partly such as make strongly against them: for as to that, that writs of *Habeas Corpus* under the great seal of England have gone to Gascoigne, it is no manner of proof; for that the king's writs, which are mandatory, and not writs of ordinary justice, may go to his subjects into any foreign parts whatsoever, and under what seal it pleaseth him to use. And as to that, that some acts of parliament have been cited, wherein the parliaments of England have taken upon them to order matters of Gascoigne; if those statutes be well looked into, nothing doth more plainly convince the contrary, for they intermeddle with nothing but that that concerneth either the Englished subjects personally, or the territories of England locally, and never the subjects of Gascoigne; for look upon the statute of 27 Ed. III. cap. 5, there it is said, that there shall be no forestalling of wines. But by whom? Only by English merchants; not a word of the subjects of Gascoigne, and yet no doubt they might be offenders in the same kind.

So in the sixth chapter it is said, that all merchants Gascoignes may safely bring wines into what part it shall please them: here now are the persons of Gascoignes; but then the place whither? Into the realm of England. And in the seventh chapter, that erects the ports of Bourdeaux and Bayonne for the staple towns of wine; the statute ordains, "that if any," but who? "English merchant, or his servants, shall buy or bargain other where, his body shall be arrested by the steward of Gascoigne, or the constable of Bourdeaux;" true, for the officers of England could not catch him in Gascoigne; but what shall become of him, shall he be proceeded with within Gascoigne? No, but he shall be sent over into England into the Tower of London.

And this doth notably disclose the reason of that custom which some have sought to wrest the other way: that custom, I say, whereof a form doth yet remain, that in every parliament the king doth appoint certain committees in the upper house to receive the petitions of Normandy, Guienne, and the rest; which, as by the former statute doth appear, could not be for the ordering of the governments there, but for the liberties and good usage of the subjects of those parts when they came hither, or *vice versa*, for the restraining of the abuses and misdemeanors of our subjects when they went thither.

Wherefore I am now at an end. For us to speak of the mischiefs, I hold it not fit for this place, lest we should seem to bend the laws to policy, and not to take them in their true and natural sense. It is enough that every man knows, that it is true of these two kingdoms, which a good father said of the churches of Christ: "si inseparabiles insuperabiles." Some things I may have forgot, and some things, perhaps, I may forget willingly; for I will not press any opinion or declaration of late time which may prejudice the liberty of this debate; but "ex dictis, et ex non dictis," upon the whole matter I pray judgment for the plaintiff.

A PROPOSITION TO HIS MAJESTY,

BY SIR FRANCIS BACON, KNIGHT,

HIS MAJESTY'S ATTORNEY GENERAL, AND ONE OF HIS PRIVY COUNCIL;

TOUCHING THE COMPILING AND AMENDMENT OF THE LAWS OF ENGLAND.

YOUR Majesty, of your favour, having made me privy-counsellor, and continuing me in the place of your attorney-general, which is more than was these hundred years before, I do not understand it to be, that by putting off the dealing in causes between party and party, I should keep holy-day the more; but that I should dedicate my time to your service with less distraction. Wherefore, in this plentiful accession of time, which I have now gained, I take it to be my duty, not only to speed your commandments and the business of my place; but to meditate and to excogitate of myself, wherein I may best, by my travails, derive your virtues to the good of your people, and return their thanks and increase of love to you again. And after I had thought of many things, I could find, in my judgment, none more proper for your Majesty as a master, nor for me as a workman, than the reducing and recompiling of the laws of England.

Your Majesty is a king blessed with posterity; and these kings sort best with acts of perpetuity, when they do not leave them, instead of children;

but transmit both line and merit to future generations. You are a great master in justice and judicature, and it were pity that the fruit of that virtue should die with you. Your Majesty also reigneth in learned times; the more in regard of your own perfections and patronage of learning; and it hath been the mishap of works of this nature, that the less learned time hath wrought upon the more learned, which now will not be so. As for myself, the law is my profession, to which I am a debtor. Some little helps I may have of other learning, which may give form to matter; and your Majesty hath set me in an eminent place, whereby in a work, which must be the work of many, I may the better have coadjutors. Therefore, not to hold your Majesty with any long preface, in that which I conceive to be nothing less than words, I will proceed to the matter: which matter itself nevertheless requireth somewhat briefly to be said, both of the dignity, and likewise of the safety, and convenience of this work: and then go to the main; that is to say, to show how the work is to be done: which incidently also will best demonstrate, that it is no vast nor speculative thing, but real and feasible. Callisthenes, that followed Alexander's court, and was grown in some displeasure with him, because he could not well brook the Persian adoration; at a supper, which with the Grecians was ever a great part talk, was desired, because he was an eloquent man, to speak of some theme; which he did, and chose for his theme the praise of the Macedonian nation; which though it were but a filling thing to praise men to their faces, yet he did it with such advantage of truth, and avoidance of flattery, and with such life, as the hearers were so ravished with it that they plucked the roses off from their garlands, and threw them upon him; as the manner of applauses then was. Alexander was not pleased with it, and by way of discountenance said, It was easy to be a good orator in a pleasing theme: "But," saith he to Callisthenes, "turn your style, and tell us now of our faults, that we may have the profit, and not you only the praise;" which he presently did with such a force, and so piquantly, that Alexander said, The goodness of his theme had made him eloquent before; but now it was the malice of his heart, that had inspired him.

1. Sir, I shall not fall into either of those two extremes, concerning the laws of England; they commend themselves best to them that understand them; and your Majesty's chief justice of your bench hath in his writings magnified them not without cause: certainly they are wise, they are just and moderate laws; they give to God, they give to Cæsar, they give to the subjects, that which appertaineth. It is true, they are as mixt as our language, compounded of British, Roman, Saxon, Danish, Norman customs. And as our language is so much the richer, so the laws are the more complete: neither doth this attribute less to them, than those that would have them to have stood out the same in all mutations; for no tree is so good first set, as by transplanting.

2. As for the second extreme, I have nothing to do with it by way of taxing the laws. I speak only by way of perfecting them, which is easiest in the best things: for that which is far amiss hardly receiveth amendment; but that which hath already, to that more may be given. Besides, what I shall propound is not to the matter of the laws, but to the manner of their registry, expression, and tradition: so that it giveth them rather light than any new nature. This being so, for the dignity of the work I know scarcely where to find the like: for surely that scale, and those degrees of sovereign honour, are true and rightly marshalled; first the founders of states; then the lawgivers; then the deliverers and saviours after long calamities; then the fathers of their countries, which are just and prudent princes; and lastly, conquerors, which honour is not to be received amongst the rest, except it be where there is an addition of more country and territory to a better government than that was of the conquered. Of these, in my judgment, your Majesty may with more truth and flattery be entitled to the first, because of your uniting of Britain and planting Ireland; both which savour of the founder. That which I now propound to you, may adopt you also into the second: lawgivers have been called "principes perpetui;" because as bishop Gardiner said in a bad sense, that he would be bishop a hundred years after his death, in respect of the long leases he made: so lawgivers are still kings and rulers after their decease, in their laws. But this work, shining so in itself, needs no taper. For the safety and convenience thereof, it is good to consider, and to answer those objections or scruples which may arise or be made against this work.

Obj. I. That it is a thing needless; and that the law, as it now is, is in good estate comparable to any foreign law: and that it is not possible for the wit of man, in respect of the frailty thereof, to provide against the uncertainties and evasions, or omissions of law.

Resp. For the comparison with foreign laws, it is in vain to speak of it; for men will never agree about it. Our lawyers will maintain for our municipal laws; civilians, scholars, travellers, will be of the other opinion.

But certain it is, that our laws, as they now stand, are subject to great uncertainties, and variety of opinions, delays, and evasions: whereof ensueth,

1. That the multiplicity and length of suits is great.

2. That the contentious person is armed, and the honest subject wearied and oppressed.

3. That the judge is more absolute; who, in doubtful cases, hath a greater stroke and liberty.

4. That the chancery courts are not filled, the remedy of law being often obscure and doubtful.

5. That the ignorant lawyer shroudeth his ignorance of law, in that doubts are so frequent and many.

6. That men's assurances of their lands and estates by patents, deeds, wills, are often subject to question, and hollow; and many the like inconveniences.

It is a good rule and direction, for that all laws, "secundum majus et minus," do participate of un-

certainties, that followeth: Mark, whether the doubts that arise, are only in cases not of ordinary experience; or which happen every day. If in the first only, impute it to the frailty of man's foresight, that cannot reach by law to all cases; but if in the latter, be assured there is a fault in the law. Of this I say no more, but that, to give every man his due, had it not been for Sir Edward Coke's Reports, (which though they may have errors, and some peremptory and extrajudicial resolutions more than are warranted; yet they contain infinite good decisions, and rulings over of cases,) the law by this time had been almost like a ship without ballast; for that the cases of modern experience are fled from those that are adjudged and ruled in former time.

But the necessity of this work is yet greater in the statute law. For first, there are a number of insnaring penal laws, which lie upon the subject: and if in bad times they should be awaked and put in execution, would grind them to powder.

There is a learned civilian that expoundeth the curse of the prophet, "Pluet super eos laqueos," of a multitude of penal laws, which are worse than showers of hail or tempest upon cattle, for they fall upon men.

There are some penal laws fit to be retained, but their penalty too great; and it is ever a rule, That any over-great penalty, besides the acerbity of it, deadens the execution of the law.

There is a farther inconvenience of penal laws, obsolete, and out of use; for that it brings a gangrene, neglect, and habit of disobedience upon other wholesome laws, that are fit to be continued in practice and execution; so that our laws endure the torment of Mezentius:

"The living die in the arms of the dead."

Lastly, There is such an accumulation of statutes concerning one matter, and they so cross and intricate, as the certainty of law is lost in the heap; as your Majesty had experience last day upon the point, Whether the incendiary of Newmarket should have the benefit of his clergy?

Obj. II. That it is a great innovation; and innovations are dangerous beyond foresight.

Resp. All purgings and medicines, either in the civil or natural body, are innovations: so as that argument is a common place against all noble reformations. But the truth is, that this work ought not to be termed or held for any innovation in the suspected sense. For those are the innovations which are quarrelled and spoken against, that concern the consciences, estates, and fortunes of particular persons; but this of general ordinance pricketh not particulars, but passeth *sine strepitu*. Besides, it is on the favourable part; for it easeth, it presseth not: and lastly, it is rather matter of order and explanation than of alteration. Neither is this without precedent in former governments.

The Romans, by their Decemvirs, did make their twelve tables, but that was indeed a new enacting or constituting of laws, not a registering or recompiling; and they were made out of the laws of the Grecians, not out of their own customs.

In Athens they had Sexviri, which were standing commissioners to watch and to discern what laws waxed improper for the time; and what new law did, in any branch, cross a former law, and so *ex officio*, propound their repeals.

King Lewis XI. of France had it in his intention to have made one perfect and uniform law, out of the civil law Roman, and the provisional customs of France.

Justinian the emperor, by commissions directed to divers persons learned in the laws, reduced the Roman laws from vastness of volume, and a labyrinth of uncertainties, unto that course of the civil law which is now in use. I find here at home of late years, that king Henry VIII. in the twenty-seventh of his reign, was authorized by parliament to nominate thirty-two commissioners, part ecclesiastical, part temporal, to purge the canon law, and to make it agreeable to the law of God, and the law of the realm; and the same was revived in the fourth year of Edward VI. though neither took effect.

For the laws of Lycurgus, Solon, Minos, and others of ancient time, they are not the worse, because grammar scholars speak of them: but things too ancient wax children with us again.

Edgar, the Saxon king, collated the laws of this kingdom, and gave them the strength of a faggot bound, which formerly were dispersed.

The statutes of king Edward the first were fundamental. But I doubt, I err in producing so many examples: for, as Cicero saith to Cæsar, so may I say to your Majesty; "Nil vulgare te dignum videri possit."

Obj. III. In this purging of the course of the common laws and statutes much good may be taken away.

Resp. In all purging, some good humours may pass away; but that is largely recompensed by lightening the body of much bad.

Obj. IV. Labour were better bestowed, in bringing the common laws of England to a text law, as the statutes are, and setting both of them down in method and by titles.

Resp. It is too long a business to debate, whether "lex scripta, aut non scripta," a text law, or customs well registered, with received and approved grounds and maxims, and acts and resolutions judicial, from time to time duly entered and reported, be the better form of declaring and authorizing laws. It was the principal reason or oracle of Lycurgus, that none of his laws should be written. Customs are laws written in living tables, and some traditions the church doth not disauthorize. In all sciences they are the soundest, that keep close to particulars; and, sure I am, there are more doubts that rise upon our statutes, which are a text law, than upon the common law, which is no text law. But, howsoever that question be determined, I dare not advise to cast the law into a new mold. The work, which I propound, tendeth to pruning and grafting the law, and not to plowing up and planting it again; for such a remove I should hold indeed for a perilous innovation.

Obj. V. It will turn the judges, counsellors of law, and students of law to school again, and make

them to seek what they shall hold and advise for law; and it will impose a new charge upon all lawyers to furnish themselves with new books of law.

Resp. For the former of these, touching the new labour, it is true it would follow, if the law were new molded into a text law: for then men must be new to begin, and that is one of the reasons for which I disallow that course.

But in the way that I shall now propound, the entire body and substance of law shall remain, only discharged of idle and unprofitable or hurtful matter; and illustrated by order and other helps, towards the better understanding of it and judgment thereupon.

For the latter, touching the new change, it is not worthy the speaking of in a matter of so high importance; it might have been used of the new translation of the Bible, and such like works. Books must follow sciences, and not sciences books.

The work itself; and the way to reduce and recompile the laws of England.

This work is to be done, to use some few words, which is the language of action and effect, in this manner.

It consisteth of two parts; the digest or recompiling of the common laws, and that of the statutes.

In the first of these, three things are to be done:

1. The compiling of a book "De antiquitatibus juris."

2. The reducing or perfecting of the course or corps of the common laws.

3. The composing of certain introductive and auxiliary books touching the study of the laws.

For the first of these, all ancient records in your Tower, or elsewhere, containing acts of parliament, letters patents, commissions, and judgments, and the like, are to be searched, perused, and weighed: and out of these are to be selected those that are of most worth and weight, and in order of time, not of titles, for the more conformity with the year-books, to be set down and registered, rarely in *hæc verba:* but summed with judgment, not omitting any material part; these are to be used for reverend precedents, but not for binding authorities.

For the second, which is the main, there is to be made a perfect course of the law *in serie temporis*, or year-books, as we call them, from Edward the First to this day: in the compiling of this course of law, or year-books, the points following are to be observed.

First, All cases which are at this day clearly no law, but constantly ruled to the contrary, are to be left out; they do but fill the volumes, and season the wits of students in a contrary sense of law. And so likewise all cases, wherein that is solemnly and long debated, whereof there is now no question at all, are to be entered as judgments only, and resolutions, but without the arguments, which are now become but frivolous: yet for the observation of the deeper sort of lawyers, that they may see how the law hath altered, out of which they may pick sometimes good use, I do advise, that upon the first in time of those obsolete cases there were a *memorandum* set, that at that the law was thus taken, until such a time, &c.

Secondly, "Homonymiæ," as Justinian calleth them, that is, cases merely of iteration and repetition, are to be purged away: and the cases of identity, which are best reported and argued, to be retained instead of the rest; the judgments nevertheless to be set down, every one in time as they are, but with a quotation or reference to the case where the point is argued at large: but if the case consist part of repetition, part of new matter, the repetition is only to be omitted.

Thirdly, As to the "Antinomiæ," cases judged to the contrary, it were too great a trust to refer to the judgment of the composers of this work, to decide the law either way, except there be a current stream of judgments of later times; and then I reckon the contrary cases amongst cases obsolete, of which I have spoken before: nevertheless this diligence would be used, that such cases of contradiction be specially noted and collected, to the end those doubts, that have been so long militant, may either, by assembling all the judges in the exchequer chamber, or by parliament, be put into certainty. For to do it, by bringing them in question under feigned parties, is to be disliked. "Nihil habeat forum ex scena."

Fourthly, All idle queries, which are but seminaries of doubts, and uncertainties, are to be left out and omitted, and no queries set down, but of great doubts well debated, and left undecided for difficulty; but no doubting or upstarting queries, which though they be touched in argument for explanation, yet were better to die than to be put into the books.

Lastly, Cases reported with too great prolixity would be drawn into a more compendious report; not in the nature of an abridgement, but tautologies and impertinences to be cut off: as for misprinting, and insensible reporting, which many times confound the students, that will be *obiter* amended; but more principally, if there be any thing in the report which is not well warranted by the record, that is also to be rectified: the course being thus compiled, then it resteth but for your Majesty to appoint some grave and sound lawyers, with some honourable stipend, to be * reporters for the time to come, and then this is settled for all times.

For the auxiliary books that conduce to the study and science of the law, they are three: Institutions; a treatise "De regulis juris;" and a better book "De verborum significationibus," or terms of the law. For the Institutions, I know well there be books of introductions, wherewith students begin, of good worth, especially Littleton and Fitzherbert's "Natura brevium;" but they are no ways of the nature of an institution; the office whereof is to be a key and general preparation to the reading of the course. And principally it ought to have two properties; the one a perspicuous and clear

* This constitution of reporters I obtained of the king, after I was chancellor; and there are two appointed with £100 a year a piece stipend.

order or method; and the other, an universal latitude or comprehension, that the students may have a little prenotion of every thing, like a model towards a great building. For the treatise "De regulis juris," I hold it, of all other things, the most important to the health, as I may term it, and good institutions of any laws: it is indeed like the ballast of a ship, to keep all upright and stable; but I have seen little in this kind, either in our laws or other laws, that satisfieth me. The naked rule or maxim doth not the effect: it must be made useful by good differences, ampliations, and limitations, warranted by good authorities; and this not by raising up of quotations and references, but by discourse and deducement in a just tractate. In this I have travelled myself, at the first more cursorily,* since with more diligence, and will go on with it, if God and your Majesty will give me leave. And I do assure your Majesty, I am in good hope, that when Sir Edward Coke's Reports, and my rules and decisions, shall come to posterity, there will be, whatsoever is now thought, question, who was the greater lawyer? For the books Of the terms of the law, there is a poor one, but I wish a diligent one, wherein should be comprised not only the exposition of the terms of law, but of the words of all ancient records and precedents.

* See above, p. 548–570.

For the Abridgements, I could wish, if it were possible, that none might use them, but such as had read the course first, that they might serve for repertories to learned lawyers, and not to make a lawyer in haste: but since that cannot be, I wish there were a good abridgement composed of the two that are extant, and in better order. So much for the common law.

Statute law. For the reforming and recompiling of the statute law, it consisteth of four parts.

1. The first, to discharge the books of those statutes, where the case, by alteration of time, is vanished; as Lombards, Jews, Gauls, half-pence, &c. Those may nevertheless remain in the libraries for antiquities, but no reprinting of them. The like of statutes long since expired and clearly repealed; for if the repeal be doubtful, it must be so propounded to the parliament.

2. The next is, to repeal all statutes which are sleeping and not of use, but yet snaring and in force; in some of those it will perhaps be requisite to substitute some more reasonable law, instead of them, agreeable to the time; in others a simple repeal may suffice.

3. The third, that the grievousness of the penalty in many statutes be mitigated, though the ordinance stand.

4. The last is, the reducing of concurrent statutes, heaped one upon another, to one clear and uniform law. Towards this there hath been already, upon my motion, and your Majesty's direction, a great deal of good pains taken: my lord Hobart, myself, serjeant Finch, Mr. Heneage Finch, Mr. Noye, Mr. Hackwell, and others, whose labours being of a great bulk, it is not fit now to trouble your Majesty with any farther particularity therein; only by this you may perceive the work is already advanced: but because this part of the work, which concerneth the statute laws, must of necessity come to parliament, and the houses will best like that which themselves guide, and the persons that themselves employ, the way were to imitate the precedent of the commissioners for the canon laws in 27 Hen. VIII. and 4 Edw. VI. and the commissioners for the union of the two realms, *primo* of your Majesty, and so to have the commissioners named by both houses; but not with a precedent power to conclude, but only to prepare and propound to parliament.

This is the best way, I conceive, to accomplish this excellent work, of honour to your Majesty's times and of good to all times; which I submit to your Majesty's better judgment.

AN OFFER TO KING JAMES

OF A DIGEST TO BE MADE

OF THE LAWS OF ENGLAND.

MOST EXCELLENT SOVEREIGN,

Amongst the degrees and acts of sovereign, or rather heroical honour, the first or second is the person and merit of a lawgiver. Princes that govern well are fathers of the people: but if a father breed his son well, or allow him well while he liveth, but leave him nothing at his death, whereby both he and his children, and his children's children, may be the better, surely the care and piety of a father is not in him complete. So kings, if they make a portion of an age happy by their good government, yet if they do not make testaments, as God Almighty doth, whereby a perpetuity of good may descend to their country, they are but mortal and transitory benefactors. Domitian, a few days before he died,

dreamed that a golden head did rise upon the nape of his neck; which was truly performed in the golden age that followed his times for five successions. But kings, by giving their subjects good laws, may, if they will, in their own time, join and graft this golden head upon their own necks after their deaths. Nay, they may make Nabuchodonozor's image of monarchy golden from head to foot. And if any of the meaner sort of politics, that are sighted only to see the worst of things, think, that laws are but cobwebs, and that good princes will do well without them, and bad will not stand much upon them; the discourse is neither good nor wise. For certain it is, that good laws are some bridle to bad princes, and as a very wall about government. And if tyrants sometimes make a breach into them, yet they mollify even tyranny itself, as Solon's laws did the tyranny of Pisistratus: and then commonly they get up again, upon the first advantage of better times. Other means to perpetuate the memory and merits of sovereign princes are inferior to this. Buildings of temples, tombs, palaces, theatres, and the like, are honourable things, and look big upon posterity: but Constantine the Great gave the name well to those works, when he used to call Trajan, that was a great builder, Parietaria, wall-flower, because his name was upon so many walls: so if that be the matter, that a king would turn wall-flower, or pillitory of the wall, with cost he may. Adrian's vein was better, for his mind was to wrestle a fall with time; and being a great progressor through all the Roman empire, whenever he found any decays of bridges, or highways, or cuts of rivers and sewers, or walls, or banks, or the like, he gave substantial order for their repair with the better. He gave also multitudes of charters and liberties for the comfort of corporations and companies in decay: so that his bounty did strive with the ruins of time. But yet this, though it were an excellent disposition, went but in effect to the cases and shells of a commonwealth. It was nothing to virtue or vice. A bad man might indifferently take the benefit and ease of his ways and bridges, as well as a good; and bad people might purchase good charters. Surely the better works of perpetuity in princes are those, that wash the inside of the cup; such as are foundations of colleges and lectures for learning and education of youth; likewise foundations and institutions of orders and fraternities, for nobleness, enterprise, and obedience, and the like. But yet these also are but like plantations of orchards and gardens, in plots and spots of ground here and there; they do not till over the whole kingdom, and make it fruitful, as doth the establishing of good laws and ordinances; which makes a whole nation to be as a well-ordered college or foundation.

This kind of work, in the memory of times, is rare enough to show it excellent: and yet not so rare, as to make it suspected for impossible, inconvenient, or unsafe. Moses, that gave laws to the Hebrews, because he was the scribe of God himself, is fitter to be named for honour's sake to other lawgivers, than to be numbered or ranked amongst them. Minos, Lycurgus, and Solon, are examples for themes of grammar scholars. For ancient personages and characters now-a-days use to wax children again; though that parable of Pindarus be true, the best thing is water: for common and trivial things are many times the best, and rather despised upon pride, because they are vulgar, than upon cause or use. Certain it is, that the laws of those three lawgivers had great prerogatives. The first of fame, because they were the pattern amongst the Grecians: the second of lasting, for they continued longest without alteration: the third, of a spirit of reviver, to be often oppressed, and often restored.

Amongst the seven kings of Rome four were lawgivers: for it is most true, that a discourser of Italy saith; "there was never state so well swaddled in the infancy, as the Roman was by the virtue of their first kings; which was a principal cause of the wonderful growth of that state in after-times."

The Decemvirs' laws were laws upon laws, not the original; for they grafted laws of Græcia upon the Roman stock of laws and customs: but such was their success, as the twelve tables which they compiled were the main body of the laws which framed and wielded the great body of that estate. These lasted a long time, with some supplementals and the pretorian edicts *in albo*; which were, in respect of laws, as writing tables in respect of brass; the one to be put in and out, as the other is permanent. Lucius Cornelius Sylla reformed the laws of Rome: for that man had three singularities, which never tyrant had but he; that he was a lawgiver, that he took part with the nobility, and that he turned private man, not upon fear, but upon confidence.

Cæsar long after desired to imitate him only in the first, for otherwise he relied upon new men; and for resigning his power Seneca describeth him right; "Cæsar gladium cito condidit, nunquam posuit," "Cæsar soon sheathed his sword, but never put it off." And himself took it upon him, saying in scorn of Sylla's resignation; "Sylla nescivit literas, dictare non potuit," "Sylla knew no letters, he could not dictate." But for the part of a lawgiver, Cicero giveth him the attribute; "Cæsar, si ab eo quæreretur, quid egisset in toga; leges se respondisset multas et præclaras tulisse;" "If you had asked Cæsar what he did in the gown, he would have answered, that he made many excellent laws." His nephew Augustus did tread the same steps, but with deeper print, because of his long reign in peace; whereof one of the poets of his time saith,

> "Pace data terris, animum ad civilia vertit
> Jura suum; legesque tulit justissimus auctor."

From that time there was such a race of wit and authority, between the commentaries and decisions of the lawyers, and the edicts of the emperors, as both law and lawyers were out of breath. Whereupon Justinian in the end recompiled both, and made a body of laws such as might be wielded, which himself calleth gloriously, and yet not above truth, the edifice or structure of a sacred temple of justice, built indeed out of the former ruins of books, as materials, and some novel constitutions of his own.

In Athens they had *Sexviri*, as Æschines observ-

eth, which were standing commissioners, who did watch to discern what laws waxed improper for the times, and what new law did in any branch cross a former law, and so *ex officio* propounded their repeal.

King Edgar collected the laws of this kingdom, and gave them the strength of a faggot bound, which formerly were dispersed; which was more glory to him, than his sailing about this island with a potent fleet: for that was, as the Scripture saith, "via navis in mari," "the way of a ship in the sea;" it vanished, but this lasteth. Alphonso the wise, the ninth of that name, king of Castile, compiled the digest of the laws of Spain, entitled the "Siete Partidas;" an excellent work, which he finished in seven years. And as Tacitus noteth well, that the capitol, though built in the beginnings of Rome, yet was fit for the great monarchy that came after; so that building of laws sufficeth the greatness of the empire of Spain, which since hath ensued.

Lewis XI. had it in his mind, though he performed it not, to have made one constant law of France, extracted out of the civil Roman law, and the customs of provinces which are various, and the king's edicts, which with the French are statutes. Surely he might have done well, if, like as he brought the crown, as he said himself, from Page, so he had brought his people from Lackey; not to run up and down for their laws to the civil law, and the ordinances and the customs and the discretions of courts, and discourses of philosophers, as they use to do.

King Henry VIII. in the twenty-seventh year of his reign, was authorized by parliament to nominate thirty-two commissioners, part ecclesiastical, and part temporal, to purge the canon law, and to make it agreeable to the law of God, and the law of the land; but it took not effect: for the acts of that king were commonly rather proffers and fames, than either well grounded, or well pursued: but I doubt I err in producing so many examples. For as Cicero said to Cæsar, so I may say to your Majesty, "Nil vulgare te dignum videri possit." Though indeed this well understood is far from vulgar: for that the laws of the most kingdoms and states have been like buildings of many pieces, and patched up from time to time according to occasions, without frame or model.

Now for the laws of England, if I shall speak my opinion of them without partiality either to my profession or country, for the matter and nature of them, I hold them wise, just, and moderate laws; they give to God, they give to Cæsar, they give to the subject, what appertaineth. It is true they are as mixt as our language, compounded of British, Roman, Saxon, Danish, Norman customs: and surely as our language is thereby so much the richer, so our laws are likewise by that mixture the more complete.

Neither doth this attribute less to them, than those that would have them to have stood out the same in all mutations. For no tree is so good first set, as by transplanting and grafting. I remember what happened to Callisthenes, that followed Alexander's court, and was grown into some displeasure with him, because he could not well brook the Persian adoration. At a supper, which with the Grecians was a great part talk, he was desired, the king being present, because he was an eloquent man, to speak of some theme, which he did; and chose for his theme, the praise of the Macedonian nation, which though it were but a filling thing to praise men to their faces, yet he performed it with such advantage of truth, and avoidance of flattery, and with such life, as was much applauded by the hearers. The king was the less pleased with it, not loving the man, and by way of discountenance said, It was easy to be a good orator in a pleasing theme. "But," saith he to him, "turn your style, and tell us now of our faults, that we may have the profit, and not you the praise only;" which he presently did with such quickness, that Alexander said, That malice made him eloquent then, as the theme had done before. I shall not fall into either of these extremes, in this subject of the laws of England; I have commended them before for the matter, but surely they ask much amendment for the form; which to reduce and perfect, I hold to be one of the greatest dowries that can be conferred upon this kingdom: which work, for the excellency, as it is worthy your Majesty's act and times, so it hath some circumstance of propriety agreeable to your person. God hath blessed your Majesty with posterity, and I am not of opinion that kings that are barren are fittest to supply perpetuity of generations by perpetuity of noble acts; but contrariwise, that they that have posterity are the more interested in the care of future times; that as well their progeny, as their people, may participate of their merit.

Your Majesty is a great master in justice and judicature, and it were pity the fruit of that your virtue should not be transmitted to the ages to come. Your Majesty also reigneth in learned times, the more, no doubt, in regard of your own perfection in learning, and your patronage thereof. And it hath been the mishap of works of this nature, that the less learned time hath, sometimes, wrought upon the more learned, which now will not be so. As for myself, the law was my profession, to which I am a debtor: some little helps I have of other arts, which may give form to matter: and I have now, by God's merciful chastisement, and by his special providence, time and leisure to put my talent, or half talent, or what it is, to such exchanges as may perhaps exceed the interests of an active life. Therefore, as in the beginning of my troubles I made offer to your Majesty to take pains in the story of England, and in compiling a method and digest of your laws, so have I performed the first, which rested but upon myself, in some part: and I do in all humbleness renew the offer of this latter, which will require help and assistance, to your Majesty, if it shall stand with your good pleasure to employ my service therein.

THE JUDICIAL CHARGE

OF

SIR FRANCIS BACON, KNIGHT,

THE KING'S SOLICITOR,

UPON THE COMMISSION OF OYER AND TERMINER HELD FOR THE

VERGE OF THE COURT.

"Lex vitiorum emendatrix, virtutum commendatrix est."

You are to know, and consider well, the duty and service to which you are called, and whereupon you are by your oath charged. It is the happy estate and condition of the subject of this realm of England, that he is not to be impeached in his life, lands, or goods, by flying rumours, or wandering fames and reports, or secret and privy inquisitions; but by the oath and presentment of men of honest condition, in the face of justice. But this happy estate of the subject will turn to hurt and inconvenience, if those that hold that part which you are now to perform shall be negligent and remiss in doing their duty; for as of two evils it were better men's doings were looked into over-strictly and severely, than that there should be a notorious impunity of malefactors; as was well and wisely said of ancient time, "a man were better live where nothing is lawful, than where all things are lawful." This therefore rests in your care and conscience, forasmuch as at you justice begins, and the law cannot pursue and chase offenders to their deserved fall, except you first put them up and discover them, whereby they may be brought to answer; for your verdict is not concluding to condemn, but it is necessary to charge, and without it the court cannot proceed to condemn.

Considering therefore that ye are the eye of justice, ye ought to be single, without partial affection; watchful, not asleep, or false asleep in winking at offenders, and sharp-sighted to proceed with understanding and discretion: for, in a word, if you shall not present unto the court all such offences, as shall appear unto you either by evidence given in, or otherwise, mark what I say, of your own knowledge, which have been committed within the verge, which is as it were the limits of your survey, but shall smother and conceal any offence willingly, then the guiltiness of others will cleave to your consciences before God; and besides, you are answerable in some degree to the king and his law for such your default and suppression; and therefore take good regard unto it, you are to serve the king and his people, you are to keep and observe your oath, you are to acquit yourselves.

But there is yet more cause why you should take more special regard to your presentments, than any other grand juries within the counties of this kingdom at large: for as it is a nearer degree and approach unto the king, which is the fountain of justice and government, to be the king's servant, than to be the king's subject; so this commission ordained for the king's servants and household, ought in the execution of justice to be exemplary unto other places. David saith, who was a king, "The wicked man shall not abide in my house;" as taking knowledge that it was impossible for kings to extend their care, to banish wickedness over all their land or empire; but yet at least they ought to undertake to God for their house.

We see further, that the law doth so esteem the dignity of the king's settled mansion-house, as it hath laid unto it a plot of twelve miles round, which we call the verge, to be subject to a special and exempted jurisdiction depending upon his person and great officers. This is a half-pace or carpet spread about the king's chair of estate, which therefore ought to be cleared and voided more than other places of the kingdom; for if offences should be shrouded under the king's wings, what hope is there of discipline and good justice in more remote parts? We see the sun, when it is at the brightest, there may be perhaps a bank of clouds in the north, or the west, or remote regions, but near his body few or none; for where the king cometh, there should come peace and order, and an awe and reverence in men's hearts.

And this jurisdiction was in ancient time executed, and since by statute ratified, by the lord steward with great ceremony, in the nature of a peculiar king's bench for the verge; for it was thought a kind of eclipsing to the king's honour, that where the king was, any justice should be sought but immediately from his own officers. But in respect that office was oft void, this commission hath succeeded, which change I do not dislike; for though it hath less state, yet it hath more strength legally: therefore I say, you that are a jury of the verge, should lead and give a pattern unto others in the care and conscience of your presentments.

Articuli super Chartas, c. 3. 13 R. 2. c. 3. 33 H. 8. c. 12.

Concerning the particular points and articles whereof you shall inquire, I will help your memory and mine own with order; neither will I load you, or trouble myself, with every branch of several offences, but stand upon those that are principal and most in use: the offences therefore that you are to present are of four natures.

I. The first, such as concern God and his church.

II. The second, such as concern the king and his state.

III. The third, such as concern the king's people, and are capital.

IV. The fourth, such as concern the king's people, not capital.

God and his church.

The service of Almighty God, upon whose blessing the peace, safety, and good estate of king and kingdom doth depend, may be violated, and God dishonoured in three manners, by profanation, by contempt, and by division, or breach of unity.

Profanations. 1 E. 6. c. 1. et 1 El. c. 2. 1 M. c. 3. 5 E. 6. c. 4. 13 E. 1. Stat. of Winton.

First, if any man hath depraved or abused in word or deed the blessed sacrament, or disturbed the preacher or congregation in the time of divine service; or if any have maliciously stricken with weapon, or drawn weapon in any church or church-yard; or if any fair or market have been kept in any church-yard; these are profanations within the purview of several statutes, and those you are to present: for holy things, actions, times, and sacred places, are to be preserved in reverence and divine respect.

Contempts, namely, Recusancy.

For contempts of our church and service, they are comprehended in that known name, which too many, if it pleased God, bear, recusancy; which offence hath many branches and dependencies; the wife-recusant, she tempts; the church-papist, he feeds and relieves; the corrupt schoolmaster, he soweth tares; the dissembler, he conformeth and doth not communicate. Therefore if any person, man or woman, wife or sole, above the age of sixteen years, not having some lawful excuse, have not repaired to church according to the several statutes; the one, for the weekly, the other, for the monthly repair, you are to present both the offence and the time how long. Again, such as maintain, relieve, keep in service of livery, recusants, though themselves be none, you are likewise to present; for these be like the roots of nettles, which sting not themselves, but bear and maintain the stinging leaves: so if any that keepeth a schoolmaster that comes not to church, or is not allowed by the bishop, for that infection may spread far: so such recusants as have been convicted and conformed, and have not received the sacrament once a year, for that is the touch-stone of their true conversion: and of these offences of recusancy take you special regard. Twelve miles from court is no region for such subjects. In the name of God, why should not twelve miles about the king's chair be as free from papist-recusants, as twelve miles from the city of Rome, the pope's chair, is from protestants? There be hypocrites and atheists, and so I fear there be amongst us; but no open contempt of their religion is endured. If there must be recusants, it were better they lurked in the country, than here in the bosom of the kingdom.

Breach of unity.

For matter of division and breach of unity, it is not without a mystery that Christ's coat had no seam, nor no more should the church, if it were possible. Therefore if any minister refuse to use the book of Common-prayer, or wilfully swerveth in divine service from that book; or if any person whatsoever do scandalize that book, and speak openly and maliciously in derogation of it; such men do but make a rent in the garment, and such are by you to be inquired of. But much more, such as are not only differing, but in a sort opposite unto it, by using a superstitious and corrupted form of divine service; I mean, such as say or hear mass.

These offences which I have recited to you, are against the service and worship of God: there remain two which likewise pertain to the dishonour of God; the one is, the abuse of his name by perjury; the other is, the adhering to God's declared enemies, evil and outcast spirits, by conjuration and witchcraft.

Perjury.

For perjury, it is hard to say whether it be more odious to God, or pernicious to man; for an oath, saith the apostle, is the end of controversies; if therefore that boundary of suits be taken away or mis-set, where shall be the end? Therefore you are to inquire of wilful and corrupt perjury in any of the king's courts, yea, of court-barons and the like, and that as well of the actors, as of the procurer and suborner.

Conjuration and witchcraft.

For witchcraft, by the former law it was not death, except it were actual and gross invocation of evil spirits, or making covenant with them, or taking away life by witchcraft: but now by an act in his Majesty's times, charms and sorceries in certain cases of procuring of unlawful love or bodily hurt, and some others, are made felony the second offence; the first being imprisonment and pillory.

1 Jac. c. 1, 2.

Supremacy placed with offences of state.

And here I do conclude my first part concerning religion and ecclesiastical causes: wherein it may be thought that I do forget matters of supremacy, or of Jesuits, and seminaries, and the like, which are usually sorted with causes of religion: but I must have leave to direct myself according to mine own persuasion, which is, that, whatsoever hath been said or written on the other side, all the late statutes, which inflict capital punishment upon extollers of the pope's supremacy, deniers of the king's supremacy, Jesuits and seminaries, and other offenders of that nature, have for their principal scope, not the punishment of the error of conscience, but the repressing of the peril of the estate. This is the true spirit of these laws, and therefore I will place them under my second division, which is of offences that concern the king and his estate, to which now I come.

The king and the state.

These offences therefore respect either the safety of the king's person,

or the safety of his estate and kingdom, which though they cannot be dissevered in deed, yet they may be distinguished in speech. First then, if any have conspired against the life of the king, which God have in his custody! or of the queen's Majesty, or of the most noble prince their eldest son; the very compassing and inward imagination thereof is high treason, if it can be proved by any fact that is overt: for in the case of so sudden, dark, and pernicious, and peremptory attempts, it were too late for the law to take a blow before it gives; and this high treason of all other is most heinous, of which you shall inquire, though I hope there be no cause.

The king's person.

There is another capital offence that hath an affinity with this, whereof you here within the verge are most properly to inquire; the king's privy council are as the principal watch over the safety of the king, so as their safety is a portion of his: if therefore any of the king's servants within his cheque-roll, for to them only the law extends, have conspired the death of any the king's privy council, this is felony, and thereof you shall inquire.

Privy council.

And since we are now in that branch of the king's person, I will speak also of the king's person by representation, and the treasons which touch the same.

Representation of his person.

The king's person and authority is represented in three things; in his seals, in his moneys, and in his principal magistrates: if therefore any have counterfeited the king's great seal, privy seal, or seal manual; or counterfeited, clipped, or scaled his moneys, or other moneys current, this is high treason; so is it to kill certain great officers or judges executing their office.

We will now pass to those treasons which concern the safety of the king's estate, which are of three kinds, answering to three perils which may happen to an estate; these perils are, foreign invasion, open rebellion and sedition, and privy practice to alienate and estrange the hearts of the subjects, and to prepare them either to adhere to enemies, or to burst out into tumults and commotions of themselves.

The estate.

Therefore if any person have solicited or procured any invasion from foreigners; or if any have combined to raise and stir the people to rebellion within the realm; these are high treasons, tending to the overthrow of the estate of this commonwealth, and to be inquired of.

Invasion and rebellion.

The third part of practice hath divers branches, but one principal root in these our times, which is the vast and over-spreading ambition and usurpation of the see of Rome; for the pope of Rome is, according to his late challenges and pretences, become a competitor and corrival with the king, for the hearts and obediences of the king's subjects: he stands for it, he sends over his love-tokens and brokers, under colour of conscience, to steal and win away the hearts and allegiances of the people, and to make them as fuel ready to take fire upon any his commandments.

Alienation of hearts.

This is that yoke which this kingdom hath happily cast off, even at such time when the popish religion was nevertheless continued, and that divers states, which are the pope's vassals, do likewise begin to shake off.

If therefore any person have maintained and extolled the usurped authority of the bishop of Rome within the king's dominions, by writing, preaching, or deed, advisedly, directly, and maliciously; or if any person have published or put in ure any of the pope's bulls or instruments of absolution; or if any person have withdrawn, and reconciled, any of the king's subjects from their obedience, or been withdrawn and reconciled; or if any subject have refused the second time to take the oath of supremacy lawfully tendered; or if any Jesuit or seminary come and abide within this realm; these are by several statutes made cases of high treason, the law accounting these things as preparatives, and the first wheels and secret motions of seditions and revolts from the king's obedience. Of these you are to inquire, both of the actors and of their abettors, comforters, receivers, maintainers, and concealers, which in some cases are traitors, as well as the principal, in some cases in *præmunire*, in some other in misprision of treason, which I will not stand to distinguish, and in some other, felony; as namely, that of the receiving and relieving of Jesuits and priests; the bringing in and dispersing of *Agnus Dei's*, crosses, pictures, or such trash, is likewise *præmunire*: and so is the denial to take the oath of supremacy the first time.

Supremacy, treason, &c. 5 Eliz. c. 1. Jesuits. 3 Jac. cap. 4, et 5.

28 El. c. 1.

13 El. c. 2. 23 El. c. 1.

Agnus Dei's.

And because in the disposition of a state to troubles and perturbations, military men are most tickle and dangerous; therefore if any of the king's subjects go over to serve in foreign parts, and do not first endure the touch, that is, take the oath of allegiance; or if he have borne office in any army, and do not enter into bond with sureties as is prescribed, this is made felony; and such as you shall inquire.

Military men.

Lastly, because the vulgar people are sometimes led with vain and fond prophecies; if any such shall be published, to the end to move stirs or tumults, this is not felony, but punished by a year's imprisonment and loss of goods; and of this also shall you inquire.

Prophecies.

You shall likewise understand that the escape of any prisoner committed for treason, is treason; whereof you are likewise to inquire.

Now come I to the third part of my division; that is, those offences which concern the king's people, and are capital; which nevertheless the law terms offences against the crown, in respect of the protection that the king hath of his people, and the interest he hath in them and their welfare; for touch them, touch the king. These offences are of three natures: the first concerneth the conservation of their lives; the second, of honour and honesty of their persons and families; and the third, of their substance.

The people, capital.

Life. First for life. I must say unto you in general, that life is grown too cheap in these times, it is set at the price of words, and every petty scorn and disgrace can have no other reparation; nay so many men's lives are taken away with impunity, that the very life of the law is almost taken away, which is the execution; and therefore though we cannot restore the life of those men that are slain, yet I pray let us restore the law to her life, by proceeding with due severity against the offenders; and most especially this plot of ground, which, as I said, is the king's carpet, ought not to be stained with blood, crying in the ears of God and the king. It is true nevertheless, that the law doth make divers just differences of life taken away; but yet no such differences as the wanton humours and braveries of men have under a reverend name of honour and reputation invented.

The highest degree is where such a one is killed, unto whom the offender did bear faith and obedience; as the servant to the master, the wife to the husband, the clerk to the prelate; and I shall ever add, for so I conceive of the law, the child to the father or the mother; and this the law terms petty treason.

The second is, Where a man is slain upon forethought malice, which the law terms murder; and it is an offence horrible and odious, and cannot be blanched, nor made fair, but foul.

The third is, Where a man is killed upon a sudden heat or affray, whereunto the law gives some little favour, because a man in fury is not himself, *ira furor brevis*, wrath is a short madness; and the wisdom of law in his Majesty's time hath made a subdivision of the stab given, where the party stabbed is out of defence, and had not given the first blow, from other manslaughters.

1 Jac. c. 8.

The fourth degree is, That of killing a man in the party's own defence, or by misadventure, which though they be not felonies, yet nevertheless the law doth not suffer them to go unpunished: because it doth discern some sparks of a bloody mind in the one, and of carelessness in the other.

And the fifth is, Where the law doth admit a kind of justification, not by plea, for a man may not, that hath shed blood, affront the law with pleading not guilty; but when the case is found by verdict, being disclosed upon the evidence; as where a man in the king's highway and peace is assailed to be murdered or robbed; or when a man defending his house, which is his castle, against unlawful violence; or when a sheriff or minister of justice is resisted in the execution of his office; or when the patient dieth in the chirurgeon's hands, upon cutting or otherwise: for these cases the law doth privilege, because of the necessity, and because of the innocency of the intention.

Thus much for the death of man, of which cases you are to inquire: together with the accessories before and after the fact.

Honesty of life. For the second kind, which concerns the honour and chasteness of persons and families; you are to inquire of the ravishment of women, of the taking of women out of the possession of their parents or guardians against their will, or marrying them, or abusing them; of double marriages, where there was not first seven years' absence, and no notice that the party so absent was alive, and other felonies against the honesty of life.

1 Jac. c. 11.

Substance. For the third kind, which concerneth men's substance, you shall inquire of burglaries, robberies, cutting of purses, and taking of any thing from the person: and generally other stealths, as well such as are plain, as those that are disguised, whereof I will by and by speak: but first I must require you to use diligence in presenting especially those purloinings and embezzlements, which are of plate, vessel, or whatsoever within the king's house. The king's house is an open place; it ought to be kept safe by law, and not by lock, and therefore needeth the more severity.

Now for coloured and disguised robberies; I will name two or three of them: the purveyor that takes without warrant, is no better than a thief, and it is felony. The servant that hath the keeping of his Majesty's goods, and going away with them, though he came to the possession of them lawfully, it is felony. Of these you shall likewise inquire, principals and accessories. The voluntary escape of a felon is also felony.

28 E. I. *Articuli super chartas*, c. 2. 31 El. c. 4. 33 H. 6. c. 1. 21 H. 8. c. 7.

The people, not capital. For the last part, which is of offences concerning the people not capital, they are many: but I will select only such as I think fittest to be remembered unto you, still dividing, to give you the better light. They are of four natures.

1. The first, is matter of force and outrage.
2. The second, matter of fraud and deceit.
3. Public nuisances and grievances.
4. The fourth, breach and inobservance of certain wholesome and politic laws for government.

Force. For the first, you shall inquire of riots and unlawful assemblies, of forcible entries, and detainers with force; and properly of all assaults of striking, drawing weapon, or other violence within the king's house, and the precincts thereof: for the king's house, from whence example of peace should flow unto the farthest parts of the kingdom, as the ointment of Aaron's head to the skirts of his garment, ought to be sacred and inviolate from force and brawls, as well in respect of reverence to the place, as in respect of danger of greater tumult, and of ill example to the whole kingdom; and therefore in that place all should be full of peace, order, regard, forbearance, and silence.

Besides open force, there is a kind of force that cometh with an armed hand, but disguised, that is no less hateful and hurtful; and that is, abuse and oppression by authority. And therefore you shall inquire of all extortions, in officers and ministers; as sheriffs, bailiffs of hundreds, escheators, coroners, constables, ordinaries, and others, who by colour of office do poll the people.

For frauds and deceits, I do chiefly commend to your care the frauds and deceits in that which is the chief means of all just contract and permutation, which is, weights and measures; wherein, although God hath pronounced that a false weight is an abomination, yet the abuse is so common and so general, I mean of weights, and I speak upon knowledge and late examination, that if one were to build a church, he should need but false weights, and not seek them far, of the piles of brass to make the bells, and the weights of lead to make the battlements: and herein you are to make special inquiry, whether the clerk of the market within the verge, to whom properly it appertains, hath done his duty.

Nuisance. For nuisances and grievances, I will for the present only single out one, that ye present the decays of highways and bridges; for where the Majesty of a king's house draws recourse and access, it is both disgraceful to the king, and diseaseful to the people, if the ways near-abouts be not fair and good; wherein it is strange to see the chargeable pavements and causeways in the avenues and entrances of towns abroad beyond the seas; whereas London, the second city at least of Europe, in glory, in greatness, and in wealth, cannot be discerned by the fairness of the ways, though a little perhaps by the broadness of them, from a village.

Breach of statutes. For the last part, because I pass these things over briefly, I will make mention unto you of three laws.

1. The one, concerning the king's pleasure.
2. The second, concerning the people's food.
3. And the third, concerning wares and manufactures.

King's pleasure. You shall therefore inquire of the unlawful taking partridges and pheasants or fowl, the destruction of the eggs of the wild-fowl, the killing of hares or deer, and the selling of venison or hares: for that which is for exercise, and sport, and courtesy, should not be turned to gluttony and sale victual.

Food. You shall also inquire whether bakers and brewers keep their assize, and whether as well they as butchers, innholders and victuallers, do sell that which is wholesome, and at reasonable prices, and whether they do link and combine to raise prices.

Manufactures. Lastly, you shall inquire whether the good statute be observed, whereby a man may have that he thinketh he hath, and not be abused or mis-served in that he buys: 5 Eliz. c. 4. I mean that statute that requireth that none use any manual occupation but such as have been seven years apprentice to it; which law being generally transgressed, makes the people buy in effect chaff for corn; for that which is mis-wrought will mis-wear.

There be many more things inquirable by you throughout all the former parts, which it were overlong in particular to recite. You may be supplied either out of your own experience, or out of such bills and informations as shall be brought unto you, or upon any question that you shall demand of the court, which will be ready to give you any farther direction as far as is fit: but these which I have gone through, are the principal points of your charge; which to present, you have taken the name of God to witness; and in the name of God perform it.

A CHARGE DELIVERED

BY SIR FRANCIS BACON, KNIGHT,

THE KING'S SOLICITOR-GENERAL,

AT THE

ARRAIGNMENT OF THE LORD SANQUHAR,

IN THE KING'S BENCH AT WESTMINSTER.

THE ARGUMENT.

The Lord Sanquhar, a Scotch nobleman, having, in private revenge, suborned Robert Carlile to murder John Turner, master of fence, thought, by his greatness, to have borne it out; but the king, respecting nothing so much as justice, would not suffer nobility to be a shelter for villany; but, according to law, on the 29th of June, 1612, the said Lord Sanquhar, having been arraigned and condemned, by the name of Robert Creighton, Esq. was before Westminster-hall Gate executed, where he died very penitent. At whose arraignment my lord Bacon, then Solicitor-General to King James, made this speech following:

In this cause of life and death, the jury's part is in effect discharged; for after a frank and formal confession, their labour is at an end: so that what hath been said by Mr. Attorney, or shall be said by myself, is rather convenient than necessary.

My lord Sanquhar, your fault is great, and cannot

be extenuated, and it need not be aggravated; and if it needed, you have made so full an anatomy of it out of your own feeling, as it cannot be matched by myself, or any man else, out of conceit; so as that part of aggravation I leave. Nay, more, this christian and penitent course of yours draws me thus far, that I will agree, in some sort extenuates it: for certainly, as even in extreme evils there are degrees; so this particular of your offence is such, as though it be foul spilling of blood, yet there are more foul: for if you had sought to take away a man's life for his vineyard, as Ahab did; or for envy, as Cain did; or to possess his bed, as David did; surely the murder had been more odious.

Your temptation was revenge, which the more natural it is to man, the more have laws both divine and human sought to repress it; "Mihi vindicta." But in one thing you and I shall never agree, that generous spirits, you say, are hard to forgive: no, contrariwise, generous and magnanimous minds are readiest to forgive; and it is a weakness and impotency of mind to be unable to forgive;

Corpora magnanimo satis est prostrasse leoni.

But howsoever murders may arise from several motives, less or more odious, yet the law both of God and man involves them in one degree, and therefore you may read that in Joab's case, which was a murder upon revenge, and matcheth with your case; he for a dear brother, and you for a dear part of your own body; yet there was a severe charge given, it should not be unpunished.

And certainly the circumstance of time is heavy upon you: it is now five years since this unfortunate man Turner, be it upon accident, or be it upon despite, gave the provocation, which was the seed of your malice. All passions are suaged with time: love, hatred, grief; all fire itself burns out with time, if no new fuel be put to it. Therefore for you to have been in the gall of bitterness so long, and to have been in a restless chace of this blood so many years, is a strange example; and I must tell you plainly, that I conceive you have sucked those affections of dwelling in malice, rather out of Italy and outlandish manners, where you have conversed, than out of any part of this island, England or Scotland.

But that which is fittest for me to spend time in, the matter being confessed, is to set forth and magnify to the hearers the justice of this day; first of God, and then of the king.

My lord, you have friends and entertainments in foreign parts; it had been an easy thing for you to set Carlile, or some other bloodhound on work, when your person had been beyond the seas; and so this news might have come to you in a packet, and you might have looked on how the storm would pass: but God bereaved you of this foresight, and closed you here under the hand of a king, that though abundant in clemency, yet is no less zealous of justice.

Again, when you came in at Lambeth, you might have persisted in the denial of the procurement of the fact; Carlile, a resolute man, might perhaps have cleared you, for they that are resolute in mischief, are commonly obstinate in concealing the procurers, and so nothing should have been against you but presumption. But then also God, to take away all obstruction of justice, gave you the grace, which ought indeed to be more true comfort to you, than any device whereby you might have escaped, to make a clear and plain confession.

Other impediments there were, not a few, which might have been an interruption to this day's justice, had not God in his providence removed them.

But, now that I have given God the honour, let me give it likewise where it is next due, which is, to the king our sovereign.

This murder was no sooner committed, and brought to his Majesty's ears, but his just indignation, wherewith he first was moved, cast itself into a great deal of care and providence to have justice done. First came forth his proclamation, somewhat of a rare form, and devised, and in effect dictated by his Majesty himself; and by that he did prosecute the offenders, as it were with the breath and blast of his mouth. Then did his Majesty stretch forth his long arms, for kings have long arms when they will extend them, one of them to the sea, where he took hold of Grey shipped for Sweden, who gave the first light of testimony; the other arm to Scotland, and took hold of Carlile, ere he was warm in his house, and brought him the length of his kingdom under such safe watch and custody, as he could have no means to escape, no nor to mischief himself, no nor learn any lessons to stand mute; in which cases, perhaps, this day's justice might have received a stop. So that I may conclude his Majesty hath showed himself God's true lieutenant, and that he is no respecter of persons; but the English, Scottish, nobleman, fencer, are to him alike in respect of justice.

Nay, I must say farther, that his Majesty hath had, in this, a kind of prophetical spirit; for what time Carlile and Grey, and you, my lord, yourself, were fled no man knew whither, to the four winds, the king ever spake in a confident and undertaking manner, that wheresoever the offenders were in Europe, he would produce them forth to justice; of which noble word God hath made him master.

Lastly, I will conclude towards you, my lord, that though your offence hath been great, yet your confession hath been free, and your behaviour and speech full of discretion; and this shows, that though you could not resist the tempter, yet you bear a christian and generous mind, answerable to the noble family of which you are descended. This I commend unto you, and take it to be an assured token of God's mercy and favour, in respect whereof all worldly things are but trash; and so it is fit for you, as your state now is, to account them. And this is all I will say for the present.

[*Note.* The reader for his fuller information in this story of the lord Sanquhar, is desired to peruse the case in the ninth book of the lord Coke's Reports; at the end of which the whole series of the murder and trial is exactly related.]

THE CHARGE

OF SIR FRANCIS BACON, KNIGHT.

THE KING'S ATTORNEY-GENERAL,

TOUCHING DUELS.

UPON AN INFORMATION IN THE STAR-CHAMBER AGAINST PRIEST AND WRIGHT.

WITH THE DECREE OF THE STAR-CHAMBER IN THE SAME CAUSE.

My lords,

I thought it fit for my place, and for these times, to bring to hearing before your lordships some cause touching private duels, to see if this court can do any good to tame and reclaim that evil which seems unbridled. And I could have wished that I had met with some greater persons, as a subject for your censure, both because it had been more worthy of this presence, and also the better to have showed the resolution myself hath to proceed without respect of persons in this business: but finding this cause on foot in my predecessor's time, and published and ready for hearing, I thought to lose no time in a mischief that groweth every day: and besides, it passes not amiss sometimes in government, that the greater sort be admonished by an example made in the meaner, and the dog to be beaten before the lion. Nay, I should think, my lords, that men of birth and quality will leave the practice when it begins to be vilified, and come so low as to barber-surgeons and butchers, and such base mechanical persons.

And for the greatness of this presence, in which I take much comfort, both as I consider it in itself, and much more in respect it is by his Majesty's direction, I will supply the meanness of the particular cause, by handling of the general point: to the end, that by the occasion of this present cause, both my purpose of prosecution against duels, and the opinion of the court, without which I am nothing, for the censure of them, may appear, and thereby offenders in that kind may read their own case, and know what they are to expect; which may serve for a warning until example may be made in some greater person: which I doubt the times will but too soon afford.

Therefore before I come to the particular, whereof your lordships are now to judge, I think it time best spent to speak somewhat,

First, Of the nature and greatness of this mischief.

Secondly, Of the causes and remedies.

Thirdly, Of the justice of the law of England, which some stick not to think defective in this matter.

Fourthly, Of the capacity of this court, where certainly the remedy of this mischief is best to be found.

And fifthly, Touching mine own purpose and resolution, wherein I shall humbly crave your lordships' aid and assistance.

For the mischief itself, it may please your lordships to take into your consideration that when revenge is once extorted out of the magistrates' hands, contrary to God's ordinance, "Mihi vindicta, ego retribuam," and every man shall bear the sword, not to defend, but to assail; and private men begin once to presume to give law to themselves, and to right their own wrongs, no man can foresee the danger and inconveniences that may arise and multiply thereupon. It may cause sudden storms in court, to the disturbance of his Majesty, and unsafety of his person: it may grow from quarrels to bandying, and from bandying to trooping, and so to tumult and commotion; from particular persons to dissension of families and alliances; yea, to national quarrels, according to the infinite variety of accidents, which fall not under foresight: so that the state by this means shall be like to a distempered and imperfect body, continually subject to inflammations and convulsions.

Besides, certainly, both in divinity and in policy, offences of presumption are the greatest. Other offences yield and consent to the law that it is good, not daring to make defence, or to justify themselves; but this offence expressly gives the law an affront, as if there were two laws, one a kind of gown-law, and the other a law of reputation, as they term it; so that Paul's and Westminster, the pulpit and the courts of justice, must give place to the law, as the king speaketh in his proclamation, of ordinary tables, and such reverend assemblies: the year-books and statute-books must give place to some French and Italian pamphlets, which handle the doctrine of duels, which if they be in the right, *transeamus ad illa*, let us receive them, and not keep the people in conflict and distraction between two laws.

Again, my lords, it is a miserable effect, when young men full of towardness and hope, such as the poets call *auroræ filii*, sons of morning, in whom the expectation and comfort of their friends consisteth, shall be cast away and destroyed in such a vain manner; but much more it is to be deplored when so much noble and genteel blood should be spilt upon such follies, as, if it were adventured in the field in service of the king and realm, were able to make the fortune of a day, and to change the fortune of a kingdom. So as your lordships see what a desperate evil this is; it troubleth peace, it disfurnisheth war, it bringeth calamity upon private men, peril upon the state, and contempt upon the law.

Touching the causes of it; the first motive, no doubt, is a false and erroneous imagination of honour and credit: and therefore the king, in his last proclamation, doth most aptly and excellently call them bewitching duels. For if one judge of it truly, it is no better than a sorcery that enchanteth the spirits of young men, that bear great minds with a false show, *species falsa*; and a kind of satanical illusion and apparition of honour against religion, against law, against moral virtue, and against the precedents and examples of the best times and valiantest nations; as I shall tell you by and by, when I shall show you the law of England is not alone in this point.

But then the seed of this mischief being such, it is nourished by vain discourses, and green and unripe conceits, which nevertheless have so prevailed, as though a man were staid and sober-minded, and a right believer touching the vanity and unlawfulness of these duels; yet the stream of vulgar opinion is such, as it imposeth a necessity upon men of value to conform themselves, or else there is no living or looking upon men's faces: so that we have not to do, in this case, so much with particular persons, as with unsound and depraved opinions, like the dominations and spirits of the air which the Scripture speaketh of.

Hereunto may be added, that men have almost lost the true notion and understanding of fortitude and valour. For fortitude distinguisheth of the grounds of quarrels whether they be just; and not only so, but whether they be worthy; and setteth a better price upon men's lives than to bestow them idly: nay, it is weakness and disesteem of a man's self, to put a man's life upon such liedger performances: a man's life is not to be trifled away; it is to be offered up and sacrificed to honourable services, public merits, good causes, and noble adventures. It is in expense of blood as it is in expense of money; it is no liberality to make a profusion of money upon every vain occasion, nor no more it is fortitude to make effusion of blood, except the cause be of worth. And thus much for the causes of this evil.

For the remedies, I hope some great and noble person will put his hand to this plough, and I wish that my labours of this day may be but forerunners to the work of a higher and better hand. But yet to deliver my opinion as may be proper for this time and place, there be four things that I have thought on, as the most effectual for the repressing of this depraved custom of particular combats.

The first is, That there do appear and be declared a constant and settled resolution in the state to abolish it. For this is a thing, my lords, must go down at once, or not at all; for then every particular man will think himself acquitted in his reputation, when he sees that the state takes it to heart, as an insult against the king's power and authority, and thereupon hath absolutely resolved to master it; like unto that which was set down in express words in the edict of Charles IX. of France touching duels, that the king himself took upon him the honour of all that took themselves grieved or interested for not having performed the combat. So must the state do in this business: and in my conscience there is none that is but of a reasonable sober disposition, be he never so valiant, except it be some furious person that is like a firework, but will be glad of it, when he shall see the law and rule of state disinterest him of a vain and unnecessary hazard.

Secondly, Care must be taken that this evil be no more cockered, nor the humour of it fed; wherein I humbly pray your lordships that I may speak my mind freely, and yet be understood aright. The proceedings of the great and noble commissioners martial I honour and reverence much, and of them I speak not in any sort; but I say the compounding of quarrels, which is otherwise in use by private noblemen and gentlemen, it is so punctual, and hath such reference and respect unto the received conceits, what's before-hand, and what's behind-hand, and I cannot tell what, as without all question it doth, in a fashion, countenance and authorize this practice of duels, as if it had in it somewhat of right.

Thirdly, I must acknowledge that I learned out of the king's last proclamation the most prudent and best applied remedy for this offence, if it shall please his Majesty to use it, that the wit of man can devise. This offence, my lords, is grounded upon a false conceit of honour, and therefore it would be punished in the same kind, "in eo quis rectissime plectitur, in quo peccat." The fountain of honour is the king and his aspect, and the access to his person continueth honour in life, and to be banished from his presence is one of the greatest eclipses of honour that can be; if his Majesty shall be pleased that when this court shall censure any of these offences in persons of eminent quality, to add this out of his own power and discipline, that these persons shall be banished and excluded from his court for certain years, and the courts of his queen and prince, I think there is no man that hath any good blood in him will commit an act that shall cast him into that darkness, that he may not behold his sovereign's face.

Lastly, and that which more properly concerneth this court: We see, my lords, the root of this offence is stubborn; for it despiseth death, which is the utmost of punishments; and it were a just but a miserable severity to execute the law without all remission or mercy, where the case proveth capital. And yet the late severity in France was more, where, by a kind of martial law, established by ordinance of the king and parliament, the party that had slain

another was presently had to the gibbet, insomuch as gentlemen of great quality were hanged, their wounds bleeding, lest a natural death should prevent the example of justice. But, my lords, the course which we shall take is of far greater lenity, and yet of no less efficacy; which is to punish, in this court, all the middle acts and proceedings which tend to the duel, which I will enumerate to you anon, and so to hew and vex the root in the branches, which, no doubt, in the end will kill the root, and yet prevent the extremity of law.

Now for the law of England, I see it excepted to, though ignorantly, in two points:

The one, That it should make no difference between an insidious and foul murder, and the killing of a man upon fair terms, as they now call it.

The other, That the law hath not provided sufficient punishment, and reparations, for contumely of words, as the lie, and the like.

But these are no better than childish novelties against the divine law, and against all laws in effect, and against the examples of all the bravest and most virtuous nations of the world.

For first, for the law of God, there is never to be found any difference made in homicide, but between homicide voluntary and involuntary, which we term misadventure. And for the case of misadventure itself, there were cities of refuge; so that the offender was put to his flight, and that flight was subject to accident, whether the revenger of blood should overtake him before he had gotten sanctuary or no. It is true that our law hath made a more subtle distinction between the will inflamed and the will advised, between manslaughter in heat and murder upon prepensed malice or cold blood, as the soldiers call it, an indulgence not unfit for a choleric and warlike nation; for it is true, "ira furor brevis:" a man in fury is not himself. This privilege of passion the ancient Roman law restrained, but to a case: that was, if the husband took the adulterer in the manner; to that rage and provocation only it gave way, that a homicide was justifiable. But for a difference to be made in case of killing and destroying man, upon a fore-thought purpose, between foul and fair, and as it were between single murder and vied murder, it is but a monstrous child of this latter age, and there is no shadow of it in any law divine or human. Only it is true, I find in the Scripture that Cain enticed his brother into the field and slew him treacherously; but Lamech vaunted of his manhood that he would kill a young man, and if it were to his hurt: so as I see no difference between an insidious murder and a braving or presumptuous murder, but the difference between Cain and Lamech.

As for examples in civil states, all memory doth consent that Græcia and Rome were the most valiant and generous nations of the world; and, that which is more to be noted, they were free estates, and not under a monarchy; whereby a man would think it a great deal the more reason that particular persons should have righted themselves; and yet they had not this practice of duels, nor any thing that bare show thereof: and sure they would have had it, if there had been any virtue in it. Nay, as he saith, "Fas est et ab hoste doceri." It is memorable, that is reported by a counsellor ambassador of the emperor's, touching the censure of the Turks of these duels: there was a combat of this kind performed by two persons of quality of the Turks, wherein one of them was slain, the other party was convented before the counsel of bashaws; the manner of the reprehension was in these words: "How durst you undertake to fight one with the other? Are there not christians enough to kill? Did you not know that whether of you shall be slain, the loss would be the Great Seignior's?" So as we may see that the most warlike nations, whether generous or barbarous, have ever despised this wherein now men glory.

It is true, my lords, that I find combats of two natures authorized, how justly I will not dispute as to the latter of them.

The one, when upon the approaches of armies in the face one of the other, particular persons have made challenges for trial of valours in the field upon the public quarrel.

This the Romans called *Pugna per provocationem*. And this was never, but either between the generals themselves, who are absolute, or between particulars by licence of the generals; never upon private authority. So you see David asked leave when he fought with Goliah; and Joab, when the armies were met, gave leave, and said, "Let the young men play before us." And of this kind was that famous example in the wars of Naples, between twelve Spaniards and twelve Italians, where the Italians bare away the victory; besides other infinite like examples worthy and laudable, sometimes by singles, sometimes by numbers.

The second combat is a judicial trial of right, where the right is obscure, introduced by the Goths and the northern nations, but more anciently entertained in Spain; and this yet remains in some cases as a divine lot of battle, though controverted by divines, touching the lawfulness of it: so that a wise writer saith, "Taliter pugnantes videntur tentare Deum, quia hoc volunt ut Deus ostendat et faciat miraculum, ut justam causam habens victor efficiatur, quod sæpe contra accidit." But howsoever it be, this kind of fight taketh its warrant from law. Nay, the French themselves, whence this folly seemeth chiefly to have flown, never had it but only in practice and toleration, and never as authorized by law; and yet now of late they have been fain to purge their folly with extreme rigour, in so much as many gentlemen left between death and life in the duels, as I spake before, were hastened to hanging with their wounds bleeding. For the state found it had been neglected so long, as nothing could be thought cruelty which tended to the putting of it down.

As for the second defect pretended in our law, that it hath provided no remedy for lies and fillips, it may receive like answer. It would have been thought a madness amongst the ancient lawgivers, to have set a punishment upon the lie given, which in effect is but a word of denial, a negative of another's saying. Any lawgiver, if he had been asked

the question would have made Solon's answer: That he had not ordained any punishment for it, because he never imagined the world would have been so fantastical as to take it so highly. The civilians, they dispute whether an action of injury lie for it, and rather resolve the contrary. And Francis the first of France, who first set on and stamped this disgrace so deep, is taxed by the judgment of all wise writers for beginning the vanity of it: for it was he, that when he had himself given the lie and defy to the emperor, to make it current in the world, said in a solemn assembly, "That he was no honest man that would bear the lie:" which was the fountain of this new learning.

As for words of reproach and contumely, whereof the lie was esteemed none, it is not credible, but that the orations themselves are extant, what extreme and exquisite reproaches were tossed up and down in the senate of Rome and the places of assembly, and the like in Græcia, and yet no man took himself fouled by them, but took them but for breath, and the style of an enemy, and either despised them or returned them, but no blood spilt about them.

So of every touch or light blow of the person, they are not in themselves considerable, save that they have got upon them the stamp of a disgrace, which maketh these light things pass for great matter. The law of England, and all laws, hold these degrees of injury to the person, slander, battery, maim, and death; and if there be extraordinary circumstances of despite and contumely, as in case of libels, and bastinadoes, and the like, this court taketh them in hand, and punisheth them exemplarily. But for this apprehension of a disgrace, that a fillip to the person should be a mortal wound to the reputation, it were good that men did hearken unto the saying of Consalvo, the great and famous commander, that was wont to say, a gentleman's honour should be *de tela crassiore*, of a good strong warp or web, that every little thing should not catch in it; when as now it seems they are but of cobweb lawn, or such light stuff, which certainly is weakness, and not true greatness of mind, but like a sick man's body, that is so tender that it feels every thing. And so much in maintenance and demonstration of the wisdom and justice of the law of the land.

For the capacity of this court, I take this to be a ground infallible: that wheresoever an offence is capital or matter of felony, though it be not acted, there the combination or practice tending to that offence is punishable in this court as a high misdemeanor. So practice to impoison, though it took no effect; waylaying to murder, though it took no effect, and the like; have been adjudged heinous misdemeanors punishable in this court. Nay, inceptions and preparations in inferior crimes, that are not capital, as suborning and preparing of witnesses that were never deposed, or deposed nothing material, have likewise been censured in this court, as appeareth by the decree in Garnon's case.

Why then, the major proposition being such, the minor cannot be denied: for every appointment of the field is but combination and plotting of murder; let them gild it how they list, they shall never have fairer terms of me in place of justice. Then the conclusion followeth, that it is a case fit for the censure of the court. And of this there be precedents in the very point of challenge.

It was the case of Wharton plaintiff, against Ellekar and Acklam defendants, where Acklam being a follower of Ellekar's was censured for carrying a challenge from Ellekar to Wharton, though the challenge was not put in writing, but delivered only by word of message; and there are words in the decree that such challenges are to the subversion of government.

These things are well known, and therefore I needed not so much to have insisted upon them, but that in this case I would be thought not to innovate any thing of my own head, but to follow the former precedents of the court, though I mean to do it more throughly, because the time requires it more.

Therefore now to come to that which concerneth my part; I say that by the favour of the king and the court, I will prosecute in this court in the cases following.

If any man shall appoint the field, though the fight be not acted or performed.

If any man shall send any challenge in writing, or any message of challenge.

If any man carry or deliver any writing or message of challenge.

If any man shall accept or return a challenge.

If a man shall accept to be a second in a challenge of either side.

If any man shall depart the realm, with intention and agreement to perform the fight beyond the seas.

If any man shall revive a quarrel by any scandalous bruits or writings, contrary to a former proclamation published by his Majesty in that behalf.

Nay, I hear there be some counsel learned of duels, that tell young men when they are beforehand, and when they are otherwise, and thereby incense and incite them to the duel, and make an art of it; I hope I shall meet with some of them too: and I am sure, my lords, this course of preventing duels, in nipping them in the bud, is fuller of clemency and providence than the suffering them to go on, and hanging men with their wounds bleeding, as they did in France.

To conclude, I have some petitions to make first to your lordship, my lord chancellor, that in case I be advertised of a purpose in any to go beyond the sea to fight, I may have granted his Majesty's writ of *Ne exeat regnum* to stop him, for this giant bestrideth the sea, and I would take and snare him by the foot on this side; for the combination and plotting is on this side, though it should be acted beyond sea. And your lordship said notably the last time I made a motion in this business, that a man may be as well *fur de se* as *felo de se*, if he steal out of the realm for a bad purpose; as for the satisfying of the words of the writ, no man will doubt but he doth *machinari contra coronam*, as the words of the writ be, that seeketh to murder a subject; for that is ever *contra coronam et dignitatem*. I have also a suit to your lordships all in general, that for justice' sake, and for true honour's sake, honour of religion, law, and

the king our master, against this fond and false disguise or puppetry of honour, I may in my prosecution, which, it is like enough, may sometimes stir coals, which I esteem not for my particular, but as it may hinder the good service, I may, I say, be countenanced and assisted from your lordships. Lastly, I have a petition to the nobles and gentlemen of England, that they would learn to esteem themselves at a just price. *Non hos quæsitum munus in usus*, their blood is not to be spilt like water or a vile thing; therefore that they would rest persuaded there cannot be a form of honour, except it be upon a worthy matter. But for this, *ipsi viderint*, I am resolved. And thus much for the general, now to the present case.

THE

DECREE OF THE STAR-CHAMBER

AGAINST

DUELS,

IN CAMERA STELLATA CORAM CONCILIO, IBIDEM, 26 JANUARII, 11 JAC. REGIS.

PRESENT,

George Lord Archbishop of Canterbury.
Thomas Lord Ellesmere, Lord Chancellor of England.
Henry Earl of Northampton, Lord Privy Seal.
Charles Earl of Nottingham, Lord High Admiral of England.
Thomas E. of Suffolk, Lord Chamberlain.
John Lord Bishop of London.
Edward Lord Zouch.
William Lord Knolles, Treasurer of the Household.
Edward Lord Wotton, Comptroller.
John Lord Stanhope, Vice-chamberlain.
Sir Edward Coke, Knight, Lord Chief Justice of England.
Sir Henry Hobart, Knight, Lord Chief Justice of the Common-pleas.
Sir Julius Cæsar, Knight, Chancellor of the Exchequer.

This day was heard and debated at large the several matters of informations here exhibited by Sir Francis Bacon, knight, his Majesty's attorney-general, the one against William Priest, gentleman, for writing and sending a letter of challenge, together with a stick, which should be the length of the weapon: and the other against Richard Wright, esquire, for carrying and delivering the said letter and stick unto the party challenged, and for other contemptuous and insolent behaviour used before the justices of the peace in Surrey at their sessions, before whom he was convented. Upon the opening of which cause, his Highness's said attorney-general did first give his reason to the court, why, in a case which he intended should be a leading case for the repressing of so great a mischief in the commonwealth, and concerning an offence which reigneth chiefly amongst persons of honour and quality, he should begin with a cause which had passed between so mean persons as the defendants seemed to be; which he said was done, because he found this cause ready published: and in so growing an evil, he thought good to lose no time; whereunto he added, that it was not amiss sometimes to beat the dog before the lion; saying farther, that he thought it would be some motive for persons of high birth and countenance to leave it, when they saw it was taken up by base and mechanical fellows; but concluded, that he resolved to proceed without respect of persons for the time to come, and for the present to supply the meanness of this particular case by insisting the longer upon the general point.

Wherein he did first express unto the court at large the greatness and dangerous consequence of this presumptuous offence, which extorted revenge out of the magistrate's hands, and gave boldness to private men to be lawgivers to themselves; the rather because it is an offence that doth justify itself against the law, and plainly gives the law an affront; describing also the miserable effect which it draweth upon private families, by cutting off young men, otherwise of good hope; and chiefly the loss of the king and the commonwealth, by the casting away of much good blood, which, being spent in the field upon occasion of service, were able to continue the renown which this kingdom hath obtained in all ages of being esteemed victorious.

Secondly, his Majesty's said attorney-general did discourse touching the causes and remedies of this mischief that prevailed so in these times; showing the ground thereof to be a false and erroneous imagination of honour and credit, according to the term which was given to those duels by a former proclamation of his Majesty's, which called them bewitching duels, for that it was no better than a kind of sorcery, which enchanteth the spirits of young men, which bear great minds, with a show of honour in that which is no honour indeed: being against religion, law, moral virtue, and against the precedents and examples of the best times and valiantest nations of the world; which though they excelled for prowess and military virtue in a public quarrel, yet knew not what these private duels meant; saying farther, that there was too much way and counte-

nance given unto these duels, by the course that is held by noblemen and gentlemen in compounding of quarrels, who use to stand too punctually upon conceits of satisfactions and distinctions, what is beforehand, and what behind-hand, which do but feed the humour: adding likewise, that it was no fortitude to show valour in a quarrel, except there were a just and worthy ground of the quarrel; but that it was weakness to set a man's life at so mean a rate as to bestow it upon trifling occasions, which ought to be rather offered up and sacrificed to honourable services, public merits, good causes, and noble adventures. And as concerning the remedies, he concluded, that the only way was, that the state would declare a constant and settled resolution to master and put down this presumption in private men, of whatsoever degree, of righting their own wrongs, and this to do at once; for that then every particular man would think himself acquitted in his reputation, when that he shall see that the state takes his honour into their own hands, and standeth between him and any interest or prejudice, which he might receive in his reputation for obeying: whereunto he added likewise, that the wisest and mildest way to suppress these duels was rather to punish in this court all the acts of preparation, which did in any wise tend to the duels, as this of challenges and the like, and so to prevent the capital punishment, and to vex the root in the branches, than to suffer them to run on to the execution, and then to punish them capitally after the manner of France: where of late times gentlemen of great quality that had killed others in duel, were carried to the gibbet with their wounds bleeding, lest a natural death should keep them from the example of justice.

Thirdly, His Majesty's said attorney-general did, by many reasons which he brought and alleged, free the law of England from certain vain and childish exceptions, which are taken by these duellists: the one, because the law makes no difference in punishment between an insidious and foul murder, and the killing a man upon challenge and fair terms, as they call it. The other, for that the law hath not provided sufficient punishment and reparation for contumely of words, as the lie, and the like; wherein his Majesty's said attorney-general did show, by many weighty arguments and examples, that the law of England did consent with the law of God and the law of nations in both those points, and that this distinction in murder between foul and fair, and this grounding of mortal quarrels upon uncivil and reproachful words, or the like disgraces, was never authorized by any law or ancient examples; but it is a late vanity crept in from the practice of the French, who themselves since have been so weary of it, as they have been forced to put it down with all severity.

Fourthly, His Majesty's said attorney-general did prove unto the court by rules of law and precedents, that this court hath capacity to punish sending and accepting of challenges, though they were never acted nor executed; taking for a ground infallible, that wheresoever an offence is capital or matter of felony, if it be acted and performed, there the conspiracy, combination, or practice tending to the same offence, is punishable as a high misdemeanor, although they never were performed. And therefore, that practice to impoison, though it took no effect, and the like, have been punished in this court; and cited the precedent in Garnon's case, wherein a crime of a much inferior nature, the suborning and preparing of witnesses, though they never were deposed, or deposed nothing material, was censured in this court: whereupon he concluded, that forasmuch as every appointment of the field is in law but a combination of plotting of a murder, howsoever men might gild it; that therefore it was a case fit for the censure of this court: and therein he vouched a precedent in the very point, that in a case between Wharton plaintiff, and Ellekar and Acklam defendants; Acklam being a follower of Ellekar, had carried a challenge unto Wharton; and although it were by word of mouth, and not by writing, yet it was severely censured by the court; the decree having words that such challenges do tend to the subversion of government. And therefore his Majesty's attorney willed the standers-by to take notice that it was no innovation that he brought in, but a proceeding according to former precedents of the court, although he purposed to follow it more thoroughly than had been done ever heretofore, because the times did more and more require it. Lastly, his Majesty's said attorney-general did declare and publish to the court in several articles, his purpose and resolution in what cases he did intend to prosecute offences of that nature in this court; that is to say, that if any man shall appoint the field, although the fight be not acted or performed; if any man shall send any challenge in writing or message of challenge; if any man shall carry or deliver any writing or message of challenge; if any man shall accept or return a challenge; if any man shall accept to be a second in a challenge of either part; if any man shall depart the realm with intention and agreement to perform the fight beyond the seas; if any man shall revive a quarrel by any scandalous bruits or writings contrary to a former proclamation, published by his Majesty in that behalf; that in all these cases his Majesty's attorney-general, in discharge of his duty, by the favour and assistance of his Majesty and the court, would bring the offenders, of what state or degree soever, to the justice of this court, leaving the lords commissioners martial to the more exact remedies: adding farther, that he heard there were certain counsel learned of duels, that tell young men when they are beforehand, and when they are otherwise, and did incense and incite them to the duel, and made an art of it; who likewise should not be forgotten. And so concluded with two petitions, the one in particular to the lord chancellor, that in case advertisement were given of a purpose in any to go beyond the seas to fight, there might be granted his Majesty's writ of *Ne exeat regnum* against him; and the other to the lords in general, that he might be assisted and countenanced in this service.

After which opening and declaration of the general cause, his Majesty's said attorney did proceed to

set forth the proofs of this particular challenge and offence now in hand, and brought to the judgment and censure of this honourable court; whereupon it appeared to this honourable court by the confession of the said defendant Priest himself, that he having received some wrong and disgrace at the hands of one Hutchest, did thereupon, in revenge thereof, write a letter to the said Hutchest, containing a challenge to fight with him at single rapier, which letter the said Priest did deliver to the said defendant Wright, together with a stick containing the length of the rapier, wherewith the said Priest meant to perform the fight. Whereupon the said Wright did deliver the said letter to the said Hutchest, and did read the same unto him; and after the reading thereof, did also deliver to the said Hutchest the said stick, saying, that the same was the length of the weapon mentioned in the said letter. But the said Hutchest, dutifully respecting the preservation of his Majesty's peace, did refuse the said challenge, whereby no farther mischief did ensue thereupon.

This honourable court, and all the honourable presence this day sitting, upon grave and mature deliberation, pondering the quality of these offences, they generally approved the speech and observations of his Majesty's said attorney-general, and highly commended his great care and good service in bringing a cause of this nature to public punishment and example, and in professing a constant purpose to go on in the like course with others: letting him know, that he might expect from the court all concurrence and assistance in so good a work. And thereupon the court did by their several opinions and sentences declare how much it imported the peace and prosperous estate of his Majesty and his kingdom to nip this practice and offence of duels in the head, which now did overspread and grow universal, even among mean persons, and was not only entertained in practice and custom, but was framed into a kind of art and precepts: so that, according to the saying of the Scripture, *mischief* is *imagined like a law*. And the court with one consent did declare their opinions: That by the ancient law of the land, all inceptions, preparations, and combinations to execute unlawful acts, though they never be performed, as they be not to be punished capitally, except it be in case of treason, and some other particular cases of statute law; so yet they are punishable as misdemeanors and contempts: and that this court was proper for offences of such nature; especially in this case, where the bravery and insolency of the times are such as the ordinary magistrates and justices that are trusted with the preservation of the peace, are not able to master and repress those offences, which were by the court at large set forth, to be not only against the law of God, to whom, and his substitutes, all revenge belongeth, as part of his prerogative, but also against the oath and duty of every subject unto his Majesty, for that the subject doth swear unto him by the ancient law allegiance of life and member; whereby it is plainly inferred, that the subject hath no disposing power over himself of life and member to be spent or ventured according to his own passions and fancies, insomuch as the very practice of chivalry in justs and tournays, which are but images of martial actions, appear by ancient precedents not to be lawful without the king's licence obtained. The court also noted, that these private duels or combats were of another nature from the combats which have been allowed by the law, as well of this land as of other nations, for the trial of rights or appeals. For that those combats receive direction and authority from the law; whereas these contrariwise spring only from the unbridled humours of private men. And as for the pretence of honour, the court much misliking the confusion of degrees which is grown of late, every man assuming unto himself the term and attribute of honour, did utterly reject and condemn the opinion that the private duel, in any person whatsoever, had any grounds of honour; as well because nothing can be honourable that is not lawful, and that it is no magnanimity or greatness of mind, but a swelling and tumour of the mind, where there faileth a right and sound judgment; as also for that it was rather justly to be esteemed a weakness, and a conscience of small value in a man's self, to be dejected so with a word or trifling disgrace, as to think there is no re-cure of it, but by the hazard of life: whereas true honour in persons that know their own worth, is not of any such brittle substance, but of a more strong composition. And finally, the court showing a firm and settled resolution to proceed with all severity against these duels, gave warning to all young noblemen and gentlemen, that they should not expect the like connivance or toleration as formerly have been, but that justice should have a full passage without protection or interruption. Adding, that after a strait inhibition, whosoever should attempt a challenge or combat, in case where the other party was restrained to answer him, as now all good subjects are, did by their own principles receive the dishonour and disgrace upon himself.

And for the present cause, the court hath ordered, adjudged, and decreed, that the said William Priest and Richard Wright be committed to the prison of the Fleet, and the said Priest to pay five hundred pounds, and the said Wright five hundred marks, for their several fines to his Majesty's use. And to the end, that some more public example may be made hereof amongst his Majesty's people, the court hath further ordered and decreed, that the said Priest and Wright shall at the next assizes, to be holden in the county of Surrey, publicly, in face of the court, the judges sitting, acknowledge their high contempt and offence against God, his Majesty, and his laws, and show themselves penitent for the same.

Moreover, the wisdom of this high and honourable court thought it meet and necessary, that all sorts of his Majesty's subjects should understand and take notice of that which hath been said and handled this day touching this matter, as well by his Highness's attorney-general, as by the lords judges, touching the law in such cases. And therefore the court hath enjoined Mr. Attorney to have special care to the penning of this decree, for the setting

forth in the same summarily the matters and reasons, which have been opened and delivered by the court touching the same; and nevertheless also at some time convenient to publish the particulars of his speech and declaration, as very meet and worthy to be remembered and made known unto the world, as these times are. And this decree, being in such sort carefully drawn and penned, the whole court thought it meet, and so have ordered and decreed, that the same be not only read and published at the next assizes for Surrey, at such time as the said Priest and Wright are to acknowledge their offences as aforesaid; but that the same be likewise published and made known in all shires of this kingdom. And to that end the justices of assize are required by this honourable court to cause this decree to be solemnly read and published in all the places and sittings of their several circuits, and in the greatest assembly; to the end, that all his Majesty's subjects may take knowledge and understand the opinion of this honourable court in this case, and in what measure his Majesty and this honourable court purposeth to punish such as shall fall into the like contempt and offences hereafter. Lastly, this honourable court much approving that which the right honourable Sir Edward Coke, knight, lord chief justice of England, did now deliver touching the law in this case of duels, hath enjoined his lordship to report the same in print, as he hath formerly done divers other cases, that such as understand not the law in that behalf, and all others, may better direct themselves, and prevent the danger thereof hereafter.

THE CHARGE

OF SIR FRANCIS BACON, KNIGHT,

THE KING'S ATTORNEY-GENERAL,

AGAINST WILLIAM TALBOT,

A COUNSELLOR AT LAW, OF IRELAND,

UPON AN INFORMATION IN THE STAR-CHAMBER "ORE TENUS," FOR A WRITING UNDER HIS HAND, WHEREBY THE SAID WILLIAM TALBOT BEING DEMANDED, WHETHER THE DOCTRINE OF SUAREZ, TOUCHING DEPOSING AND KILLING OF KINGS EXCOMMUNICATED, WERE TRUE OR NO? HE ANSWERED, THAT HE REFERRED HIMSELF UNTO THAT WHICH THE CATHOLIC ROMAN CHURCH SHOULD DETERMINE THEREOF.

ULTIMO DIE TERMINI HILARII, UNDECIMO JACOBI REGIS.

My lords,

I brought before you the first sitting of this term the cause of duels; but now this last sitting I shall bring before you a cause concerning the greatest duel which is in the christian world, the duel and conflict between the lawful authority of sovereign kings, which is God's ordinance for the comfort of human society, and the swelling pride and usurpation of the see of Rome, *in temporalibus*, tending altogether to anarchy and confusion. Wherein if this pretence in the pope of Rome, by cartels to make sovereign princes as the banditti, and to proscribe their lives, and to expose their kingdoms to prey; if these pretences, I say, and all persons that submit themselves to that part of the pope's power in the least degree, be not by all possible severity repressed and punished, the state of christian kings will be no other than the ancient torment described by the poets in the hell of the heathen; a man sitting richly robed, solemnly attended, delicious fare, &c. with a sword hanging over his head, hanging by a small thread, ready every moment to be cut down by an accursing and accursed hand. Surely I had thought they had been the prerogatives of God alone, and of his secret judgments: "Solvam cingula regum," "I will loosen the girdles of kings;" or again, "He poureth contempt upon princes;" or, "I will give a king in my wrath, and take him away again in my displeasure;" and the like: but if these be the claims of a mortal man, certainly they are but the mysteries of that person which "exalts himself above all that is called God," "supra omne quod dicitur Deus." Note it well, not above God, though that in a sense be true, but "above all that is called God;" that is, lawful kings and magistrates.

But, my lords, in this duel I find this Talbot, that is now before you, but a coward; for he hath given ground, he hath gone backward and forward; but in such a fashion, and with such interchange of repenting and relapsing, as I cannot tell whether it doth extenuate or aggravate his offence. If he shall more publicly in the face of the court fall and settle upon a right mind, I shall be glad of it; and he

that would be against the king's mercy, I would he might need the king's mercy: but nevertheless the court will proceed by rules of justice.

The offence therefore wherewith I charge this Talbot, prisoner at the bar, is this in brief and in effect: That he hath maintained, and maintaineth under his hand, a power in the pope for deposing and murdering of kings. In what sort he doth this, when I come to the proper and particular charge, I will deliver it in his own words without pressing or straining.

But before I come to the particular charge of this man, I cannot proceed so coldly; but I must express unto your lordships the extreme and imminent danger wherein our dear and dread sovereign is, and in him we all; nay, all princes of both religions, for it is a common cause, do stand at this day, by the spreading and enforcing of this furious and pernicious opinion of the pope's temporal power: which though the modest sort would blanch with the distinction of "in ordine ad spiritualia," yet that is but an elusion; for he that maketh the distinction, will also make the case. This peril, though it be in itself notorious, yet because there is a kind of dulness, and almost a lethargy in this age, give me leave to set before you two glasses, such as certainly the like never met in one age; the glass of France, and the glass of England. In that of France the tragedies acted and executed in two immediate kings; in the glass of England, the same, or more horrible, attempted likewise in a queen and king immediate, but ending in a happy deliverance. In France, Henry III. in the face of his army, before the walls of Paris, stabbed by a wretched Jacobine friar. Henry IV. a prince that the French do surname the Great, one that had been a saviour and redeemer of his country from infinite calamities, and a restorer of that monarchy to the ancient state and splendour, and a prince almost heroical, except it be in the point of revolt from religion, at a time when he was, as it were to mount on horseback for the commanding of the greatest forces that of long time had been levied in France, this king likewise stillettoed by a rascal votary, which had been enchanted and conjured for the purpose.

In England, queen Elizabeth, of blessed memory, a queen comparable and to be ranked with the greatest kings, oftentimes attempted by like votaries, Sommervile, Parry, Savage, and others, but still protected by the Watchman that slumbereth not. Again, our excellent sovereign king James, the sweetness and clemency of whose nature were enough to quench and mortify all malignity, and a king shielded and supported by posterity; yet this king in the chair of Majesty, his vine and olive branches about him, attended by his nobles and third estate in parliament; ready in the twinkling of an eye, as if it had been a particular dooms-day, to have been brought to ashes, dispersed to the four winds. I noted the last day, my lord chief justice, when he spake of this powder treason, he laboured for words; though they came from him with great efficacy, yet he truly confessed, and so must all men, that that treason is above the charge and report of any words whatsoever.

Now, my lords, I cannot let pass, but in these glasses which I spake of, besides the facts themselve and danger, to show you two things; the one the ways of God Almighty, which turneth the sword of Rome upon the kings that are the vassals of Rome, and over them gives it power; but protecteth those kings which have not accepted the yoke of his tyranny, from the effects of his malice: the other, that, as I said at first, this is a common cause of princes; it involveth kings of both religions; and therefore his Majesty did most worthily and prudently ring out the alarm-bell, to awake all other princes to think of it seriously, and in time. But this is a miserable case the while, that these Roman soldiers do either thrust the spear into the sides of God's anointed, or at least they crown them with thorns; that is, piercing and pricking cares and fears, that they can never be quiet or secure of their lives or states. And as this peril is common to princes of both religions, so princes of both religions have been likewise equally sensible of every injury that touched their temporals.

Thuanus reports in his story, that when the realm of France was interdicted by the violent proceedings of Pope Julius the second, the king, otherwise noted for a moderate prince, caused coins of gold to be stamped with his own image, and this superscription, "Perdam nomen Babylonis e terra." Of which Thuanus saith, himself had seen divers pieces thereof. So as this catholic king was so much incensed at that time, in respect of the pope's usurpation, as he did apply Babylon to Rome. Charles the fifth emperor, who was accounted one of the pope's best sons, yet proceeded in matter temporal towards pope Clement with strange rigour: never regarding the pontificality, but kept him prisoner thirteen months in a pestilent prison; and was hardly dissuaded by his council from having sent him captive into Spain; and made sport with the threats of Frosberg the German, who wore a silk rope under his cassock, which he would show in all companies; telling them that he carried it to strangle the pope with his own hands. As for Philip the fair, it is the ordinary example, how he brought pope Boniface the eighth to an ignominious end, dying mad and enraged; and how he styled his rescript to the pope's bull, whereby he challenged his temporals, "Sciat fatuitas vestra," not your beatitude, but your stultitude; a style worthy to be continued in the like cases; for certainly that claim is mere folly and fury. As for native examples, here it is too long a field to enter into them. Never kings of any nation kept the partition-wall between temporal and spiritual better in times of greatest superstition: I report me to king Edward I. that set up so many crosses, and yet crossed that part of the pope's jurisdiction, no man more strongly. But these things have passed better pens and speeches: here I end them.

But now to come to the particular charge of this man, I must inform your lordships the occasion and nature of this offence: There hath been published lately to the world a work of Suarez, a Portuguese, a Professor in the university of Coimbra, a confident and daring writer, such a one as Tully describes in

derision; "nihil tam verens, quam ne dubitare aliqua de re videretur:" one that fears nothing but this, lest he should seem to doubt of any thing. A fellow that thinks with his magistrality and goose-quill to give laws and menages to crowns and sceptres. In this man's writing, this doctrine of deposing or murdering kings seems to come to a higher elevation than heretofore; and it is more arted and positived than in others. For in the passages which your lordships shall hear read anon, I find three assertions which run not in the vulgar track, but are such as wherewith men's ears, as I suppose, are not much acquainted; whereof the first is, That the pope hath a superiority over kings, as subjects, to depose them; not only for spiritual crimes, as heresy and schism, but for faults of a temporal nature; forasmuch as a tyrannical government tendeth ever to the destruction of souls. So by this position, kings of either religion are alike comprehended, and none exempted. The second, that after a sentence given by the pope, this writer hath defined of a series, or succession, or substitution of hangmen, or *bourreaux*, to be sure, lest an executioner should fail. For he saith, That when a king is sentenced by the pope to deprivation or death, the executioner, who is first in place, is he to whom the pope shall commit the authority, which may be a foreign prince, it may be a particular subject, it may be general to the first undertaker. But if there be no direction or assignation in the sentence special nor general, then, *de jure*, it appertains to the next successor, a natural and pious opinion; for commonly they are sons, or brothers, or near of kin, all is one: so as the successor be apparent; and also that he be a catholic. But if he be doubtful, or that he be no catholic, then it devolves to the commonalty of the kingdom; so as he will be sure to have it done by one minister or other. The third is, he distinguisheth of two kinds of tyrants, a tyrant in title, and a tyrant in regiment: the tyrant in regiment cannot be resisted or killed without a sentence precedent by the pope; but a tyrant in title may be killed by any private man whatsoever. By which doctrine he hath put the judgment of king's titles, which I will undertake are never so clean but that some vain quarrel or exception may be made unto them, upon the fancy of every private man; and also couples the judgment and execution together, that he may judge him by a blow, without any other sentence.

Your lordships see what monstrous opinions these are, and how both these beasts, the beast with seven heads, and the beast with many heads, pope and people, are at once let in, and set upon the sacred persons of kings.

Now to go on with the narrative; there was an extract made of certain sentences and portions of this book, being of this nature that I have set forth, by a great prelate and counsellor, upon a just occasion; and there being some hollowness and hesitation in these matters, wherein it is a thing impious to doubt, discovered and perceived in Talbot; he was asked his opinion concerning these assertions, in the presence of the best; and afterwards they were delivered to him, that upon advice, and *sedato animo*, he might declare himself. Whereupon, under his hand, he subscribes thus;

May it please your honourable good lordships: Concerning this doctrine of Suarez, I do not perceive, by what I have read in this book, that the same doth concern matter of faith, the controversy growing upon exposition of Scriptures and councils, wherein being ignorant and not studied, I cannot take upon me to judge; but I do submit my opinion therein to the judgment of the catholic Roman church, as in all other points concerning faith I do. And for matter concerning my loyalty, I do acknowledge my sovereign liege Lord King James, to be lawful and undoubted King of all the kingdoms of England, Scotland, and Ireland; and I will bear true faith and allegiance to his Highness during my life.

WILLIAM TALBOT.

My lords, upon these words I conceive Talbot hath committed a great offence, and such a one, as if he had entered into a voluntary and malicious publication of the like writing, it would have been too great an offence for the capacity of this court. But because it grew by a question asked by a council of estate, and so rather seemeth, in a favourable construction, to proceed from a kind of submission to answer, than from any malicious or insolent will; it was fit, according to the clemency of these times, to proceed in this manner before your lordships: and yet let the hearers take these things right; for certainly, if a man be required by the council to deliver his opinion whether king James be king or no? and he deliver his opinion that he is not, this is high treason: but I do not say that these words amount to that; and therefore let me open them truly to your lordships, and therein open also the understanding of the offender himself, how far they reach.

My lords, a man's allegiance must be independent and certain, and not dependent and conditional. Elizabeth Barton that was called the holy maid of Kent, affirmed, that if king Henry VIII. did not take Catharine of Spain again to his wife within a twelvemonth, he should be no king: and this was treason. For though this act be contingent and future, yet the preparing of the treason is present.

And in like manner, if a man should voluntarily publish or maintain, that whensoever a bull of deprivation shall come forth against the king, that from thenceforth he is no longer king; this is of like nature. But with this I do not charge you neither; but this is the true latitude of your words, That if the doctrine touching the killing of kings be matter of faith, then you submit yourself to the judgment of the catholic Roman church: so as now, to do you right, your allegiance doth not depend simply upon a sentence of the pope's deprivation against the king; but upon another point also, if these doctrines be already, or shall be declared to be matter of faith. But, my lords, there is little won in this: there may be some difference to the guilt of the party, but there is little to the danger of the king. For the same pope of Rome may, with the same breath, declare both. So as still, upon the matter, the king is made

but tenant at will of his life and kingdoms; and the allegiance of his subjects is pinned upon the pope's acts. And certainly, it is time to stop the current of this opinion of acknowledgment of the pope's power *in temporalibus*; or else it will sap and supplant the seat of kings. And let it not be mistaken, that Mr. Talbot's offence should be no more than the refusing the oath of allegiance. For it is one thing to be silent, and another thing to affirm. As for the point of matter of faith, or not of faith, to tell your lordships plain, it would astonish a man to see the gulf of this implied belief. Is nothing excepted from it? If a man should ask Mr. Talbot, Whether he do condemn murder, or adultery, or rape, or the doctrine of Mahomet, or of Arius, instead of Suarez? Must the answer be with this exception, that if the question concern matter of faith, as no question it doth, for the moral law is matter of faith, that therein he will submit himself to what the church shall determine? And, no doubt, the murder of princes is more than simple murder. But to conclude, Talbot, I will do you this right, and I will not be reserved in this, but to declare that that is true; that you came afterwards to a better mind; wherein if you had been constant, the king, out of his great goodness, was resolved not to have proceeded with you in course of justice; but then again you started aside like a broken bow. So that by your variety and vacillation you lost the acceptable time of the first grace, which was not to have convented you.

Nay, I will go farther with you: your last submission I conceive to be satisfactory and complete; but then it was too late; the king's honour was upon it; it was published, and a day appointed for hearing; yet what preparation that may be to the second grace of pardon, that I know not: but I know my lords, out of their accustomed favour, will admit you not only to your defence concerning that that hath been charged, but to extenuate your fault by any submission that now God shall put into your mind to make.

A CHARGE GIVEN

BY SIR FRANCIS BACON, KNIGHT,

HIS MAJESTY'S ATTORNEY GENERAL,

AGAINST

MR. OLIVER SAINT JOHN,

FOR SCANDALIZING AND TRADUCING IN THE PUBLIC SESSIONS, LETTERS SENT FROM THE LORDS OF THE COUNCIL TOUCHING THE BENEVOLENCE.

My lords,

I shall inform you *ore tenus*, against this gentleman Mr. I. S. a gentleman, as it seems, of an ancient house and name; but for the present, I can think of him by no other name, than the name of a great offender. The nature and quality of his offence in sum is this: This gentleman hath upon advice, not suddenly by his pen, nor by the slip of his tongue; not privately, or in a corner, but publicly, as it were, to the face of the king's ministers and justices, slandered and traduced the king our sovereign, the law of the land, the parliament, and infinite particulars of his Majesty's worthy and loving subjects. Nay, the slander is of that nature, that it may seem to interest the people in grief and discontent against the state; whence might have ensued matter of murmur and sedition. So that it is not a simple slander, but a seditious slander, like to that the poet speaketh of—"Calamosque armare veneno:" venomous dart that hath both iron and poison.

To open to your lordships the true state of this offence, I will set before you, first, the occasion whereupon Mr. I. S. wrought: then the offence itself in his own words: and lastly, the points of his charge.

My lords, you may remember that there was the last parliament an expectation to have had the king supplied with treasure, although the event failed. Herein it is not fit for me to give opinion of a house of parliament, but I will give testimony of truth in all places. I served in the lower house, and I observed somewhat. This I do affirm, that I never could perceive but that there was in that house a general disposition to give, and give largely. The clocks in the house perchance might differ; some went too fast, some went too slow; but the disposition to give was general: so that I think I may truly say, "solo tempore lapsus amor."

This accident happening thus besides expectation, it stirred up and awaked in divers of his Majesty's worthy servants and subjects of the clergy, the nobi-

lity, the court, and others here near at hand, an affection loving and cheerful, to present the king some with plate, some with money, as free-will offerings, a thing that God Almighty loves, a cheerful giver: what an evil eye doth I know not. And, my lords, let me speak it plainly unto you: God forbid any body should be so wretched as to think that the obligation of love and duty, from the subject to the king, should be joint and not several. No, my lords, it is both. The subject petitioneth to the king in parliament. He petitioneth likewise out of parliament. The king on the other side gives graces to the subject in parliament: he gives them likewise, and poureth them upon his people out of parliament: and so no doubt the subject may give to the king in parliament, and out of parliament. It is true the parliament is *intercursus magnus*, the great intercourse and main current of graces and donatives from the king to the people, from the people to the king: but parliaments are held but at certain times: whereas the passages are always open for particulars; even as you see great rivers have their tides, but particular springs and fountains run continually.

To proceed therefore: As the occasion, which was the failing of supply by parliament, did awake the love and benevolence of those that were at hand to give; so it was apprehended and thought fit by my lords of the council to make a proof whether the occasion and example both, would not awake those in the country of the better sort to follow. Whereupon, their lordships devised and directed letters unto the sheriffs and justices, which declared what was done here above, and wished that the country might be moved, especially men of value.

Now, my lords, I beseech you give me favour and attention to set forth and observe unto you five points: I will number them, because other men may note them; and I will but touch them, because they shall not be drowned or lost in discourse, which I hold worthy the observation, for the honour of the state and confusion of slanderers; whereby it will appear most evidently what care was taken, that that which was then done might not have the effect, no nor the show, no nor so much as the shadow of a tax; and that it was so far from breeding or bringing in any ill precedent or example, as contrariwise it is a corrective that doth correct and allay the harshness and danger of former examples.

The first is, that what was done was done immediately after such a parliament, as made general profession to give, and was interrupted by accident: so as you may truly and justly esteem it, "tanquam posthuma proles parliamenti," as an after-child of the parliament, and in pursuit, in some small measure, of the firm intent of a parliament past. You may take it also, if you will, as an advance or provisional help until a future parliament; or as a gratification simply without any relation to a parliament; you can no ways take it amiss.

The second is, that it wrought upon example, as a thing not devised, or projected, or required; no nor so much as recommended, until many that were never moved nor dealt with, *ex mero motu*, had freely and frankly sent in their presents. So that the letters were rather like letters of news, what was done at London, than otherwise: and we know "exempla ducunt, non trahunt;" examples they do but lead, they do not draw nor drive.

The third is, that it was not done by commission under the great seal; a thing warranted by a multitude of precedents, both ancient, and of late time, as you shall hear anon, and no doubt warranted by law: so that the commissions be of that style and tenour, as they be to move that and not to levy: but this was done by letters of the council, and no higher hand or form.

The fourth is, that these letters had no manner of show of any binding act of state: for they contain not any special frame or direction how the business should be managed; but were written as upon trust, leaving the matter wholly to the industry and confidence of those in the country: so that it was an *absque computo*; such a form of letters as no man could fitly be called to account upon.

The fifth and last point is, that the whole carriage of the business had no circumstance compulsory. There was no proportion or rate set down, not so much as by way of a wish; there was no menace of any that should deny; no reproof of any that did deny; no certifying of the names of any that had denied. Indeed, if men could not content themselves to deny, but that they must censure and inveigh, nor to excuse themselves, but they must accuse the state, that is another case. But I say, for denying, no man was apprehended, no nor noted. So that I verily think, that there is none so subtle a disputer in the controversy of *liberum arbitrium*, that can with all his distinctions fasten or carp upon the act, but that there was free-will in it.

I conclude therefore, my lords, that this was a true and pure benevolence; not an imposition called a benevolence, which the statute speaks of; as you shall hear by one of my fellows. There is a great difference, I tell you, though Pilate would not see it, between "Rex Judæorum" and "se dicens Regem Judæorum." And there is a great difference between a benevolence and an exaction called a benevolence, which the duke of Buckingham speaks of in his oration to the city; and defineth it to be not what the subject of his good-will would give, but what the king of his good-will would take. But this, I say, was a benevolence wherein every man had a prince's prerogative, a negative voice; and this word *excusez moy*, was a plea peremptory. And therefore I do wonder how Mr. I. S. could foul or trouble so clear a fountain, certainly it was but his own bitterness and unsound humours.

Now to the particular charge: Amongst other counties, these letters of the lords came to the justices of D—shire, who signified the contents thereof, and gave directions and appointments for meetings concerning the business, to several towns and places within that county: and amongst the rest, notice was given unto the town of A. The mayor of A conceiving that this Mr. I. S. being a principal person, and a dweller in that town, was a man likely to give both money and good example, dealt with him to

know his mind: he intending, as it seems, to play prizes, would give no answer to the mayor in private, but would take time. The next day then being an appointment of the justices to meet, he takes occasion, or pretends occasion to be absent, because he would bring his papers upon the stage: and thereupon takes pen in hand, and instead of excusing himself, sits down and contriveth a seditious and libellous accusation against the king and state, which your lordships shall now hear, and sends it to the mayor: and withal, because the feather of his quill might fly abroad, he gives authority to the mayor to impart it to the justices, if he so thought good. And now, my lords, because I will not mistake or mis-repeat, you shall hear the seditious libel in the proper terms and words thereof.

[Here the papers were read.]

My lords, I know this paper offends your ears much, and the ears of any good subject; and sorry I am that the times should produce offences of this nature: but since they do, I would be more sorry they should be passed without severe punishment: "Non tradite factum," as the verse says, altered a little, "aut si tradatis, facti quoque tradite pœnam." If any man have a mind to discourse of the fact, let him likewise discourse of the punishment of the fact.

In this writing, my lords, there appears a monster with four heads, of the progeny of him that is the father of lies, and takes his name from slander.

The first is a wicked and seditious slander; or, if I shall use the Scripture phrase, a blaspheming of the king himself; setting him forth for a prince perjured in the great and solemn oath of his coronation, which is as it were the knot of the diadem; a prince that should be a violator and infringer of the liberties, laws, and customs of the kingdom; a mark for a Henry the fourth; a match for a Richard the second.

The second is a slander and falsification, and wresting of the law of the land gross and palpable: it is truly said by a civilian, "Tortura legum pessima," the torture of laws is worse than the torture of men.

The third is a slander and false charge of the parliament, that they had denied to give to the king: a point of notorious untruth.

And the last is a slander and taunting of an infinite number of the king's loving subjects, that have given towards this benevolence and free contribution; charging them as accessary and co-adjutors to the king's perjury. Nay, you leave us not there, but you take upon you a pontifical habit, and couple your slander with a curse; but thanks be to God, we have learned sufficiently out of the Scripture, that "as the bird flies away, so the causeless curse shall not come."

For the first of these, which concerns the king, I have taken to myself the opening and aggravation thereof; the other three I have distributed to my fellows.

My lords, I cannot but enter into this part with some wonder and astonishment, how it should come into the heart of a subject of England to vapour forth such a wicked and venomous slander against the king, whose goodness and grace is comparable, if not incomparable, unto any of the kings his progenitors. This therefore gives me a just and necessary occasion to do two things: the one, to make some representation of his Majesty; such as truly he is found to be in his government, which Mr. I. S. chargeth with violation of laws and liberties: the other, to search and open the depth of Mr. I. S. his offence. Both which I will do briefly; because the one, I cannot express sufficiently; and the other, I will not press too far.

My lords, I mean to make no panegyric or laudative; the king delights not in it, neither am I fit for it: but if it were but a counsellor or nobleman, whose name had suffered, and were to receive some kind of reparation in this high court, I would do him that duty as not to pass his merits and just attributes, especially such as are limited with the present case, in silence: for it is fit to burn incense where evil odours have been cast and raised. Is it so that king James shall be said to be a violator of the liberties, laws, and customs of his kingdoms? Or is he not rather a noble and constant protector and conservator of them all? I conceive this consisteth in maintaining religion and the true church; in maintaining the laws of the kingdom, which is the subject's birthright; in temperate use of the prerogative; in due and free administration of justice, and conservation of the peace of the land.

For religion, we must ever acknowledge, in the first place, that we have a king that is the principal conservator of true religion through the christian world. He hath maintained it not only with sceptre and sword, but likewise by his pen; wherein also he is potent.

He hath awaked and re-authorized the whole party of the reformed religion throughout Europe; which through the insolency and divers artifices and enchantments of the adverse part, was grown a little dull and dejected: he hath summoned the fraternity of kings to enfranchise themselves from the usurpation of the see of Rome: he hath made himself a mark of contradiction for it.

Neither can I omit, when I speak of religion, to remember that excellent act of his Majesty, which though it were done in a foreign country, yet the church of God is one, and the contagion of these things will soon pass seas and lands: I mean, in his constant and holy proceeding against the heretic Vorstius, whom, being ready to enter into the chair, and there to have authorized one of the most pestilent and heathenish heresies that ever was begun, his Majesty by his constant opposition dismounted and pulled down. And I am persuaded there sits in this court one whom God doth the rather bless for being his Majesty's instrument in that service.

I cannot remember religion and the church, but I must think of the seed-plots of the same, which are the universities. His Majesty, as for learning amongst kings, he is incomparable in his person; so likewise hath he been in his government a benign or benevolent planet towards learning: by whose influence those nurseries and gardens of learning,

the universities, were never more in flower nor fruit.

For the maintaining of the laws, which is the hedge and fence about the liberty of the subject, I may truly affirm it was never in better repair. He doth concur with the votes of the nobles; "Nolumus leges Angliæ mutare." He is an enemy of innovation. Neither doth the universality of his own knowledge carry him to neglect or pass over the very forms of the laws of the land. Neither was there ever king, I am persuaded, that did consult so oft with his judges, as my lords that sit here know well. The judges are a kind of council of the king's by oath and ancient institution; but he useth them so indeed: he confers regularly with them upon their returns from their visitations and circuits: he gives them liberty, both to inform him, and to debate matters with him; and in the fall and conclusion commonly relies on their opinions.

As for the use of the prerogative, it runs within the ancient channels and banks: some things that were conceived to be in some proclamations, commissions, and patents, as overflows, have been by his wisdom and care reduced; whereby, no doubt, the main channel of his prerogative is so much the stronger. For evermore overflows do hurt the channel.

As for administration of justice between party and party, I pray observe these points. There is no news of great seal or signet that flies abroad for countenance or delay of causes; protections rarely granted, and only upon great ground, or by consent. My lords here of the council and the king himself meddle not, as hath been used in former times, with matters of *meum* and *tuum*, except they have apparent mixture with matters of estate, but leave them to the king's courts of law or equity. And for mercy and grace, without which there is no standing before justice, we see, the king now hath reigned twelve years in his white robe, without almost any aspersion of the crimson dye of blood. There sits my lord Hobart, that served attorney seven years. I served with him. We were so happy, as there passed not through our hands any one arraignment for treason; and but one for any capital offence, which was that of the lord Sanquhar; the noblest piece of justice, one of them, that ever came forth in any king's time.

As for penal laws, which lie as snares upon the subjects, and which were as a *nemo scit* to king Henry VII.; it yields a revenue that will scarce pay for the parchment of the king's records at Westminster.

And lastly for peace, we see manifestly his Majesty bears some resemblance of that great name, "a Prince of Peace:" he hath preserved his subjects during his reign in peace, both within and without. For the peace with states abroad, we have it *usque ad satietatem:* and for peace in the lawyers' phrase, which count trespasses, and forces, and riots, to be *contra pacem;* let me give your lordships this token or taste, that this court, where they should appear, had never less to do. And certainly there is no better sign of *omnia bene*, than when this court is in a still.

But, my lords, this is a sea of matter: and therefore I must give it over, and conclude, that there was never king reigned in this nation that did better keep covenant in preserving the liberties and procuring the good of his people: so that I must needs say for the subjects of England,

"O fortunatos nimium sua si bona norint;"

as no doubt they do both know and acknowledge it; whatsoever a few turbulent discourses may, through the lenity of the time, take boldness to speak.

And as for this particular, touching the benevolence, wherein Mr. I. S. doth assign his breach of covenant, I leave it to others to tell you what the king may do, or what other kings have done; but I have told you what our king and my lords have done: which, I say again, is so far from introducing a new precedent, as it doth rather correct, and mollify, and qualify former precedents.

Now, Mr. I. S. let me tell you your fault in few words: for that I am persuaded you see it already, though I woo no man's repentance; but I shall, as much as in me is, cherish it where I find it. Your offence hath three parts knit together:

Your slander,

Your menace, and

Your comparison.

For your slander, it is no less than that the king is perjured in his coronation oath. No greater offence than perjury; no greater oath than that of a coronation. I leave it; it is too great to aggravate.

Your menace, that if there were a Bullingbroke, or I cannot tell what, there were matter for him, is a very seditious passage. You know well, that howsoever Henry the fourth's act, by a secret providence of God, prevailed, yet it was but an usurpation; and if it were possible for such a one to be this day, wherewith it seems your dreams are troubled, I do not doubt, his end would be upon the block; and that he would sooner have the ravens sit upon his head at London bridge, than the crown at Westminster. And it is not your interlacing of your "God forbid," that will salve these seditious speeches: neither could it be a forewarning, because the matter was past and not revocable, but a very stirring up and incensing of the people. If I should say to you, for example, "If these times were like some former times, of king Henry VIII. or some other times, which God forbid, Mr. I. S. it would cost you your life;" I am sure you would not think this to be a gentle warning, but rather that I incensed the court against you.

And for your comparison with Richard II. I see, you follow the example of them that brought him upon the stage, and into print, in queen Elizabeth's time, a most prudent and admirable queen. But let me entreat you, that when you will speak of queen Elizabeth or king James, you would compare them to king Henry VII. or king Edward I. or some other parallels to which they are alike. And this I would wish both you and all to take heed of, how you speak seditious matter in parables, or by tropes or examples. There is a thing in an indictment called

an innuendo; you must beware how you beckon or make signs upon the king in a dangerous sense: but I will contain myself and press this no farther. I may hold you for turbulent or presumptuous; but I hope you are not disloyal: you are graciously and mercifully dealt with. And therefore having now opened to my lords, and, as I think to your own heart and conscience, the principal part of your offence, which concerns the king, I leave the rest, which concerns the law, parliament, and the subjects that have given, to Mr. Serjeant and Mr. Solicitor.

THE CHARGE OF OWEN,

INDICTED OF HIGH TREASON, IN THE KING'S BENCH,

BY SIR FRANCIS BACON, KNIGHT,

HIS MAJESTY'S ATTORNEY-GENERAL.

The treason wherewith this man standeth charged, is for the kind and nature of it ancient, as ancient as there is any law of England; but in the particular, late and upstart: and again, in the manner and boldness of the present case, new and almost unheard of till this man. Of what mind he is now, I know not; but I take him as he was, and as he standeth charged. For high treason is not written in ice; that when the body relenteth, the impression should go away.

In this cause the evidence itself will spend little time: time therefore will be best spent in opening fully the nature of this treason, with the circumstances thereof; because the example is more than the man. I think good therefore by way of inducement and declaration in this cause to open unto the court, jury, and hearers, five things.

The first is, the clemency of the king; because it is news, and a kind of rarity, to have a proceeding in this place upon treason: and perhaps it may be marvelled by some, why after so long an intermission it should light upon this fellow; being a person but contemptible, a kind of venomous fly, and a hang-by of the seminaries.

The second is, the nature of this treason, as concerning the fact, which, of all kinds of compassing the king's death, I hold to be the most perilous, and as much differing from other conspiracies, as the lifting up of a thousand hands against the king, like the giant Briareus, differs from lifting up one or a few hands.

The third point that I will speak unto is, the doctrine or opinion, which is the ground of this treason; wherein I will not argue or speak like a divine or scholar, but as a man bred in a civil life; and to speak plainly, I hold the opinion to be such that deserveth rather detestation than contestation.

The fourth point is, the degree of this man's offence, which is more presumptuous than I have known any other to have fallen into in this kind, and hath a greater overflow of malice and treason.

And fifthly, I will remove somewhat that may seem to qualify and extenuate this man's offence; in that he hath not affirmed simply that it is lawful to kill the king, but conditionally; that if the king be excommunicate, it is lawful to kill him: which maketh little difference either in law or peril.

For the king's clemency, I have said it of late upon a good occasion, and I still speak it with comfort: I have now served his Majesty's solicitor and attorney eight years and better; yet this is the first time that ever I gave in evidence against a traitor at this bar or any other. There hath not wanted matter in that party of the subjects whence this kind of offence floweth, to irritate the king: he hath been irritated by the powder of treason, which might have turned judgment into fury. He hath been irritated by wicked and monstrous libels; irritated by a general insolency and presumption in the papists throughout the land; and yet I see his Majesty keepeth Cæsar's rule: "Nil malo, quam eos esse similes sui, et mei." He leaveth them to be like themselves; and he remaineth like himself, and striveth to overcome evil with goodness. A strange thing, bloody opinions, bloody doctrines, bloody examples, and yet the government still unstained with blood. As for this Owen that is brought in question, though his person be in his condition contemptible; yet we see by miserable examples, that these wretches which are but the scum of the earth, have been able to stir earthquakes by murdering princes; and if it were in case of contagion, as this is a contagion of the heart and soul, a rascal may bring in a plague into the city as well as a great man: so it is not the person, but the matter that is to be considered.

For the treason itself, which is the second point, my desire is to open it in the depth thereof, if it were possible; but it is bottomless: I said in the beginning, that this treason in the nature of it was old. It is not of the treasons whereof it may be said, from the beginning it was not so. You are indicted, Owen, not upon any statute made against the pope's supremacy, or other matters, that have

reference to religion; but merely upon that law which was born with the kingdom, and was law even in superstitious times, when the pope was received. The compassing and imagining of the king's death was treason. The statute of 25 Edw. III. which was but declaratory, begins with this article as the capital of capitals in treason, and of all others the most odious and the most perilous: and so the civil law saith, "Conjurationes omnium proditionum odiosissimæ et perniciosissimæ." Against hostile invasions and the adherence of subjects to enemies, kings can arm. Rebellions must go over the bodies of many good subjects before they can hurt the king; but conspiracies against the persons of kings are like thunder-bolts that strike upon the sudden, hardly to be avoided. "Major metus a singulis," saith he, "quam ab universis." There is no preparation against them: and that preparation which may be of guard or custody, is a perpetual misery. And therefore they that have written of the privileges of ambassadors, and of the amplitude of safe-conducts, have defined, that if an ambassador or a man that cometh in upon the highest safe-conducts, do practise matter of sedition in a state, yet by the law of nations he ought to be remanded; but if he conspire against the life of a prince by violence or poison, he is to be justiced: "Quia odium est omni privilegio majus." Nay, even amongst enemies, and in the most deadly wars, yet nevertheless conspiracy and assassination of princes hath been accounted villanous and execrable.

The manners of conspiring and compassing the king's death are many: but it is most apparent, that amongst all the rest this surmounteth. First, because it is grounded upon pretenced religion; which is a trumpet that inflameth the heart and powers of a man with daring and resolution more than any thing else. Secondly, it is the hardest to be avoided; for when a particular conspiracy is plotted or attempted against a king by some one or some few conspirators, it meets with a number of impediments. Commonly he that hath the head to devise it, hath not the heart to undertake it: and the person that is used, sometimes faileth in courage; sometimes faileth in opportunity; sometimes is touched with remorse. But to publish and maintain, that it may be lawful for any man living to attempt the life of a king, this doctrine is a venomous sop; or, as a legion of malign spirits, or an universal temptation, doth enter at once into the hearts of all that are any way prepared, or of any predisposition to be traitors; so that whatsoever faileth in any one, is supplied in many. If one man faint, another will dare; if one man hath not the opportunity, another hath; if one man relent, another will be desperate. And thirdly, particular conspiracies have their periods of time, within which if they be not taken, they vanish; but this is endless, and importeth perpetuity of springing conspiracies. And so much concerning the nature of the fact.

For the third point, which is the doctrine; that upon an excommunication of the pope, with sentence of deposing, a king by any son of Adam may be slaughtered; and that it is justice and no murder; and that their subjects are absolved of their allegiance, and the kings themselves exposed to spoil and prey. I said before, that I would not argue the subtlety of the question: it is rather to be spoken to by way of accusation of the opinion as impious, than by way of dispute of it as doubtful. Nay, I say, it deserveth rather some holy war or league amongst all christian princes of either religion for the extirpating and razing of the opinion, and the authors thereof, from the face of the earth, than the style of pen or speech. Therefore in this kind I will speak to it a few words, and not otherwise. Nay, I protest, if I were a papist I should say as much: nay, I should speak it perhaps with more indignation and feeling. For this horrible opinion is our advantage, and it is their reproach, and will be their ruin.

This monster of opinion is to be accused of three most evident and most miserable slanders.

First, Of the slander it bringeth to the christian faith, being a plain plantation of irreligion and atheism.

Secondly, The subversion which it introduceth into all policy and government.

Thirdly, The great calamity it bringeth upon papists themselves; of which the more moderate sort, as men misled, are to be pitied.

For the first, if a man doth visit the foul and polluted opinions, customs, or practices of heathenism, Mahometism, and heresy, he shall find they do not attain to this height. Take the examples of damnable memory amongst the heathen. The proscriptions in Rome of Sylla, and afterwards of the Triumvirs, what were they? They were but a finite number of persons, and those not many that were exposed unto any man's sword. But what is that to the proscribing of a king, and all that shall take his part? And what was the reward of a soldier that amongst them killed one of the proscribed? A small piece of money. But what is now the reward of one that shall kill a king? The kingdom of heaven. The custom among the heathen that was most scandalized was, that sometimes the priest sacrificed men; but yet you shall not read of any priesthood that sacrificed kings.

The Mahometans make it a part of their religion to propagate their sect by the sword; but yet still by honourable wars, never by villanies and secret murders. Nay, I find that the Saracen prince, of whom the name of the assassins is derived, which had divers votaries at commandment, which he sent and employed to the killing of divers princes in the east, by one of whom Amurath the first was slain, and Edward the first of England was wounded, was put down and rooted out by common consent of the Mahometan princes.

The anabaptists, it is true, come nearest. For they profess the pulling down of magistrates: and they can chant the psalm, "To bind their kings in chains, and their nobles in fetters of iron." This is the glory of the saints, much like the temporal authority that the pope challengeth over princes. But this is the difference, that that is a furious and fanatical fury, and this is a sad and solemn mis-

chief: he "imagineth mischief as a law;" a law-like mischief.

As for the defence which they do make, it doth aggravate the sin, and turneth it from a cruelty towards man to a blasphemy towards God. For to say that all this is "in ordine ad spirituale," and to a good end, and for the salvation of souls, it is directly to make God author of evil, and to draw him in the likeness of the prince of darkness; and to say with those that St. Paul speaketh of, "Let us do evil that good may come thereof;" of whom the apostle saith definitively, "that their damnation is just."

For the destroying of government universally, it is most evident, that it is not the case of protestant princes only, but of catholic princes likewise; as the king hath excellently set forth. Nay, it is not the case of princes only, but of all subjects and private persons. For touching princes, let history be perused, what hath been the causes of excommunication; and namely, this tumour of it, the deposing of kings; it hath not been for heresy and schism alone, but for collation and investitures of bishoprics and benefices, intruding upon ecclesiastical possessions, violating of any ecclesiastical person or liberty. Nay, generally they maintain it, that it may be for any sin: so that the difference wherein their doctors vary, that some hold that the pope hath his temporal power immediately, and others but "in ordine ad spirituale," is but a delusion and an abuse. For all cometh to one. What is there that may not be made spiritual by consequence; especially when he that giveth the sentence may make the case? and accordingly hath the miserable experience followed. For this murdering of kings hath been put in practice, as well against papist kings as protestant: save that it hath pleased God so to guide it by his admirable providence, as the attempts upon papist princes have been executed, and the attempts upon protestant princes have failed, except that of the Prince of Orange: and not that neither, until such time as he had joined too fast with the duke of Anjou and the papists. As for subjects, I see not, nor ever could discern, but that by infallible consequence it is the case of all subjects and people, as well as of kings; for it is all one reason, that a bishop upon an excommunication of a private man, may give his lands and goods in spoil, or cause him to be slaughtered, as for the pope to do it towards a king; and for a bishop to absolve the son from duty to the father, as for the pope to absolve the subject from his allegiance to his king. And this is not my inference, but the very affirmative of pope Urban the second, who in a brief to Godfrey, bishop of Lucca, hath these very words, which cardinal Baronius reciteth in his Annals, "Non illos homicidas arbitramur, qui adversus excommunicatos zelo catholicæ matris ardentes eorum quoslibet trucidare contigerit," speaking generally of all excommunications. Tom. XI. p. 802.

THE CHARGE

OF SIR FRANCIS BACON, KNIGHT,

THE KING'S ATTORNEY-GENERAL,

AGAINST

MR. LUMSDEN, SIR JOHN WENTWORTH, AND SIR JOHN HOLMES.

FOR SCANDAL AND TRADUCING THE KING'S JUSTICE IN THE PROCEEDINGS AGAINST WESTON IN THE STAR-CHAMBER, NOVEMBER, 1615.

The offence wherewith I shall charge the three offenders at the bar, is a misdemeanor of a high nature, tending to the defacing and scandal of justice in a great cause capital. The particular charge is this:

The king amongst many his princely virtues is known to excel in that proper virtue of the imperial throne, which is justice. It is a royal virtue, which doth employ the other three cardinal virtues in her service: wisdom to discover, and discern nocent or innocent; fortitude to prosecute and execute; temperance, so to carry justice as it be not passionate in the pursuit, nor confused in involving persons upon light suspicion, nor precipitate in time. For this his Majesty's virtue of justice God hath of late raised an occasion, and erected as it were a stage or theatre, much to his honour, for him to show it, and act it in the pursuit of the untimely death of Sir Thomas Overbury, and therein cleansing the land from blood. For, my lords, if blood spilt pure doth cry to heaven in God's ears, much more blood defiled with poison.

This great work of his Majesty's justice, the more excellent it is, your lordships will soon conclude the greater is the offence of any that have sought to affront it or traduce it. And therefore, before I descend unto the charge of these offenders, I will set before your lordships the weight of that which they have sought to impeach; speaking somewhat of the general crime of imprisonment, and then of the par-

ticular circumstances of this fact upon Overbury; and thirdly and chiefly, of the king's great and worthy care and carriage in this business.

The offence of impoisonment is most truly figured in that device or description, which was made of the nature of one of the Roman tyrants, that he was "lutum sanguine maceratum," mire mingled or cemented with blood: for as it is one of the highest offences in guiltiness, so it is the basest of all others in the mind of the offenders. Treasons "magnum aliquid spectant:" they aim at great things; but this is vile and base. I tell your lordships what I have noted, that in all God's book, both of the Old and New Testament, I find examples of all other offences and offenders in the world, but not any one of an impoisonment or an impoisoner. I find mention or fear of casual impoisonment: when the wild vine was shred into the pot, they came complaining in a fearful manner; Master, "mors in olla." And I find mention of poisons of beasts and serpents; "the poison of asps is under their lips." But I find no example in the book of God of impoisonment. I have sometime thought of the words in the psalm, "let their table be made a snare." Which certainly is most true of impoisonment; for the table, the daily bread, for which we pray, is turned to a deadly snare: but I think rather that that was meant of the treachery of friends that were participant of the same table.

But let us go on. It is an offence, my lords, that hath the two spurs of offending; *spes perficiendi*, and *spes celandi*; it is easily committed, and easily concealed.

It is an offence that is "tanquam sagitta nocte volans;" it is the arrow that flies by night. It discerns not whom it hits: for many times the poison is laid for one, and the other takes it; as in Sander's case, where the poisoned apple was laid for the mother, and was taken up by the child, and killed the child: and so in that notorious case, whereupon the statute of 22 Hen. VIII. cap. 9, was made, where the intent being to poison but one or two, poison was put into a little vessel of barm that stood in the kitchen of the bishop of Rochester's house; of which barm pottage or gruel was made, wherewith seventeen of the bishop's family were poisoned: nay, divers of the poor that came to the bishop's gate, and had the broken pottage in alms, were likewise poisoned. And therefore if any man will comfort himself, or think with himself, Here is great talk of impoisonment, I hope I am safe; for I have no enemies; nor I have nothing that any body should long for: Why, that is all one; for he may sit at table by one for whom poison is prepared, and have a drench of his cup, or of his pottage. And so, as the poet saith, "concidit infelix alieno vulnere;" he may die another man's death. And therefore it was most gravely, and judiciously, and properly provided by that statute, that impoisonment should be high treason; because whatsoever offence tendeth to the utter subversion and dissolution of human society, is in the nature of high treason.

Lastly, it is an offence that I may truly say of it, "non est nostri generis, nec sanguinis." It is, thanks be to God, rare in the isle of Britain: it is neither of our country, nor of our church; you may find it in Rome or Italy. There is a region, or perhaps a religion for it: and if it should come amongst us, certainly it were better living in a wilderness than in a court.

For the particular fact upon Overbury. First, for the person of Sir Thomas Overbury: I knew the gentleman. It is true, his mind was great, but it moved not in any good order; yet certainly it did commonly fly at good things; and the greatest fault that I ever heard of him was, that he made his friend his idol. But I leave him as Sir Thomas Overbury.

But take him as he was the king's prisoner in the Tower; and then see how the case stands. In that place the state is as it were respondent to make good the body of a prisoner. And if any thing happen to him there, it may, though not in this case, yet in some others, make an aspersion and reflection upon the state itself. For the person is utterly out of his own defence; his own care and providence can serve him nothing. He is in custody and preservation of law; and we have a maxim in our law, as my lords the judges know, that when a state is in preservation of law nothing can destroy it, or hurt it. And God forbid but the like should be for the persons of those that are in custody of law; and therefore this was a circumstance of great aggravation.

Lastly, To have a man chased to death in such manner, as it appears now by matter of record; for other privacy of the cause I know not; by poison after poison, first roseaker, then arsenick, then mercury sublimate, then sublimate again; it is a thing would astonish man's nature to hear it. The poets feign, that the furies had whips, that they were corded with poisonous snakes; and a man would think that this were the very case, to have a man tied to a post, and to scourge him to death with snakes: for so may truly be termed diversity of poisons.

Now I will come to that which is the principal; that is, his Majesty's princely, yea, and as I may truly term it, sacred proceeding in this cause. Wherein I will first speak of the temper of his justice, and then of the strength thereof.

First, it pleased my lord chief justice to let me know, that which I heard with great comfort, which was the charge that his Majesty gave to himself first, and afterwards to the commissioners in this case, worthy certainly to be written in letters of gold, wherein his Majesty did fore-rank and make it his prime direction, that it should be carried, without touch to any that was innocent; nay more, not only without impeachment, but without aspersion: which was a most noble and princely caution from his Majesty; for men's reputations are tender things, and ought to be, like Christ's coat, without seam. And it was the more to be respected in this case, because it met with two great persons; a nobleman that his Majesty had favoured and advanced, and his lady being of a great and honourable house: though I think it be true that the writers say, That there is no pomegranate so fair or so sound, but may have a perished kernel. Nay, I see plainly, that in those

excellent parts of his Majesty's own hand-writing, being as so many beams of justice issuing from that virtue which doth shine in him; I say, I see it was so evenly carried without prejudice, whether it were a true accusation of the one part, or a practice of a false accusation on the other, as showed plainly that his Majesty's judgment was *tanquam tabula rasa*, as a clean pair of tables, and his ear *tanquam janua aperta*, as a gate not side open, but wide open to truth, as it should be by little and little discovered. Nay, I see plainly, that at the first, till farther light did break forth, his Majesty was little moved with the first tale, which he vouchsafeth not so much as the name of a tale; but calleth a rumour, which is a heedless tale.

As for the strength or resolution of his Majesty's justice, I must tell your lordships plainly; I do not marvel to see kings thunder out justice in cases of treason, when they are touched themselves; and that they are *vindices doloris proprii:* but that a king should, *pro amore justitiæ* only, contrary to the tide of his own affection, for the preservation of his people, take such care of a cause of justice, that is rare and worthy to be celebrated far and near. For, I think I may truly affirm, that there was never in this kingdom, nor in any other kingdom, the blood of a private gentleman vindicated *cum tanto motu regni*, or to say better, *cum tanto plausu regni*. If it had concerned the king or prince, there could not have been greater nor better commissioners to examine it. The term hath been almost turned into a *justitium*, or vacancy; the people themselves being more willing to be lookers-on in this business, than to follow their own. There hath been no care of discovery omitted, no moment of time lost. And therefore I will conclude this part with the saying of Solomon, "Gloria Dei celare rem, et gloria regis scrutari rem." And his Majesty's honour is much the greater, for that he hath showed to the world in this business as it hath relation to my lord of Somerset, whose case in no sort I do prejudge, being ignorant of the secrets of the cause, but taking him as the law takes him hitherto, for a subject, I say, the king hath to his great honour showed, that were any man, in such a case of blood, as the signet upon his right hand, as the Scripture says, yet would he put him off.

Now will I come to the particular charge of these gentlemen, whose qualities and persons I respect and love; for they are all my particular friends: but now I can only do this duty of a friend to them, to make them know their fault to the full.

And therefore, first, I will by way of narrative declare to your lordships the fact, with the occasion of it; then you shall have their confessions read, upon which you are to proceed, together with some collateral testimonies by way of aggravation: and lastly, I will note and observe to your lordships the material points which I do insist upon for their charge, and so leave them to their answer. And this I will do very briefly, for the case is not perplexed.

That wretched man Weston, who was the actor or mechanical party in this impoisonment, at the first day being indicted by a very substantial jury of selected citizens, to the number of nineteen, who found *billa vera*, yet nevertheless at the first stood mute: but after some days intermission, it pleased God to cast out the dumb devil, and that he did put himself upon his trial; and was by a jury also of great value, upon his confession, and other testimonies, found guilty: so as thirty-one sufficient jurors have passed upon him. Whereupon judgment and execution was awarded against him. After this, being in preparation for another world, he sent for Sir Thomas Overbury's father, and falling down upon his knees, with great remorse and compunction, asked him forgiveness. Afterwards, again, of his own motion, desired to have his like prayer of forgiveness recommended to his mother, who was absent. And at both times, out of the abundance of his heart, confessed that he was to die justly, and that he was worthy of death. And after again at his execution, which is a kind of sealing-time of confessions, even at the point of death, although there were tempters about him, as you shall hear by and by, yet he did again confirm publicly, that his examinations were true, and that he had been justly and honourably dealt with. Here is the narrative, which induceth the charge. The charge itself is this.

Mr. L. whose offence stands alone single, the offence of the other two being in consort; and yet all three meeting in their end and centre, which was to interrupt or deface this excellent piece of justice; Mr. L. I say, meanwhile between Weston's standing mute and his trial, takes upon him to make a most false, odious, and libellous relation, containing as many untruths as lines, and sets it down in writing with his own hand, and delivers it to Mr. Henry Gibb, of the bed-chamber, to be put into the king's hand; in which writing he doth falsify and pervert all that was done the first day at the arraignment of Weston; turning the pike and point of his imputations principally upon my lord chief justice of England; whose name, thus occurring, I cannot pass by, and yet I cannot skill to flatter. But this I will say of him, and I would say as much to ages, if I should write a story; that never man's person and his place were better met in a business, than my lord Coke and my lord chief justice, in the cause of Overbury.

Now, my lords, in this offence of M. L. for the particulars of these slanderous articles, I will observe them unto you when the writings and examinations are read; for I do not love to set the gloss before the text. But in general I note to your lordships, first, the person of M. L. I know he is a Scotch gentleman, and thereby more ignorant of our laws and forms: but I cannot tell whether this doth extenuate his fault in respect of ignorance, or aggravate it much, in respect of presumption; that he would meddle in that he understood not: but I doubt it came not out of his quiver: some other man's cunning wrought upon this man's boldness. Secondly, I may note unto you the greatness of the cause wherein he being a private mean gentleman did presume to deal. M. L. could not but know to what great and grave commissioners the king had committed this cause; and that his Majesty in his wisdom would expect return of all things from them

to whose trust he hath committed this business. For it is the part of commissioners, as well to report the business, as to manage the business; and then his Majesty might have been sure to have had all things well weighed, and truly informed: and therefore it should have been far from M. L. to have presumed to have put forth his hand to so high and tender a business, which was not to be touched but by employed hands. Thirdly, I note to your lordships, that this infusion of a slander into a king's ear, is of all forms of libels and slanders the worst. It is true, that kings may keep secret their informations, and then no man ought to inquire after them, while they are shrined in their breast. But where a king is pleased that a man shall answer for his false information; there, I say, the false information to a king exceeds in offence the false information of any other kind; being a kind, since we are in matter of poison, of impoisonment of a king's ear. And thus much for the offence of M. L.

For the offence of S. W. and H. I. which I said was in consort, it was shortly this. At the time and place of the execution of Weston, to supplant his christian resolution, and to scandalize the justice already past, and perhaps to cut off the thread of that which is to come, these gentlemen, with others, came mounted on horseback, and in a ruffling and facing manner put themselves forward to re-examine Weston upon questions; and what questions? Directly cross to that that had been tried and judged. For what was the point tried? That Weston had poisoned Overbury. What was S. W.'s question? Whether Weston did poison Overbury or no? A contradictory directly: Weston answered only, that he did him wrong; and turning to the sheriff, said, You promised me I should not be troubled at this time. Nevertheless, he pressed him to answer; saying he desired to know it, that he might pray with him. I know not that S. W. is an ecclesiastic, that he should cut any man from the communion of prayer. And yet for all this vexing of the spirit of a poor man, now in the gates of death, Weston nevertheless stood constant, and said, I die not unworthily; my lord chief justice hath my mind under my hand, and he is an honourable and just judge. This is S. W. his offence.

For H. I. he was not so much a questionest; but wrought upon the other's questions, and, like a kind of confessor, wished him to discharge his conscience, and to satisfy the world. What world? I marvel! it was sure the world at Tyburn. For the world at Guildhall, and the world at London, was satisfied before; *teste* the bells that rung. But men have got a fashion now-a-days, that two or three busy-bodies will take upon them the name of the world, and broach their own conceits, as if it were a general opinion. Well, what more? When they could not work upon Weston, then I. H. in an indignation turned about his horse, when the other was turning over the ladder, and said, he was sorry for such a conclusion; that was, to have the state honoured or justified; but others took and reported his words in another degree: but that I leave, seeing it is not confessed.

H. I. his offence had another appendix, before this in time; which was, that at the day of the verdict given up by the jury, he also would needs give his verdict, saying openly, that if he were of the jury, he would doubt what to do. Marry, he saith, he cannot tell well whether he spake this before the jury had given up the verdict, or after; wherein there is little gained. For whether H. I. were a pre-juror or a post-juror, the one was to prejudge the jury, the other as to taint them.

Of the offence of these two gentlemen in general, your lordships must give me leave to say, that it is an offence greater and more dangerous than is conceived. I know well that as we have no Spanish inquisitions, nor justice in a corner; so we have no gagging of men's mouths at their death; but that they may speak freely at the last hour: but then it must come from the free motion of the party, not by temptation of questions. The questions that are to be asked ought to tend to farther revealing of their own or others' guiltiness; but to use a question in the nature of a false interrogatory, to falsify that which is *res judicata*, is intolerable. For that were to erect a court or commission of review at Tyburn, against the king's bench at Westminster. And besides, it is a thing vain and idle: for if they answer according to the judgment past, it adds no credit; or if it be contrary, it derogateth nothing: but yet it subjecteth the majesty of justice to popular and vulgar talk and opinion.

My lords, these are great and dangerous offences; for if we do not maintain justice, justice will not maintain us.

But now your lordships shall hear the examinations themselves, upon which I shall have occasion to note some particular things, &c.

THE CHARGE

OF SIR FRANCIS BACON, KNIGHT,

HIS MAJESTY'S ATTORNEY-GENERAL,

AGAINST

FRANCES COUNTESS OF SOMERSET,

INTENDED TO HAVE BEEN SPOKEN BY HIM AT HER ARRAIGNMENT, ON FRIDAY, MAY 24, 1616, IN CASE SHE HAD PLEADED NOT GUILTY.*

IT MAY PLEASE YOUR GRACE, MY LORD HIGH STEWARD OF ENGLAND,† AND YOU, MY LORDS, THE PEERS;

You have heard the indictment against this lady well opened; and likewise the point in law, that might make some doubt, declared and solved; wherein certainly the policy of the law of England is much to be esteemed, which requireth and respecteth form in the indictment, and substance in the proof.

This scruple it may be hath moved this lady to plead not guilty, though for the proof I shall not need much more than her own confession, which she hath formerly made, free and voluntary, and therein given glory to God and justice. And certainly confession, as it is the strongest foundation of justice, so it is a kind of corner-stone, whereupon justice and mercy may meet.

The proofs, which I shall read in the end for the ground of your verdict and sentence, will be very short; and as much as may serve to satisfy your honours and consciences for the conviction of this lady, without wasting of time in a case clear and confessed; or ripping up guiltiness against one, that hath prostrated herself by confession; or preventing or deflowering too much of the evidence. And therefore the occasion itself doth admonish me to spend this day rather in declaration than in evidence, giving God and the king the honour, and your lordships and the hearers the contentment, to set before you the proceeding of this excellent work of the king's justice, from the beginning to the end; and so to conclude with the reading the confession and proofs.

My lords, this is now the second time ‡ within the space of thirteen years reign of our happy sovereign, that this high tribunal-seat of justice ordained for the trial by peers, hath been opened and erected; and that, with a rare event, supplied and exercised by one and the same person, which is a great honour to you, my lord steward.

In all this mean time the king hath reigned in his white robe, not sprinkled with any drop of blood of any of his nobles of this kingdom. Nay, such have been the depths of his mercy, as even those noblemen's bloods, against whom the proceeding was at Winchester, Cobham and Grey, were attainted and corrupted, but not spilt or taken away; but that they remained rather spectacles of justice in their continual imprisonment, than monuments of justice in the memory of their suffering.

It is true, that the objects of his justice then and now were very differing. For then, it was the revenge of an offence against his own person and crown, and upon persons that were malcontents, and contraries to the state and government. But now, it is the revenge of the blood and death of a particular subject, and the cry of a prisoner. It is upon persons that were highly in his favour; whereby his Majesty, to his great honour hath showed to the world, as if it were written in a sun-beam, that he is truly the lieutenant of Him, with whom there is no respect of persons; that his affections royal are above his affections private: that his favours and nearness about him are not like popish sanctuaries to privilege malefactors: and that his being the best master of the world doth not let him from being the best king of the world. His people, on the other side, may say to themselves, "I will lie down in peace; for God and the king and the law protect me against great and small." It may be a discipline also to great men, especially such as are swoln in fortunes from small beginnings, that the king is as well able to level mountains, as to fill valleys, if such be their desert.

But to come to the present case; the great frame of justice, my lords, in this present action, hath a vault, and it hath a stage: a vault, wherein these works of darkness were contrived; and a stage with steps, by which they were brought to light. And therefore I will bring this work of justice to the period of this day; and then go on with this day's work.

Sir Thomas Overbury was murdered by poison in the 15th of September, 1613, 11 *Reg.* This foul and cruel murder did, for a time, cry secretly in the

* She pleaded guilty, on which occasion the attorney-general spoke a charge somewhat different from this.

† Thomas Egerton, viscount Ellesmere, lord high chancellor.

‡ The first time was on the trials of the lords Cobham and Grey, in November, 1603.

ears of God: but God gave no answer to it, otherwise than by that voice, which sometimes he useth, which is *vox populi*, the speech of the people. For there went then a murmur, that Overbury was poisoned: and yet this same submiss and soft voice of God, the speech of the vulgar people, was not without a counter-tenor, or counter-blast of the devil, who is the common author both of murder and slander: for it was given out, that Overbury was dead of a foul disease, and his body, which they had made a *corpus Judaicum* with their poisons, so as it had no whole part, must be said to be leprosied with vice, and so his name poisoned as well as his body. For as to dissoluteness, I never heard the gentleman noted with it: his faults were insolency and turbulency, and the like of that kind; the other part of the soul, not the voluptuous.

Meantime there was some industry used, of which I will not now speak, to lull asleep those that were the revengers of blood; the father and the brother of the murdered. And in these terms things stood by the space almost of two years, during which time God so blinded the two great procurers, and dazzled them with their own greatness, and did bind and nail fast the actors and instruments with security upon their protection, as neither the one looked about them, nor the other stirred or fled, nor were conveyed away; but remained here still, as under a privy arrest of God's judgments; insomuch as Franklin, that should have been sent over to the Palsgrave with good store of money, was by God's providence and the accident of a marriage of his, diverted and stayed.

But about the beginning of the progress last summer, God's judgments began to come out of their depths: and as the revealing of murders is commonly such, as a man may say, *a Domino hoc factum est*; it is God's work, and it is marvellous in our eyes: so in this particular it is most admirable; for it came forth by a compliment and matter of courtesy.

My lord of Shrewsbury,* that is now with God, recommended to a counsellor of state, of especial trust by his place, the late lieutenant Helwisse,† only for acquaintance as an honest worthy gentleman; and desired him to know him, and to be acquainted with him. That counsellor answered him civilly, that my lord did him a favour; and that he should embrace it willingly: but he must let his lordship know, that there did lie a heavy imputation upon that gentleman, Helwisse: for that Sir Thomas Overbury, his prisoner, was thought to have come to a violent and untimely death. When this speech was reported back by my lord of Shrewsbury to Helwisse, *perculit illico animum*, he was stricken with it; and being a politic man, and of likelihood doubting that the matter would break forth at one time or other, and that others might have the start of him, and thinking to make his own case by his own tale, resolved with himself, upon this occasion, to discover to my lord of Shrewsbury and that counsellor, that there was an attempt, whereto he was privy, to have poisoned Overbury by the hands of his under-keeper Weston; but that he checked it, and put it by, and dissuaded it, and related so much to him indeed: but then he left it thus, that it was but an attempt, or untimely birth, never executed; and as if his own fault had been no more, but that he was honest in forbidding, but fearful of revealing and impeaching or accusing great persons; and so with this fine point thought to save himself.

But that great counsellor of state wisely considering, that by the lieutenant's own tale it could not be simply a permission or weakness; for that Weston was never displaced by the lieutenant, notwithstanding that attempt; and coupling the sequel by the beginning, thought it matter fit to be brought before his Majesty, by whose appointment Helwisse set down the like declaration in writing.

Upon this ground the king playeth Solomon's part, "Gloria Dei celare rem; et gloria regis investigare rem;" and sets down certain papers of his own hand, which I might term to be *claves justitiæ*, keys of justice; and may serve for a precedent both for princes to imitate, and for a direction for judges to follow: and his Majesty carried the balance with a constant and steady hand, evenly and without prejudice, whether it were a true accusation of the one part, or a practice and factious device of the other: which writing, because I am not able to express according to the worth thereof, I will desire your lordship anon to hear read.

This excellent foundation of justice being laid by his Majesty's own hand, it was referred unto some counsellors to examine farther, who gained some degrees of light from Weston, but yet left it imperfect.

After it was referred to Sir Edward Coke, chief justice of the king's bench, as a person best practised in legal examinations, who took a great deal of indefatigable pains in it, without intermission, having, as I have heard him say, taken at least three hundred examinations in this business.

But these things were not done in a corner. I need not speak of them. It is true, that my lord chief justice, in the dawning and opening of the light, finding that the matter touched upon these great persons, very discreetly became suitor to the king to have greater persons than his own rank joined with him. Whereupon, your lordship, my lord high steward of England, to whom the king commonly resorteth *in arduis*, and my lord steward of the king's house, and my lord Zouch, were joined with him.

Neither wanted there this while practice to suppress testimony, to deface writings, to weaken the

* Gilbert earl of Shrewsbury, knight of the Garter, who died May 8, 1616.

† Sir Gervase Helwisse, appointed lieutenant of the Tower, upon the removal of Sir William Waade on the 6th of May, 1613, [Reliquiæ Wottonianæ, p. 412, 3d Edit. 1672.] Mr. Chamberlain, in a MS. letter to Sir Dudley Carleton, dated at London, May 13, 1613, speaks of Sir Gervase's promotion in these terms. "One Sir Gervase Helwisse, of Lincolnshire, somewhat an unknown man, is put into the place [of Sir W. Waade's] by the favour of the Lord Chamberlain [earl of Somerset] and his lady. The gentleman is of too mild and gentle a disposition for such an office. He is my old friend and acquaintance in France, and lately renewed in town, where he hath lived past a year, nor followed the court many a day." Sir Henry Wotton, in a letter of the 14th of May, 1613, [*ubi supra*, p. 13.] says that Sir Gervase had been before one of the pensioners.

king's resolution, to slander the justice, and the like. Nay, when it came to the first solemn act of justice, which was the arraignment of Weston, he had his lesson to stand mute; which had arrested the wheel of justice. But this dumb devil, by the means of some discreet divines, and the potent charm of justice, together, was cast out. Neither did this poisonous adder stop his ear to those charms, but relented, and yielded to his trial.

Then follow the proceedings of justice against the other offenders, Turner, Helwisse, Franklin.

But all these being but the organs and instruments of this fact, the actors and not the authors, justice could not have been crowned without this last act against these great persons. Else Weston's censure or prediction might have been verified, when he said, he hoped the small flies should not be caught, and the great escape. Wherein the king being in great straits, between the defacing of his honour and of his creature, hath, according as he useth to do, chosen the better part, reserving always mercy to himself.

The time also of this justice hath had its true motions. The time until this lady's deliverance was due unto honour, christianity, and humanity, in respect to her great belly. The time since was due to another kind of deliverance too; which was, that some causes of estate, that were in the womb, might likewise be brought forth, not for matter of justice, but for reason of state. Likewise this last procrastination of days had the like weighty grounds and causes. And this is the true and brief representation of this extreme work of the king's justice.

Now for the evidence against this lady, I am sorry I must rip it up. I shall first show you the purveyance or provisions of the poisons: that they were seven in number brought to this lady, and by her billeted and laid up till they might be used: and this done with an oath or vow of secrecy, which is like the Egyptian darkness, a gross and palpable darkness, that may be felt.

Secondly, I shall show you the exhibiting and sorting of this same number or volley of poisons: white arsenic was fit for salt, because it is of like body and colour. The poison of great spiders, and of the venomous fly cantharides, was fit for pig's sauce or partridge sauce, because it resembled pepper. As for mercury-water, and other poisons, they might be fit for tarts, which is a kind of hotch-pot, wherein no one colour is so proper: and some of these were delivered by the hands of this lady, and some by her direction.

Thirdly, I shall prove and observe unto you the cautions of these poisons; that they might not be too swift, lest the world should startle at it by the suddenness of the despatch; but they must abide long in the body, and work by degrees: and for this purpose there must be essays of them upon poor beasts, &c.

And lastly, I shall show you the rewards of this impoisonment, first demanded by Weston, and denied, because the deed was not done; but after the deed done and perpetrated, that Overbury was dead, then performed and paid to the value of 180*l.*

And so without farther aggravation of that, which in itself bears its own tragedy, I will conclude with the confessions of this lady herself, which is the strongest support of justice; and yet is the footstool of mercy. For, as the Scripture says, "Mercy and Truth have kissed each other;" there is no meeting or greeting of mercy, till there be a confession, or trial of truth. For these read,

THE

CHARGE,* BY WAY OF EVIDENCE,

BY

SIR FRANCIS BACON, KNIGHT,

HIS MAJESTY'S ATTORNEY-GENERAL,

BEFORE THE LORD HIGH STEWARD AND THE PEERS;†

AGAINST

FRANCES, COUNTESS OF SOMERSET,

CONCERNING THE POISONING OF SIR THOMAS OVERBURY.

IT MAY PLEASE YOUR GRACE, MY LORD HIGH STEWARD OF ENGLAND, AND YOU MY LORDS THE PEERS:

I AM very glad to hear this unfortunate lady doth take this course, to confess fully and freely, and thereby to give glory to God and to justice. It is, as I may term it, the nobleness of an offender to confess: and therefore those meaner persons, upon whom justice passed before, confessed not; she doth. I know your lordships cannot behold her without compassion: many things may move you, her youth, her person, her sex, her noble family; yea, her provocations, if I should enter into the cause itself, and furies about her; but chiefly her penitency and confession. But justice is the work of this day; the mercy-seat was in the inner part of the temple; the throne is public. But since this lady hath by her confession prevented my evidence, and your verdict, and that this day's labour is eased; there resteth, in the legal proceeding, but for me to pray that her confession may be recorded, and judgment thereupon.

But because your lordships the peers are met, and that this day and to-morrow are the days that crown all the former justice; and that in these great cases it hath been ever the manner to respect honour and satisfaction, as well as the ordinary parts and forms of justice; the occasion itself admonisheth me to give your lordships and the hearers this contentment, as to make declaration of the proceedings of this excellent work of the king's justice, from the beginning to the end.

It may please your Grace, my lord high steward of England: this is now the second time, within the space of thirteen years' reign of our happy sovereign, that this high tribunal-seat, ordained for the trial of peers, hath been opened and erected, and that with a rare event, supplied and exercised by one and the same person, which is a great honour unto you, my lord steward.

In all this mean time the king hath reigned in his white robe, not sprinkled with any one drop of the blood of any of his nobles of this kingdom. Nay, such have been the depths of his mercy, as even those noblemen's bloods, against whom the proceeding was at Winchester, Cobham and Grey, were attainted and corrupted, but not spilt or taken away; but that they remained rather spectacles of justice in their continual imprisonment, than monuments of justice in the memory of their suffering.

It is true that the objects of his justice then and now were very differing: for then it was the revenge of an offence against his own person and crown, and upon persons that were malcontents, and contraries to the state and government; but now it is the revenge of the blood and death of a particular subject, and the cry of a prisoner; it is upon persons that were highly in his favour; whereby his Majesty, to his great honour, hath showed to the world, as if it were written in a sun-beam, that he is truly the lieutenant of Him with whom there is no respect of persons; that his affections royal are above his affections private; that his favours and nearness about him are not like popish sanctuaries, to privilege malefactors; and that his being the best master in the world doth not let him from being the best king in the world. His people, on the other side, may say to themselves, I will lie down in peace, for God, the king, and the law, protect me against great and small. It may be a discipline also to great men, especially such as are swoln in their fortunes from small beginnings, that the king is as well able to level mountains, as to fill valleys, if such be their desert.

But to come to the present case: The great frame of justice, my lords, in this present action, hath a vault, and hath a stage; a vault, wherein these works of darkness were contrived; and a stage, with steps, by which it was brought to light.

* Given May 24, 1616.

† The lord chancellor Egerton, lord Ellesmere, and earl of Bridgwater.

For the former of these, I will not lead your lordships into it, because I will engrieve nothing against a penitent; neither will I open any thing against him that is absent. The one I will give to the laws of humanity, and the other to the laws of justice; for I shall always serve my master with a good and sincere conscience, and I know that he accepteth best. Therefore I will reserve that till to-morrow, and hold myself to that which I called the stage or theatre, whereunto indeed it may be fitly compared: for that things were first contained within the invisible judgments of God, as within a curtain, and after came forth, and were acted most worthily by the king, and right well by his ministers.

Sir Thomas Overbury was murdered by poison, September 15, 1613. This foul and cruel murder did for a time cry secretly in the ears of God; but God gave no answer to it, otherwise than by that voice, which sometimes he useth, which is *vox populi*, the speech of the people: for there went then a murmur that Overbury was poisoned; and yet the same submiss and low voice of God, the speech of the vulgar people, was not without a counter-tenor or counter-blast of the devil, who is the common author both of murder and slander; for it was given out that Overbury was dead of a foul disease; and his body, which they had made *corpus Judaicum* with their poisons, so as it had no whole part, must be said to be leprosied with vice, and so his name poisoned as well as his body. For as to dissoluteness, I have not heard the gentleman noted with it; his faults were of insolency, turbulency, and the like of that kind.

Meantime there was some industry used, of which I will not now speak, to lull asleep those that were the revengers of the blood, the father and the brother of the murdered. And in these terms things stood by the space of two years, during which time God did so blind the two great procurers, and dazzle them with their greatness, and blind and nail fast the actors and instruments with security upon their protection, as neither the one looked about them, nor the other stirred or fled, or were conveyed away, but remained here still, as under a privy arrest of God's judgments; insomuch as Franklin, that should have been sent over to the Palsgrave with good store of money, was, by God's providence and the accident of a marriage of his, diverted and stayed.

But about the beginning of the progress the last summer, God's judgments began to come out of their depths. And as the revealing of murder is commonly such as a man said, "a Domino hoc factum est; it is God's work, and it is marvellous in our eyes:" so in this particular it was most admirable; for it came forth first by a compliment, a matter of courtesy. My lord of Shrewsbury, that is now with God, recommended to a counsellor of state, of special trust by his place, the late lieutenant Helwisse,* only for acquaintance, as an honest and worthy gentleman, and desired him to know him, and to be acquainted with him. That counsellor answered him civilly, that my lord did him a favour, and that he should embrace it willingly; but he must let his lordship know, that there did lie a heavy imputation upon that gentleman, Helwisse; for that Sir Thomas Overbury, his prisoner, was thought to have come to a violent and an untimely death. When this speech was reported back by my lord of Shrewsbury to Helwisse, "percussit illico animum," he was strucken with it: and being a politic man, and of likelihood doubting that the matter would break forth at one time or other, and that others might have the start of him, and thinking to make his own case by his own tale, resolved with himself upon this occasion to discover unto my lord of Shrewsbury, and that counsellor, that there was an attempt, whereunto he was privy, to have poisoned Overbury by the hands of his under-keeper Weston; but that he checked it, and put it by, and dissuaded it. But then he left it thus, that it was but as an attempt, or an untimely birth, never executed; and as if his own fault had been no more, but that he was honest and forbidding, but fearful of revealing and impeaching, or accusing great persons: and so with this fine point thought to save himself.

But that counsellor of estate, wisely considering that by the lieutenant's own tale it could not be simply a permission or weakness; for that Weston was never displaced by the lieutenant, notwithstanding that attempt; and coupling the sequel by the beginning, thought it matter fit to be brought before his Majesty, by whose appointment Helwisse set down the like declaration in writing.

Upon this ground the king playeth Solomon's part, "Gloria Dei celare rem, et gloria regis investigare rem," and sets down certain papers of his own hand, which I might term to be *claves justitiæ*, keys of justice; and may serve both for a precedent for princes to imitate, and for a direction for judges to follow. And his Majesty carried the balance with a constant and steady hand, evenly and without prejudice, whether it were a true accusation of the one part, or a practice and factious scandal of the other: which writing, because I am not able to express according to the worth thereof, I will desire your lordships anon to hear read.

This excellent foundation of justice being laid by his Majesty's own hand, it was referred unto some counsellors to examine farther; who gained some degrees of light from Weston, but yet left it imperfect.

After it was referred to Sir Edward Coke, chief justice of the king's bench, as a person best practised in legal examinations; who took a great deal of indefatigable pains in it without intermission, having, as I have heard him say, taken at least three hundred examinations in this business.

But these things were not done in a corner, I need not speak of them. It is true that my lord chief justice, in the dawning and opening of the light, finding the matter touched upon these great persons, very discreetly became suitor to the king, to have greater persons than his own rank joined with him; where-

upon your lordships, my lord high steward of England, my lord steward of the king's house, and my lord Zouch, were joined with him.

Neither wanted there, this while, practice to suppress testimony, to deface writings, to weaken the king's resolution, to slander the justice, and the like. Nay, when it came to the first solemn act of justice, which was the arraignment of Weston, he had his lesson to stand mute; which had arrested the whole wheel of justice. But this dumb devil, by the means of some discreet divines, and the potent charm of justice, together, was cast out. Neither did this poisonous adder stop his ear to these charms, but relented, and yielded to his trial.

Then followed the other proceedings of justice against the other offenders, Turner, Helwisse, Franklin.

But all these being but the organs and instruments of this fact, the actors, and not the authors, justice could not have been crowned without this last act against these great persons; else Weston's censure or prediction might have been verified, when he said, he hoped the small flies should not be caught, and the greater escape. Wherein the king, being in great straits between the defacing of his honour, and of his creature, hath, according as he used to do, chosen the better part, reserving always mercy to himself.

The time also of justice hath had its true motions. The time until this lady's deliverance was due unto honour, christianity, and humanity, in respect of her great belly. The time since was due to another kind of deliverance too; which was, that some causes of estate which were in the womb might likewise be brought forth, not for matter of justice, but for reason of state. Likewise this last procrastination of days had the like weighty grounds and causes.

But, my lords, where I speak of a stage, I doubt I hold you upon the stage too long. But before I pray judgment, I pray your lordships to hear the king's papers read, that you may see how well the king was inspired, and how nobly he carried it, that innocency might not have so much as aspersion.

Frances, Countess of Somerset, hath been indicted and arraigned, as accessary before the fact, for the murder and impoisonment of Sir Thomas Overbury, and hath pleaded guilty, and confesseth the indictment: I pray judgment against the prisoner.

THE CHARGE

OF SIR FRANCIS BACON, KNIGHT,

HIS MAJESTY'S ATTORNEY-GENERAL,

BY WAY OF EVIDENCE,

BEFORE THE LORD HIGH STEWARD, AND THE PEERS,

AGAINST ROBERT, EARL OF SOMERSET,

CONCERNING THE POISONING OF OVERBURY.

IT MAY PLEASE YOUR GRACE, MY LORD HIGH STEWARD OF ENGLAND, AND YOU, MY LORDS THE PEERS:

You have here before you Robert earl of Somerset, to be tried for his life, concerning the procuring and consenting to the impoisonment of Sir Thomas Overbury, then the king's prisoner in the Tower of London, as an accessary before the fact.

I know your lordships cannot behold this nobleman, but you must remember his great favour with the king, and the great place that he hath had and borne, and must be sensible that he is yet of your number and body, a peer as you are; so that you cannot cut him off from your body but with grief; and therefore that you will expect from us, that give in the king's evidence, sound and sufficient matter of proof to satisfy your honours and consciences.

As for the manner of the evidence, the king our master, who among his other virtues excelleth in that virtue of the imperial throne, which is justice, hath given us in commandment that we should not expatiate, nor make invectives, but materially pursue the evidence, as it conduceth to the point in question; a matter, that though we are glad of so good a warrant, yet we should have done of ourselves: for far be it from us, by any strains of wit or art, to seek to play prizes, or to blazon our names in blood, or to carry the day otherwise than upon just grounds. We shall carry the lanthorn of justice, which is the evidence, before your eyes upright, and to be able to save it from being put out with any winds of evasion or vain defences, that is our part; and within that we shall contain ourselves, not doubting at all, but that the evidence itself will carry such force as it shall need no vantage or aggravation.

My lords, the course which I will hold in delivering that which I shall say, for I love order, shall be this:

First, I will speak somewhat of the nature and greatness of the offence which is now to be tried; not to weigh down my lord with the greatness of it, but contrariwise to show that a great offence deserveth a great proof, and that the king, however he might esteem this gentleman heretofore, as the signet upon his finger, to use the Scripture phrase, yet in such case as this he was to put him off.

Secondly, I will use some few words touching the nature of the proofs, which in such a case are competent.

Thirdly, I will state the proofs.

Fourthly and lastly, I will produce the proofs, either out of examinations and matters of writing, or witnesses, *viva voce*.

For the offence itself, it is of crimes, next unto high treason, the greatest; it is the foulest of felonies. And take this offence with the circumstances, it hath three degrees or stages: that it is murder; that it is murder by impoisonment; that it is murder committed upon the king's prisoner in the Tower: I might say, that it is murder under the colour of friendship; but this is a circumstance moral; I leave that to the evidence itself.

For murder, my lords, the first record of justice that was in the world was a judgment upon a murderer in the person of Adam's first-born, Cain; and though it was not punished by death, but with banishment and mark of ignominy, in respect of the primogeniture, or population of the world, or other points of God's secret decree, yet it was judged, and was, as it is said, the first record of justice. So it appeareth likewise in Scripture, that the murder of Abner by Joab, though it were by David respited in respect of great services past, or reason of state, yet it was not forgotten. But of this I will say no more. It was ever admitted, and ranked in God's own tables, that murder is of offences between man and man, next unto treason and disobedience unto authority, which some divines have referred to the first table, because of the lieutenancy of God in princes.

For impoisonment, I am sorry it should be heard of in this kingdom: it is not "nostri generis nec sanguinis:" it is an Italian crime, fit for the court of Rome, where that person which intoxicateth the kings of the earth with his cup of poison, is many times really and materially intoxicated and impoisoned himself.

But it hath three circumstances, which make it grievous beyond other murders; whereof the first is, that it takes away a man in full peace, in God's and the king's peace; he thinketh no harm, but is comforting of nature with refection and food; so that, as the Scripture saith, "his table is made a snare."

The second is, that it is easily committed, and easily concealed; and on the other side, hardly prevented, and hardly discovered: for murder by violence, princes have guards, and private men have houses, attendants, and arms: neither can such murder be committed but *cum sonitu*, and with some overt and apparent act that may discover and trace the offender. But as for poison, the cup itself of princes will scarce serve, in regard of many poisons that neither discolour nor distaste.

And the last is, because it concerneth not only the destruction of the maliced man, but of any other; "Quis modo tutus erit?" for many times the poison is prepared for one, and is taken by another: so that men die other men's deaths; "concidit infelix alieno vulnere:" and it is, as the Psalm calleth it, "sagitta nocte volens; the arrow that flieth by night;" it hath no aim or certainty.

Now for the third degree of this particular offence, which is, that it was committed upon the king's prisoner, who was out of his own defence, and merely in the king's protection, and for whom the king and state was a kind of respondent; it is a thing that aggravates the fault much. For certainly, my lord of Somerset, let me tell you this, that Sir Thomas Overbury is the first man that was murdered in the Tower of London, since the murder of the two young princes. Thus much of the offence, now to the proof.

For the nature of the proofs, your lordships must consider, that impoisonment of all offences is the most secret; so secret, as that if in all cases of impoisonment you should require testimony, you were as good proclaim impunity.

Who could have impeached Livia, by testimony, of the impoisoning figs upon the tree, which her husband was wont to gather with his own hands?

Who could have impeached Parisatis for the poisoning of one side of the knife that she carved with, and keeping the other side clean; so that herself did eat of the same piece of meat that the lady did that she did impoison? The cases are infinite, and need not to be spoken of, of the secrecy of impoisonments; but wise triers must take upon them, in these secret cases, Solomon's spirit, that where there could be no witnesses, collected the act by the affection.

But yet we are not to come to one case: for that which your lordships are to try is not the act of impoisonment, for that is done to your hand; all the world by law is concluded to say, that Overbury was impoisoned by Weston.

But the question before you is of the procurement only, and of the abetting, as the law termeth it, as accessary before the fact: which abetting is no more but to do or use any act or means, which may aid or conduce unto the impoisonment.

So that it is not the buying or making of the poison, or the preparing, or confecting, or commixing of it, or the giving or sending or laying the poison, that are the only acts that do amount unto abetment. But if there be any other act or means done or used to give the opportunity of impoisonment, or to facilitate the execution of it, or to stop or divert any impediments that might hinder it, and this be with an intention to accomplish and achieve the impoisonment; all these are abetments, and accessaries before the fact. I will put you a familiar example. Allow there be a conspiracy to murder a

man as he journeys by the way, and it be one man's part to draw him forth to that journey by invitation, or by colour of some business; and another takes upon him to dissuade some friend of his, whom he had a purpose to take in his company, that he be not too strong to make his defence; and another hath the part to go along with him, and to hold him in talk till the first blow be given: all these, my lords, without scruple, are abettors to this murder, though none of them give the blow, nor assist to give the blow.

My lords, he is not the hunter alone that lets slip the dog upon the deer, but he that lodges the deer, or raises him, or puts him out, or he that sets a toil that he cannot escape, or the like.

But this, my lords, little needeth in this present case, where there is such a chain of acts of impoisonment as hath been seldom seen, and could hardly have been expected, but that greatness of fortune maketh commonly grossness in offending.

To descend to the proofs themselves, I shall keep this course.

First, I will make a narrative or declaration of the fact itself.

Secondly, I will break and distribute the proofs as they concern the prisoner.

And thirdly, according to that distribution, I will produce them, and read them, or use them.

So that there is nothing that I shall say, but your lordship, my lord of Somerset, shall have three thoughts or cogitations to answer it: First, when I open it, you may take your aim. Secondly, when I distribute it, you may prepare your answers without confusion. And lastly, when I produce the witnesses or examinations themselves, you may again ruminate and re-advise how to make your defence. And this I do the rather, because your memory or understanding may not be oppressed or overladen with the length of evidence, or with confusion of order. Nay more, when your lordship shall make your answers in your time, I will put you in mind, when cause shall be, of your omissions.

First, therefore, for the simple narrative of the fact. Sir Thomas Overbury for a time was known to have had great interest and great friendship with my lord of Somerset, both in his meaner fortunes, and after: insomuch as he was a kind of oracle of direction unto him; and, if you will believe his own vaunts, being of an insolent Thrasonical disposition, he took upon him, that the fortune, reputation, and understanding of this gentleman, who is well known to have had a better teacher, proceeded from his company and counsel.

And this friendship rested not only in conversation and business of court, but likewise in communication of secrets of estate. For my lord of Somerset, at that time exercising, by his Majesty's special favour and trust, the office of the secretary provisionally, did not forbear to acquaint Overbury with the king's packets of despatches from all parts, Spain, France, the Low Countries, &c. And this not by glimpses, or now and then rounding in the ear for a favour, but in a settled manner: packets were sent, sometimes opened by my lord, sometimes unbroken, unto Overbury, who perused them, copied, registered them, made tables of them as he thought good: so that, I will undertake, the time was when Overbury knew more of the secrets of state than the council-table did. Nay, they were grown to such an inwardness, as they made a play of all the world besides themselves: so as they had ciphers and jargons for the king, the queen, and all the great men; things seldom used but either by princes and their ambassadors and ministers, or by such as work and practise against, or at least upon, princes.

But understand me, my lord, I shall not charge you this day with any disloyalty; only I say this for a foundation, that there was a great communication of secrets between you and Overbury, and that it had relation to matters of estate, and the greatest causes of this kingdom.

But, my lords, as it is a principle in nature, that the best things are in their corruption the worst, and the sweetest wine makes the sharpest vinegar; so fell it out with them, that this excess, as I may term it, of friendship ended in mortal hatred on my lord of Somerset's part.

For it fell out, some twelve months before Overbury's imprisonment in the Tower, that my lord of Somerset was entered into an unlawful love towards his unfortunate lady, then countess of Essex; which went so far, as it was then secretly projected, chiefly between my lord privy seal and my lord of Somerset, to effect a nullity in the marriage with my lord of Essex, and so to proceed to a marriage with Somerset.

This marriage and purpose did Overbury mainly oppugn, under pretence to do the true part of a friend; for that he counted her an unworthy woman: but the truth was, that Overbury, who, to speak plainly, had little that was solid for religion or moral virtue, but was a man possessed with ambition and vain-glory, was loth to have any partners in the favour of my lord of Somerset, and especially not the house of the Howards, against whom he had always professed hatred and opposition: so all was but miserable bargains of ambition.

And, my lords, that this is no sinister construction, will well appear unto you, when you shall hear that Overbury makes his brags to my lord of Somerset, that he had won him the love of the lady by his letters and industry: so far was he from cases of conscience in this matter. And certainly, my lords, howsoever the tragical misery of that poor gentleman Overbury ought somewhat to obliterate his faults; yet because we are not now upon point of civility, but to discover the face of truth to the face of justice; and that it is material to the true understanding of the state of this cause; Overbury was naught and corrupt, the ballads must be amended for that point.

But to proceed; when Overbury saw that he was like to be dispossessed of my lord here, whom he had possessed so long, and by whose greatness he had promised himself to do wonders; and being a man of an unbounded and impetuous spirit, he began not only to dissuade, but to deter him from that love and marriage; and finding him fixed, thought to try stronger remedies, supposing that he had my

lord's head under his girdle, in respect of communication of secrets of estate, or, as he calls them himself in his letters, secrets of all natures; and therefore dealt violently with him, to make him desist, with menaces of discovery of secrets, and the like.

Hereupon grew two streams of hatred upon Overbury; the one, from the lady, in respect that he crossed her love, and abused her name, which are furies to women; the other, of a deeper and more mineral nature, from my lord of Somerset himself; who was afraid of Overbury's nature, and that if he did break from him and fly out, he would mine into him and trouble his whole fortunes.

I might add a third stream from the earl of Northampton's ambition, who desires to be first in favour with my lord of Somerset; and knowing Overbury's malice to himself and his house, thought that man must be removed and cut off. So it was amongst them resolved and decreed that Overbury must die.

Hereupon they had variety of devices. To send him beyond sea, upon occasion of employment, that was too weak; and they were so far from giving way to it, as they crossed it. There rested but two ways, quarrel or assault, and poison. For that of assault, after some proposition and attempt, they passed from it; it was a thing too open, and subject to more variety of chances. That of poison likewise was a hazardous thing, and subject to many preventions and cautions; especially to such a jealous and working brain as Overbury had, except he were first fast in their hands.

Therefore the way was first to get him into a trap, and lay him up, and then they could not miss the mark. Therefore in execution of this plot it was devised, that Overbury should be designed to some honourable employment in foreign parts, and should under-hand by the lord of Somerset be encouraged to refuse it; and so upon that contempt he should be laid prisoner in the Tower, and then they would look he should be close enough, and death should be his bail. Yet were they not at their end. For they considered that if there was not a fit lieutenant of the Tower for their purpose, and likewise a fit under-keeper of Overbury; first, they should meet with many impediments in the giving and exhibiting the poison. Secondly, they should be exposed to note and observation that might discover them. And thirdly, Overbury in the mean time might write clamorous and furious letters to other his friends, and so all might be disappointed. And therefore the next link of the chain was to displace the then lieutenant Waade, and to place Helwisse, a principal abettor in the impoisonment: again, to displace Cary, that was the under-keeper in Waade's time, and to place Weston, who was the principal actor in the impoisonment: and this was done in such a while, that it may appear to be done, as it were, with one breath, as there were but fifteen days between the commitment of Overbury, the displacing of Waade, the placing of Helwisse, the displacing of Cary the under-keeper, the placing of Weston, and the first poison given two days after.

Thus when they had this poor gentleman in the Tower close prisoner, where he could not escape nor stir, where he could not feed but by their hands, where he could not speak nor write but through their trunks; then was the time to execute the last act of this tragedy.

Then must Franklin be purveyor of the poisons, and procure five, six, seven several potions, to be sure to hit his complexion. Then must Mrs. Turner be the say-mistress of the poisons to try upon poor beasts, what is present, and what works at distance of time. Then must Weston be the tormentor, and chase him with poison after poison; poison in salts, poison in meats, poison in sweetmeats, poison in medicines and vomits, until at last his body was almost come, by use of poisons, to the state that Mithridates's body was by the use of treacle and preservatives, that the force of the poisons were blunted upon him; Weston confessing, when he was chid for not despatching him, that he had given him enough to poison twenty men. Lastly, because all this asked time, courses were taken by Somerset, both to divert all means of Overbury's delivery, and to entertain Overbury by continual letters, partly of hopes and projects for his delivery, and partly of other fables and negotiations; somewhat like some kind of persons, which I will not name, which keep men in talk of fortune-telling, when they have a felonious meaning.

And this is the true narrative of this act of impoisonment, which I have summarily recited.

Now for the distribution of the proofs, there are four heads of proofs to prove you guilty, my lord of Somerset, of this impoisonment; whereof two are precedent to the imprisonment, the third is present, and the fourth is following or subsequent. For it is in proofs as it is in lights, there is a direct light, and there is a reflexion of light, or back-light.

The first head or proof thereof is, That there was a root of bitterness, a mortal malice or hatred, mixed with deep and bottomless fears, that you had towards Sir Thomas Overbury.

The second is, That you were the principal actor, and had your hand in all those acts, which did conduce to the impoisonment, and which gave opportunity and means to effect it; and without which the impoisonment could never have been, and which could serve or tend to no other end but to the impoisonment.

The third is, That your hand was in the very impoisonment itself, which is more than needs to be proved; that you did direct poison; that you did deliver poison; that you did continually hearken to the success of the impoisonment; and that you spurred it on, and called for despatch when you thought it lingered.

And lastly, That you did all the things after the impoisonment, which may detect a guilty conscience, for the smothering of it, and avoiding punishment for it: which can be but of three kinds: that you suppressed, as much as in you was, testimony; That you did deface, and destroy, and clip, and misdate all writings that might give light to the impoisonment; and that you did fly to the altar of guiltiness, which is a pardon, and a pardon of murder, and a pardon for yourself, and not for your lady.

In this, my lord, I convert my speech to you, because I would have you attend the points of your charge, and so of your defence the better. And two of these heads I have taken to myself, and left the other two to the king's two serjeants.

For the first main part, which is the mortal hatred, coupled with fear, that was in my lord of Somerset towards Overbury, although he did palliate it with a great deal of hypocrisy and dissimulation even to the end; I shall prove it, my lord steward, and you my lords and peers, manifestly, by matter both of oath and writing. The root of this hatred was that that hath cost many a man's life, that is, fear of discovering secrets; secrets, I say, of a high and dangerous nature: Wherein the course that I will hold, shall be this:

First, I will show that such a breach and malice was between my lord and Overbury, and that it burst forth into violent menaces and threats on both sides.

Secondly, That these secrets were not light, but of a high nature; for I will give you the elevation of the pole. They were such, as my lord of Somerset for his part had made a vow, that Overbury should neither live in court nor country. That he had likewise opened himself and his own fears so far, that if Overbury ever came forth of the Tower, either Overbury or himself must die for it. And of Overbury's part, he had threatened my lord, that whether he did live or die, my lord's shame should never die, but he would leave him the most odious man of the world. And farther, that my lord was like enough to repent it, in the place where Overbury wrote, which was the Tower of London. He was a true prophet in that: so here is the height of the secrets.

Thirdly, I will show you that all the king's business was by my lord put into Overbury's hands; so as there is work enough for secrets, whatsoever they were: and like princes confederates, they had their ciphers and jargons.

And lastly, I will show you that it is but a toy to say that the malice was only in respect he spake dishonourably of the lady; or for doubt of breaking the marriage: for that Overbury was a coadjutor to that love, and the lord of Somerset was as deep in speaking ill of the lady as Overbury. And again, it was too late for that matter, for the bargain of the match was then made and past. And if it had been no more but to remove Overbury from disturbing of the match, it had been an easy matter to have banded over Overbury beyond seas, for which they had a fair way; but that would not serve their turn.

And lastly, *periculum periculo vincitur*, to go so far as an impoisonment, must have a deeper malice than flashes: for the cause must bear a proportion to the effect.

For the next general head of proofs, which consists in acts preparatory to the middle acts, they are in eight several points of the compass, as I may term it.

First, That there were devices and projects to despatch Overbury, or to overthrow him, plotted between the countess of Somerset, the earl of Somerset, and the earl of Northampton, before they fell upon the impoisonment: for always before men fix upon a course of mischief, there must be some rejections: but die he must, one way or other.

Secondly, That my lord of Somerset was a principal practiser, I must speak it, in a most perfidious manner, to set a train or trap for Overbury to get him into the Tower; without which they never durst have attempted the impoisonment.

Thirdly, That the placing of the lieutenant Helwisse, one of the impoisoners, and the displacing of Waade, was by the means of my lord of Somerset.

Fourthly, That the placing of Weston the underkeeper, who was the principal impoisoner, and the displacing of Cary, and the doing of all this within fifteen days after Overbury's commitment, was by the means and countenance of my lord of Somerset. And these two were the active instruments of the impoisonment; and this was a business that the lady's power could not reach unto.

Fifthly, That because there must be a time for the tragedy to be acted, and chiefly because they would not have the poisons work upon the sudden: and for that the strength of Overbury's nature, or the very custom of receiving poison into his body, did overcome the poisons, that they wrought not so fast; therefore Overbury must be held in the Tower. And as my lord of Somerset got him into the trap, so he kept him in, and abused him with continual hopes of liberty; and diverted all the true and effectual means of his liberty, and made light of his sickness and extremities.

Sixthly, That not only the plot of getting Overbury into the Tower, and the devices to hold him and keep him there; but the strange manner of his close keeping, being in but for a contempt, was by the device and means of my lord of Somerset, who denied his father to see him, denied his servants that offered to be shut up close prisoners with him; and in effect handled it so, that he was close prisoner to all his friends, and open and exposed to all his enemies.

Seventhly, That the advertisement which my lady received from time to time from the lieutenant or Weston, touching Overbury's state of body or health, were ever sent up to the court, though it were in progress, and that from my lady: such a thirst and listening this lord had to hear that he was despatched.

Lastly, There was a continual negotiation to set Overbury's head on work, that he should make some recognition to clear the honour of the lady; and that he should become a good instrument towards her and her friends: all which was but entertainment; for your lordships shall plainly see divers of my lord of Northampton's letters, whose hand was deep in this business, written, I must say it, in dark words and clauses; that there was one thing pretended and another intended; there was a real charge, and there was somewhat not real; a main drift, and a dissimulation. Nay farther, there be some passages which the peers in their wisdom will discern to point directly at the impoisonment.

[After this inducement followed the evidence itself.]

THE EFFECT OF THAT WHICH WAS SPOKEN

BY THE

LORD KEEPER OF THE GREAT SEAL OF ENGLAND,

AT THE TAKING OF HIS PLACE IN CHANCERY,

IN PERFORMANCE OF THE CHARGE HIS MAJESTY HAD GIVEN HIM WHEN HE RECEIVED THE SEAL, MAY 7, 1617.

BEFORE I enter into the business of the court, I shall take advantage of so many honourable witnesses to publish and make known summarily, what charge the king's most excellent Majesty gave me when I received the seal, and what orders and resolutions I myself have taken in conformity to that charge; that the king may have the honour of direction, and I the part of obedience; whereby your lordships and the rest of the presence shall see the whole time of my sitting in the chancery, which may be longer or shorter, as it shall please God and the king, contracted into one hour. And this I do for three causes.

First, to give account to the king of his commandment.

Secondly, that it may be a guard and custody to myself, and my own doings, that I do not swerve or recede from any thing that I have professed in so noble a company.

And thirdly, that all men that have to do with the chancery or the seal, may know what they shall expect, and both set their hearts and my ears at rest; not moving me in any thing against these rules; knowing that my answer is now turned from a *nolumus* into a *non possumus*. It is no more, I will not, but, I cannot, after this declaration.

And this I do also under three cautions.

The first is, that there be some things of a more secret and council-like nature, more fit to be acted than published. But those things which I shall speak of to-day are of a more public nature.

The second is, that I will not trouble this presence with every particular, which would be too long; but select those things which are of greatest efficacy, and conduce most *ad summas rerum*; leaving many other particulars to be set down in a table, according to the good example of my last predecessor in his beginning.

And lastly, that these imperatives, which I have made but to myself and my times, be without prejudice to the authority of the court, or to wiser men that may succeed me; and chiefly that they are wholly submitted unto the great wisdom of my sovereign, and the absolutest prince in judicature that hath been in the christian world; for if any of these things which I intend to be subordinate to his directions, shall be thought by his Majesty to be inordinate, I shall be most ready to reform them. These things are but "tanquam album prætoris;" for so did the Roman prætors, which have the greatest affinity with the jurisdiction of the chancellor here, who used to set down at their entrance, how they would use their jurisdiction. And this I shall do, my lords, *in verbis masculis*; no flourishing or painted words, but such as are fit to go before deeds.

The king's charge, which is my lanthorn, rested upon four heads.

The first was, that I should contain the jurisdiction of the court within its true and due limits, without swelling or excess.

The second, that I should think the putting of the great seal to letters patents was not a matter of course to follow after precedent warrants; but that I should take it to be the maturity and fulness of the king's intentions: and therefore of the greatest parts of my trust, if I saw therein any scruple or cause of stay, that I should acquaint him, concluding with a "Quod dubites ne feceris."

The third was, that I should retrench all unnecessary delays, that the subject might find that he did enjoy the same remedy against the fainting of the soul and the consumption of the estate; which was speedy justice. "Bis dat, qui cito dat."

The fourth was, that justice might pass with as easy charge as might be; and that those same brambles, that grow about justice, of needless charge and expense, and all manner of exactions, might be rooted out so far as might be.

These commandments, my lords, are righteous, and, as I may term them, sacred; and therefore, to use a sacred form, I pray God bless the king for his great care over the justice of the land, and give me, his poor servant, grace and power to observe his precepts.

Now for a beginning towards it, I have set down and applied particular orders to-day out of these four general heads.

For the excess or tumour of this court of chancery, I shall divide it into five natures.

The first is, when the court doth embrace and retain causes, both in matter and circumstance, merely determinable and fit for the common law;

for, my lords, the chancery is ordained to supply the law, and not to subvert the law. Now to describe unto you or delineate what those causes are that are fit for the court, or not fit for the court, were too long a lecture. But I will tell you what remedy I have prepared. I will keep the keys of the court myself, and will never refer any demurrer or plea, tending to discharge or dismiss the court of the cause, to any master of the chancery, but judge of it myself, or at least the master of the rolls. Nay farther, I will appoint regularly, that on the Tuesday of every week, which is the day of orders, first to hear motions of that nature before any other, that the subject may have his *vale* at first without attending, and that the court do not keep and accumulate a miscellany and confusion of causes of all natures.

The second point concerneth the time of the complaint, and the late comers into the chancery; which stay till a judgment be passed against them at the common law, and then complain: wherein your lordships may have heard a great rattle and a noise of a *præmunire*, and I cannot tell what. But that question the king hath settled according to the ancient precedents in all times continued. And this I will say, that the opinion, not to relieve any case after judgment, would be a guilty opinion; guilty of the ruin, and naufrage, and perishing of infinite subjects: and as the king found it well out, why should a man fly into the chancery before he be hurt? The whole need not the physician, but the sick. But, my lords, the power would be preserved, but the practice would be moderate. My rule shall be therefore, that in case of complaints after judgment, except the judgments be upon *nihil dicit*, and cases which are but disguises of judgment, as that they be judgments obtained in contempt of a preceding order in this court, yea, and after verdicts also, I will have the party complainant enter into good bond to prove his suggestion: so that if he will be relieved against a judgment at common law upon matter of equity, he shall do it *tanquam in vinculis*, at his peril.

The third point of excess may be the over-frequent and facile granting of injunctions for the staying of the common laws, or the altering of possessions; wherein these shall be my rules.

I will grant no injunction merely upon priority of suit; that is to say, because this court was first possessed: a thing that was well reformed in the late lord chancellor's time, but usual in the chancellor Bromley's time; insomuch, as I remember, that Mr. Dalton the counsellor at law put a pasquil upon the court in nature of a bill; for seeing it was no more but, My lord, the bill came in on Monday, and the arrest at common law was on Tuesday, I pray the injunction upon priority of suit: he caused his client that had a loose debtor, to put his bill into the chancery before the bond due to him was forfeited, to desire an order that he might have his money at the day, because he would be sure to be before the other. I do not mean to make it a matter of a horse-race who shall be first at Westminster-hall.

Neither will I grant an injunction upon matter contained in the bill only, be it never so smooth and specious; but upon matter confessed in the defendant's answer, or matter pregnant in writing, or of record; or upon contempt of the defendant in not appearing, or not answering, or trifling with the court by insufficient answering. For then it may be thought that the defendant stands out upon purpose to get the start at the common law, and so to take advantage of his own contempt; which may not be suffered.

As for injunctions for possessions, I shall maintain possessions as they were at the time of the bill exhibited; and for the space of a year at the least before, except the possession were gotten by force or any trick.

Neither will I alter possession upon interlocutory orders, until a decree; except upon matter plainly confessed in the defendant's answer, joined also with a plain disability and insolvency in the defendant to answer the profits.

As for taking of possession away in respect of contempts, I will have all the process of the court spent first, and a sequestration of the profits before I come to an injunction.

The fourth point is concerning the communicating of the authority of the chancellor too far; and making, upon the matter, too many chancellors, by relying too much upon the reports of the masters of the chancery as concludent. I know, my lords, the masters of the chancery are reverend men; and the great mass of the business of the court cannot be sped without them; and it is a thing the chancellor may soon fall into for his own ease, to rely too much upon them. But the course that I will take generally shall be this; I will make no binding order upon any report of one of the masters, without giving a seven-night's day at the least, to show cause against the report, which nevertheless I will have done modestly, and with due reverence towards them: and again, I must utterly discontinue the making of a hypothetical or conditional order; that if a master of the chancery do certify thus and thus, that then it is so ordered without farther motion; for that it is a surprise, and giveth no time for contradiction.

The last point of excess is, if a chancellor shall be so much of himself, as he shall neglect assistance of reverend judges in cases of difficulty, especially if they touch upon law, or calling them, shall do it but *pro forma tantum*, and give no due respect to their opinions: wherein, my lords, preserving the dignity and majesty of the court, which I account rather increased than diminished by grave and due assistance, I shall never be found so sovereign or abundant in mine own sense, but I shall both desire and make true use of assistance. Nay, I assure your lordships, if I should find any main diversity of opinion of my assistants from mine own, though I know well the judicature of the court wholly resteth in myself; yet I think I should have recourse to the oracle of the king's own judgment, before I should pronounce. And so much for the temperate use of the authority of this court; for surely the health of a court, as well as of a body, consisteth in temperance.

For the second commandment of his Majesty, touching staying of grants at the great seal; there may be just cause of stay, either in the matter of the grant, or in the manner of passing the same. Out of both which I extract these six principal cases which I will now make known: all which, nevertheless, I understand to be wholly submitted to his Majesty's will and pleasure, after by me he shall have been informed; for if *iteratum mandatum* be come, obedience is better than sacrifice.

The first case is, where any matter of revenue, or treasure, or profit, passeth from his Majesty; my first duty shall be to examine, whether the grant hath passed in the due and natural course by the great officers of the revenue, the lord treasurer and chancellor of the exchequer, and with their privity; which if I find it not to be, I must presume it to have passed in the dark, and by a kind of surreption; and I will make stay of it till his Majesty's pleasure be farther known.

Secondly, if it be a grant that is not merely vulgar, and hath not of course passed at the signet by a *fac simile*, but needeth science, my duty shall be to examine whether it hath passed by the learned counsel and had their docket; which is that his Majesty reads, and leads him. And if I find it otherwise, although the matter were not in itself inconvenient, yet I hold it a just cause of stay, for precedent's sake, to keep men in the right way.

Thirdly, if it be a grant which I conceive, out of my little knowledge, to be against the law; of which nature Theodosius was wont to say, when he was pressed, "I spake it, or I wrote it, but I granted it not if it be unjust:" I will call the learned counsel to it, as well him that drew the book as the rest, or some of them: and if we find cause, I will inform his Majesty of our opinion, either by myself or some of them. And as for the judges, they are judges of grants past, but not of grants to come, except the king call them.

Fourthly, if the grants be against the king's public book of bounty, I am expressly commanded to stay them until the king either revise his book in general, or give direction in particular.

Fifthly, if, as a counsellor of estate, I do foresee inconvenience to ensue by the grant in reason of estate, in respect of the king's honour, or discontent, and murmur of the people; I will not trust mine own judgment, but I will either acquaint his Majesty with it, or the council table, or some such of my lords as I shall think fit.

Lastly, for matter of pardons; if it be for treason, misprision, murder, either expressed or involute, by a *non-obstante;* or of piracy, or of *præmunire*, or of fines, or exemplary punishment in the star-chamber, or of some other natures; I shall, by the grace of God, stay them until his Majesty, who is the fountain of grace, may resolve between God and him, how far grace shall abound or super-abound.

And if it be of persons attainted and convicted of robbery, burglary, &c. then will I examine whether the pardons passed the hand of any justice of assize, or other commissioners, before whom the trial was made; and if not, I think it my duty also to stay them.

And your lordships see in this matter of the seal, and his Majesty's royal commandment concerning the same, I mean to walk in the light; so that men may know where to find me: and this publishing thereof plainly, I hope will save the king from a great deal of abuse, and me from a great deal of envy; when men shall see that no particular turn or end leads me, but a general rule.

For the third general head of his Majesty's precepts concerning speedy justice, it rests much upon myself, and much upon others; yet so, as my procuration may give some remedy and order to it. For myself, I am resolved that my decree shall come speedily, if not instantly, after the hearing, and my signed decree speedily upon my decree pronounced. For it hath been a manner much used of late in my last lord's time, of whom I learn much to imitate, and somewhat to avoid; that upon the solemn and full hearing of a cause nothing is pronounced in court, but breviates are required to be made; which I do not dislike in itself in causes perplexed. For I confess I have somewhat of the cunctative; and I am of opinion, that whosoever is not wiser upon advice than upon the sudden, the same man was no wiser at fifty than he was at thirty. And it was my father's ordinary word, "You must give me time." But yet I find, when such breviates were taken, the cause was sometimes forgotten a term or two, and then set down for a new hearing, three or four terms after. And in the mean time the subject's pulse beats swift, though the chancery pace be slow. Of which kind of intermission I see no use, and therefore I will promise regularly to pronounce my decree within few days after my hearing; and to sign my decree at the least in the vacation after the pronouncing. For fresh justice is the sweetest. And to the end that there be no delay of justice, nor any other means-making or labouring, but the labouring of the counsel at the bar.

Again, because justice is a sacred thing, and the end for which I am called to this place, and therefore is my way to heaven; and if it be shorter, it is never a whit the worse, I shall by the grace of God, as far as God will give me strength, add the afternoon to the forenoon, and some fourth night of the vacation to the term, for the expediting and clearing of the causes of the court; only the depth of the three long vacations I would reserve in some measure free from business of estate, and for studies, arts and sciences, to which in my own nature I am most inclined.

There is another point of true expedition, which resteth much in myself, and that is in my manner of giving orders. For I have seen an affectation of despatch turn utterly to delay at length: for the manner of it is to take the tale out of the counsellor at the bar his mouth, and to give a cursory order, nothing tending or conducing to the end of the business. It makes me remember what I heard one say of a judge that sat in chancery; that he would make forty orders in a morning out of the way, and it was out of the way indeed; for it was nothing to the end of the business: and this is that which makes sixty, eighty, a hundred orders in a cause,

to and fro, begetting one another; and like Penelope's web, doing and undoing. But I mean not to purchase the praise of expeditive in that kind; but as one that have a feeling of my duty, and of the case of others. My endeavour shall be to hear patiently, and to cast my order into such a mold as may soonest bring the subject to the end of his journey.

As for delays that may concern others, first, the great abuse is, that if the plaintiff have got an injunction to stay suits at the common law, then he will spin out his cause at length. But, by the grace of God, I will make injunctions but a hard pillow to sleep on; for if I find that he prosecutes not with effect, he may perhaps, when he is awake, find not only his injunction dissolved, but his cause dismissed.

There be other particular orders, I mean to take for *non* prosecution or faint prosecution, wherewith I will not trouble you now, because *summa sequar fastigia rerum*. And so much for matter of expedition.

Now for the fourth and last point of the king's commandment; for the cutting off unnecessary charge of the subject, a great portion of it is fulfilled in the precedent article; for it is the length of suits that doth multiply charges chiefly; but yet there are some other remedies that do conduce thereunto.

First, therefore, I will maintain strictly, and with severity, the former orders which I find my lord chancellor hath taken, for the immoderate and needless prolixity, and length of bills, and answers, and so forth; as well in punishing the party, as fining the counsel, whose hand I shall find at such bills, answers, &c.

Secondly, for all the examinations taken in the court, I do give charge unto the examiners, upon peril of losing their places, that they do not use any idle repetitions, or needless circumstances, in setting down the depositions taken by them; and I would I could help it likewise in the country, but that is almost impossible.

Thirdly, I shall take a diligent survey of the copies in chancery, that they have their just number of lines, and without open and wasteful writing.

Fourthly, I shall be careful there be no exaction of any new fees, but according as they have been heretofore set and tabled.

As for lawyers' fees, I must leave that to the conscience and merit of the lawyer; and the estimation and gratitude of the client: but this I can do; I know there have used to attend this bar a number of lawyers that have not been heard sometimes, and scarce once or twice in a term; and that makes the client seek to great counsel and favourites, as they call them, a term fitter for kings than judges, for every order that a mean lawyer might as well despatch. And therefore to help the generality of lawyers, and therein to ease the client, I will constantly observe that every Tuesday, and other days of orders, after nine o'clock strucken, I will hear the bar until eleven, or half an hour after ten at the least. And since I am upon the point whom I will hear, your lordships will give me leave to tell you a fancy. It falleth out, that there be three of us the king's servants in great places, that are lawyers by descent, Mr. Attorney son of a judge, Mr. Solicitor likewise son of a judge, and myself a chancellor's son.

Now because the law roots so well in my time, I will water it at the root thus far, as besides these great ones, I will hear any judge's son before a serjeant, and any serjeant's son before a reader, if there be not many of them.

Lastly, for the better ease of the subjects, and the bridling of contentious suits, I shall give better, that is greater, costs where the suggestions are not proved, than hath been hitherto used.

There be divers orders for the better reglement of this court; and for granting of writs, and for granting of benefices and others, which I shall set down in a table. But I will deal with no other to-day but such as have a proper relation to his Majesty's commandment; it being my comfort that I serve such a master, that I shall need to be but a conduit only for the conveying of his goodness to his people. And it is true, that I do affect and aspire to make good that saying, that "Optimus magistratus præstat optimæ legi;" which is true in his Majesty. But for myself, I doubt I shall not attain it. But yet I have a domestic example to follow. My lords, I have no more to say, but now I will go on to the business of the court.

THE SPEECH WHICH WAS USED

BY THE

LORD KEEPER OF THE GREAT SEAL,

IN THE STAR-CHAMBER BEFORE THE SUMMER CIRCUITS, THE KING BEING THEN IN SCOTLAND, 1617.

The king, by his perfect declaration published in this place concerning judges and justices, hath made the speech of his chancellor, accustomed before the circuits, rather of ceremony than of use. For as in his book to his son he hath set forth a true character and platform of a king; so in this

his speech he hath done the like of a judge and justice: which showeth, that as his Majesty is excellently able to govern in chief; so he is likewise well seen and skilful in the inferior offices and stages of justice and government; which is a thing very rare in kings.

Yet nevertheless, somewhat must be said to fulfil an old observance; but yet upon the king's grounds, and very briefly: for, as Solomon saith in another case, "In these things who is he that can come after the king?"

First, You that are the judges of circuits are, as it were, the planets of the kingdom, I do you no dishonour in giving you that name, and no doubt you have a great stroke in the frame of this government, as the other have in the great frame of the world. Do therefore as they do, move always and be carried with the motion of your first mover, which is your sovereign. A popular judge is a deformed thing: and *plaudites* are fitter for players than for magistrates. Do good to the people, love them and give them justice; but let it be, as the Psalm saith, "nihil inde expectantes;" looking for nothing, neither praise nor profit.

Yet my meaning is not, when I wish you to take heed of popularity, that you should be imperious and strange to the gentlemen of the country. You are above them in power, but your rank is not much unequal; and learn this, that power is ever of greatest strength, when it is civilly carried.

Secondly, You must remember, that besides your ordinary administration of justice, you do carry the two glasses or mirrors of the state; for it is your duty in these your visitations, to represent to the people the graces and care of the king: and again, upon your return, to present to the king the distastes and griefs of the people.

Mark what the king says in his book: "Procure reverence to the king and the law; inform my people truly of me, (which, we know, is hard to do according to the excellency of his merit; but yet endeavour it,) how zealous I am for religion; how I desire law may be maintained and flourish; that every court should have its jurisdiction; that every subject should submit himself to the law." And of this you have had of late no small occasion of notice and remembrance, by the great and strait charge that the king hath given me as keeper of his seal for the governing of the chancery without tumour or excess.

Again, *e re nata*, you at this present ought to make the people know and consider the king's blessed care and providence in governing this realm in his absence; so that sitting at the helm of another kingdom, not without great affairs and business; yet he governs all things here by his letters and directions, as punctually and perfectly as if he were present.

I assure you, my lords of the council, and I do much admire the extension and latitude of his care in all things.

In the high commission he did conceive a sinew of government was a little shrunk; he recommended the care of it.

He hath called for the accounts of the last circuit from the judges to be transmitted unto him in Scotland.

Touching the infestation of pirates, he hath been careful, and is, and hath put things in a way.

All things that concern the reformation or the plantation of Ireland, he hath given in them punctual and resolute directions. All this is in absence.

I give but a few instances of a public nature; the secrets of council I may not enter into, though his despatches into France, Spain, and the Low Countries, now in his absence, are also notorious as to the outward sending. So that I must conclude that his Majesty wants but more kingdoms, for I see he could suffice to all.

As for the other glass I told you of, of representing to the king the griefs of his people, without doubt it is properly your part; for the king ought to be informed of any thing amiss in the state of his countries from the observations and relations of the judges, that indeed know the pulse of the country, rather than from discourse. But for this glass, thanks be to God, I do hear from you all, that there was never greater peace, obedience, and contentment in the country; though the best governments be always like the fairest crystals, wherein every little icicle or grain is seen, which in a fouler stone is never perceived.

Now to some particulars, and not many: of all other things I must begin as the king begins; that is, with the cause of religion, and especially the hollow church-papist. St. Augustin hath a good comparison of such men, affirming that they are like the roots of nettles, which themselves sting not, but they bear all the stinging leaves: let me know of such roots, and I will root them out of the country.

Next, for the matter of religion; in the principal place I recommend both to you and to the justices, the countenancing of godly and zealous preachers. I mean not sectaries or novelists, but those which are sound and conform, and yet pious and reverend: for there will be a perpetual defection, except you keep men in by preaching, as well as law doth by punishing; and commonly spiritual diseases are not cured but by spiritual remedies.

Next, let me commend unto you the repressing, as much as may be, of faction in the countries, of which ensue infinite inconveniences, and perturbations of all good order, and crossing of all good service in court or country, or wheresoever. Cicero, when he was consul, had devised a fine remedy, a mild one, but an effectual and apt one, for he saith, "Eos, qui otium perturbant, reddam otiosos." Those that trouble others' quiet, I will give them quiet: they shall have nothing to do, nor no authority shall be put into their hands. If I may know from you, of any who are in the country that are heads or hands of faction, or men of turbulent spirits; I shall give them Cicero's reward, as much as in me is.

To conclude, study the king's book, and study yourselves how you profit by it, and all shall be well. And you the justices of peace in particular, let me say this to you, never king of this realm did you so much honour as the king hath done you in

his speech, by being your immediate director, and by sorting you and your service with the service of ambassadors, and of his nearest attendance. Nay more, it seems his Majesty is willing to do the state of justice of peace honour actively also; by bringing in with time the like form or commission into the government of Scotland, as that glorious king, Edward the third, did plant this commission here in this kingdom. And therefore you are not fit to be copies, except you be fair written without blots or blurs, or any thing unworthy your authority: and so I will trouble you no longer for this time.

THE SPEECH USED

BY SIR FRANCIS BACON,

LORD KEEPER OF THE GREAT SEAL OF ENGLAND,

TO SIR WILLIAM JONES,

UPON HIS CALLING TO BE LORD CHIEF JUSTICE OF IRELAND, 1617.

Sir William Jones,

The king's most excellent Majesty being duly informed of your sufficiency every way, hath called you, by his writ now returned, to the state and degree of a serjeant at law, but not to stay there, but, being so qualified, to serve him as his chief justice of his king's bench in his realm of Ireland. And therefore that which I shall say to you, must be applied not to your serjeant's place, which you take but in passage, but to that great place where you are to settle; and because I will not spend time to the delay of the business of causes of the court, I will lead you the short journey by examples, and not the long by precepts.

The place that you shall now serve in, hath been fortunate to be well served in four successions before you: do but take unto you the constancy and integrity of Sir Robert Gardiner; the gravity, temper, and direction of Sir James Lea; the quickness, industry, and despatch of Sir Humphry Winch; the care and affection to the commonwealth, and the prudent and politic administration of Sir John Denham, and you shall need no other lessons. They were all Lincoln's-Inn men as you are, you have known them as well in their beginnings, as in their advancement.

But because you are to be there not only chief justice, but a counsellor of estate, I will put you in mind of the great work now in hand, that you may raise your thoughts according unto it. Ireland is the last *ex filiis Europæ*, which hath been reclaimed from desolation, and a desert, in many parts, to population and plantation; and from savage and barbarous customs to humanity and civility. This is the king's work in chief: it is his garland of heroical virtue and felicity, denied to his progenitors, and reserved to his times. The work is not yet conducted to perfection, but is in fair advance: and this I will say confidently, that if God bless this kingdom with peace and justice, no usurer is so sure in seven years' space to double his principal with interest, and interest upon interest, as that kingdom is within the same time to double the stock both of wealth and people. So as that kingdom, which once within these twenty years wise men were wont to doubt whether they should wish it to be in a pool, is like now to become almost a garden, and younger sister to Great Britain. And therefore you must set down with yourself to be not only a just governor, and a good chief justice, as if it were in England, but under the king and the deputy you are to be a master builder, and a master planter, and reducer of Ireland. To which end, I will trouble you at this time but with three directions.

The first is, that you have special care of the three plantations. That of the north, which is in part acted; that of Wexford, which is now in distribution; and that of Longford and Letrim, which is now in survey. And take this from me, that the bane of a plantation is, when the undertakers or planters make such haste to a little mechanical present profit, as disturbeth the whole frame and nobleness of the work for times to come. Therefore hold them to their covenants, and the strict ordinances of plantation.

The second is, that you be careful of the king's revenue, and by little and little constitute him a good demesne, if it may be, which hitherto is little or none. For the king's case is hard, when every man's land shall be improved in value with increase manifold, and the king shall be tied to his dry rent.

My last direction, though first in weight, is, that you do all good endeavours to proceed resolutely and constantly, and yet with due temperance and equality, in matters of religion; lest Ireland civil become more dangerous to us than Ireland savage. So God give you comfort of your place.

After Sir William Jones's speech:

I had forgotten one thing, which was this. You may take exceeding great comfort, that you shall serve with such a deputy; one that, I think, is a man ordained of God to do great good to that kingdom, and this I think good to say to you, that the true temper of a chief justice towards a deputy is, neither servilely to second him, nor factiously to oppose him.

THE LORD KEEPER'S SPEECH,

IN THE EXCHEQUER,

TO SIR JOHN DENHAM,

WHEN HE WAS CALLED TO BE ONE OF THE BARONS OF THE EXCHEQUER, IN 1617.

Sir John Denham,

The king, of his grace and favour, hath made choice of you to be one of the barons of the exchequer, to succeed to one of the gravest and most reverend judges of this kingdom; for so I hold baron Altham was. The king takes you not upon credit but proof, and great proof of your former service; and that in both those kinds wherein you are now to serve: for as you have showed yourself a good judge between party and party, so you have showed yourself a good administer of the revenue, both when you were chief baron, and since as counsellor of estate there in Ireland, where the council, as you know, doth in great part manage and messuage the revenue.

And to both these parts I will apply some admonitions, but not vulgar or discursive, but apt for the times, and in few words, for they are best remembered.

First therefore, above all you ought to maintain the king's prerogative, and to set down with yourself, that the king's prerogative and the law are not two things; but the king's prerogative is law, and the principal part of the law, the first-born or *pars prima* of the law; and therefore in conserving or maintaining that, you conserve and maintain the law. There is not in the body of man one law of the head, and another of the body, but all is one entire law.

The next point that I would now advise you is, that you acquaint yourself diligently with the revenue; and also with the ancient records and precedents of this court. When the famous case of the copper-mines was argued in this court, and judged for the king, it was not upon the fine reasons of wit; as that the king's prerogative drew to it the chief *in quaque specie:* the lion is the chief of beasts, the eagle the chief of birds, the whale the chief of fishes, and so copper the chief of minerals; for these are but dalliances of law and ornaments: but it was the grave records and precedents that grounded the judgment of that cause; and therefore I would have you both guide and arm yourself with them against these vapours and fumes of law, which are extracted out of men's inventions and conceits.

The third advice I will give you hath a large extent; it is, that you do your endeavour in your place so to manage the king's justice and revenue, as the king may have most profit, and the subject less vexation: for when there is much vexation to the subject, and little benefit to the king, then the exchequer is sick; and when there is much benefit to the king, with less trouble and vexation to the subject, then the exchequer is sound. As for example; if there shall be much racking for the king's old debts, and the more fresh and late debts shall be either more negligently called upon, or over-easily discharged, or over-indulgently stalled; or if the number of informations be many, and the king's part or fines for compositions a trifle; or if there be much ado to get the king new land upon concealments, and that which he hath already be not known and surveyed, nor the woods preserved, (I could put you many other cases,) this falls within that which I term the sick estate of the exchequer: and this is that which makes every man ready with their undertakings and their projects to disturb the ancient frame of the exchequer; than the which, I am persuaded, there is not a better, this being the burden of the song: That much goeth out of the subject's purse, and little cometh to the king's purse. Therefore, give them not that advantage so to say. Sure I am, that besides your own associates, the barons, you serve with two superior great officers, that have honourable and true ends, and desire to serve the king and right the subject.

There resteth, that I deliver you your patent.

HIS LORDSHIP'S SPEECH, IN THE COMMON-PLEAS,

TO JUSTICE HUTTON,

WHEN HE WAS CALLED TO BE ONE OF THE JUDGES OF THE COMMON-PLEAS.

MR. SERJEANT HUTTON,

THE king's most excellent Majesty, being duly informed of your learning, integrity, discretion, experience, means, and reputation in your country, hath thought fit not to leave you these talents to be employed upon yourself only, but to call you to serve himself, and his people, in the place of one of his justices of the court of common-pleas.

This court where you are to serve, is the local centre and heart of the laws of this realm: here the subject hath his assurance by fines and recoveries; here he hath his fixed and invariable remedies by *præcipes* and writs of right; here justice opens not by a by-gate of privilege, but by the great gate of the king's original writs out of the chancery. Here issues process of outlawry; if men will not answer law in this centre of law, they shall be cast out. And therefore it is proper for you, by all means, with your wisdom and fortitude, to maintain the laws of the realm: wherein, nevertheless, I would not have you head-strong, but heart-strong; and to weigh and remember with yourself, that the twelve judges of the realm are as the twelve lions under Solomon's throne: they must show their stoutness in elevating and bearing up the throne. To represent unto you the lines and portraitures of a good judge:

The first is, that you should draw your learning out of your books, not out of your brain.

2. That you should mix well the freedom of your own opinion with the reverence of the opinion of your fellows.

3. That you should continue the studying of your books, and not to spend on upon the old stock.

4. That you should fear no man's face, and yet not turn stoutness into bravery.

5. That you should be truly impartial, and not so as men may see affection through fine carriage.

6. That you should be a light to jurors to open their eyes, but not a guide to lead them by the noses.

7. That you affect not the opinion of pregnancy and expedition by an impatient and catching hearing of the counsellors at the bar.

8. That your speech be with gravity, as one of the sages of the law; and not talkative, nor with impertinent flying out to show learning.

9. That your hands, and the hands of your hands, I mean those about you, be clean, and uncorrupt from gifts, from meddling in titles, and from serving of turns, be they of great ones or small ones.

10. That you contain the jurisdiction of the court within the ancient merestones, without removing the mark.

11. Lastly, That you carry such a hand over your ministers and clerks, as that they may rather be in awe of you, than presume upon you.

These and the like points of the duty of a judge, I forbear to enlarge; for the longer I have lived with you, the shorter shall my speech be to you; knowing that you come so furnished and prepared with these good virtues, as whatsoever I shall say cannot be new unto you; and therefore I will say no more unto you at this time, but deliver you your patent.

ORDINANCES MADE

BY THE LORD CHANCELLOR BACON,

FOR THE BETTER AND MORE REGULAR ADMINISTRATION OF JUSTICE IN THE CHANCERY,

TO BE DAILY OBSERVED, SAVING THE PREROGATIVE OF THE COURT.

Decrees. No decree shall be reversed, altered, or explained, being once under the great seal, but upon bill of review: and no bill of review shall be admitted, except it contain either error in law, appearing in the body of the decree, without farther examination of matters in fact, or some new matter which hath risen in time after the decree, and not any new proof which might have

been used when the decree was made: nevertheless upon new proof, that is come to light after the decree made, and could not possibly have been used at the time when the decree passed, a bill of review may be grounded by the special licence of the court, and not otherwise.

2. In case of miscasting, being a matter demonstrative, a decree may be explained, and reconciled by an order without a bill of review; not understanding, by miscasting, any pretended misrating or misvaluing, only error in the auditing or numbering.

3. No bill of review shall be admitted, or any other new bill, to change matter decreed, except the decree be first obeyed and performed: as, if it be for land, that the possession be yielded; if it be for money, that the money be paid; if it be for evidences, that the evidences be brought in; and so in other cases which stand upon the strength of the decree alone.

4. But if any act be decreed to be done which extinguisheth the parties' right at the common law, as making of assurance or release, acknowledging satisfaction, cancelling of bonds, or evidences, and the like; those parts of the decree are to be spared until the bill of review be determined; but such sparing is to be warranted by public order made in court.

5. No bill of review shall be put in, except the party that prefers it enter into recognisances with sureties for satisfying of costs and damages for the delay, if it be found against them.

6. No decrees shall be made, upon pretence of equity, against the express provision of an act of parliament: nevertheless if the construction of such act of parliament hath for a time gone one way in general opinion and reputation, and after by a later judgment hath been controlled, then relief may be given upon matter of equity, for cases arising before the said judgment, because the subject was in no default.

7. Imprisonment for breach of a decree is in nature of an execution, and therefore the custody ought to be strait, and the party not to have any liberty to go abroad, but by special licence of the lord chancellor; but no close imprisonment is to be, but by express order for wilful and extraordinary contempts and disobedience, as hath been used.

8. In case of enormous and obstinate disobedience in breach of a decree, an injunction is to be granted *sub pœna* of a sum; and upon affidavit, or other sufficient proof, of persisting in contempt, fines are to be pronounced by the lord chancellor in open court, and the same to be estreated down into the hanaper, if cause be, by a special order.

9. In case of a decree made for the possession of land, a writ of execution goes forth: and if that be disobeyed, then process of contempt according to the course of the court against the person, unto a commission of rebellion; and then a serjeant at arms by special warrant: and in case the serjeant at arms cannot find him, or be resisted; or upon the coming in of the party, and his commitment, if he persist in disobedience, an injunction is to be granted for the possession; and in case also that be disobeyed, then a commission to the sheriff to put him into possession.

10. Where the party is committed for the breach of a decree, he is not to be enlarged until the decree be fully performed in all things, which are to be done presently. But if there be other parts of the decree to be performed at days or times to come, then he may be enlarged by order of the court upon recognisance, with sureties to be put in for the performance thereof *de futuro*, otherwise not.

11. Where causes come to a hearing in court, no decree bindeth any person who was not served with process *ad audiendum judicium*, according to the course of the court, or did appear *gratis* in person in court.

12. No decree bindeth any that cometh in *bona fide*, by conveyance from the defendant before the bill exhibited, and is made no party, neither by bill nor the order: but where he comes in *pendente lite*, and while the suit is in full prosecution, and without any colour of allowance or privity of the court, there regularly the decree bindeth; but if there were any intermission of suit, or the court made acquainted with the conveyance, the court is to give order upon the special matter according to justice.

Dismissions.

13. Where causes are dismissed upon full hearing, and the dismission signed by the lord chancellor, such causes shall not be retained again, nor new bill exhibited, except it be upon new matter, like to the case of the bill of review.

14. In case of all other dismissions, which are not upon hearing of the cause, if any new bill be brought, the dismission is to be pleaded; and after reference and report of the contents of both suits, and consideration taken of the former orders and dismission, the court shall rule the retaining or dismissing of the new bill, according to justice and nature of the case.

15. All suits grounded upon wills nuncupative, leases parol, or upon long leases that tend to the defeating of the king's tenures, or for the establishing of perpetuities, or grounded upon remainders put into the crown, to defeat purchasers; or for brokage or rewards to make marriages; or for bargains at play and wagers; or for bargains for offices contrary to the statute of 5 and 6 Ed. VI.; or for contracts upon usury or simony, are regularly to be dismissed upon motion, if they be the sole effect of the bill; and if there be no special circumstances to move the court to allow their proceedings, and all suits under the value of ten pounds, are regularly to be dismissed. *V. postea*, § 58, 60.

16. Dismissions are properly to be prayed, and had, either upon hearing, or upon plea unto the bill, when the cause comes first into court; but dismissions are not to be prayed after the parties have been at charge of examination, except it be upon special cause.

17. If the plaintiff discontinue the prosecution, after all the defendants have answered, above the space of one whole term, the cause is to be dismissed of course without any motion; but after replication put in, no cause is to be dismissed without motion and order of the court.

Election of suits.

18. Double vexation is not to be admitted; but if the party sue for the same cause at the common law and in chancery, he is to have a day given to make this election where he will proceed, and in default of making such election to be dismissed.

Certiorari.

19. Where causes are removed by special *certiorari* upon a bill containing matter of equity, the plaintiff is, upon receipt of his writ, to put in bond to prove his suggestions within fourteen days after the receipt; which if he do not prove, then upon certificate from either of the examiners, presented to the lord chancellor, the cause shall be dismissed with costs, and a *procedendo* to be granted.

Injunction.

20. No injunction of any nature shall be granted, dissolved, or stayed upon any private petition.

21. No injunction to stay suits at the common law shall be granted upon priority of suit only, or upon surmise of the plaintiff's bill only; but upon matter confessed in the defendant's answer, or matter of record, or writing plainly appearing, or when the defendant is in contempt for not answering, or that the debt desired to be stayed appeareth to be old, and hath slept long, or the creditor or the debtor hath been dead some good time before the suit brought.

22. Where the defendant appears not, but sits an attachment; or when he doth appear, and departs without answer, and is under attachment for not answering; or when he takes oath he cannot answer without sight of evidences in the country; or where after answer he sues at common law by attorney, and absents himself beyond the sea: in these cases an injunction is to be granted for the stay of all suits at the common law, until the party answer or appear in person in court, and the court give farther order: but nevertheless upon answer put in, if there be no motion made the same term, or the next general seal after the term, to continue the injunction in regard of the insufficiency of the answer put in, or in regard of matter confessed in the answer, then the injunction to die and dissolve without any special order.

23. In the case aforesaid, where an injunction is to be awarded for stay of suits at the common law, if the like suit be in the chancery, either by *scire facias*, or privilege, or English bill, then the suit is to be stayed by order of the court, as it is in other courts by injunction, for that the court cannot enjoin itself.

24. Where an injunction hath been obtained for staying of suits, and no prosecution is had for the space of three terms, the injunction is to fall of itself without farther motion.

25. Where a bill comes in after an arrest at the common law for debt, no injunction shall be granted without bringing the principal money into court, except there appear in the defendant's answer, or by sight of writings, plain matter tending to discharge the debt in equity: but if an injunction be awarded and disobeyed, in that case no money shall be brought in, or deposited, in regard of the contempt.

26. Injunctions for possession are not to be granted before a decree, but where the possession hath continued by the space of three years, before the bill exhibited, and upon the same title; and not upon any title by lease, or otherwise determined.

27. In case where the defendant sits all the process of contempt, and cannot be found by the serjeant at arms, or resists the serjeant, or makes rescue, a sequestration shall be granted of the land in question; and if the defendant render not himself within the year, then an injunction for the possession.

28. Injunctions against felling of timber, ploughing up of ancient pastures, or for the maintaining of enclosures or the like, shall be granted according to the circumstances of the case; but not in case where the defendant upon his answer claimeth an estate of inheritance, except it be where he claimeth the land in trust, or upon some other special ground.

Sequestrations.

29. No sequestration shall be granted but of lands, leases, or goods in question, and not of any other lands or goods, not contained in the suits.

30. Where a decree is made for rent to be paid out of land, or a sum of money to be levied out of the profits of land, there a sequestration of the same lands, being in the defendant's hands, may be granted.

31. Where the decrees of the provincial council, or of the court of requests, or the queen's court, are by contumacy or other means interrupted; there the court of chancery, upon a bill preferred for corroborations of the same jurisdictions, decrees, and sentences, shall give remedy.

32. Where any cause comes to a hearing, that hath been formerly decreed in any other of the king's courts at Westminster, such decree shall be first read, and then to proceed to the rest of the evidence on both sides.

Suits after judgment.

33. Suits after judgment may be admitted according to the ancient custom of the chancery, and the late royal decision of his Majesty, of record, after solemn and great deliberation: but in such suits it is ordered, that bond be put in with good sureties to prove the suggestions of the bill.

34. Decrees upon suits brought after judgment shall contain no words to make void or weaken the judgment, but shall only correct the corrupt conscience of the party, and rule him to make restitution, or perform other acts, according to the equity of the cause.

Orders, and the office of the registers.

35. The registers are to be sworn, as hath been lately ordered.

36. If any order shall be made, and the court not informed of the last material order formerly made, no benefit shall be taken by such order, as granted by abuse and surreption; and to

that end the registers ought duly to mention the former order in the later.

37. No order shall be explained upon any private petition but in court as they are made, and the register is to set down the orders as they were pronounced by the court, truly, at his peril, without troubling the lord chancellor, by any private attending of him, to explain his meaning; and if any explanation be desired, it is to be done by public motion, where the other party may be heard.

38. No draught of any order shall be delivered by the register to either party, without keeping a copy by him, to the end that if the order be not entered, nevertheless the court may be informed what was formerly done, and not put to new trouble and hearing; and to the end also that knowledge of orders be not kept back too long from either party, but may presently appear at the office.

39. Where a cause hath been debated upon hearing of both parties, and opinion hath been delivered by the court, and nevertheless the cause referred to treaty, the registers are not to omit the opinion of the court, in drawing of the order of reference, except the court doth specially declare that it be entered without any opinion either way; in which case nevertheless the registers are out of their short note to draw up some more full remembrance of that that passed in court, to inform the court if the cause come back and cannot be agreed.

40. The registers, upon sending of their draught unto the counsel of the parties, are not to respect the interlineations, or alterations of the said counsel, be the said counsel never so great, farther, than to put them in remembrance of that which was truly delivered in court, and so to conceive the order, upon their oath and duty, without any farther respect.

41. The registers are to be careful in the penning and drawing up of decrees, and special matters of difficulty and weight; and therefore when they present the same to the lord chancellor, they ought to give him understanding which are such decrees of weight, that they may be read and reviewed before his lordship sign them.

42. The decrees granted at the rolls are to be presented to his lordship, with the orders whereupon they are drawn, within two or three days after every term.

43. Injunctions for possession, or for stay of suits after verdict, are to be presented to his lordship, together with the orders whereupon they go forth, that his lordship may take consideration of the order before he sign them.

44. Where any order upon the special nature of the case shall be made against any of these general rules, there the register shall plainly and expressly set down the particulars, reasons and grounds, moving the court to vary from the general use.

References. 45. No reference upon a demurrer, or question touching the jurisdiction of the court, shall be made to the masters of the chancery; but such demurrers shall be heard and ruled in court, or by the lord chancellor himself.

46. No order shall be made for the confirming or ratifying of any report without day first given, by the space of a seven-night at the least, to speak to it in court.

47. No reference shall be made to any masters of the court, or any other commissioners to hear and determine where the cause is gone so far as to examination of witnesses, except it be in special causes of parties near in blood, or of extreme poverty, or by consent and general reference of the estate of the cause, except it be by consent of the parties to be sparingly granted.

48. No report shall be respected in court, which exceedeth the warrant of the order of reference.

49. The masters of the court are required not to certify the state of any cause, as if they would make breviate of the evidence on both sides, which doth little ease the court, but with some opinion; or otherwise, in case they think it too doubtful to give opinion, and therefore make such special certificate, the cause is to go on to a judicial hearing, without respect had to the same.

50. Matters of account, unless it be in very weighty causes, are not fit for the court, but to be prepared by reference, with this difference nevertheless, that the cause comes first to a hearing; and upon the entrance into a hearing, they may receive some direction, and be turned over to have the accounts considered, except both parties, before a hearing, do consent to a reference of the examination of the accounts, to make it more ready for a hearing.

51. The like course to be taken for the examination of court rolls, upon customs and copies, which shall not be referred to any one master, but to two masters at the least.

52. No reference to be made of the insufficiency of an answer, without showing of some particular point of the defect, and not upon surmise of the insufficiency in general.

53. Where a trust is confessed by the defendant's answer, there needeth no farther hearing of the cause, but a reference presently to be made upon the account, and so to go on to a hearing of the accounts.

Suits in court. 54. In all suits where it shall appear, upon the hearing of the cause, that the plaintiff had not *probabilem causam litigandi*, he shall pay unto the defendant his utmost costs, to be assessed by the court.

Bills, demurrers, answers, pleadings, and copies. 55. If any bill, answers, replication, or rejoinder, shall be found of an immoderate length, both the party and the counsel under whose hand it passeth shall be fined.

56. If there be contained in any bill, answer, or other pleadings, or any interrogatory, any matter libellous or slanderous against any that is not party to the suit, or against such as are parties to the suit, upon matters impertinent, or in derogation of the settled authorities of any of his Majesty's courts; such bills, answers, pleadings, or interrogatories shall be taken off the file and suppressed, and the parties severally punished by commitment or ignominy, as shall be thought fit, for the abuse of the court; and

the counsellors at law, who have set their hands, shall likewise receive reproof or punishment, if cause be.

57. Demurrers and pleas which tend to discharge the suit shall be heard first upon every day of orders, that the subject may know whether he shall need farther attendance or no.

58. A demurrer is properly upon matter defective, contained in the bill itself, and no foreign matter; but a plea is of foreign matter to discharge or stay the suit, as that the cause hath been formerly dismissed, or that the plaintiff is outlawed, or excommunicated; or there is another bill depending for the same cause, or the like: and such plea may be put in without oath, in case where the matter of the plea appear upon record; but if it be any thing that doth not appear upon record the plea must be upon oath.

59. No plea of outlawry shall be allowed without pleading the record *sub pede sigilli;* nor plea of excommunication, without the seal of the ordinary.

60. Where any suit appeareth upon the bill to be of the natures which are regularly to be dismissed according to the fifteenth ordinance, such matter is to be set forth by way of demurrer.

61. Where an answer shall be certified insufficient, the defendant is to pay costs: and if a second answer be returned insufficient, in the points before certified insufficient, then double costs, and upon the third treble costs, and upon the fourth quadruple costs, and then to be committed also until he hath made a perfect answer, and to be examined upon interrogatories touching the points defective in his answer; but if any answer be certified sufficient, the plaintiff is to pay costs.

62. No insufficient answer can be taken hold of after replication put in, because it is admitted sufficient by the replication.

63. An answer to a matter charged as the defendant's own fact must be direct, without saying it is to his remembrance, or as he believeth, if it be laid down within seven years before; and if the defendant deny the fact, he must traverse it directly, and not by way of negative pregnant; as if a fact be laid to be done with divers circumstances, the defendant may not traverse it literally as it is laid in the bill, but must traverse the point of substance; so if he be charged with the receipt of one hundred pounds, he must traverse that he hath not received a hundred pounds, or any part thereof; and if he have received part, he must set forth what part.

64. If a hearing be prayed upon bill and answer, the answer must be admitted to be true in all points, and a decree ought not to be made, but upon hearing the answer read in court.

65. Where no counsel appears for the defendant at the hearing, and the process appears to have been served, the answer of such defendant is to be read in court.

66. No new matter is to be contained in any replication, except it be to avoid matter set forth in the defendant's answer.

67. All copies in chancery shall contain fifteen lines in every sheet thereof, written orderly and unwastefully, unto which shall be subscribed the name of the principal clerk of the office where it is written, or his deputy, for whom he will answer, for which only subscription no fee at all shall be taken.

Commissions, examinations, and depositions.

68. All commissions for examination of witnesses shall be *super interr. inclusis* only, and no return of depositions into the court shall be received, but such only as shall be either comprised in one roll, subscribed with the name of the commissioners, or else in divers rolls, whereof each one shall be so subscribed.

69. If both parties join in commission, and upon warning given the defendant bring his commissioners, but produceth no witnesses, nor ministereth interrogatories, but after seek a new commission, the same shall not be granted: but nevertheless upon some extraordinary excuse of the defendant's default, he may have liberty granted by special order to examine his witnesses in court upon the former interrogatories, giving the plaintiff or his attorney notice, that he may examine also if he will.

70. The defendant is not to be examined upon interrogatories, except it be in very special cases, by express order of the court, to sift out some fraud or practice pregnantly appearing to the court, or otherwise upon offer of the plaintiff to be concluded by the answer of the defendant without any liberty to disprove such answer, or to impeach him after of perjury.

71. Decrees in other courts may be read upon hearing without the warrant of any special order: but no depositions taken in any other court are to be read but by special order; and regularly the court granteth no order for reading of depositions, except it be between the same parties, and upon the same title and cause of suit.

72. No examination is to be had of the credit of any witness but by special order, which is sparingly to be granted.

73. Witnesses shall not be examined *in perpetuam rei memoriam*, except it be upon the ground of a bill first put in, and answer thereunto made, and the defendant or his attorney made acquainted with the names of the witnesses that the plaintiff would have examined, and so publication to be of such witnesses; with this restraint nevertheless, that no benefit shall be taken of the depositions of such witnesses, in case they may be brought *viva voce* upon the trial, but only to be used in case of death before the trial, or age, or impotency, or absence out of the realm at the trial.

Ad informandam conscientiam judicis.

74. No witnesses shall be examined after publication, except it be by consent, or by special order, *ad informandam conscientiam judicis*, and then to be brought close sealed up to the court to peruse or publish, as the court shall think good.

Affidavits.

75. No affidavit shall be taken or admitted by any master of the chancery,

tending to the proof or disproof of the title, or matter in question, or touching the merits of the cause; neither shall any such matter be colourably inserted in any affidavit for serving of process.

76. No affidavit shall be taken against affidavit, as far as the masters of the chancery can have knowledge; and if any such be taken, the latter affidavit shall not be used nor read in court.

77. In case of contempts grounded upon force or ill words, upon serving of process, or upon words of scandal of the court, proved by affidavit, the party is forthwith to stand committed; but for other contempts against the orders or decrees of the court an attachment goes forth, first, upon affidavit made, and then the party is to be examined upon interrogatories, and his examination referred; and if upon his examination he confess matter of contempt, he is to be committed; if not, the adverse party may examine witnesses to prove the contempt: and therefore if the contempt appear, the party is to be committed; but if not, or if the party that pursues the contempt do fail in putting in interrogatories, or other prosecution, or fail in the proof of the contempt, then the party charged with the contempt is to be discharged with good costs.

78. They that are in contempt, specially so far as proclamation of rebellion, are not to be heard, neither in that suit, nor any other, except the court of special grace suspend the contempt.

79. Imprisonment upon contempt for matters past may be discharged of grace, after sufficient punishment, or otherwise dispensed with: but if the imprisonment be not for performance of any order of the court in force, they ought not to be discharged except they first obey, but the contempt may be suspended for a time.

80. Injunctions, sequestrations, dismissions, retainers upon dismissions, or final orders, are not to be granted upon petitions.

81. No former order made in court is to be altered, crossed, or explained upon any petition; but such orders may be stayed upon petition for a small stay, until the matter may be moved in court.

82. No commission for examination of witnesses shall be discharged; nor no examinations or depositions shall be suppressed upon petition, except it be upon point of course of the court first referred to the clerks, and certificate thereupon.

83. No demurrer shall be overruled upon petition.

84. No *scire facias* shall be awarded upon recognisances not enrolled, nor upon recognisances enrolled, unless it be upon examination of the record with the writ; nor no recognisance shall be enrolled after the year, except it be upon special order from the lord chancellor.

85. No writ of *ne exeat regnum*, prohibition, consultation, statute of Northampton, *certiorari* special, or *procedendo* special, or *certiorari* or *procedendo* general, more than once in the same cause; *habeas corpus*, or *corpus cum causa*, *vi laica removend'*, or restitution thereupon, *de coronatore et viridario eligendo*, in case of a moving *de homine repleg. assiz.* or special patent, *de ballivo amovend'*, *certiorari super præsentationibus fact. coram commissariis sewar,'* or *ad quod dampnum*, shall pass without warrant under the lord chancellor's hand, and signed by him, save such writs *ad quod dampnum*, as shall be signed by master attorney.

86. Writs of privilege are to be reduced to a better rule, both for the number of persons that shall be privileged, and for the case of the privilege: and as for the number, it shall be set down by schedule: for the case, it is to be understood, that besides persons privileged as attendants upon the court, suitors and witnesses are only to have privilege, *eundo, redeundo, et morando*, for their necessary attendance, and not otherwise; and that such writ of privilege dischargeth only an arrest upon the first process, but yet, where at such times of necessary attendance the party is taken in execution, it is a contempt to the court, and accordingly to be punished.

87. No *supplicavit* for the good behaviour shall be granted, but upon articles grounded upon the oath of two at the least, or certificate of any one justice of assize, or two justices of the peace, with affidavit that it is their hands, or by order of the star-chamber, or chancery, or other of the king's courts.

88. No recognisance of the good behaviour, or the peace, taken in the country, and certified into the petty bag, shall be filed in the year without warrant from the lord chancellor.

89. Writs of *ne exeat regnum* are properly to be granted according to the suggestion of the writ, in respect of attempts prejudicial to the king and state, in which case the lord chancellor will grant them upon prayer of any the principal secretaries without cause showing, or upon such information as his lordship shall think of weight; but otherwise also they may be granted, according to the practice of long time used, in case of interlopers in trade, great bankrupts, in whose estate many subjects are interested, or other cases that concern multitudes of the king's subjects, also in case of duels, and divers others.

90. All writs, certificates, and whatsoever other process *ret. coram Rege in Canc.* shall be brought into the chapel of the rolls, within convenient time after the return thereof, and shall be there filed upon their proper files and bundles as they ought to be; except the depositions of witnesses, which may remain with any of the six clerks by the space of one year next after the cause shall be determined by decree, or otherwise be dismissed.

91. All injunctions shall be enrolled, or the transcript filed, to the end that if occasion be, the court may take order to award writs of *scire facias* thereupon, as in ancient time hath been used.

92. All days given by the court to sheriffs to return their writs or bring in their prisoners upon writs of privilege, or otherwise between party and party, shall be filed, either in the register's office, or in the petty bag respectively; and all recognisances taken to the king's use or unto the court, shall be duly enrolled in convenient time, with the clerks of the enrolment, and calendars made of them, and the calendars every Michaelmas term to be presented to the lord chancellor.

93. In case of suits upon the commissions for

charitable uses, to avoid charge, there shall need no bill, but only exceptions to the decree, and answer forthwith to be made thereunto; and thereupon, and upon sight of the inquisition, and the decree brought unto the lord chancellor by the clerk of the petty bag, his lordship upon perusal thereof, will give order under his hand for an absolute decree to be drawn up.

94. Upon suit for the commission of sewers, the names of those that are desired to be commissioners are to be presented to the lord chancellor in writing; then his lordship will send the names of some privy counsellor, lieutenant of the shire, or justices of assize, being resident in the parts for which the commission is prayed, to consider of them, that they be not put in for private respects; and upon the return of such opinion, his lordship will give farther order for the commission to pass.

95. No new commission of sewers shall be granted while the first is in force, except it be upon discovery of abuse or fault in the first commissioners, or otherwise upon some great or weighty ground.

96. No commission of bankrupt shall be granted but upon petition first exhibited to the lord chancellor together with names presented, of which his lordship will take consideration, and always mingle some learned in the law with the rest; yet so as care be taken that the same parties be not too often used in commissions; and likewise care is to be taken that bond with good surety be entered into, in 200*l.* at least, to prove him a bankrupt.

97. No commission of delegates in any cause of weight shall be awarded, but upon petition preferred to the lord chancellor, who will name the commissioners himself, to the end they may be persons of convenient quality, having regard to the weight of the cause, and the dignity of the court from whence the appeal is.

98. Any man shall be admitted to defend *in forma pauperis*, upon oath, but for plaintiffs they are ordinarily to be referred to the court of requests, or to the provincial councils, if the case arise in those jurisdictions, or to some gentlemen in the country, except it be in some special cases of commiseration, or potency in the adverse party.

99. Licences to collect for losses by fire or water are not to be granted, but upon good certificate; and not for decays of suretiship or debt, or any other casualties whatsoever: and they are rarely to be renewed; and they are to be directed ever unto the county where the loss did arise, if it were by fire, and the counties that abut upon it, as the case shall require; and if it were by sea, then unto the county where the port is, from whence the ship went, and to some sea-counties adjoining.

100. No exemplification shall be made of letters patents, *inter alia*, with omission of the general words; nor of records made void or cancelled; nor of the decrees of this court not enrolled; nor of depositions by parcel and fractions, omitting the residue of the depositions in court, to which the hand of the examiner is not subscribed; nor of records of the court not being enrolled or filed; nor of records of any other court, before the same be duly certified to this court, and orderly filed here: nor of any records upon the sight and examination of any copy in paper, but upon sight and examination of the original.

101. And because time and experience may discover some of these rules to be inconvenient, and some other to be fit to be added; therefore his lordship intendeth in any such case from time to time to publish any such revocations or additions.

THE PASSAGES IN PARLIAMENT

AGAINST

FRANCIS VISCOUNT ST. ALBAN,

LORD CHANCELLOR OF ENGLAND.

ANNO DOMINI 1620 AND 1621.

On Monday, the nineteenth day of March, 1620, in the afternoon, the commons had a conference with the lords; which conference was reported the next day by the lord treasurer, [who] delivered the desire of the commons to inform their lordships of the great abuses of the courts of justice: the information whereof was divided into these three parts.

First, The persons accused.

Secondly, Of the matters objected against them.

Thirdly, Their proof.

The persons are the lord chancellor of England and the now bishop of Landaff, being then no bishop, but Dr. Field.

The incomparable good parts of the lord chancellor were highly commended, his place he holds magnified, from whence bounty, justice, and mercy were

to be distributed to the subjects, with which he was solely trusted, whither all great causes were drawn, and from whence no appeal lay for any injustice or wrong done, save to the parliament.

That the lord chancellor is accused of great bribery and corruption, committed by him in this eminent place, whereof two cases were alleged:

The one concerning Christopher Awbrey, and the other concerning Edward Egerton. In the cause depending in the chancery between this Awbrey and Sir William Bronker, Awbrey feeling some hard measure, was advised to give the lord chancellor 100*l.* the which he delivered to his counsel Sir George Hastings, and he to the lord chancellor. This business proceeding slowly notwithstanding, Awbrey did write divers letters, and delivered them to the lord chancellor, but could never have any answer from his lordship; but at last delivering another letter, his lordship answered, If he importuned him he would lay him by the heels.

The proofs of this accusation are five:

The first, Sir George Hastings related it long since unto Sir Charles Montague.

Secondly, the lord chancellor, fearing this would be complained of, desired silence of Sir George Hastings.

Thirdly, Sir George Hastings's testimony thereof; which was not voluntary, but urged.

Fourthly, the lord chancellor desired Sir George Hastings to bring the party Awbrey unto him; and promised redress of the wrong done him.

Fifthly, that the lord chancellor said unto Sir George Hastings, if he would affirm the giving of this 100*l.* his lordship would and must deny it upon his honour.

The case of Mr. Edward Egerton is this: There being divers suits between Edward Egerton and Sir Rowland Egerton in the chancery, Edward Egerton presented his lordship, a little after he was lord keeper, with a bason and ewer of 50*l.* and above, and afterwards he delivered unto Sir George Hastings and Sir Richard Young 400*l.* in gold, to be presented unto his lordship. Sir Richard Young presented it, his lordship took it, and poised [it], and said, it was too much; and returned answer, That Mr. Egerton had not only enriched him, but had a tie upon his lordship to do him favour in all his just causes.

The proofs are the testimony of Sir George Hastings, and the testimony of Merefil, a scrivener, thus far: That he took up 700*l.* for Mr. Egerton, Mr. Egerton then telling him, that a great part of it was to be given to the lord chancellor; and that Mr. Egerton afterwards told him, that the 400*l.* in gold was given to the lord chancellor. At this conference was farther declared of a bishop, who was touched in this business, upon the bye, whose function was much honoured, but his person touched herein: this business depending being ordered against Edward Egerton, he procured a new reference thereof from the king to the lord chancellor: his lordship demanded the parties to be bound in 6000 marks, to stand to his lordship's award: they having entered into that bond, his lordship awarded the matter against Edward Egerton for Sir Rowland Egerton; and Edward Egerton refusing to stand to the said award, a new bill was exhibited in the chancery; and thereupon his lordship ordered that his bond of 6000 marks should be assigned unto Sir Rowland Egerton, and he to put the same in suit in his lordship's name.

The bishop of Landaff, as a friend to Mr. Edward Egerton, advised with Randolph Damport and Butler, which Butler is now dead, that they would procure a stay of the decree of that award, and procure a new hearing: it was agreed that 6000 marks should be given for this by Edward Egerton, and shared amongst them, and amongst certain noble persons.

A recognisance of 10,000*l.* was required from Mr. Egerton to the bishop for the performance hereof: the bishop his share of this 6000 marks was to have [been] so great, as no court of justice would allow: they produce letters of the bishop naming the sum, and setting down a course how this 6000 marks might be raised, namely, the land in question to be decreed for Mr. Egerton, and out of that the money to be levied; and if this were not effected, then the bishop *in verbo sacerdotis* promised to deliver up this recognisance to be cancelled. The new recognisance is sealed accordingly, and Randolph Damport rides to the court, and moved the lord admiral for his lordship's letter to the lord chancellor herein: but his lordship denied to meddle in a cause depending in suit.

Then the said Randolph Damport assayed to get the king's letter, but failed therein also: so that the good they intended to Mr. Egerton was not effected; and yet the bishop, though required, refused to deliver up the said recognisance, until Mr. Egerton threatened to complain thereof unto the king.

He showed also that the commons do purpose, that if any more of this kind happen to be complained of before them, they will present the same to your lordships, wherein they shall follow the ancient precedents, which show that great persons have been accused for the like in parliament.

They humbly desire that forasmuch as this concerneth a person of so great eminency, it may not depend long before your lordships; that the examination of the proofs may be expedited, and if he be found guilty, then to be punished; if not guilty, the now accusers to be punished.

THIS being reported, the lord admiral presented to the house a letter, written unto their lordships, the tenor whereof followeth.

TO THE RIGHT HONOURABLE HIS VERY GOOD LORDS, THE LORDS SPIRITUAL AND TEMPORAL, IN THE UPPER HOUSE OF PARLIAMENT ASSEMBLED.

"MY VERY GOOD LORDS,

"I humbly pray your lordships all, to make a favourable and true construction of my absence. It is no feigning or fainting, but sickness both of my heart and of my back, though joined with that comfort of mind, that persuadeth me that I am not far from heaven, whereof I feel the first fruits.

" And because, whether I live or die, I would be glad to preserve my honour and fame, so far as I am worthy; hearing that some complaints of base bribery are coming before your lordships, my requests unto your lordships are:

" First, That you will maintain me in your good opinion, without prejudice, until my cause be heard.

" Secondly, That, in regard I have sequestered my mind at this time, in great part, from worldly matters, thinking of my account and answers in a higher court; your lordships will give me convenient time, according to the course of other courts, to advise with my counsel, and to make my answer; wherein, nevertheless, my counsel's part will be the least: for I shall not, by the grace of God, trick up an innocency with cavillations, but plainly and ingenuously, as your lordships know my manner is, declare what I know or remember.

" Thirdly, That according to the course of justice I may be allowed to except to the witnesses brought against me, and to move questions to your lordships for their cross examinations, and likewise to produce my own witnesses for the discovery of the truth.

" And lastly, That if there be any more petitions of like nature, that your lordships would be pleased not to take any prejudice or apprehension of any number or muster of them, especially against a judge that makes 2000 orders and decrees in a year, not to speak of the courses that have been taken for hunting out complaints against me, but that I may answer them, according to the rules of justice, severally and respectively.

" These requests, I hope, appear to your lordships no other than just. And so, thinking myself happy to have so noble peers and reverend prelates to discern of my cause, and desiring no privilege of greatness for subterfuge of guiltiness, but meaning, as I said, to deal fairly and plainly with your lordships, and to put myself upon your honours and favours, I pray God to bless your counsels and persons. And rest

" Your lordships' humble servant,

19 March, 1620. FR. ST. ALBAN, CANC."

Upon which letter answer was sent from the lords unto the said lord chancellor on the said twentieth of March, namely, That the lords received his lordship's letter, delivered unto them by the lord admiral: they intend to proceed in his cause now before their lordships, according to the right rule of justice, and they shall be glad if his lordship shall clear his honour therein: to which end they pray his lordship to provide his just defence.

And afterwards, on Wednesday, the twenty-first of March, the commons sent a message unto the lords concerning their farther complaint against the said lord chancellor, which consisted of these four points, namely,

The first in chancery being between the lady Wharton plaintiff, and Wood and others defendants, upon cross bills; the lord chancellor upon hearing wholly dismissed them; but upon entry of the order, the cross bill against the lady Wharton was only dismissed; and afterwards, for a bribe of 300*l.* given by the lady Wharton to the lord chancellor, his lordship decreed the cause farther; and then hearing that Wood and the other defendants complained thereof to the house of commons, his lordship sent for them, and damned that decree as unduly gotten; and when the lady Wharton began to complain thereof, his lordship sent for her also, and promised her redress, saying, " That decree is not yet entered."

Secondly, in the suit between Hall plaintiff, and Holman defendant: Holman deferring his answer was committed to the Fleet, where he lay twenty weeks, and petitioning to be delivered, was answered by some about the lord chancellor, The bill shall be decreed against him, *pro confesso*, unless he would enter into a 2000*l.* bond to stand to the lord chancellor's order; which he refusing, his liberty cost him one way or other one thousand pounds. Holman being freed out of the Fleet, Hall petitioned to the lord chancellor, and Holman finding his cause to go hard with him on his side, complained to the commons; whereupon the lord chancellor sent for him, and to pacify him, told him he should have what order he would himself.

Thirdly, in the cause between Smithwicke and Wiche, the matter in question being for accounts with the merchant, to whom it was referred, certified in the behalf of Smithwicke; yet Smithwicke, to obtain a decree, was told by Mr. Burrough, one near to the lord chancellor, that it must cost him 200*l.* which he paid to Mr. Burrough or Mr. Hunt, to the use of the lord chancellor; and yet the lord chancellor decreed but one part of the certificate; whereupon he treats again with Mr. Burrough, who demanded another 100*l.* which Smithwicke also paid to the use of the lord chancellor. Then his lordship referred the accounts again to the same merchant, who certified it again for Smithwicke; yet his lordship decreed the second part of the certificate against Smithwicke, and the first part, which was formerly decreed for him, his lordship made doubtful: Smithwicke petitioned to the lord chancellor for his money again; and Smithwicke had all his money save 20*l.* kept back by Hunt for a year.

The lord chief justice also delivered three petitions, which his lordship received yesterday from the commons: the first by the lady Wharton, the second by Wood and Parjetor and others, and the third by Smithwicke.

The fourth part of the message consists only of instructions delivered unto the commons by one Churchill a register, concerning divers bribes and abuses in the chancery, which the commons desire may be examined.

The lords, in the mean time, proceeded to the examination of the complaints, and took divers examinations of witnesses in the house, and appointed a select committee of themselves to take examinations also.

And on Wednesday, the twenty-fourth of April, the prince his highness signified unto their lordships, that the said lord chancellor had sent a submission

unto their lordships, which was presently read *in hæc verba:*

TO THE RIGHT HONOURABLE THE LORDS OF THE PARLIAMENT IN THE UPPER HOUSE ASSEMBLED.

The humble Submission and Supplication of the Lord Chancellor.

"IT MAY PLEASE YOUR LORDSHIPS,

"I shall humbly crave at your lordships' hands a benign interpretation of that which I shall now write; for words that come from wasted spirits, and an oppressed mind, are more safe in being deposited in a noble construction, than in being circled with any reserved caution.

"This being moved, and as I hope obtained, in the nature of a protection for all that I shall say; I shall now make into the rest of that, wherewith I shall at this time trouble your lordships, a very strange entrance: for in the midst of a state of as great affliction, as I think a mortal man can endure, honour being above life, I shall begin with the professing of gladness in some things.

"The first is, That hereafter the greatness of a judge, or magistrate, shall be no sanctuary or protection of guiltiness: which, in few words, is the beginning of a golden world.

"The next, That after this example, it is like that judges will fly from any thing that is in the likeness of corruption, though it were at a great distance, as from a serpent; which tendeth to the purging of the courts of justice, and the reducing them to their true honour and splendour.

"And in these two points, God is my witness, that though it be my fortune to be the anvil, whereupon those good effects are beaten and wrought, I take no small comfort.

"But to pass from the motions of my heart, whereof God is only judge, to the merits of my cause, whereof your lordships are judges, under God and his lieutenant. I do understand there hath been heretofore expected from me some justification: and therefore I have chosen one only justification, out of the justification of Job. For after the clear submission and confession which I shall now make unto your lordships, I hope I may say and justify with Job in these words, 'I have not hid my sins, as did Adam, nor concealed my faults in my bosom.' This is the only justification which I will use.

"It resteth therefore, that, without fig-leaves, I do ingenuously confess and acknowledge, that having understood the particulars of the charge, not formally from the house, but enough to inform my conscience and my memory, I find matters sufficient and full, both to move me to desert my defence, and to move your lordships to condemn and censure me.

"Neither will I trouble your lordships by singling those particulars which I think might fall off, "Quid te exempta juvat spinis de pluribus una?" Neither will I prompt your lordships to observe upon the proofs, where they come not home, or the scruple touching the credit of the witnesses. Neither will I represent to your lordships, how far a defence in divers things mought extenuate the offence in respect of the time and manner of the gift, or the like circumstances. But only leave these things to spring out of your own noble thoughts, and observations of the evidence, and examinations themselves; and charitably to wind about the particulars of the charge, here and there as God shall put into your minds; and so submit myself wholly to your piety and grace.

Horat. Ep. lib. ii.

"And now I have spoken to your lordships as judges, I shall say a few words to you as peers and prelates; humbly commending my cause to your noble minds and magnanimous affections.

"Your lordships are not simply judges, but parliamentary judges; you have a farther extent of arbitrary power, than other courts. And if your lordships be not tied by ordinary courses of courts or precedents in points of strictness and severity, much more in points of mercy and mitigation.

"And yet if any thing which I shall move, mought be contrary to your worthy ends to introduce a reformation, I should not seek it: but herein I beseech your lordships to give me leave to tell you a story. Titus Manlius took his son's life for giving battle against the prohibition of his general: not many years after the like severity was pursued by Papirius Cursor, the dictator, against Quintus Maximus; who being upon the point to be sentenced, by the intercession of some principal persons of the senate was spared: whereupon Livy maketh this grave and gracious observation; "Neque minus firmata est disciplina militaris periculo Quinti Maximi, quam miserabili supplicio Titi Manlii." The discipline of war was no less established by the questioning of Quintus Maximus, than by the punishing of Titus Manlius. And the same reason is of the reformation of justice; for the questioning of men of eminent places hath the same terror, though not the same rigour with the punishment.

"But my case standeth not there; for my humble desire is, that his Majesty would take the seal into his hands; which is a great downfal, and may serve, I hope, in itself, for an expiation of my faults.

"Therefore, if mercy and mitigation be in your power, and do no ways cross your noble ends, why should I not hope of your lordships favour and commiseration?

"Your lordships will be pleased to behold your chief pattern, the king our sovereign, a king of incomparable clemency, and whose heart is inscrutable for wisdom and goodness. Your lordships will remember that there sat not these hundred years before, a prince in your house, and never such a prince, whose presence deserves to be made memorable by records and acts mixed of mercy and justice. Your lordships are either nobles, and compassion ever beateth in the veins of noble blood, or reverend prelates, who are the servants of Him, who would not 'break the bruised reed, nor quench the smoking flax.' You all sit upon one high stage, and therefore cannot but be more sensible of the changes of the world, and the fall of any of high place.

"Neither will your lordships forget that there are *vitia temporis*, as well as *vitia hominis*; and that the beginning of reformations hath the contrary power of the pool of Bethesda; for that had strength to cure him only that was first cast in, and this hath commonly strength to hurt him only that is first cast in. And for my part, I wish it may stay there and go no further.

"Lastly, I assure myself, your lordships have a noble feeling of me, as a member of your own body, and one that in this very session had some taste of your loving affections; which, I hope, was not a lightening before the death of them, but rather a spark of that grace, which now in the conclusion will more appear.

"And therefore my humble suit to your lordships is, That my penitent submission may be my sentence, and the loss of the seal my punishment; and that your lordships will spare any farther sentence, but recommend me to his Majesty's grace and pardon for all that is past. God's holy Spirit be among you.

"Your lordships' humble servant, and suppliant,

22d April, 1621. "FR. ST. ALBAN, CANC."

The lords having considered of this submission, and heard the collections of corruptions charged upon the said lord chancellor, and the proofs thereof read, they sent a copy of the same without the proofs unto him the said lord chancellor, by Mr. Baron Denham, and Mr. Attorney-general, with this message from their lordships, namely,

That the lord chancellor's confession is not fully set down by his lordship, in the said submission, for three causes.

1. First, his lordship confesseth not any particular bribe or corruption.

2. Nor showeth how his lordship heard the charge thereof.

3. The confession, such as it is, is afterwards extenuated in the same submission; and therefore the lords have sent him a particular of the charge, and do expect his answer to the same with all convenient expedition.

Unto which message the lord chancellor answered, "that he would return the lords an answer with speed."

And on the twenty-fifth of April the lords considered of the lord chancellor's said answer, sent unto their message yesterday, and sent a second message unto his lordship to this effect, by the said Mr. Baron Denham, and Mr. Attorney-general, namely,

The lords having received a doubtful answer unto the message their lordships sent him yesterday; and therefore they now send to him again to know of his lordship, directly and presently, whether his lordship will make his confession, or stand upon his defence.

Answer returned by the said messengers, namely,

"The lord chancellor will make no manner of defence to the charge, but meaneth to acknowledge corruption, and to make a particular confession to every point, and after that an humble submission; but humbly craves liberty, that where the charge is more full than he finds the truth of the fact, he may make declaration of the truth in such particulars, the charge being brief, and containing not all circumstances."

The lords sent the same messengers back again to the lord chancellor, to let him know, that their lordships have granted him time until Monday next, the thirtieth * of April, by ten in the morning, to send such confession and submission as his lordship intends to make.

On which Monday the lord chancellor sent the same accordingly, and that follows *in hæc verba*, namely:

TO THE RIGHT HONOURABLE THE LORDS SPIRITUAL AND TEMPORAL, IN THE HIGH COURT OF PARLIAMENT ASSEMBLED:

The humble Confession and Submission of me the Lord Chancellor.

Upon advised consideration of the charge, descending into my own conscience, and calling my memory to account, so far as I am able, I do plainly and ingenuously confess that I am guilty of corruption, and do renounce all defence, and put myself upon the grace and mercy of your lordships.

The particulars I confess and declare to be as followeth.

To the first article of the charge, namely, "In the cause between Sir Rowland Egerton and Edward Egerton, the lord chancellor received 300*l.* on the part of Sir Rowland Egerton, before he had decreed the cause:"

I do confess and declare, that upon a reference from his Majesty of all suits and controversies between Sir Rowland Egerton and Edward Egerton, both parties submitted themselves to my award by recognisances reciprocal in ten thousand marks apiece; thereupon, after divers hearings, I made my award with the advice and consent of my lord Hobard: the award was perfected and published to the parties, which was in February. Then some days after the three hundred pounds, mentioned in the charge, was delivered unto me. Afterwards Mr. Edward Egerton fled off from the award; then in Midsummer term following a suit was begun in chancery by Sir Rowland to have the award confirmed, and upon that suit was the decree made mentioned in the article.

The second article of the charge, namely, "In the same cause he received from Edward Egerton 400*l.*"

I confess and declare, that soon after my first coming to the seal, being a time when I was presented by many, the 400*l.* mentioned in the said charge was delivered unto me in a purse, and, as I now call to mind, from Mr. Edward Egerton; but, as far as I can remember, it was expressed by them that brought it to be for favours past, and not in respect of favours to come.

The article of the charge, namely, "In the cause between Hody and Hody, he received a dozen of

* I presume it should be the twenty-ninth.

buttons of the value of 50*l.* about a fortnight after the cause was ended:"

I confess and declare, that as it is laid in the charge, about a fortnight after the cause was ended, it being a suit for a great inheritance, there were gold buttons about the value of 50*l.* as is mentioned in the charge, presented unto me, as I remember, by Sir Thomas Perrot and the party himself.

To the fourth article of the charge, namely, "In a cause between the lady Wharton, and the coheirs of Sir Francis Willoughby, he received of the lady Wharton three hundred and ten pounds:"

I confess and declare, that I did receive of the lady Wharton, at two several times, as I remember, in gold, 200*l.* and 100 pieces; and this was certainly *pendente lite:* but yet I have a vehement suspicion that there was some shuffling between Mr. Shute and the register in entering some orders, which afterwards I did distaste.

To the fifth article of the charge, namely, "In Sir Thomas Monk's cause he received from Sir Thomas Monk, by the hands of Sir Henry Holmes, 110*l.* but this was three-quarters of a year after the suit was ended:"

I confess it to be true, that I received 100 pieces; but it was long after the suit ended, as is contained in the charge.

To the sixth article of the charge, namely, "In the cause between Sir John Trevor and Ascue, he received on the part of Sir John Trevor 100*l.*"

I confess and declare, that I received at new year's tide 100*l.* from Sir John Trevor; and, because it came as a new year's gift, I neglected to inquire whether the cause was ended or depending; but since I find, that though the cause was then dismissed to a trial at law, yet the equity is reserved, so as it was in that kind *pendente lite.*

To the seventh article of the charge, namely, "In the cause between Holman and Young, he received of Young 100*l.* after the decree made for him:"

I confess and declare, that, as I remember, a good while after the cause ended, I received 100*l.* either by Mr. Toby Matthew, or from Young himself; but whereas I have understood that there was some money given by Holman to my servant Hatcher, to that certainly I was never made privy.

To the eighth article of the charge, "In the cause between Fisher and Wrenham, the lord chancellor, after the decree passed, received a suit of hangings worth one hundred and threescore pounds and better, which Fisher gave him by advice of Mr. Shute:"

I confess and declare, that some time after the decree passed, I being at that time upon remove to York-house, I did receive a suit of hangings of the value, I think, mentioned in the charge, by Mr. Shute, as from Sir Edward Fisher, towards the furnishing of my house, as some others, that were no ways suitors, did present me with the like about that time.

To the ninth article of the charge, "In the cause between Kennedy and Vanlore, he received a rich cabinet from Kennedy, prized at 800*l.*"

I confess and declare, that such a cabinet was brought to my house, though nothing near half the value; and that I said to him that brought it, that I came to view it, and not to receive it; and gave commandment that it should be carried back; and was offended when I heard it was not: and some year and half after, as I remember, Sir John Kennedy having all that time refused to take it away, as I am told by my servants, I was petitioned by one Pinkney that it might be delivered to him, for that he stood engaged for the money that Sir John Kennedy paid for it: and thereupon Sir John Kennedy wrote a letter to my servant Sherborne, with his own hand, desiring I would not do him that disgrace, as to return that gift back, much less to put it into a wrong hand: and so it remains yet ready to be returned to whom your lordships shall appoint.

To the tenth article of the charge, namely, "He borrowed of Vanlore 1000*l.* upon his own bond at one time, and the like sum at another time, upon his lordship's own bill, subscribed by Mr. Hunt his man:"

I confess and declare, that I borrowed the money in the article set down, and that this is a true debt; and I remember well that I wrote a letter from Kew, about a twelvemonth since, to a friend about the king; wherein I desired, that whereas I owed Peter Vanlore 2000*l.* his Majesty would be pleased to grant me so much out of his fine, set upon him in the star-chamber.

To the eleventh article of the charge, namely, "He received of Richard Scott 200*l.* after his cause was decreed, but upon a precedent promise; all which was transacted by Mr. Shute:"

I confess and declare, that some fortnight after, as I remember, that the decree passed, I received 200*l.* as from Mr. Scott, by Mr. Shute: but precedent promise or transaction by Mr. Shute, certain I am, I knew of none.

To the twelfth article of the charge, namely, "He received in the same cause, on the part of Sir John Lenthall, 100*l.*"

I confess and declare, that some months after, as I remember, that the decree passed, I received 100*l.* by my servant Sherborne, as from Sir John Lenthall, who was not in the adverse party to Scott, but a third person, relieved by the same decree, in the suit of one Power.

To the thirteenth article of the charge, namely, "He received of Mr. Worth 100*l.* in respect of the cause between him and Sir Arthur Mainwaring:"

I confess and declare, that this cause being a cause for inheritance of good value, was ended by my arbitrament, and consent of parties, and so a decree passed of course; and some months after the cause was ended, the 100*l.* mentioned in the said article, was delivered to me by my servant Hunt.

To the fourteenth article of the charge, namely, "He received of Sir Ralph Hansbye, having a cause depending before him, 500*l.*"

I confess and declare, that there were two decrees, one as I remember for the inheritance, and the other for the goods and chattels, but all upon one bill: and some good time after the first decree, and before the second, the said 500*l.* was delivered unto me by

Mr. Toby Matthew; so as I cannot deny but it was, upon the matter, *pendente lite*.

To the fifteenth article of the charge, namely, "William Compton being to have an extent for a debt of 1200*l.* the lord chancellor stayed it, and wrote his letter, upon which, part of the debt was paid presently, and part at a future day; the lord chancellor hereupon sends to borrow 500*l.* and because Compton was to pay 400*l.* to one Huxley, his lordship requires Huxley to forbear six months; and thereupon obtains the money from Compton: the money being unpaid, suit grows between Huxley and Compton in chancery, where his lordship decrees Compton to pay Huxley the debt, with damage and costs, when it was in his own hands:"

I do declare that in my conscience the stay of the extent was just, being an extremity against a nobleman, by whom Compton could be no loser; the money was plainly borrowed of Compton upon bond with interest, and the message to Huxley was only to entreat him to give Compton a longer day, and in no sort to make me a debtor or responsible to Huxley; and therefore, though I was not ready to pay Compton his money, as I would have been glad to have done, save only 100*l.* which is paid, I could not deny justice to Huxley in as ample manner as if nothing had been between Compton and I; but if Compton hath been damnified in my respect, I am to consider it to Compton.

To the sixteenth article of the charge, namely, "In the cause between Sir William Bronker and Awbrey, the lord chancellor received from Awbrey 100*l.*"

I do confess and declare, that the money was given and received, but the manner of it I leave to the witnesses.

To the seventeenth article of the charge, namely, "In the lord Montague's cause, he received from the lord Montague 600 or 700*l.* and more was to be paid at the ending of the cause:"

I confess and declare there was money given, and, as I remember, to Mr. Bevis Thelwall, to the sum mentioned in the article, after the cause was decreed; but I cannot say it was ended: for there have been many orders since, caused by Sir Francis Inglefield's contempts; and I do remember, that when Thelwal brought the money, he said that my lord would be yet farther thankful if he could once get his quiet; to which speech I gave little regard.

To the eighteenth article of the charge, namely, "In the cause of Mr. Dunch, he received from Mr. Dunch 200*l.*"

I confess and declare, that it was delivered by Mr. Thelwall to Hatcher my servant for me, as I think, some time after the decree; but I cannot precisely inform myself of the time.

To the nineteenth article of the charge, namely, "In the cause between Reynell and Peacoke, he received from Reynell 200*l.* and a dipmond ring worth 500 or 600*l.*"

I confess and declare, that at my first coming to the seal, when I was at Whitehall, my servant Hunt delivered me 200*l.* from Sir George Raynell, my near ally, to be bestowed upon furniture of my house; adding farther, that he had received divers former favours from me; and this was, as I verily think, before any suit begun: the ring was certainly received *pendente lite;* and though it were at new year's tide, it was too great a value for a new year's gift; though, as I take it, nothing near the value mentioned in the article.

To the twentieth article of the charge, namely, "That he took of Peacoke 100*l.* without interest, security, or time of payment:"

I confess and declare, that I received of Mr. Peacoke 100*l.* at Dorset-house, at my first coming to the seal, as a present; at which time no suit was begun; and at the summer after, I sent my then servant Lister to Mr. Rolfe, my good friend and neighbour at St. Albans, to use his means with Mr. Peacoke, who was accounted a moneyed man, for the borrowing of 500*l.* and after by my servant Hatcher for borrowing of 500*l.* more, which Mr. Rolfe procured; and told me at both times, it should be without interest, script, or note, and that I should take my own time for payment of it.

To the twenty-first article of the charge, namely, "In the cause between Smithwicke and Wiche, he received from Smithwicke 200*l.* which was repaid:"

I confess and declare, that my servant Hunt did, upon his account, being my receiver of the fines upon original writs, charge himself with 200*l.* formerly received of Smithwicke; which, after that I had understood the nature of it, I ordered him to repay, and to defalke it out of his accounts.

To the two and twentieth article of the charge, namely, "In the cause of Sir Henry Ruswell, he received money from Ruswell, but it is not certain how much:"

I confess and declare, that I received money from my servant Hunt, as from Mr. Ruswell, in a purse; and whereas the sum in the article being indefinite, I confess [it] to be 300 or 400*l.* and it was about some months after the cause was decreed: in which decree I was assisted by two of the judges.

To the twenty-third article of the charge, namely, "In the cause of Mr. Barker, the lord chancellor received from Barker 700*l.*"

I confess and declare, that the sum mentioned in the article was received from Mr. Barker some time after the decree past.

To the twenty-fourth, twenty-fifth, twenty-sixth articles of the charge, namely, The twenty-fourth, "There being a reference from his Majesty to his lordship of a business between the grocers and the apothecaries, the lord chancellor received of the grocers 200*l.*" The twenty-fifth article, "In the same cause, he received of the apothecaries, that stood with the grocers, a taster of gold worth between 400 and 500*l.* and a present of ambergrease." And the twenty-sixth article, "He received of a new company of apothecaries, that stood against the grocers, 100*l.*"

To these I confess and declare, that the several sums from the three parties were received; and for that it was no judicial business, but a concord of composition between the parties, and that as I thought all had received good, and they were all

three common purses, I thought it the less matter to receive that which they voluntarily presented; for if I had taken it in the nature of a corrupt bribe, I knew it could not be concealed, because it must needs be put to account to the three several companies.

To the twenty-seventh article of the charge, namely, "He took of the French merchants 1000*l.* to constrain the vintners of London to take from them 1500 tuns of wine; to accomplish which, he used very indirect means, by colour of his office and authority, without bill or suit depending, terrifying the vintners by threats, and by imprisonments of their persons, to buy wines whereof they had no need, nor use, at higher rates than they were vendible:"

I do confess and declare, that Sir Thomas Smith did deal with me in behalf of the French Company; informing me, that the vintners by combination would not take off their wines at any reasonable prices; that it would destroy their trade, and stay their voyage for that year; and that it was a fair business, and concerned the state; and he doubted not but I should receive thanks from the king, and honour by it; and that they would gratify me with a thousand pounds for my travail in it: whereupon I treated between them by way of persuasion; and to prevent any compulsory suit, propounding such a price as the vintners might be gainers 6*l.* in a tun as it was then maintained unto me. And after the merchants petitioning to the king, and his Majesty recommending this business unto me, as a business that concerns his customs and the navy, I dealt more earnestly and peremptorily in it; and, as I think, restrained in the messenger's hand for a day or two some that were the most stiff; and afterwards the merchants presented me with 1000*l.* out of their common purse, and acknowledging themselves that I had kept them from a kind of ruin, and still maintaining to me, that the vintners, if they were not insatiably minded, had a very competent gain: this is the merits of the cause, as it there appears to me.

To the twenty-eighth article of the charge, namely, "The lord chancellor hath given way to great exactions by his servants, both in respect of private seals, and otherwise for sealing of injunctions:"

I confess it was a great fault of neglect in me that I looked no better to my servants.

This declaration I have made to your lordships, with a sincere mind, humbly craving that if there should be any mistake, your lordships would impute it to want of memory, and not to any desire of mine to obscure truth, or palliate any thing; for I do now again confess, that in the points charged upon me, though they should be taken, as myself declared them, there is a great deal of corruption and neglect, for which I am heartily sorry, and submit myself to the judgment, grace, and mercy of the court.

For extenuation I will use none concerning the matters themselves; only it may please your lordships, out of your nobleness, to cast your eyes of compassion upon my person and estate. I was never noted for any avaricious man; and the apostle saith, that "covetousness is the root of all evil." I hope also that your lordships do rather find me in a state of grace, for that in all these particulars there are few or none that are not almost two years old; whereas those that have a habit of corruption do commonly wax worse: so that it hath pleased God to prepare me by precedent degrees of amendment to my present penitency; and for my estate, it is so mean and poor, as my care is now chiefly to satisfy my debts.

And so fearing I have troubled your lordships too long, I shall conclude with an humble suit unto you, that if your lordships proceed to sentence, your sentence may not be heavy to my ruin, but gracious and mixt with mercy; and not only so, but that you would be noble intercessors for me to his Majesty likewise for his grace and favour.

Your lordships' humble servant and suppliant,

FR. ST. ALBAN, CANC.

The lords having heard this confession and submission read, these lords undernamed, namely, the earl of Pembroke, lord chamberlain; the earl of Arundel, the earl of Southampton, the bishop of Durham, the bishop of Winchester, the bishop of Coventry and Lichfield, the lord Wentworth, the lord Cromwell, the lord Sheffield, the lord North, the lord Chandos, the lord Hunsdon, were sent to him the said lord chancellor, and showed him the said confession, and told him, that the lords do conceive it to be an ingenuous and full confession: and demanded of him, whether it be his own hand that is subscribed to the same, and whether he will stand to it or no; unto which the said lord chancellor answered, namely,

"My lords, it is my act, my hand, my heart: I beseech your lordships to be merciful to a broken reed."

The which answer being reported to the house, it was agreed by the house, to move his Majesty to sequester the seal; and the lords entreated the prince's Highness, that he would be pleased to move the king: whereunto his Highness condescended; and the same lords, which went to take the acknowledgment of the lord chancellor's hand, were appointed to attend the prince to the king, with some other lords added: and his Majesty did not only sequester the seal, but awarded a new commission unto the lord chief justice to execute the place of the chancellor or lord keeper.

Parliament. dat. *primo Maii*, and on Wednesday the second of May the said commission being read, their lordships agreed to proceed to sentence the lord chancellor to-morrow morning; wherefore the gentleman usher, and serjeant at arms, attendants on the upper house, were commanded to go and summon him the said lord chancellor to appear in person before their lordships to-morrow morning by nine of the clock; and the said serjeant was commanded to take his mace with him, and to show it unto his lordship at the said summons: but they found him sick in bed, and being summoned, he an-

swered that he was sick, and protested that he feigned not this for any excuse; for if he had been well he would willingly have come.

The lords resolved to proceed notwithstanding against the said lord chancellor; and therefore, on Thursday the third day of May, their lordships sent their message unto the commons to this purpose, namely, That the lords are ready to give judgment against the lord viscount St. Alban, lord chancellor, if they with their speaker will come to demand it. And the commons being come, the speaker came to the bar, and making three low obeisances, said:

"THE knights, citizens, and burgesses, of the commons house of parliament, have made complaints unto your lordships of many exorbitant offences of bribery and corruption committed by the lord chancellor; we understand that your lordships are ready to give judgment upon him for the same; wherefore I their speaker, in their name, do humbly demand, and pray judgment against him the lord chancellor, as the nature of his offence and demerits do require."

The lord chief justice answered,

"MR. SPEAKER,

"Upon complaint of the commons against the viscount St. Alban, lord chancellor, this high court hath hereby, and by his own confession, found him guilty of the crimes and corruptions complained of by the commons, and of sundry other crimes and corruptions of the like nature.

"And therefore this high court, having first summoned him to attend, and having his excuse of not attending by reason of infirmity and sickness, which, he protested, was not feigned, or else he would most willingly have attended; doth nevertheless think fit to proceed to judgment; and therefore this high court doth adjudge,

"I. That the lord viscount St. Alban, lord chancellor of England, shall undergo fine and ransom of forty thousand pounds.

"II. That he shall be imprisoned in the Tower during the king's pleasure.

"III. That he shall for ever be uncapable of any office, place, or employment, in the state or commonwealth.

"IV. That he shall never sit in parliament, nor come within the verge of the court.

"This is the judgment and resolution of this high court."

WORKS HISTORICAL.

THE HISTORY OF THE REIGN

OF

KING HENRY THE SEVENTH.

TO THE MOST ILLUSTRIOUS AND MOST EXCELLENT PRINCE CHARLES,

PRINCE OF WALES, DUKE OF CORNWALL, EARL OF CHESTER, ETC.

IT MAY PLEASE YOUR HIGHNESS,

IN part of my acknowledgment to your Highness, I have endeavoured to do honour to the memory of the last king of England, that was ancestor to the king your father and yourself; and was that king to whom both unions may in a sort refer: that of the roses being in him consummate, and that of the kingdoms by him begun: besides, his times deserve it. For he was a wise man, and an excellent king; and yet the times were rough and full of mutations, and rare accidents. And it is with times, as it is with ways: some are more up-hill and down-hill, and some are more flat and plain; and the one is better for the liver, and the other for the writer. I have not flattered him, but took him to life as well as I could, sitting so far off, and having no better light. It is true your Highness hath a living pattern, incomparable, of the king your father: but it is not amiss for you also to see one of these ancient pieces. God preserve your Highness.

Your Highness's most humble and devoted servant,

FRANCIS ST. ALBAN.

AFTER that Richard, the third of that name, king in fact only, but tyrant both in title and regiment, and so commonly termed and reputed in all times since, was by the Divine revenge favouring the design of an exiled man, overthrown and slain at Bosworth-field; there succeeded in the kingdom the earl of Richmond, thenceforth styled Henry the seventh. The king immediately after the victory, as one that had been bred under a devout mother, and was in his nature a great observer of religious forms, caused "Te Deum laudamus" to be solemnly sung in the presence of the whole army upon the place, and was himself with general applause and great cries of joy, in a kind of military election or recognition, saluted king. Meanwhile the body of Richard, after many indignities and reproaches, the *diriges* and obsequies of the common people towards tyrants, was obscurely buried. For though the king of his nobleness gave charge unto the friars of Leicester to see an honourable interment to be given to it, yet the religious people themselves, being not free from the humours of the vulgar, neglected it; wherein nevertheless they did not then incur any man's blame or censure: no man thinking any ignominy or contumely unworthy of him that had been the executioner of king Henry the sixth, that innocent prince, with his own hands; the contriver of the death of the duke of Clarence his brother; the murderer of his two nephews, one of them his lawful king in the present, and the other in the future, failing of him; and vehemently suspected to have been the impoisoner of his wife, thereby to make vacant his bed, for a marriage within the degrees forbidden. And although he were a prince in military virtue approved, jealous of the honour of the English nation, and likewise a good law-maker, for the ease and solace of the common people; yet his cruelties and parricides, in the

opinion of all men, weighed down his virtues and merits; and, in the opinion of wise men, even those virtues themselves were conceived to be rather feigned and affected things to serve his ambition, than true qualities ingenerate in his judgment or nature. And therefore it was noted by men of great understanding, who seeing his after-acts, looked back upon his former proceedings, that even in the time of king Edward his brother he was not without secret trains and mines to turn envy and hatred upon his brother's government; as having an expectation and a kind of divination, that the king, by reason of his many disorders, could not be of long life, but was like to leave his sons of tender years; and then he knew well, how easy a step it was, from the place of a protector, and first prince of the blood, to the crown. And that out of this deep root of ambition it sprung, that as well at the treaty of peace that passed between Edward the fourth and Lewis the eleventh of France concluded by interview of both kings at Piqueny, as upon all other occasions, Richard, then duke of Gloucester, stood ever upon the side of honour, raising his own reputation to the disadvantage of the king his brother, and drawing the eyes of all, especially of the nobles and soldiers, upon himself; as if the king, by his voluptuous life and mean marriage, were become effeminate and less sensible of honour and reason of state than was fit for a king. And as for the politic and wholesome laws which were enacted in his time, they were interpreted to be but the brokage of an usurper, thereby to woo and win the hearts of the people, as being conscious to himself, that the true obligations of sovereignty in him failed, and were wanting. But king Henry, in the very entrance of his reign, and the instant of time when the kingdom was cast into his arms, met with a point of great difficulty, and knotty to solve, able to trouble and confound the wisest king in the newness of his estate; and so much the more, because it could not endure a deliberation, but must be at once deliberated and determined. There were fallen to his lot, and concurrent in his person, three several titles to the imperial crown. The first, the title of the lady Elizabeth, with whom by precedent pact with the party that brought him in, he was to marry. The second, the ancient and long disputed title both by plea and arms, of the house of Lancaster, to which he was inheritor in his own person. The third, the title of the sword or conquest, for that he came in by victory of battle, and that the king in possession was slain in the field. The first of these was fairest, and most like to give contentment to the people, who by two and twenty years' reign of king Edward the fourth had been fully made capable of the clearness of the title of the white rose, or house of York; and by the mild and plausible reign of the same king towards his latter time, were become affectionate to that line. But then it lay plain before his eyes, that if he relied upon that title, he could be but a king at courtesy, and have rather a matrimonial than a regal power; the right remaining in his queen, upon whose decease, either with issue or without issue, he was to give place and be removed. And though he should obtain by parliament to be continued, yet he knew there was a very great difference between a king that holdeth his crown by a civil act of estates, and one that holdeth it originally by the law of nature and descent of blood. Neither wanted there even at that time secret rumours and whisperings, which afterwards gathered strength and turned to great troubles, that the two young sons of king Edward the fourth, or one of them, which were said to be destroyed in the Tower, were not indeed murdered, but conveyed secretly away, and were yet living: which, if it had been true, had prevented the title of the lady Elizabeth. On the other side, if he stood upon his own title of the house of Lancaster, inherent in his person, he knew it was a title condemned by parliament, and generally prejudged in the common opinion of the realm, and that it tended directly to the disinherison of the line of York, held then the indubitate heirs of the crown. So that if he should have no issue by the lady Elizabeth, which should be descendants of the double line, then the ancient flames of discord and intestine wars, upon the competition of both houses, would again return and revive.

As for conquest, notwithstanding Sir William Stanley, after some acclamations of the soldiers in the field, had put a crown of ornament, which Richard wore in the battle, and was found amongst the spoils, upon king Henry's head, as if there were his chief title; yet he remembered well upon what conditions and agreements he was brought in; and that to claim as conqueror, was to put as well his own party, as the rest, into terror and fear; as that which gave him power of disannulling of laws, and disposing of men's fortunes and estates, and the like points of absolute power, being in themselves so harsh and odious, as that William himself, commonly called the Conqueror, howsoever he used and exercised the power of a conqueror to reward his Normans, yet he forbore to use that claim in the beginning, but mixed it with a titulary pretence, grounded upon the will and designation of Edward the Confessor. But the king, out of the greatness of his own mind, presently cast the die; and the inconveniences appearing unto him on all parts, and knowing there could not be any interreign, or suspension of title, and preferring his affection to his own line and blood, and liking that title best which made him independent; and being in his nature and constitution of mind not very apprehensive or forecasting of future events afar off, but an entertainer of fortune by the day; resolved to rest upon the title of Lancaster as the main, and to use the other two, that of marriage, and that of battle, but as supporters, the one to appease secret discontents, and the other to beat down open murmur and dispute: not forgetting that the same title of Lancaster had formerly maintained a possession of three descents in the crown; and might have proved a perpetuity, had it not ended in the weakness and inability of the last prince. Whereupon the king presently that very day, being the two and twentieth of August, assumed the style of king in his own name, without mention of the lady Elizabeth at all, or any relation thereunto. In

which course he ever after persisted: which did spin him a thread of many seditions and troubles. The king, full of these thoughts, before his departure from Leicester, despatched Sir Robert Willoughby to the castle of Sheriff-Hutton in Yorkshire, where were kept in safe custody, by king Richard's commandment, both the lady Elizabeth, daughter of king Edward, and Edward Plantagenet, son and heir to George, duke of Clarence. This Edward was by the king's warrant delivered from the constable of the castle to the hand of Sir Robert Willoughby: and by him with all safety and diligence conveyed to the Tower of London, where he was shut up close prisoner. Which act of the king's, being an act merely of policy and power, proceeded not so much from any apprehension he had of Doctor Shaw's tale at Paul's cross for the bastarding of Edward the fourth's issues, in which case this young gentleman was to succeed, for that fable was ever exploded, but upon a settled disposition to depress all eminent persons of the line of York. Wherein still the king out of strength of will, or weakness of judgment, did use to show a little more of the party than of the king.

For the lady Elizabeth, she received also a direction to repair with all convenient speed to London, and there to remain with the queen dowager her mother; which accordingly she soon after did, accompanied with many noblemen and ladies of honour. In the mean season the king set forward by easy journeys to the city of London, receiving the acclamations and applauses of the people as he went, which indeed were true and unfeigned, as might well appear in the very demonstrations and fulness of the cry. For they thought generally, that he was a prince, as ordained and sent down from heaven, to unite and put to an end the long dissensions of the two houses; which although they had had, in the times of Henry the fourth, Henry the fifth, and a part of Henry the sixth, on the one side, and the times of Edward the fourth on the other, lucid intervals and happy pauses; yet they did ever hang over the kingdom, ready to break forth into new perturbations and calamities. And as his victory gave him the knee, so his purpose of marriage with the lady Elizabeth gave him the heart; so that both knee and heart did truly bow before him.

He on the other side with great wisdom, not ignorant of the affections and fears of the people, to disperse the conceit and terror of a conquest, had given order, that there should be nothing in his journey like unto a warlike march or manner; but rather like unto the progress of a king in full peace and assurance.

He entered the city upon a Saturday, as he had also obtained the victory upon a Saturday; which day of the week, first upon an observation, and after upon memory and fancy, he accounted and chose as a day prosperous unto him.

The mayor and companies of the city received him at Shoreditch; whence with great and honourable attendance, and troops of noblemen, and persons of quality, he entered the city; himself not being on horseback, or in any open chair or throne, but in a close chariot, as one that having been sometimes an enemy to the whole state, and a proscribed person, chose rather to keep state, and strike a reverence into the people, than to fawn upon them.

He went first into St. Paul's church, where, not meaning that the people should forget too soon that he came in by battle, he made offertory of his standards, and had orisons and "Te Deum" again sung; and went to his lodging prepared in the bishop of London's palace, where he stayed for a time.

During his abode there, he assembled his council and other principal persons, in presence of whom he did renew again his promise to marry with the lady Elizabeth. This he did the rather, because having at his coming out of Britain given artificially, for serving his own turn, some hopes, in case he obtained the kingdom, to marry Anne, inheritress to the duchy of Britain, whom Charles the eighth of France soon after married, it bred some doubt and suspicion amongst divers that he was not sincere, or at least not fixed in going on with the match of England so much desired: which conceit also, though it were but talk and discourse, did much afflict the poor lady Elizabeth herself. But howsoever he both truly intended it, and desired it, and desired also it should be so believed, the better to extinguish envy and contradiction to his other purposes, yet was he resolved in himself not to proceed to the consummation thereof, till his coronation and a parliament were past. The one, lest a joint coronation of himself and his queen might give any countenance of participation of title; the other, lest in the entailing of the crown to himself, which he hoped to obtain by parliament, the votes of the parliament might any ways reflect upon her.

About this time in autumn, towards the end of September, there began and reigned in the city, and other parts of the kingdom, a disease then new: which by the accidents and manner thereof they called the sweating sickness. This disease had a swift course, both in the sick body, and in the time and period of the lasting thereof; for they that were taken with it, upon four and twenty hours escaping, were thought almost assured. And as to the time of the malice and reign of the disease ere it ceased; it began about the one and twentieth of September, and cleared up before the end of October, insomuch as it was no hinderance to the king's coronation, which was the last of October; nor, which was more, to the holding of the parliament, which began but seven days after. It was a pestilent fever, but, as it seemeth, not seated in the veins or humours, for that there followed no carbuncle, no purple or livid spots, or the like, the mass of the body being not tainted; only a malign vapour flew to the heart, and seized the vital spirits; which stirred nature to strive to send it forth by an extreme sweat. And it appeared by experience, that this disease was rather a surprise of nature than obstinate to remedies, if it were in time looked unto. For if the patient were kept in an equal temper, both for clothes, fire, and drink, moderately warm, with temperate cordials, whereby nature's work were neither irritated by heat, nor turned back by cold, he commonly recovered. But infinite persons died suddenly of it, before the man-

ner of the cure and attendance was known. It was conceived not to be an epidemic disease, but to proceed from a malignity in the constitution of the air, gathered by the predispositions of seasons; and the speedy cessation declared as much.

On Simon and Jude's eve, the king dined with Thomas Bourchier, archbishop of Canterbury and cardinal; and from Lambeth went by land over the bridge to the Tower, where the morrow after he made twelve knights bannerets. But for creations he dispensed them with a sparing hand. For notwithstanding a field so lately fought, and a coronation so near at hand, he only created three: Jasper, earl of Pembroke, the king's uncle, was created duke of Bedford; Thomas, the lord Stanley, the king's father-in-law, earl of Derby; and Edward Courtney, earl of Devon; though the king had then nevertheless a purpose in himself to make more in time of parliament; bearing a wise and decent respect to distribute his creations, some to honour his coronation, and some his parliament.

The coronation followed two days after, upon the thirtieth day of October, in the year of our Lord, 1485; at which time Innocent the eighth was pope of Rome; Frederick the third emperor of Almain; and Maximilian his son newly chosen king of the Romans; Charles the eighth king of France; Ferdinando and Isabella kings of Spain; and James the third king of Scotland: with all which kings and states the king was at that time in good peace and amity. At which day also, as if the crown upon his head had put perils into his thoughts, he did institute, for the better security of his person, a band of fifty archers, under a captain to attend him, by the name of yeomen of his guard: and yet, that it might be thought to be rather a matter of dignity, after the imitation of what he had known abroad, than any matter of diffidence appropriate to his own case, he made it to be understood for an ordinance not temporary, but to hold in succession for ever after.

The seventh of November the king held his parliament at Westminster, which he had summoned immediately after his coming to London. His ends in calling a parliament, and that so speedily, were chiefly three: first, to procure the crown to be entailed upon himself. Next, to have the attainders of all his party, which were in no small number, reversed, and all acts of hostility by them done in his quarrel remitted and discharged; and on the other side, to attaint by parliament the heads and principals of his enemies. The third, to calm and quiet the fears of the rest of that party by a general pardon; not being ignorant in how great danger a king stands from his subjects, when most of his subjects are conscious in themselves that they stand in his danger. Unto these three special motives of a parliament was added, that he, as a prudent and moderate prince, made this judgment, that it was fit for him to hasten to let his people see, that he meant to govern by law, howsoever he came in by the sword; and fit also to reclaim them to know him for their king, whom they had so lately talked of as an enemy or banished man. For that which concerned the entailing of the crown, more than that he was true to his own will, that he would not endure any mention of the lady Elizabeth, no not in the nature of special entail, he carried it otherwise with great wisdom and measure: for he did not press to have the act penned by way of declaration or recognition of right; as, on the other side, he avoided to have it by new law or ordinance, but chose rather a kind of middle way, by way of establishment, and that under covert and indifferent words: "that the inheritance of the crown should rest, remain, and abide in the king," &c. which words might easily be applied, that the crown should continue to him; but whether as having former right to it, which was doubtful, or having it then in fact and possession, which no man denied, was left fair to interpretation either way. And again, for the limitation of the entail, he did not press it to go farther than to himself and to the heirs of his body, not speaking of his right heirs: but leaving that to the law to decide: so as the entail might seem rather a personal favour to him and his children, than a total disinherison to the house of York. And in this form was the law drawn and passed. Which statute he procured to be confirmed by the pope's bull the year following, with mention nevertheless, by way of recital, of his other titles, both of descent and conquest. So as now the wreath of three, was made a wreath of five; for to the first three titles of the two houses, or lines, and conquest, were added two more, the authorities parliamentary and papal.

The king likewise, in the reversal of the attainders of his partakers, and discharging them of all offences incident to his service and succour, had his will; and acts did pass accordingly. In the passage whereof, exception was taken to divers persons in the house of commons, for that they were attainted, and thereby not legal, nor habilitate to serve in parliament, being disabled in the highest degree; and that it should be a great incongruity to have them to make laws, who themselves were not inlawed. The truth was, that divers of those, which had in the time of king Richard been strongest, and most declared for the king's party, were returned knights and burgesses for the parliament; whether by care or recommendation from the state, or the voluntary inclination of the people; many of which had been by Richard the third attainted by outlawries, or otherwise. The king was somewhat troubled with this; for though it had a grave and specious show, yet it reflected upon his party. But wisely not showing himself at all moved therewith, he would not understand it but as a case in law, and wished the judges to be advised thereupon; who for that purpose were forthwith assembled in the exchequer-chamber, which is the council-chamber of the judges, and upon deliberation they gave a grave and safe opinion and advice, mixed with law and convenience; which was, that the knights and burgesses attainted by the course of law should forbear to come into the house, till a law were passed for the reversal of their attainders.

It was at that time incidently moved amongst the judges in their consultation, what should be done

for the king himself, who likewise was attainted? But it was with unanimous consent resolved, "That the crown takes away all defects and stops in blood; and that from the time the king did assume the crown, the fountain was cleared, and all attainders and corruption of blood discharged." But nevertheless, for honour's sake, it was ordained by parliament, that all records, wherein there was any memory or mention of the king's attainder, should be defaced, cancelled, and taken off the file.

But on the part of the king's enemies there were by parliament attainted, the late duke of Gloucester, calling himself Richard the third; the duke of Norfolk, the earl of Surry, viscount Lovel, the lord Ferrers, the lord Zouch, Richard Ratcliffe, William Catesby, and many others of degree and quality. In which bills of attainders, nevertheless, there were contained many just and temperate clauses, savings, and provisoes, well showing and fore-tokening the wisdom, stay, and moderation of the king's spirit of government. And for the pardon of the rest, that had stood against the king, the king, upon a second advice, thought it not fit it should pass by parliament, the better, being matter of grace, to impropriate the thanks to himself; using only the opportunity of a parliament time, the better to disperse it into the veins of the kingdom. Therefore during the parliament he published his royal proclamation, offering pardon and grace of restitution to all such as had taken arms, or been participant of any attempts against him; so as they submitted themselves to his mercy by a day, and took the oath of allegiance and fidelity to him. Whereupon many came out of sanctuary, and many more came out of fear, no less guilty than those that had taken sanctuary.

As for money or treasure, the king thought it not seasonable or fit to demand any of his subjects at this parliament; both because he had received satisfaction from them in matters of so great importance, and because he could not remunerate them with any general pardon, being prevented therein by the coronation pardon passed immediately before; but chiefly, for that it was in every man's eye, what great forfeitures and confiscations he had at that present to help himself; whereby those casualties of the crown might in reason spare the purses of the subject; especially in a time when he was in peace with all his neighbours. Some few laws passed at that parliament, almost for form sake: amongst which there was one, to reduce aliens, being made denizens, to pay strangers' customs; and another, to draw to himself the seizures and compositions of Italians' goods, for not employment, being points of profit to his coffers, whereof from the very beginning he was not forgetful: and had been more happy at the latter end, if his early providence, which kept him from all necessity of exacting upon his people, could likewise have attempered his nature therein. He added, during parliament, to his former creations, the ennoblement or advancement in nobility of a few others; the lord Chandos of Britain, was made earl of Bath; Sir Giles Daubeney, was made lord Daubeney; and Sir Robert Willoughby, lord Brook.

The king did also with great nobleness and bounty, which virtues at that time had their turns in his nature, restore Edward Stafford, eldest son to Henry, duke of Buckingham, attainted in the time of king Richard, not only to his dignities, but to his fortunes and possessions, which were great: to which he was moved also by a kind of gratitude, for that the duke was the man that moved the first stone against the tyranny of king Richard, and indeed made the king a bridge to the crown upon his own ruins. Thus the parliament broke up.

The parliament being dissolved, the king sent forth with money to redeem the marquis Dorset, and Sir John Bourchier, whom he had left as his pledges at Paris, for money which he had borrowed, when he made his expedition for England. And thereupon he took a fit occasion to send the lord treasurer and master Bray, whom he used as counsellor, to the lord mayor of London, requiring of the city a prest of six thousand marks; but after many parleys, he could obtain but two thousand pounds; which nevertheless the king took in good part, as men use to do, that practise to borrow money when they have no need. About this time the king called unto his privy-council John Morton and Richard Fox, the one bishop of Ely, the other bishop of Exeter; vigilant men, and secret, and such as kept watch with him almost upon all men else. They had been both versed in his affairs, before he came to the crown, and were partakers of his adverse fortune. This Morton soon after, upon the death of Bourchier, he made archbishop of Canterbury. And for Fox, he made him lord keeper of his privy-seal, and afterwards advanced him by degrees, from Exeter to Bath and Wells, thence to Durham, and last to Winchester. For although the king loved to employ and advance bishops, because having rich bishoprics, they carried their reward upon themselves; yet he did use to raise them by steps, that he might not lose the profit of the first fruits, which by that course of gradation was multiplied.

At last, upon the eighteenth of January, was solemnized the so long expected and so much desired marriage, between the king and the lady Elizabeth; which day of marriage was celebrated with greater triumph and demonstrations, especially on the people's part, of joy and gladness, than the days either of his entry or coronation; which the king rather noted than liked. And it is true, that all his life-time, while the lady Elizabeth lived with him, for she died before him, he showed himself no very indulgent husband towards her, though she was beautiful, gentle, and fruitful. But his aversion towards the house of York was so predominant in him, as it found place not only in his wars and councils, but in his chamber and bed.

Towards the middle of the spring, the king, full of confidence and assurance, as a prince that had been victorious in battle, and had prevailed with his parliament in all that he desired, and had the ring of acclamations fresh in his ears, thought the rest of his reign should be but play, and the enjoying of a kingdom: yet, as a wise and watchful king, he would not neglect any thing for his safety; thinking

nevertheless to perform all things now, rather as an exercise than as a labour. So he being truly informed, that the northern parts were not only affectionate to the house of York, but particularly had been devoted to king Richard the third, thought it would be a summer well spent to visit those parts, and by his presence and application of himself to reclaim and rectify those humours. But the king, in his account of peace and calms, did much overcast his fortunes, which proved for many years together full of broken seas, tides, and tempests. For he was no sooner come to Lincoln, where he kept his Easter, but he received news, that the lord Lovel, Humphrey Stafford, and Thomas Stafford, who had formerly taken sanctuary at Colchester, were departed out of sanctuary, but to what place no man could tell: which advertisement the king despised, and continued his journey to York. At York there came fresh and more certain advertisement, that the lord Lovel was at hand with a great power of men, and that the Staffords were in arms in Worcestershire, and had made their approaches to the city of Worcester, to assail it. The king, as a prince of great and profound judgment, was not much moved with it; for that he thought it was but a rag or remnant of Bosworth-field, and had nothing in it of the main party of the house of York. But he was more doubtful of the raising of forces to resist the rebels, than of the resistance itself; for that he was in a core of people, whose affections he suspected. But the action enduring no delay, he did speedily levy and send against the lord Lovel, to the number of three thousand men, ill armed, but well assured, being taken some few out of his own train, and the rest out of the tenants and followers of such as were safe to be trusted, under the conduct of the duke of Bedford. And as his manner was to send his pardons rather before the sword than after, he gave commission to the duke to proclaim pardon to all that would come in: which the duke, upon his approach to the lord Lovel's camp, did perform. And it fell out as the king expected; the heralds were the great ordnance. For the lord Lovel, upon proclamation of pardon, mistrusting his men, fled into Lancashire, and lurking for a time with Sir Thomas Broughton, after sailed over into Flanders to the lady Margaret. And his men, forsaken of their captain, did presently submit themselves to the duke. The Staffords likewise, and their forces, hearing what had happened to the lord Lovel, in whose success their chief trust was, despaired and dispersed. The two brothers taking sanctuary at Colnham, a village near Abingdon; which place, upon view of their privilege in the king's bench, being judged no sufficient sanctuary for traitors, Humphrey was executed at Tyburn; and Thomas, as being led by his elder brother, was pardoned. So this rebellion proved but a blast, and the king having by this journey purged a little the dregs and leaven of the northern people, that were before in no good affection towards him, returned to London.

In September following, the queen was delivered of her first son, whom the king, in honour of the British race, of which himself was, named Arthur, according to the name of that ancient worthy king of the Britains, in whose acts there is truth enough to make him famous, besides that which is fabulous. The child was strong and able, though he was born in the eighth month, which the physicians do prejudge.

There followed this year, being the second of the king's reign, a strange accident of state, whereof the relations which we have are so naked, as they leave it scarce credible; not for the nature of it, for it hath fallen out often, but for the manner and circumstance of it, especially in the beginnings. Therefore we shall make our judgment upon the things themselves, as they give light one to another, and, as we can, dig truth out of the mine. The king was green in his estate; and, contrary to his own opinion and desert both, was not without much hatred throughout the realm. The root of all was the discountenancing of the house of York, which the general body of the realm still affected. This did alienate the hearts of the subjects from him daily more and more, especially when they saw, that after his marriage, and after a son born, the king did nevertheless not so much as proceed to the coronation of the queen, not vouchsafing her the honour of a matrimonial crown; for the coronation of her was not till almost two years after, when danger had taught him what to do. But much more when it was spread abroad, whether by error, or the cunning of malecontents, that the king had a purpose to put to death Edward Plantagenet closely in the Tower: whose case was so nearly paralleled with that of Edward the fourth's children, in respect of the blood, like age, and the very place of the Tower, as it did refresh and reflect upon the king a most odious resemblance, as if he would be another king Richard. And all this time it was still whispered every where, that at least one of the children of Edward the fourth was living: which bruit was cunningly fomented by such as desired innovation. Neither was the king's nature and customs greatly fit to disperse these mists, but contrariwise, he had a fashion rather to create doubts than assurance. Thus was fuel prepared for the spark: the spark, that afterwards kindled such a fire and combustion, was at the first contemptible.

There was a subtile priest called Richard Simon,* that lived in Oxford, and had to his pupil a baker's son, named Lambert Simnell, of the age of some fifteen years, a comely youth, and well favoured, not without some extraordinary dignity and grace of aspect. It came into this priest's fancy, hearing what men talked, and in hope to raise himself to some great bishopric, to cause this lad to counterfeit and personate the second son of Edward the fourth, supposed to be murdered; and afterward, for he changed his intention in the manage, the lord Edward Plantagenet, then prisoner in the Tower, and accordingly to frame him and instruct him in the part he was to play. This is that which, as was

* The priest's name was William Simonds, and the youth was the son of..... an organ-maker in Oxford, as the priest declared before the whole convocation of the clergy at Lambeth, Feb. 17, 1486. Vide Reg. Morton, f. 34 MS. Sancroft.

touched before, seemeth scarcely credible; not that a false person should be assumed to gain a kingdom, for it hath been seen in ancient and late times; nor that it should come into the mind of such an abject fellow, to enterprise so great a matter; for high conceits do sometimes come streaming into the imaginations of base persons, especially when they are drunk with news, and talk of the people. But here is that which hath no appearance: That this priest, being utterly unacquainted with the true person, according to whose pattern he should shape his counterfeit, should think it possible for him to instruct his player, either in gesture and fashions, or in recounting past matters of his life and education; or in fit answers to questions, or the like, any ways to come near the resemblance of him whom he was to represent. For this lad was not to personate one, that had been long before taken out of his cradle, or conveyed away in his infancy, known to few; but a youth, that till the age almost of ten years had been brought up in a court where infinite eyes had been upon him. For king Edward, touched with remorse of his brother the duke of Clarence's death, would not indeed restore his son, of whom we speak, to be duke of Clarence, but yet created him earl of Warwick, reviving his honour on the mother's side; and used him honourably during his time, though Richard the third afterwards confined him. So that it cannot be, but that some great person that knew particularly and familiarly Edward Plantagenet, had a hand in the business, from whom the priest might take his aim. That which is most probable, out of the precedent and subsequent acts, is, that it was the queen dowager, from whom this action had the principal source and motion. For certain it is, she was a busy negotiating woman, and in her withdrawing-chamber had the fortunate conspiracy for the king against king Richard the third been hatched: which the king knew, and remembered perhaps but too well; and was at this time extremely discontent with the king, thinking her daughter, as the king handled the matter, not advanced but depressed: and none could hold the book so well to prompt and instruct this stage-play, as she could. Nevertheless, it was not her meaning, nor no more was it the meaning of any of the better and sager sort that favoured this enterprise, and knew the secret, that this disguised idol should possess the crown; but at his peril to make way to the overthrow of the king; and that done, they had their several hopes and ways. That which doth chiefly fortify this conjecture is, that as soon as the matter brake forth in any strength, it was one of the king's first acts to cloister the queen dowager in the nunnery of Bermondsey, and to take away all her lands and estate: and this by a close council, without any legal proceeding, upon far-fetched pretences that she had delivered her two daughters out of sanctuary to king Richard, contrary to promise. Which proceeding being even at that time taxed for rigorous and undue, both in matter and manner, makes it very probable there was some greater matter against her, which the king, upon reason of policy, and to avoid envy, would not publish. It is likewise no small argument that there was some secret in it, and some suppressing of examinations, for that the priest Simon himself, after he was taken, was never brought to execution; no not so much as to public trial, as many clergymen were upon less treasons, but was only shut up close in a dungeon. Add to this, that after the earl of Lincoln, a principal person of the house of York, was slain in Stoke-field, the king opened himself to some of his council that he was sorry for the earl's death, because by him, he said, he might have known the bottom of his danger.

But to return to the narration itself: Simon did first instruct his scholar for the part of Richard, duke of York, second son to king Edward the fourth: and this was at such a time as it was voiced, that the king purposed to put to death Edward Plantagenet, prisoner in the Tower, whereat there was great murmur. But hearing soon after a general bruit that Plantagenet had escaped out of the Tower, and thereby finding him so much beloved amongst the people, and such rejoicing at his escape, the cunning priest changed his copy, and chose now Plantagenet to be the subject his pupil should personate, because he was more in the present speech and votes of the people; and it pieced better, and followed more close and handsomely, upon the bruit of Plantagenet's escape. But yet doubting that there would be too near looking, and too much perspective into his disguise, if he should show it here in England; he thought good, after the manner of scenes in stage-plays and masks, to show it afar off; and therefore sailed with his scholar into Ireland, where the affection to the house of York was most in height. The king had been a little improvident in the matters of Ireland, and had not removed officers and counsellors, and put in their places, or at least intermingled, persons of whom he stood assured, as he should have done, since he knew the strong bent of that country towards the house of York; and that it was a ticklish and unsettled state, more easy to receive distempers and mutations than England was. But trusting to the reputation of his victories and successes in England, he thought he should have time enough to extend his cares afterwards to that second kingdom.

Wherefore through this neglect, upon the coming of Simon with his pretended Plantagenet into Ireland, all things were prepared for revolt and sedition, almost as if they had been set and plotted beforehand. Simon's first address was to the lord Thomas Fitz-Gerard, earl of Kildare, and deputy of Ireland; before whose eyes he did cast such a mist, by his own insinuation, and by the carriage of his youth, that expressed a natural princely behaviour, as joined perhaps with some inward vapours of ambition and affection in the earl's own mind, left him fully possessed, that it was the true Plantagenet. The earl presently communicated the matter with some of the nobles, and others there, at the first secretly; but finding them of like affection to himself, he suffered it of purpose to vent and pass abroad; because they thought it not safe to resolve, till they had a taste of the people's inclination. But if the great ones were in forwardness, the people were in fury,

entertaining this airy body or phantasm with incredible affection; partly, out of their great devotion to the house of York; partly, out of a proud humour in the nation, to give a king to the realm of England. Neither did the party, in this heat of affection, much trouble themselves with the attainder of George, duke of Clarence; having newly learned by the king's example, that attainders do not interrupt the conveying of title to the crown. And as for the daughters of king Edward the fourth, they thought king Richard had said enough for them; and took them to be but as of the king's party, because they were in his power and at his disposing. So that with marvellous consent and applause, this counterfeit Plantagenet was brought with great solemnity to the castle of Dublin, and there saluted, served, and honoured as king; the boy becoming it well, and doing nothing that did bewray the baseness of his condition. And within a few days after he was proclaimed king in Dublin, by the name of king Edward the sixth; there being not a sword drawn in king Henry his quarrel.

The king was much moved with this unexpected accident when it came to his ears, both because it struck upon that string which ever he most feared, as also because it was stirred in such a place, where he could not with safety transfer his own person to suppress it. For partly through natural valour, and partly through an universal suspicion, not knowing whom to trust, he was ever ready to wait upon all his achievements in person. The king therefore first called his council together at the charter-house at Shine; which council was held with great secresy, but the open decrees thereof, which presently came abroad, were three.

The first was, that the queen dowager, for that she, contrary to her pact and agreement with those that had concluded with her concerning the marriage of her daughter Elizabeth with king Henry, had nevertheless delivered her daughters out of sanctuary into king Richard's hands, should be cloistered in the nunnery of Bermondsey, and forfeit all her lands and goods.

The next was, that Edward Plantagenet, then close prisoner in the Tower, should be, in the most public and notorious manner that could be devised, showed unto the people: in part to discharge the king of the envy of that opinion and bruit, how he had been put to death privily in the Tower; but chiefly to make the people see the levity and imposture of the proceedings of Ireland, and that their Plantagenet was indeed but a puppet or a counterfeit.

The third was, that there should be again proclaimed a general pardon to all that would reveal their offences, and submit themselves by a day. And that this pardon should be conceived in so ample and liberal a manner, as no high-treason, no not against the king's own person, should be excepted. Which though it might seem strange, yet was it not so to a wise king, that knew his greatest dangers were not from the least treasons, but from the greatest. These resolutions of the king and his council were immediately put in execution. And first, the queen dowager was put into the monastery of Bermondsey, and all her estates seized into the king's hands; whereat there was much wondering; that a weak woman, for the yielding to the menaces and promises of a tyrant, after such a distance of time, wherein the king had showed no displeasure nor alteration, but much more after so happy a marriage between the king and her daughter, blessed with issue male, should, upon a sudden mutability or disclosure of the king's mind, be so severely handled.

This lady was amongst the examples of great variety of fortune. She had first from a distressed suitor, and desolate widow, been taken to the marriage bed of a bachelor king, the goodliest personage of his time; and even in his reign she had endured a strange eclipse by the king's flight, and temporary depriving from the crown. She was also very happy in that she had by him fair issue; and continued his nuptial love, helping herself by some obsequious bearing and dissembling of his pleasures to the very end. She was much affectionate to her own kindred, even unto faction; which did stir great envy in the lords of the king's side, who counted her blood a disparagement to be mingled with the king's. With which lords of the king's blood joined also the king's favourite, the lord Hastings; who, notwithstanding the king's great affection to him, was thought at times, through her malice and spleen, not to be out of danger of falling. After her husband's death she was matter of tragedy, having lived to see her brother beheaded, and her two sons deposed from the crown, bastarded in their blood, and cruelly murdered. All this while nevertheless she enjoyed her liberty, state, and fortunes: but afterwards again, upon the rise of the wheel, when she had a king to her son-in-law, and was made grandmother to a grandchild, of the best sex: yet was she, upon dark and unknown reasons, and no less strange pretences, precipitated and banished the world into a nunnery; where it was almost thought dangerous to visit her, or see her; and where not long after she ended her life: but was by the king's commandment buried with the king her husband at Windsor. She was foundress of queen's college in Cambridge. For this act the king sustained great obloquy, which nevertheless, besides the reason of state, was somewhat sweetened to him by a great confiscation.

About this time also, Edward Plantagenet was upon a Sunday brought throughout all the principal streets of London, to be seen of the people. And having passed the view of the streets, was conducted to Paul's church in solemn procession, where great store of people were assembled. And it was provided also in good fashion, that divers of the nobility, and others of quality, especially of those that the king most suspected, and knew the person of Plantagenet best, had communication with the young gentleman by the way, and entertained him with speech and discourse; which did in effect mar the pageant in Ireland with the subjects here, at least with so many, as out of error, and not out of malice, might be misled. Nevertheless in Ireland, where it was too late to go back, it wrought little or no effect. But contrariwise, they turned the imposture

upon the king; and gave out that the king, to defeat the true inheritor, and to mock the world, and blind the eyes of simple men, had tricked up a boy in the likeness of Edward Plantagenet, and showed him to the people; and not sparing to profane the ceremony of a procession, the more to countenance the fable.

The general pardon likewise near the same time came forth; and the king therewithal omitted no diligence, in giving strait order for the keeping of the ports, that fugitives, malecontents, or suspected persons, might not pass over into Ireland and Flanders.

Meanwhile the rebels in Ireland had sent privy messengers both into England and into Flanders, who in both places had wrought effects of no small importance. For in England they won to their party John, earl of Lincoln, son of John de la Pole, duke of Suffolk, and of Elizabeth, king Edward the fourth's eldest sister. This earl was a man of great wit and courage, and had his thoughts highly raised by hopes and expectations for a time: for Richard the third had a resolution, out of his hatred to both his brethren, king Edward, and the duke of Clarence, and their lines, having had his hand in both their bloods, to disable their issues upon false and incompetent pretexts; the one of attainder, the other of illegitimation; and to design this gentleman, in case himself should die without children, for inheritor of the crown. Neither was this unknown to the king, who had secretly an eye upon him. But the king, having tasted the envy of the people for his imprisonment of Edward Plantagenet, was doubtful to heap up any more distastes of that kind, by the imprisonment of de la Pole also; the rather thinking it policy to conserve him as a corrival unto the other. The earl of Lincoln was induced to participate with the action of Ireland, not lightly upon the strength of the proceedings there, which was but a bubble, but upon letters from the lady Margaret of Burgundy, in whose succours and declaration for the enterprise there seemed to be a more solid foundation, both for reputation and forces. Neither did the earl refrain the business, for that he knew the pretended Plantagenet to be but an idol. But contrariwise, he was more glad it should be the false Plantagenet than the true; because the false being sure to fall away of himself, and the true to be made sure by the king, it might open and pave a fair and prepared way to his own title. With this resolution he sailed secretly into Flanders, where was a little before arrived the lord Lovel, leaving a correspondence here in England with Sir Thomas Broughton, a man of great power and dependencies in Lancashire. For before this time, when the pretended Plantagenet was first received in Ireland, secret messengers had been also sent to the lady Margaret, advertising her what was passed in Ireland, imploring succours in an enterprise, as they said, so pious and just, that God had so miraculously prospered the beginning thereof; and making offer, that all things should be guided by her will and direction, as the sovereign patroness and protectoress of the enterprise. Margaret was second sister to king Edward the fourth, and had been second wife to Charles, surnamed the Hardy, duke of Burgundy; by whom having no children of her own, she did with singular care and tenderness intend the education of Philip and Margaret, grandchildren to her former husband; which won her great love and authority among the Dutch. This princess, having the spirit of a man, and malice of a woman, abounding in treasure by the greatness of her dower and her provident government, and being childless, and without any nearer care, made it her design and enterprise, to see the majesty royal of England once again replaced in her house; and had set up king Henry as a mark, at whose overthrow all her actions should aim and shoot; insomuch as all the counsels of his succeeding troubles came chiefly out of that quiver. And she bare such a mortal hatred to the house of Lancaster, and personally to the king, as she was no ways mollified by the conjunction of the houses in her niece's marriage, but rather hated her niece, as the means of the king's ascent to the crown, and assurance therein. Wherefore with great violence of affection she embraced this overture. And upon counsel taken with the earl of Lincoln, and the lord Lovel, and some other of the party, it was resolved with all speed, the two lords, assisted with a regiment of two thousand Almains, being choice and veteran bands, under the command of Martin Swart, a valiant and experimented captain, should pass over into Ireland to the new king; hoping, that when the action should have the face of a received and settled regality, with such a second person as the earl of Lincoln, and the conjunction and reputation of foreign succours, the fame of it would imbolden and prepare all the party of the confederates and malecontents within the realm of England to give them assistance when they should come over there. And for the person of the counterfeit, it was agreed, that if all things succeeded well he should be put down, and the true Plantagenet received; wherein nevertheless the earl of Lincoln had his particular hopes. After they were come into Ireland, and that the party took courage, by seeing themselves together in a body, they grew very confident of success; conceiving and discoursing amongst themselves, that they went in upon far better cards to overthrow king Henry, than king Henry had to overthrow king Richard; and that if there were not a sword drawn against them in Ireland, it was a sign the swords in England would be soon sheathed or beaten down. And first, for a bravery upon this accession of power, they crowned their new king in the cathedral church of Dublin; who formerly had been but proclaimed only; and then sat in council, what should farther be done. At which council, though it were propounded by some, that it were the best way to establish themselves first in Ireland, and to make that the seat of the war, and to draw king Henry thither in person, by whose absence they thought there would be great alterations and commotions in England; yet because the kingdom there was poor, and they should not be able to keep their army together, nor pay their German soldiers, and for that also the sway of the Irishmen, and generally of the men of war, which,

as in such cases of popular tumults is usual, did in effect govern their leaders, was eager, and in affection to make their fortunes upon England; it was concluded with all possible speed to transport their forces into England. The king, in the mean time, who at the first when he heard what was done in Ireland, though it troubled him, yet thought he should be well enough able to scatter the Irish as a flight of birds, and rattle away this swarm of bees with their king; when he heard afterwards that the earl of Lincoln was embarked in the action, and that the lady Margaret was declared for it; he apprehended the danger in a true degree as it was, and saw plainly that his kingdom must again be put to the stake, and that he must fight for it. And first he did conceive, before he understood of the earl of Lincoln's sailing into Ireland out of Flanders, that he should be assailed both upon the east parts of the kingdom of England, by some impression from Flanders, and upon the north-west out of Ireland. And therefore having ordered musters to be made in both parts, and having provisionally designed two generals, Jasper, earl of Bedford, and John, earl of Oxford, meaning himself also to go in person where the affairs should most require it, and nevertheless not expecting any actual invasion at that time, the winter being far on, he took his journey himself towards Suffolk and Norfolk, for the confirming of those parts. And being come to St. Edmond's-Bury, he understood that Thomas marquis Dorset, who had been one of the pledges in France, was hasting towards him, to purge himself of some accusations which had been made against him. But the king, though he kept an ear for him, yet was the time so doubtful, that he sent the earl of Oxford to meet him, and forthwith to carry him to the Tower; with a fair message nevertheless, that he should bear that disgrace with patience, for that the king meant not his hurt, but only to preserve him from doing hurt, either to the king's service, or to himself; and that the king should always be able, when he had cleared himself, to make him reparation.

From St. Edmond's-Bury he went to Norwich, where he kept his Christmas. And from thence he went, in a manner of pilgrimage, to Walsingham, where he visited our lady's church famous for miracles, and made his prayers and vows for help and deliverance. And from thence he returned by Cambridge to London. Not long after, the rebels, with their king, under the leading of the earl of Lincoln, the earl of Kildare, the lord Lovel, and colonel Swart, landed at Fouldrey in Lancashire; whither there repaired to them Sir Thomas Broughton, with some small company of English. The king, by that time, knowing now the storm would not divide, but fall in one place, had levied forces in good number; and in person, taking with him his two designed generals, the duke of Bedford, and the earl of Oxford, was come on his way towards them as far as Coventry, whence he sent forth a troop of light horsemen for discovery, and to intercept some stragglers of the enemies, by whom he might the better understand the particulars of their progress and purposes, which was accordingly done; though the king otherwise was not without intelligence from espials in the camp.

The rebels took their way toward York, without spoiling the country, or any act of hostility, the better to put themselves into favour of the people, and to personate their king; who, no doubt, out of a princely feeling, was sparing and compassionate towards his subjects: but their snow-ball did not gather as it went. For the people came not in to them; neither did any rise or declare themselves in other parts of the kingdom for them; which was caused partly by the good taste that the king had given his people of his government, joined with the reputation of his felicity; and partly for that it was on odious thing to the people of England, to have a king brought in to them upon the shoulders of Irish and Dutch, of which their army was in substance compounded. Neither was it a thing done with any great judgment on the party of the rebels, for them to take their way towards York: considering that howsoever those parts had formerly been a nursery of their friends; yet it was there, where the lord Lovel had so lately disbanded, and where the king's presence had a little before qualified discontents. The earl of Lincoln, deceived of his hopes of the countries' concourse unto him, in which case he would have temporized; and seeing the business past retract, resolved to make on where the king was, and to give him battle; and thereupon marched towards Newark, thinking to have surprised the town. But the king was somewhat before this time come to Nottingham, where he called a council of war, at which was consulted whether it were best to protract time, or speedily to set upon the rebels. In which council the king himself, whose continual vigilancy did suck in sometimes causeless suspicions, which few else knew, inclined to the accelerating a battle; but this was presently put out of doubt, by the great aids that came in to him in the instant of this consultation, partly upon missives, and partly voluntaries, from many parts of the kingdom.

The principal persons that came then to the king's aid, were the earl of Shrewsbury, and the lord Strange, of the nobility; and of knights and gentlemen, to the number of at least threescore and ten persons, with their companies, making in the whole, at the least, six thousand fighting men, besides the forces that were with the king before. Whereupon the king, finding his army so bravely reinforced, and a great alacrity in all his men to fight, was confirmed in his former resolution, and marched speedily, so as he put himself between the enemies' camp and Newark; being loth their army should get the commodity of that town. The earl, nothing dismayed, came forwards that day unto a little village called Stoke, and there encamped that night, upon the brow or hanging of a hill. The king the next day presented him battle upon the plain, the fields there being open and champain. The earl courageously came down and joined battle with him. Concerning which battle the relations that are left unto us are so naked and negligent, though it be an action of a recent memory, as they rather declare the success of the day, than the manner of the fight. They say

that the king divided his army into three battails; whereof the vant-guard only, well strengthened with wings, came to fight: that the fight was fierce and obstinate, and lasted three hours, before the victory inclined either way; save that judgment might be made by that the king's vant-guard of itself maintained fight against the whole power of the enemies, the other two battails remained out of action, what the success was like to be in the end: that Martin Swart with his Germans performed bravely, and so did those few English that were on that side; neither did the Irish fail in courage or fierceness; but being almost naked men, only armed with darts and skeins, it was rather an execution than a fight upon them; insomuch as the furious slaughter of them was a great discouragement and appalment to the rest: that there died upon the place all the chieftains; that is, the earl of Lincoln, the earl of Kildare, Francis lord Lovel, Martin Swart, and Sir Thomas Broughton; all making good the fight, without any ground given. Only of the lord Lovel there went a report, that he fled, and swam over Trent on horseback, but could not recover the farther side, by reason of the steepness of the bank, and so was drowned in the river. But another report leaves him not there, but that he lived long after in a cave or vault. The number that was slain in the field, was of the enemies' part four thousand at the least; and of the king's part, one half of his vant-guard, besides many hurt, but none of name. There were taken prisoners, amongst others, the counterfeit Plantagenet, now Lambert Simnell again, and the crafty priest his tutor. For Lambert, the king would not take his life, both out of magnanimity, taking him but as an image of wax, that others had tempered and molded; and likewise out of wisdom, thinking that if he suffered death, he would be forgotten too soon; but being kept alive, he would be a continual spectacle, and a kind of remedy against the like enchantments of people in time to come. For which cause he was taken into service in his court to a base office in his kitchen; so that, in a kind of *mattacina* of human fortune, he turned a broach, that had worn a crown; whereas fortune commonly doth not bring in a comedy or farce after a tragedy. And afterwards he was preferred to be one of the king's falconers. As to the priest, he was committed close prisoner, and heard of no more; the king loving to seal up his own dangers.

After the battle the king went to Lincoln, where he caused supplications and thanksgivings to be made for his deliverance and victory. And that his devotions might go round in circle, he sent his banner to be offered to our lady of Walsingham, where before he made his vows. And thus delivered of his so strange an engine, and new invention of fortune, he returned to his former confidence of mind; thinking now, that all his misfortunes had come at once. But it fell out unto him according to the speech of the common people in the beginning of his reign, that said, It was a token he should reign in labour, because his reign began with a sickness of sweat. But howsoever the king thought himself now in a haven, yet such was his wisdom, as his confidence did seldom darken his foresight, especially in things near hand. And therefore, awakened by so fresh and unexpected dangers, he entered into due consideration, as well how to weed out the partakers of the former rebellion, as to kill the seeds of the like in time to come: and withal to take away all shelters and harbours for discontented persons, where they might hatch and foster rebellions, which afterwards might gather strength and motion. And first, he did yet again make a progress from Lincoln to the northern parts, though it were indeed rather an itinerary circuit of justice than a progress. For all along as he went, with much severity and strict inquisition, partly by martial law, and partly by commission, were punished the adherents and aiders of the late rebels. Not all by death, for the field had drawn much blood, but by fines and ransoms, which spared life, and raised treasure. Amongst other crimes of this nature, there was diligent inquiry made of such as had raised and dispersed a bruit and rumour, a little before the field fought, "that the rebels had the day; and that the king's army was overthrown, and the king fled." Whereby it was supposed that many succours, which otherwise would have come unto the king, were cunningly put off and kept back. Which charge and accusation, though it had some ground, yet it was industriously embraced and put on by divers, who having been in themselves not affected to the king's part, nor forward to come to his aid, were glad to apprehend this colour to cover their neglect and coldness, under the pretence of such discouragements. Which cunning nevertheless the king would not understand, though he lodged it, and noted it in some particulars, as his manner was.

But for the extirpating of the roots and causes of the like commotions in time to come, the king began to find where his shoe did wring him, and that it was his depressing the house of York that did rankle and fester the affections of his people. And therefore being now too wise to disdain perils any longer, and willing to give some contentment in that kind, at least in ceremony, he resolved at last to proceed to the coronation of his queen. And therefore at his coming to London, where he entered in state, and in a kind of triumph, and celebrated his victory with two days of devotion, for the first day he repaired to Paul's and had the hymn of "Te Deum" sung, and the morrow after he went in procession, and heard the sermon at the cross, the queen was with great solemnity crowned at Westminster, the five and twentieth of November, in the third year of his reign, which was about two years after the marriage; like an old christening, that had stayed long for godfathers. Which strange and unusual distance of time made it subject to every man's note, that it was an act against his stomach, and put upon him by necessity and reason of state. Soon after, to show that it was now fair weather again, and that the imprisonment of Thomas, marquis Dorset, was rather upon suspicion of the time, than of the man, he, the said marquis, was set at liberty, without examination or other circumstance. At that time also the king sent an ambassador unto pope Innocent, signifying

unto him this his marriage; and that now, like another Æneas, he had passed through the floods of his former troubles and travels, and was arrived unto a safe haven: and thanking his Holiness that he had honoured the celebration of his marriage with the presence of his ambassador; and offering both his person and the forces of his kingdom, upon all occasions, to do him service.

The ambassador making his oration to the pope, in the presence of the cardinals, did so magnify the king and queen, as was enough to glut the hearers. But then he did again so extol and deify the pope, as made all that he had said in praise of his master and mistress seem temperate and passable. But he was very honourably entertained, and extremely much made on by the pope: who knowing himself to be lazy and unprofitable to the christian world, was wonderfully glad to hear that there were such echoes of him sounding in remote parts. He obtained also of the pope a very just and honourable bull, qualifying the privileges of sanctuary, wherewith the king had been extremely galled, in three points.

The first, that if any sanctuary man did by night, or otherwise, get out of sanctuary privily, and commit mischief and trespass, and then come in again, he should lose the benefit of sanctuary for ever after. The second, that howsoever the person of the sanctuary man was protected from his creditors, yet his goods out of sanctuary should not. The third, that if any took sanctuary for case of treason, the king might appoint him keepers to look to him in sanctuary.

The king also, for the better securing of his estate against mutinous and malecontented subjects, whereof he saw the realm was full, who might have their refuge into Scotland, which was not under key, as the ports were; for that cause, rather than for any doubt of hostility from those parts, before his coming to London, when he was at Newcastle, had sent a solemn ambassage unto James the third, king of Scotland, to treat and conclude a peace with him. The ambassadors were, Richard Fox, bishop of Exeter, and Sir Richard Edgcombe, comptroller of the king's house, who were honourably received and entertained there. But the king of Scotland labouring of the same disease that king Henry did, though more mortal, as afterwards appeared, that is, discontented subjects, apt to rise and raise tumult, although in his own affection he did much desire to make a peace with the king; yet finding his nobles averse, and not daring to displease them, concluded only a truce for seven years; giving nevertheless promise in private, that it should be renewed from time to time during the two kings' lives.

Hitherto the king had been exercised in settling his affairs at home. But about this time brake forth an occasion that drew him to look abroad, and to hearken to foreign business. Charles the eighth the French king, by the virtue and good fortune of his two immediate predecessors, Charles the seventh his grandfather, and Lewis the eleventh his father, received the kingdom of France in more flourishing and spread estate than it had been of many years before: being redintegrate in those principal members, which anciently had been portions of the crown of France, and were afterward dissevered, so as they remained only in homage, and not in sovereignty, being governed by absolute princes of their own, Anjou, Normandy, Provence, and Burgundy. There remained only Britain to be reunited, and so the monarchy of France to be reduced to the ancient terms and bounds.

King Charles was not a little inflamed with an ambition to re-purchase and re-annex that duchy; which his ambition was a wise and well-weighed ambition; not like unto the ambitions of his succeeding enterprises of Italy. For at that time, being newly come to the crown, he was somewhat guided by his father's counsels, counsels not counsellors, for his father was his own council, and had few able men about him. And that king, he knew well, had ever distasted the designs of Italy, and in particular had an eye upon Britain. There were many circumstances that did feed the ambition of Charles with pregnant and apparent hopes of success: the duke of Britain old, and entered into a lethargy, and served with mercenary counsellors, father of two only daughters, the one sickly and not like to continue; king Charles himself in the flower of his age, and the subjects of France at that time well trained for war, both for leaders and soldiers; men of service being not yet worn out since the wars of Lewis against Burgundy. He found himself also in peace with all his neighbour princes. As for those that might oppose to his enterprise, Maximilian king of the Romans, his rival in the same desires, (as well for the duchy, as the daughter,) feeble in means; and king Henry of England, as well somewhat obnoxious to him for his favours and benefits, as busied in his particular troubles at home. There was also a fair and specious occasion offered him to hide his ambition, and to justify his warring upon Britain; for that the duke had received and succoured Lewis duke of Orleans, and other of the French nobility, which had taken arms against their king. Wherefore king Charles, being resolved upon that war, knew well he could not receive any opposition so potent, as if king Henry should, either upon policy of state, in preventing the growing greatness of France, or upon gratitude unto the duke of Britain for his former favours in the time of his distress, espouse that quarrel, and declare himself in aid of the duke. Therefore he no sooner heard that king Henry was settled by his victory, but forthwith he sent ambassadors unto him to pray his assistance, or at least that he would stand neutral. Which ambassadors found the king at Leicester, and delivered their ambassage to this effect: They first imparted unto the king the success that their master had had a little before against Maximilian, in recovery of certain towns from him: which was done in a kind of privacy, and inwardness towards the king; as if the French king did not esteem him for an outward or formal confederate, but as one that had part in his affections and fortunes, and with whom he took pleasure to communicate his business. After this compliment, and some gratulation for the

king's victory, they fell to their errand; declaring to the king, That their master was enforced to enter into a just and necessary war with the duke of Britain, for that he had received and succoured those that were traitors and declared enemies unto his person and state. That they were no mean, distressed, and calamitous persons that fled to him for refuge, but of so great quality, as it was apparent that they came not thither to protect their own fortune, but to infest and invade his; the head of them being the duke of Orleans, the first prince of the blood, and the second person of France. That therefore, rightly to understand it, it was rather on their master's part a defensive war than an offensive; as that that could not be omitted or forborne, if he tendered the conservation of his own estate; and that it was not the first blow that made the war invasive, for that no wise prince would stay for, but the first provocation, or at least the first preparation; nay, that this war was rather a suppression of rebels, than a war with a just enemy; where the case is, that his subjects, traitors, are received by the duke of Britain his homager. That king Henry knew well what went upon it in example, if neighbour princes should patronize and comfort rebels against the law of nations and of leagues. Nevertheless that their master was not ignorant, that the king had been beholden to the duke of Britain in his adversity; as on the other side, they knew he would not forget also the readiness of their king, in aiding him when the duke of Britain, or his mercenary counsellors, failed him, and would have betrayed him; and that there was a great difference between the courtesies received from their master, and the duke of Britain: for that the duke's might have ends of utility and bargain; whereas their master's could not have proceeded but out of entire affection; for that, if it had been measured by a politic line, it had been better for his affairs, that a tyrant should have reigned in England, troubled and hated, than such a prince, whose virtues could not fail to make him great and potent, whensoever he was come to be master of his affairs. But howsoever it stood for the point of obligation which the king might owe to the duke of Britain, yet their master was well assured, it would not divert king Henry of England from doing that that was just, nor ever embark him in so ill-grounded a quarrel. Therefore, since this war, which their master was now to make, was but to deliver himself from imminent dangers, their king hoped the king would show the like affection to the conservation of their master's estate, as their master had, when time was, showed to the king's acquisition of his kingdom. At the least, that according to the inclination which the king had ever professed of peace, he would look on, and stand neutral; for that their master could not with reason press him to undertake part in the war, being so newly settled and recovered from intestine seditions. But touching the mystery of re-annexing of the duchy of Britain to the crown of France, either by war, or by marriage with the daughter of Britain, the ambassadors bare aloof from it as from a rock, knowing that it made most against them. And therefore by all means declined any mention thereof, but contrariwise interlaced, in their conference with the king, the assured purpose of their master to match with the daughter of Maximilian; and entertained the king also with some wandering discourses of their king's purpose, to recover by arms his right to the kingdom of Naples, by an expedition in person; all to remove the king from all jealousy of any design in these hither parts upon Britain, otherwise than for quenching of the fire which he feared might be kindled in his own estate.

The king, after advice taken with his council, made answer to the ambassadors: and first returned their compliment, showing he was right glad of the French king's reception of those towns from Maximilian. Then he familiarly related some particular passages of his own adventures and victory passed. As to the business of Britain, the king answered in few words; that the French king, and the duke of Britain, were the two persons to whom he was most obliged of all men; and that he should think himself very unhappy if things should go so between them, as he should not be able to acquit himself in gratitude towards them both; and that there was no means for him as a christian king, and a common friend to them, to satisfy all obligations both to God and man, but to offer himself for a mediator of an accord and peace between them; by which course he doubted not but their king's estate, and honour both, would be preserved with more safety and less envy than by a war; and that he would spare no costs or pains, no, if it were to go on pilgrimage, for so good an effect; and concluded, that in this great affair, which he took so much to heart, he would express himself more fully by an ambassage, which he would speedily despatch unto the French king for that purpose. And in this sort the French ambassadors were dismissed: the king avoiding to understand any thing touching the re-annexing of Britain, as the ambassadors had avoided to mention it; save that he gave a little touch of it in the word *envy*. And so it was, that the king was neither so shallow, nor so ill advertised, as not to perceive the intention of the French for the investing himself of Britain. But first, he was utterly unwilling, howsoever he gave out, to enter into war with France. A fame of a war he liked well, but not an achievement; for the one he thought would make him richer, and the other poorer; and he was possessed with many secret fears touching his own people, which he was therefore loth to arm, and put weapons into their hands. Yet notwithstanding, as a prudent and courageous prince, he was not so averse from a war, but that he was resolved to choose it, rather than to have Britain carried by France, being so great and opulent a duchy, and situate so opportunely to annoy England, either for coast or trade. But the king's hopes were, that partly by negligence, commonly imputed to the French, especially in the court of a young king, and partly by the native power of Britain itself, which was not small; but chiefly in respect of the great party that the duke of Orleans had in the kingdom of France,

and thereby means to stir up civil troubles, to divert the French king from the enterprise of Britain. And lastly, in regard of the power of Maximilian, who was corrival to the French king in that pursuit, the enterprise would either bow to a peace, or break in itself. In all which the king measured and valued things amiss, as afterwards appeared. He sent therefore forthwith to the French king Christopher Urswick, his chaplain, a person by him much trusted and employed: choosing him the rather, because he was a churchman, as best sorting with an ambassy of pacification: and giving him also a commission, that if the French king consented to treat, he should thence repair to the duke of Britain, and ripen the treaty on both parts. Urswick made declaration to the French king, much to the purpose of the king's answer to the French ambassador's here, instilling also tenderly some overture of receiving to grace the duke of Orleans, and some taste of conditions of accord. But the French king on the other side proceeded not sincerely, but with a great deal of art and dissimulation in this treaty; having for his end, to gain time, and so put off the English succours under hope of peace, till he had got good footing in Britain by force of arms. Wherefore he answered the ambassador, that he would put himself into the king's hands, and make him arbiter of the peace; and willingly consented, that the ambassador should straightways pass into Britain, to signify this his consent, and to know the duke's mind likewise; well foreseeing that the duke of Orleans, by whom the duke of Britain was wholly led, taking himself to be upon terms irreconcilable with him, would admit of no treaty of peace. Whereby he should in one, both generally abroad veil over his ambition, and win the reputation of just and moderate proceedings: and should withal endear himself in the affections of the king of England, as one that had committed all to his will; nay, and which was yet more fine, make faith in him, that although he went on with the war, yet it should be but with the sword in his hand, to bend the stiffness of the other party to accept of peace; and so the king should take no umbrage of his arming and prosecution; but the treaty to be kept on foot till the very last instant, till he were master of the field.

Which grounds being by the French king wisely laid, all things fell out as he expected. For when the English ambassador came to the court of Britain, the duke was then scarcely perfect in his memory, and all things were directed by the duke of Orleans, who gave audience to the chaplain Urswick, and upon his ambassage delivered made answer in somewhat high terms: That the duke of Britain having been an host, and a kind of parent or foster-father to the king, in his tenderness of age and weakness of fortune, did look for at this time from king Henry, the renowned king of England, rather brave troops for his succours, than a vain treaty of peace. And if the king could forget the good offices of the duke done unto him aforetime; yet, he knew well, he would in his wisdom consider of the future, how much it imported his own safety and reputation, both in foreign parts, and with his own people, not to suffer Britain, the old confederates of England, to be swallowed up by France, and so many good ports and strong towns upon the coast be in the command of so potent a neighbour king, and so ancient an enemy. And therefore humbly desired the king to think of this business as his own: and therewith brake off, and denied any farther conference for treaty.

Urswick returned first to the French king, and related to him what had passed. Who finding things to sort to his desire, took hold of them, and said: That the ambassador might perceive now that which he for his part partly imagined before. That considering in what hands the duke of Britain was, there would be no peace but by a mixed treaty of force and persuasion: and therefore he would go on with the one, and desired the king not to desist from the other. But for his own part, he did faithfully promise to be still in the king's power, to rule him in the matter of peace. This was accordingly represented unto the king by Urswick at his return, and in such a fashion, as if the treaty were in no sort desperate, but rather stayed for a better hour, till the hammer had wrought and beat the party of Britain more pliant. Whereupon there passed continually packets and despatches between the two kings, from the one out of desire, and the other out of dissimulation, about the negotiation of peace. The French king mean while invaded Britain with great forces, and distressed the city of Nantz with a strait siege, and, as one, who though he had no great judgment, yet had that, that he could dissemble at home, the more he did urge the prosecution of the war, the more he did, at the same time, urge the solicitation of the peace. Insomuch as during the siege of Nantz, after many letters and particular messages, the better to maintain his dissimulation, and to refresh the treaty, he sent Bernard D'Aubigney, a person of good quality, to the king, earnestly to desire him to make an end of the business howsoever.

The king was no less ready to revive and quicken the treaty; and thereupon sent three commissioners, the abbot of Abingdon, Sir Richard Tunstal, and chaplain Urswick formerly employed, to do their utmost endeavours to manage the treaty roundly and strongly.

About this time the lord Woodvile, uncle to the queen, a valiant gentleman and desirous of honour, sued to the king that he might raise some power of voluntaries underhand, and without licence or passport, (wherein the king might any ways appear,) go to the aid of the duke of Britain. The king denied his request, or at least seemed so to do, and laid strait commandment upon him, that he should not stir, for that the king thought his honour would suffer therein, during a treaty, to better a party. Nevertheless this lord, either being unruly, or out of conceit that the king would not inwardly dislike that, which he would not openly avow, sailed directly over into the isle of Wight, whereof he was governor, and levied a fair troop of four hundred men, and with them passed over into Britain, and joined himself with the duke's forces. The

news whereof, when it came to the French court, put divers young bloods into such a fury, as the English ambassadors were not without peril to be outraged. But the French king, both to preserve the privilege of ambassadors, and being conscious to himself, that in the business of peace he himself was the greater dissembler of the two, forbad all injuries of fact or word against their persons or followers. And presently came an agent from the king, to purge himself touching the lord Woodvile's going over; using for a principal argument, to demonstrate that it was without his privity, for that the troops were so small, as neither had the face of a succour by authority, nor could much advance the Britain affairs. To which message although the French king gave no full credit, yet he made fair weather with the king, and seemed satisfied. Soon after the English ambassadors returned, having two of them been likewise with the duke of Britain, and found things in no other terms than they were before. Upon their return they informed the king of the state of affairs, and how far the French king was from any true meaning of peace; and therefore he was now to advise of some other course; neither was the king himself led all this while with credulity merely, as was generally supposed; but his error was not so much facility of belief, as an ill measuring of the forces of the other party.

For, as was partly touched before, the king had cast the business thus with himself. He took it for granted in his own judgment, that the war of Britain, in respect of the strength of the towns and of the party, could not speedily come to a period. For he conceived, that the counsels of a war, that was undertaken by the French king, then childless, against an heir apparent of France, would be very faint and slow; and, besides, that it was not possible, but that the state of France should be embroiled with some troubles and alterations in favour of the duke of Orleans. He conceived likewise, that Maximilian king of the Romans was a prince warlike and potent; who, he made account, would give succours to the Britains roundly. So then judging it would be a work of time, he laid his plot, how he might best make use of that time for his own affairs. Wherein first he thought to make his vantage upon his parliament; knowing that they being affectionate unto the quarrel of Britain, would give treasure largely: which treasure, as a noise of war would draw forth, so a peace succeeding might coffer up. And because he knew his people were hot upon the business, he chose rather to seem to be deceived, and lulled asleep by the French, than to be backward in himself; considering his subjects were not so fully capable of the reasons of state, which made him hold back. Wherefore to all these purposes he saw no other expedient, than to set and keep on foot a continual treaty of peace, laying it down, and taking it up again, as the occurrence required. Besides, he had in consideration the point of honour, in bearing the blessed person of a pacificator. He thought likewise to make use of the envy the French king met with, by occasion of this war of Britain, in strengthening himself with new alliances; as namely, that of Ferdinando of Spain, with whom he had ever a consent even in nature and customs; and likewise with Maximilian, who was particularly interested. So that in substance he promised himself money, honour, friends, and peace in the end. But those things were too fine to be fortunate and succeed in all parts; for that great affairs are commonly too rough and stubborn to be wrought upon by the finer edges or points of wit. The king was likewise deceived in his two main grounds. For although he had reason to conceive that the council of France would be wary to put the king into a war against the heir apparent of France; yet he did not consider that Charles was not guided by any of the principal of the blood or nobility, but by mean men, who would make it their master-piece of credit and favour, to give venturous counsels, which no great or wise man durst or would. And for Maximilian, he was thought then a greater matter than he was; his unstable and necessitous courses being not then known.

After consultation with the ambassadors, who brought him no other news than he expected before, though he would not seem to know it till then, he presently summoned his parliament, and in open parliament propounded the cause of Britain to both houses, by his chancellor Morton archbishop of Canterbury, who spake to this effect.

"My lords and masters, the king's Grace, our sovereign lord, hath commanded me to declare unto you the causes that have moved him at this time to summon this his parliament; which I shall do in few words, craving pardon of his Grace, and you all, if I perform it not as I would.

"His Grace doth first of all let you know, that he retaineth in thankful memory the love and loyalty showed to him by you, at your last meeting, in establishment of his royalty; freeing and discharging of his partakers, and confiscation of his traitors and rebels; more than which could not come from subjects to their sovereign, in one action. This he taketh so well at your hands, as he hath made it a resolution to himself, to communicate with so loving and well approved subjects, in all affairs that are of public nature, at home or abroad.

"Two therefore are the causes of your present assembling: the one, a foreign business; the other, matter of government at home.

"The French king, as no doubt ye have heard, maketh at this present hot war upon the duke of Britain. His army is now before Nantz, and holdeth it straitly besieged, being the principal city, if not in ceremony and pre-eminence, yet in strength and wealth, of that duchy. Ye may guess at his hopes, by his attempting of the hardest part of the war first. The cause of this war he knoweth best. He allegeth the entertaining and succouring of the duke of Orleans, and some other French lords, whom the king taketh for his enemies. Others divine of other matters. Both parts have, by their ambassadors, divers times prayed the king's aids; the French king aids or neutrality; the Britains aids simply: for so their case requireth. The king, as a christian prince, and blessed son of the holy church, hath offered himself, as a mediator, to treat of peace be-

tween them. The French king yielded to treat, but will not stay the prosecution of the war. The Britains, that desire peace most, hearken to it least; not upon confidence or stiffness, but upon distrust of true meaning, seeing the war goes on. So as the king, after as much pains and care to effect a peace, as ever he took in any business, not being able to remove the prosecution on the one side, nor the distrust on the other, caused by that prosecution, hath let fall the treaty; not repenting of it, but despairing of it now, as not likely to succeed. Therefore by this narrative you now understand the state of the question, whereupon the king prayeth your advice; which is no other, but whether he shall enter into an auxiliary and defensive war for the Britains against France?

"And the better to open your understandings in this affair, the king hath commanded me to say somewhat to you from him, of the persons that do intervene in this business; and somewhat of the consequence thereof, as it hath relation to this kingdom, and somewhat of the example of it in general: making nevertheless no conclusion or judgment of any point, until his Grace hath received your faithful and politic advices.

"First, for the king our sovereign himself, who is the principal person you are to eye in this business; his Grace doth profess, that he truly and constantly desireth to reign in peace. But his Grace saith, he will neither buy peace with dishonour, nor take it up at interest of danger to ensue; but shall think it a good change, if it please God to change the inward troubles and seditions, wherewith he hath been hitherto exercised, into an honourable foreign war. And for the other two persons in this action, the French king and the duke of Britain, his Grace doth declare unto you, that they be the men unto whom he is of all other friends and allies most bounden: the one having held over him his hand of protection from the tyrant; the other having reached forth unto him his hand of help for the recovery of his kingdom. So that his affection toward them in his natural person is upon equal terms. And whereas you may have heard, that his Grace was enforced to fly out of Britain into France, for doubts of being betrayed: his Grace would not in any sort have that reflect upon the duke of Britain, in defacement of his former benefits; for that he is throughly informed, that it was but the practice of some corrupt persons about him, during the time of his sickness, altogether without his consent or privity.

"But howsoever these things do interest his Grace in this particular, yet he knoweth well, that the higher bond that tieth him to procure by all means the safety and welfare of his loving subjects, doth disinterest him of these obligations of gratitude, otherwise than thus; that if his Grace be forced to make a war, he do it without passion or ambition.

"For the consequence of this action towards this kingdom, it is much as the French king's intention is. For if it be no more, but to range his subjects to reason, who bear themselves stout upon the strength of the duke of Britain, it is nothing to us. But if it be in the French king's purpose, or if it should not be in his purpose, yet if it shall follow all one as if it were sought, that the French king shall make a province of Britain, and join it to the crown of France; then it is worthy the consideration, how this may import England, as well in the increasement of the greatness of France, by the addition of such a country, that stretcheth his boughs unto our seas, as in depriving this nation, and leaving it naked of so firm and assured confederates as the Britains have always been. For then it will come to pass, that whereas not long since this realm was mighty upon the continent, first in territory, and after in alliance, in respect of Burgundy and Britain, which were confederates indeed, but dependent confederates; now the one being already cast, partly into the greatness of France; and partly into that of Austria, the other is like wholly to be cast into the greatness of France; and this island shall remain confined in effect within the salt waters, and girt about with the coast countries of two mighty monarchs.

"For the example, it resteth likewise upon the same question, upon the French king's intent. For if Britain be carried and swallowed up by France, as the world abroad, apt to impute and construe the actions of princes to ambition, conceive it will; then it is an example very dangerous and universal, that the lesser neighbour state should be devoured of the greater. For this may be the case of Scotland towards England; of Portugal towards Spain; of the smaller estates of Italy towards the greater; and so of Germany; or as if some of you of the commons might not live and dwell safely besides some of these great lords. And the bringing in of this example will be chiefly laid to the king's charge, as to him that was most interested, and most able to forbid it. But then on the other side, there is so fair a pretext on the French king's part, and yet pretext is never wanting to power, in regard the danger imminent to his own estate is such, as may make this enterprise seem rather a work of necessity than of ambition, as doth in reason correct the danger of the example. For that the example of that which is done in a man's own defence, cannot be dangerous; because it is in another's power to avoid it. But in all this business, the king remits himself to your grave and mature advice, whereupon he purposeth to rely."

This was the effect of the lord chancellor's speech touching the cause of Britain; for the king had commanded him to carry it so, as to affect the parliament towards the business; but without engaging the king in any express declaration.

The chancellor went on:

"For that which may concern the government at home, the king had commanded me to say unto you; that he thinketh there was never any king, for the small time that he hath reigned, had greater and juster cause of the two contrary passions of joy and sorrow, than his Grace hath. Joy, in respect of the rare and visible favours of Almighty God, in girding the imperial sword upon his side, and assisting the same his sword against all his enemies; and likewise in blessing him with so many good and loving

servants and subjects which have never failed to give him faithful counsel, ready obedience, and courageous defence. Sorrow, for that it hath not pleased God to suffer him to sheath his sword, as he greatly desired, otherwise than for administration of justice, but that he hath been forced to draw it so oft, to cut off traitorous and disloyal subjects, whom, it seems, God hath left, a few amongst many good, as the Canaanites amongst the people of Israel, to be thorns in their sides, to tempt and try them; though the end hath been always, God's name be blessed therefore, that the destruction hath fallen upon their own heads.

"Wherefore his Grace saith; That he seeth that it is not the blood spilt in the field that will save the blood in the city: nor the marshal's sword that will set this kingdom in perfect peace: but that the true way is, to stop the seeds of sedition and rebellion in their beginnings; and for that purpose to devise, confirm, and quicken good and wholesome laws against riots, and unlawful assemblies of people, and all combinations and confederacies of them, by liveries, tokens, and other badges of factious dependence; that the peace of the land may by these ordinances, as by bars of iron, be soundly bound in and strengthened, and all force, both in court, country, and private houses, be suppressed. The care hereof, which so much concerneth yourselves, and which the nature of the times doth instantly call for, his Grace commends to your wisdoms.

"And because it is the king's desire, that this peace, wherein he hopeth to govern and maintain you, do not bear only unto you leaves, for you to sit under the shade of them in safety; but also should bear you fruit of riches, wealth, and plenty: therefore his Grace prays you to take into consideration matter of trade, as also the manufactures of the kingdom, and to repress the bastard and barren employment of moneys to usury and unlawful exchanges; that they may be, as their natural use is, turned upon commerce, and lawful and royal trading. And likewise that our people be set on work in arts and handicrafts; that the realm may subsist more of itself; that idleness be avoided, and the draining out of our treasure for foreign manufactures stopped. But you are not to rest here only, but to provide farther, that whatsoever merchandise shall be brought in from beyond the seas, may be employed upon the commodities of this land; whereby the kingdom's stock of treasure may be sure to be kept from being diminished by any over-trading of the foreigner.

"And lastly, because the king is well assured, that you would not have him poor, that wishes you rich; he doubteth not but that you will have care, as well to maintain his revenues of customs and all other natures, as also to supply him with your loving aids, if the case shall so require. The rather, for that you know the king is a good husband, and but a steward in effect for the public; and that what comes from you, is but as moisture drawn from the earth, which gathers into a cloud, and falls back upon the earth again. And you know well, how the kingdoms about you grow more and more in greatness, and the times are stirring; and therefore not fit to find the king with an empty purse. More I have not to say to you; and wish, that what hath been said, had been better expressed: but that your wisdoms and good affections will supply. God bless your doings."

It was no hard matter to dispose and affect the parliament in this business; as well in respect of the emulation between the nations, and the envy at the late growth of the French monarchy; as in regard of the danger to suffer the French to make their approaches upon England, by obtaining so goodly a maritime province, full of sea-towns and havens, that might do mischief to the English, either by invasion, or by interruption of traffic. The parliament was also moved with the point of oppression; for although the French seemed to speak reason, yet arguments are ever with multitudes too weak for suspicions. Wherefore they did advise the king roundly to embrace the Britons' quarrel, and to send them speedy aids; and with much alacrity and forwardness granted to the king a great rate of subsidy, in contemplation of these aids. But the king, both to keep a decency towards the French king, to whom he profest himself to be obliged, and indeed desirous rather to show war than to make it; sent new solemn ambassadors to intimate unto him the decree of his estates, and to iterate his motion, that the French would desist from hostility; or if war must follow, to desire him to take it in good part, if at the motion of his people, who were sensible of the cause of the Britons as their ancient friends and confederates, he did send them succours; with protestation nevertheless, that, to save all treaties and laws of friendship, he had limited his forces, to proceed in aid of the Britons, but in no wise to war upon the French, otherwise than as they maintained the possession of Britain. But before this formal ambassage arrived, the party of the duke had received a great blow, and grew to manifest declaration. For near the town of St. Alban in Britain, a battle had been given, where the Britons were overthrown, and the duke of Orleans and the prince of Orange taken prisoners, there being slain on the Britons' part six thousand men, and amongst them the lord Woodvile, and almost all his soldiers, valiantly fighting. And of the French part, one thousand two hundred, with their leader James Galeot, a great commander.

When the news of this battle came over into England, it was time for the king, who now had no subterfuge to continue farther treaty, and saw before his eyes that Britain went so speedily for lost, contrary to his hopes: knowing also that with his people, and foreigners both, he sustained no small envy and disreputation for his former delays, to despatch with all possible speed his succours into Britain; which he did under the conduct of Robert, lord Brooke, to the number of eighty thousand choice men well armed; who having a fair wind, in few hours landed in Britain, and joined themselves forthwith to those Briton forces that remained after the defeat, and marched straight on to find the enemy, and encamped fast by them. The French wisely

husbanding the possession of a victory, well acquainted with the courage of the English, especially when they are fresh, kept themselves within their trenches, being strongly lodged, and resolved not to give battle. But meanwhile, to harass and weary the English, they did upon all advantages set upon them with their light horse; wherein nevertheless they received commonly loss, especially by means of the English archers.

But upon these achievements Francis, duke of Britain, deceased; an accident that the king might easily have foreseen, and ought to have reckoned upon and provided for, but that the point of reputation, when news first came of the battle lost, that somewhat must be done, did overbear the reason of war.

After the duke's decease, the principal persons of Britain, partly bought, partly through faction, put all things into confusion; so as the English not finding head or body with whom to join their forces, and being in jealousy of friends, as well as in danger of enemies, and the winter begun, returned home five months after their landing. So the battle of St. Alban, the death of the duke, and the retire of the English succours, were, after some time, the causes of the loss of that duchy; which action some accounted as a blemish of the king's judgment, but most but as the misfortune of his times.

But howsoever the temporary fruit of the parliament, in their aid and advice given for Britain, took not, nor prospered not; yet the lasting fruit of parliament, which is good and wholesome laws, did prosper, and doth yet continue to this day. For according to the lord chancellor's admonition, there were that parliament divers excellent laws ordained concerning the points which the king recommended.

First, the authority of the star-chamber, which before subsisted by the ancient common laws of the realm, was confirmed in certain cases by act of parliament. This court is one of the sagest and noblest institutions of this kingdom. For in the distribution of courts of ordinary justice, besides the high court of parliament, in which distribution the king's bench holdeth the pleas of the crown, the common-pleas pleas civil, the exchequer pleas concerning the king's revenue, and the chancery the pretorian power for mitigating the rigour of law, in case of extremity, by the conscience of a good man; there was nevertheless always reserved a high and pre-eminent power to the king's council in causes that might in example or consequence concern the state of the commonwealth; which if they were criminal, the council used to sit in the chamber called the star-chamber; if civil, in the white-chamber or white-hall. And as the chancery had the pretorian power for equity; so the star-chamber had the censorian power for offences under the degree of capital. This court of star-chamber is compounded of good elements, for it consisteth of four kinds of persons, counsellors, peers, prelates, and chief judges. It discerneth also principally of four kinds of causes, forces, frauds, crimes various of stellionate, and the inchoations or middle acts towards crimes capital or heinous, not actually committed or perpetrated. But that which was principally aimed at by this act was force, and the two chief supports of force, combination of multitudes, and maintenance or headship of great persons.

From the general peace of the country the king's care went on to the peace of the king's house, and the security of his great officers and counsellors. But this law was somewhat of a strange composition and temper. That if any of the king's servants under the degree of a lord, do conspire the death of any of the king's council or lord of the realm, it is made capital. This law was thought to be procured by the lord chancellor, who being a stern and haughty man, and finding he had some mortal enemies in court, provided for his own safety; drowning the envy of it in a general law, by communicating the privilege with all other counsellors and peers, and yet not daring to extend it farther than to the king's servants in check-roll, lest it should have been too harsh to the gentlemen, and other commons of the kingdom; who might have thought their ancient liberty, and the clemency of the laws of England, invaded, if the will in any case of felony should be made the deed. And yet the reason which the act yieldeth, that is to say, that he that conspireth the death of counsellors, may be thought indirectly, and by a mean, to conspire the death of the king himself, is indifferent to all subjects, as well as to servants in court. But it seemeth this sufficed to serve the lord chancellor's turn at this time. But yet he lived to need a general law, for that he grew afterwards as odious to the country, as he was then to the court.

From the peace of the king's house, the king's care extended to the peace of private houses and families. For there was an excellent moral law molded thus; the taking and carrying away of women forcibly and against their will, except female-wards and bond-women, was made capital. The parliament wisely and justly conceiving, that the obtaining of women, by force into possession, howsoever afterwards assent might follow by allurements, was but a rape drawn forth in length, because the first force drew on all the rest.

There was made also another law for peace in general, and repressing of murders and manslaughters, and was in amendment of the common laws of the realm; being this: That whereas by the common law the king's suit, in case of homicide, did expect the year and the day, allowed to the party's suit by way of appeal; and that it was found by experience, that the party was many times compounded with, and many times wearied with the suit, so that in the end such suit was let fall, and by that time the matter was in a manner forgotten, and thereby prosecution at the king's suit by indictment, which is ever best, *flagrante crimine*, neglected; it was ordained, that the suit by indictment might be taken as well at any time within the year and the day, as after; not prejudicing nevertheless the party's suit.

The king began also then, as well in wisdom as in justice, to pare a little the privilege of clergy, ordaining that clerks convict should be burned in the hand; both because they might taste of some

corporal punishment, and that they might carry a brand of infamy. But for this good act's sake, the king himself was after branded, by Perkin's proclamation, for an execrable breaker of the rites of holy church.

Another law was made for the better peace of the country; by which law the king's officers and farmers were to forfeit their places and holds, in case of unlawful retainer, or partaking in routs and unlawful assemblies.

These were the laws that were made for repressing of force, which those times did chiefly require; and were so prudently framed, as they are found fit for all succeeding times, and so continue to this day.

There were also made good and politic laws that parliament, against usury, which is the bastard use of money; and against unlawful chievances and exchanges, which is bastard usury; and also for the security of the king's customs; and for the employment of the procedures of foreign commodities, brought in by merchant-strangers, upon the native commodities of the realm; together with some other laws of less importance.

But howsoever the laws made in that parliament did bear good and wholesome fruit; yet the subsidy granted at the same time bare a fruit that proved harsh and bitter. All was inned at last into the king's barn, but it was after a storm. For when the commissioners entered into the taxation of the subsidy in Yorkshire, and the bishopric of Duresm; the people upon a sudden grew into great mutiny, and said openly, That they had endured of late years a thousand miseries, and neither could nor would pay the subsidy. This, no doubt, proceeded not simply of any present necessity, but much by reason of the old humour of those countries, where the memory of king Richard was so strong, that it lay like lees in the bottom of men's hearts; and if the vessel was but stirred, it would come up. And, no doubt, it was partly also by the instigation of some factious malecontents, that bare principal stroke amongst them. Hereupon the commissioners being somewhat astonished, deferred the matter unto the earl of Northumberland, who was the principal man of authority in those parts. The earl forthwith wrote unto the court, signifying to the king plainly enough in what flame he found the people of those countries, and praying the king's direction. The king wrote back peremptorily, That he would not have one penny abated, of that which had been granted to him by parliament; both because it might encourage other countries to pray the like release or mitigation; and chiefly because he would never endure that the base multitude should frustrate the authority of the parliament, wherein their votes and consents were concluded. Upon this despatch from court, the earl assembled the principal justices and freeholders of the country; and speaking to them in that imperious language, wherein the king had written to him, which needed not, save that a harsh business was unfortunately fallen into the hands of a harsh man, did not only irritate the people, but make them conceive, by the stoutness and haughtiness of delivery of the king's errand, that himself was the author or principal persuader of that counsel; whereupon the meaner sort routed together, and suddenly assailing the earl in his house, slew him, and divers of his servants: and rested not there, but creating for their leader Sir John Egremond, a factious person, and one that had of a long time borne an ill talent towards the king; and being animated also by a base fellow, called John a Chamber, a very boutefeu, who bare much sway amongst the vulgar and popular, entered into open rebellion; and gave out in flat terms, that they would go against king Henry, and fight with him for the maintenance of their liberties.

When the king was advertised of this new insurrection, being almost a fever that took him every year, after his manner little troubled therewith, he sent Thomas, earl of Surrey, whom he had a little before not only released out of the Tower, and pardoned, but also received to special favour, with a competent power against the rebels, who fought with the principal band of them, and defeated them, and took alive John a Chamber their firebrand. As for Sir John Egremond, he fled into Flanders to the lady Margaret of Burgundy, whose palace was the sanctuary and receptacle of all traitors against the king. John a Chamber was executed at York in great state; for he was hanged upon a gibbet raised a stage higher in the midst of a square gallows, as a traitor paramount; and a number of his men that were his chief accomplices, were hanged upon the lower story round about him; and the rest were generally pardoned. Neither did the king himself omit his custom, to be first or second in all his warlike exploits, making good his word, which was usual with him when he heard of rebels, that he desired but to see them. For immediately after he had sent down the earl of Surrey, he marched towards them himself in person. And although in his journey he heard news of the victory, yet he went on as far as York, to pacify and settle those countries; and that done, returned to London, leaving the earl of Surrey for his lieutenant in the northern parts, and Sir Richard Tunstal for his principal commissioner, to levy the subsidy, whereof he did not remit a denier.

About the same time that the king lost so good a servant as the earl of Northumberland, he lost likewise a faithful friend and ally of James the third, king of Scotland, by a miserable disaster. For this unfortunate prince, after a long smother of discontent, and hatred of many of his nobility and people breaking forth at times into seditions and alterations of court, was at last distressed by them, having taken arms, and surprised the person of prince James his son, partly by force, partly by threats, that they would otherwise deliver up the kingdom to the king of England, to shadow their rebellion, and to be the titular and painted head of those arms. Whereupon the king, finding himself too weak, sought unto king Henry, as also unto the pope, and the king of France, to compose those troubles between him and his subjects. The kings accordingly interposed their mediation in a round

and princely manner: not only by way of request and persuasion, but also by way of protestation and menace; declaring, That they thought it to be the common cause of all kings, if subjects should be suffered to give laws unto their sovereign, and that they would accordingly resent it, and revenge it. But the rebels, that had shaken off the greater yoke of obedience, had likewise cast away the lesser tie of respect. And fury prevailing above fear, made answer; That there was no talking of peace, except the king would resign his crown. Whereupon treaty of accord taking no place, it came to a battle at Bannocksbourn by Strivelin: in which battle the king, transported with wrath and just indignation, inconsiderately fighting and precipitating the charge, before his whole numbers came up to him, was, notwithstanding the contrary express and strait commandment of the prince his son, slain in the pursuit, being fled to a mill, situate in a field, where the battle was fought.

As for the pope's ambassy, which was sent by Adrian de Castello an Italian legate, and perhaps, as those times were, might have prevailed more, it came too late for the ambassy, but not for the ambassador. For passing through England and being honourably entertained, and received of king Henry, who ever applied himself with much respect to the see of Rome, he fell into great grace with the king, and great familiarity and friendship with Morton the chancellor: insomuch as the king taking a liking to him, and finding him to his mind, preferred him to the bishopric of Hereford, and afterwards to that of Bath and Wells, and employed him in many of his affairs of state, that had relation to Rome. He was a man of great learning, wisdom, and dexterity in business of state; and having not long after ascended to the degree of cardinal, paid the king large tribute of his gratitude, in diligent and judicious advertisement of the occurrents of Italy. Nevertheless, in the end of his time, he was partaker of the conspiracy, which cardinal Alphonso Petrucci and some other cardinals had plotted against the life of pope Leo. And this offence, in itself so heinous, was yet in him aggravated by the motive thereof, which was not malice or discontent, but an aspiring mind to the papacy. And in this height of impiety there wanted not an intermixture of levity and folly; for that, as was generally believed, he was animated to expect the papacy by a fatal mockery, the prediction of a soothsayer, which was, "That one should succeed pope Leo, whose name should be Adrian, an aged man of mean birth, and of great learning and wisdom." By which character and figure he took himself to be described, though it were fulfilled of Adrian the Fleming, son of a Dutch brewer, cardinal of Tortosa, and preceptor unto Charles the fifth; the same that, not changing his christian name, was afterwards called Adrian the sixth.

But these things happened in the year following, which was the fifth of this king. But in the end of the fourth year the king had called again his parliament, not, as it seemeth, for any particular occasion of state: but the former parliament being ended somewhat suddenly, in regard of the preparation for Britain, the king thought he had not remunerated his people sufficiently with good laws, which evermore was his retribution for treasure. And finding by the insurrection in the north, there was discontentment abroad, in respect of the subsidy, he thought it good to give his subjects yet farther contentment and comfort in that kind. Certainly his times for good commonwealth's laws did excel. So as he may justly be celebrated for the best lawgiver to this nation, after king Edward the first: for his laws, whoso marks them well, are deep, and not vulgar; not made upon the spur of a particular occasion for the present, but out of providence of the future, to make the estate of his people still more and more happy; after the manner of the legislators in ancient and heroical times.

First therefore he made a law, suitable to his own acts and times: for as himself had in his person and marriage made a final concord, in the great suit and title for the crown; so by this law he settled the like peace and quiet in the private possessions of the subjects: ordaining, "That fines thenceforth should be final, to conclude all strangers' rights;" and that upon fines levied and solemnly proclaimed, the subject should have his time of watch for five years after his title accrued; which if he forepassed, his right should be bound for ever after; with some exception nevertheless of minors, married women, and such incompetent persons.

This statute did in effect but restore an ancient statute of the realm, which was itself also made but in affirmance of the common law. The alteration had been by a statute, commonly called the statute of *non-claim*, made in the time of Edward the third. And surely this law was a kind of prognostic of the good peace, which since his time hath, for the most part, continued in this kingdom until this day: for statutes of *non-claim* are fit for times of war, when men's heads are troubled, that they cannot intend their estate; but statutes that quiet possessions, are fittest for times of peace, to extinguish suits and contentions, which is one of the banes of peace.

Another statute was made, of singular policy, for the population apparently, and, if it be thoroughly considered, for the soldiery and military forces of the realm.

Enclosures at that time began to be more frequent, whereby arable land, which could not be manured without people and families, was turned into pasture, which was easily rid by a few herdsmen; and tenances for years, lives, and at will, whereupon much of the yeomanry lived, were turned into demesnes. This bred a decay of people, and, by consequence, a decay of towns, churches, tithes, and the like. The king likewise knew full well, and in no wise forgot, that there ensued withal upon this a decay and diminution of subsidies and taxes; for the more gentlemen, ever the lower books of subsidies. In remedying of this inconvenience the king's wisdom was admirable, and the parliament's at that time. Enclosures they would not forbid, for that had been to forbid the improvement of the

patrimony of the kingdom; nor tillage they would not compel, for that was to strive with nature and utility; but they took a course to take away depopulating enclosures and depopulating pasturage, and yet not by that name, or by any imperious express prohibition, but by consequence. The ordinance was, "That all houses of husbandry, that were used with twenty acres of ground and upwards, should be maintained and kept up for ever; together with a competent proportion of land to be used and occupied with them;" and in no wise to be severed from them, as by another statute, made afterwards in his successor's time, was more fully declared: this upon forfeiture to be taken, not by way of popular action, but by seizure of the land itself by the king and lords of the fee, as to half the profits, till the houses and lands were restored. By this means the houses being kept up, did of necessity enforce a dweller; and the proportion of land for occupation being kept up, did of necessity enforce that dweller not to be a beggar or cottager, but a man of some substance, that might keep hinds and servants, and set the plough on going. This did wonderfully concern the might and mannerhood of the kingdom, to have farms as it were of a standard, sufficient to maintain an able body out of penury, and did in effect amortise a great part of the lands of the kingdom unto the hold and occupation of the yeomanry or middle people, of a condition between gentlemen and cottagers or peasants. Now, how much this did advance the military power of the kingdom, is apparent by the true principles of war and the examples of other kingdoms. For it hath been held by the general opinion of men of best judgment in the wars, howsoever some few have varied, and that it may receive some distinction of case, that the principal strength of an army consisteth in the infantry or foot. And to make good infantry, it requireth men bred, not in a servile or indigent fashion, but in some free and plentiful manner. Therefore if a state run most to noblemen and gentlemen, and that the husbandmen and ploughmen be but as their workfolks and labourers, or else mere cottagers, which are but housed beggars, you may have a good cavalry, but never good stable bands of foot; like to coppice woods, that if you leave in them staddles too thick, they will run to bushes and briers, and have little clean underwood. And this is to be seen in France and Italy, and some other parts abroad, where in effect all is noblesse or peasantry, I speak of people out of towns, and no middle people; and therefore no good forces of foot: insomuch as they are enforced to employ mercenary bands of Switzers, and the like, for their battalions of foot. Whereby also it comes to pass, that those nations have much people, and few soldiers. Whereas the king saw, that contrariwise it would follow, that England, though much less in territory, yet should have infinitely more soldiers of their native forces than those other nations have. Thus did the king secretly sow Hydra's teeth; whereupon, according to the poet's fiction, should rise up armed men for the service of the kingdom.

The king also, having care to make his realm potent, as well by sea as by land, for the better maintenance of the navy, ordained; "That wines and woads from the parts of Gascoign and Languedoc, should not be brought but in English bottoms;" bowing the ancient policy of this estate, from consideration of plenty to consideration of power. For that almost all the ancient statutes incite by all means merchant-strangers, to bring in all sorts of commodities; having for end cheapness, and not looking to the point of state concerning the naval power.

The king also made a statute in that parliament, monitory and minatory towards justices of peace, that they should duly execute their office, inviting complaints against them, first to their fellow-justices, then to the justices of assize, then to the king or chancellor: and that a proclamation which he had published of that tenor, should be read in open sessions four times a year, to keep them awake. Meaning also to have his laws executed, and thereby to reap either obedience or forfeitures, wherein towards his latter times he did decline too much to the left hand, he did ordain remedy against the practice that was grown in use, to stop and damp informations upon penal laws, by procuring informations by collusion to be put in by the confederates of the delinquents, to be faintly prosecuted, and let fall at pleasure; and pleading them in bar of the informations, which were prosecuted with effect.

He made also laws for the correction of the mint, and counterfeiting of foreign coin current. And that no payment in gold should be made to any merchant-stranger, the better to keep treasure within the realm, for that gold was the metal that lay in the least room.

He made also statutes for the maintenance of drapery, and the keeping of wools within the realm; and not only so, but for stinting and limiting the prices of cloth, one for the finer, and another for the coarser sort. Which I note, both because it was a rare thing to set prices by statute, especially upon our home commodities; and because of the wise model of this act, not prescribing prices, but stinting them not to exceed a rate; that the clothier might drape accordingly as he might afford.

Divers other good statutes were made that parliament, but these were the principal. And here I do desire those into whose hands this work shall fall, that they do take in good part my long insisting upon the laws that were made in this king's reign. Whereof I have these reasons; both because it was the pre-eminent virtue and merit of this king to whose memory I do honour; and because it hath some correspondence to my person; but chiefly because, in my judgment, it is some defect even in the best writers of history, that they do not often enough summarily deliver and set down the most memorable laws that passed in the times whereof they writ, being indeed the principal acts of peace. For though they may be had in original books of law themselves; yet that informeth not the judgment of kings and counsellors, and persons of estate, so well as to see them described, and entered in the table and portrait of the times.

About the same time the king had a loan from the city of four thousand pounds; which was double to that they lent before, and was duly and orderly paid back at the day, as the former likewise had been: the king ever choosing rather to borrow too soon, than to pay too late, and so keeping up his credit.

Neither had the king yet cast off his cares and hopes touching Britain, but thought to master the occasion by policy, though his arms had been unfortunate; and to bereave the French king of the fruit of his victory. The sum of his design was, to encourage Maximilian to go on with his suit, for the marriage of Anne, the heir of Britain, and to aid him to the consummation thereof. But the affairs of Maximilian were at that time in great trouble and combustion, by a rebellion of his subjects in Flanders; especially those of Bruges and Gaunt, whereof the town of Bruges, at such time as Maximilian was there in person, had suddenly armed in tumult, and slain some of his principal officers, and taken himself prisoner, and held him in durance, till they had enforced him and some of his counsellors, to take a solemn oath to pardon all their offences, and never to question and revenge the same in time to come. Nevertheless Frederick the emperor would not suffer this reproach and indignity offered to his son to pass, but made sharp wars upon Flanders, to reclaim and chastise the rebels. But the lord Ravenstein, a principal person about Maximilian, and one that had taken the oath of abolition with his master, pretending the religion thereof, but indeed upon private ambition, and, as it was thought, instigated and corrupted from France, forsook the emperor and Maximilian his lord, and made himself a head of the popular party, and seized upon the towns of Ipres and Sluice with both the castles: and forthwith sent to the lord Cordes, governor of Picardy under the French king, to desire aid; and to move him, that he, on the behalf of the French king, would be protector of the united towns, and by force of arms reduce the rest. The lord Cordes was ready to embrace the occasion, which was partly of his own setting, and sent forthwith greater forces than it had been possible for him to raise on the sudden, if he had not looked for such a summons before, in aid of the lord Ravenstein and the Flemings, with instructions to invest the towns between France and Bruges. The French forces besieged a little town called Dixmude, where part of the Flemish forces joined with them. While they lay at this siege, the king of England, upon pretence of the safety of the English pale about Calais, but in truth being loth that Maximilian should become contemptible, and thereby be shaken off by the states of Britain about this marriage, sent over the lord Morley with a thousand men, under the lord D'Aubigny, then deputy of Calais, with secret instructions to aid Maximilian, and to raise the siege of Dixmude. The lord D'Aubigny, giving it out that all was for the strengthening of the English marches, drew out of the garrisons of Calais, Hammes and Guines, to the number of a thousand men more. So that with the fresh succours that came under the conduct of the lord Morley, they made up to the number of two thousand or better. Which forces joining with some companies of Almains, put themselves into Dixmude, not perceived by the enemies; and passing through the town, with some reinforcement from the forces that were in the town, assailed the enemies' camp negligently guarded, as being out of fear; where there was a bloody fight, in which the English and their partakers obtained the victory, and slew to the number of eight thousand men, with the loss on the English part of a hundred or thereabouts; amongst whom was the lord Morley. They took also their great ordnance, with much rich spoils, which they carried to Newport; whence the lord D'Aubigny returned to Calais, leaving the hurt men and some other voluntaries in Newport. But the lord Cordes being at Ipres with a great power of men, thinking to recover the loss and disgrace of the fight at Dixmude, came presently on, and sat down before Newport, and besieged it; and after some days siege, he resolved to try the fortune of an assault. Which he did one day, and succeeded therein so far, that he had taken the principal tower and fort in that city, and planted upon it the French banner. Whence nevertheless they were presently beaten forth by the English, by the help of some fresh succours of archers arriving by good fortune, at the instant, in the haven of Newport. Whereupon the lord Cordes, discouraged, and measuring the new succours, which were small, by the success, which was great, levied his siege. By this means matters grew more exasperate between the two kings of England and France, for that, in the war of Flanders, the auxiliary forces of French and English were much blooded one against another. Which blood rankled the more, by the vain words of the lord Cordes, that declared himself an open enemy of the English, beyond that that appertained to the present service; making it a common by-word of his, "That he could be content to lie in hell seven years, so he might win Calais from the English."

The king having thus upheld the reputation of Maximilian, advised him now to press on his marriage with Britain to a conclusion. Which Maximilian accordingly did, and so far forth prevailed, both with the young lady and with the principal persons about her, as the marriage was consummated by proxy, with a ceremony at that time in these parts new. For she was not only publicly contracted, but stated, as a bride, and solemnly bedded; and after she was laid, there came in Maximilian's ambassador with letters of procuration, and in the presence of sundry noble personages, men and women, put his leg, stripped naked to the knee, between the espousal sheets; to the end, that that ceremony might be thought to amount to a consummation and actual knowledge. This done, Maximilian, whose property was to leave things then when they were almost come to perfection, and to end them by imagination; like ill archers, that draw not their arrows up to the head; and who might as easily have bedded the lady himself, as to have made a play and disguise of it, thinking now all assured, neglected for a time his farther proceeding, and intended his

wars. Meanwhile the French king, consulting his divines, and finding that this pretended consummation was rather an invention of court, than any ways valid by the laws of the church, went more really to work, and by secret instruments and cunning agents, as well matrons about the young lady as counsellors, first sought to remove the point of religion and honour out of the mind of the lady herself, wherein there was a double labour. For Maximilian was not only contracted unto the lady, but Maximilian's daughter was likewise contracted to king Charles. So as the marriage halted upon both feet, and was not clear on either side. But for the contract with king Charles, the exception lay plain and fair; for that Maximilian's daughter was under years of consent, and so not bound by law, but a power of disagreement left to either part. But for the contract made by Maximilian with the lady herself, they were harder driven: having nothing to allege, but that it was done without the consent of her sovereign lord king Charles, whose ward and client she was, and he to her in place of a father: and therefore it was void and of no force for want of such consent. Which defect, they said, though it would not evacuate a marriage after cohabitation and actual consummation; yet it was enough to make void a contract. For as for the pretended consummation, they made sport with it, and said: "That it was an argument that Maximilian was a widower, and a cold wooer, that could content himself to be a bridegroom by deputy, and would not make a little journey to put all out of question." So that the young lady, wrought upon by these reasons, finely instilled by such as the French king, who spared for no rewards or promises, had made on his side; and allured likewise by the present glory and greatness of king Charles, being also a young king, and a bachelor, and loth to make her country the seat of a long and miserable war; secretly yielded to accept of king Charles. But during this secret treaty with the lady, the better to save it from blasts of opposition and interruption, king Charles resorting to his wonted arts, and thinking to carry the marriage as he had carried the wars, by entertaining the king of England in vain belief, sent a solemn ambassage by Francis lord of Luxemburg, Charles Marignian, and Robert Gagvien, general of the order of the *bons hommes* of the Trinity, to treat a peace and league with the king; accoupling it with an article in the nature of a request, that the French king might with the king's good will, according unto his right of seigniory and tutelage, dispose of the marriage of the young duchess of Britain, as he should think good; offering by a judicial proceeding to make void the marriage of Maximilian by proxy. Also all this while, the better to amuse the world, he did continue in his court and custody the daughter of Maximilian, who formerly had been sent unto him, to be bred and educated in France; not dismissing or renvoying her, but contrariwise professing and giving out strongly that he meant to proceed with that match. And that for the duchess of Britain, he desired only to preserve his right of seigniory, and to give her in marriage to some such ally as might depend upon him.

When the three commissioners came to the court of England, they delivered their ambassage unto the king, who remitted them to his council; where some days after they had audience, and made their proposition by the prior of the Trinity, who though he were third in place, yet was held the best speaker of them, to this effect.

"My lords, the king our master, the greatest and mightiest king that reigned in France since Charles the Great, whose name he beareth, hath nevertheless thought it no disparagement to his greatness at this time to propound a peace; yea, and to pray a peace with the king of England. For which purpose he hath sent us his commissioners, instructed and enabled with full and ample power to treat and conclude; giving us farther in charge, to open in some other business the secrets of his own intentions. These be indeed the precious love tokens between great kings, to communicate one with another the true state of their affairs, and to pass by nice points of honour, which ought not to give law unto affection. This I do assure your lordships; it is not possible for you to imagine the true and cordial love that the king our master beareth to your sovereign, except you were near him as we are. He useth his name with so great respect; he remembereth their first acquaintance at Paris with so great contentment; nay, he never speaks of him, but that presently he falls into discourse of the miseries of great kings, in that they cannot converse with their equals, but with servants. This affection to your king's person and virtues God hath put into the heart of our master, no doubt for the good of christendom, and for purposes yet unknown to us all. For other root it cannot have, since it was the same to the earl of Richmond, that it is now to the king of England. This is therefore the first motive that makes our king to desire peace and league with your sovereign: good affection, and somewhat that he finds in his own heart. This affection is also armed with reason of estate. For our king doth in all candour and frankness of dealing open himself unto you; that having an honourable, yea and an holy purpose, to make a voyage and war in remote parts, he considereth that it will be of no small effect, in point of reputation to his enterprise, if it be known abroad that he is in good peace with all his neighbour princes, and especially with the king of England, whom for good causes he esteemeth most.

"But now, my lords, give me leave to use a few words to remove all scruples and misunderstanding between your sovereign and ours, concerning some late actions; which if they be not cleared, may perhaps hinder this peace. To the end that for matters past neither king may conceive unkindness of other, nor think the other conceiveth unkindness of him. The late actions are two; that of Britain and that of Flanders. In both which it is true, that the subjects' swords of both kings have encountered and stricken, and the ways and inclinations also of

the two kings, in respect of their confederates and allies, have severed.

"For that of Britain, the king your sovereign knoweth best what hath passed. It was a war of necessity on our master's part. And though the motives of it were sharp and piquant as could be, yet did he make that war rather with an olive-branch, than a laurel-branch in his hand, more desiring peace than victory. Besides, from time to time he sent, as it were, blank papers to your king, to write the conditions of peace. For though both his honour and safety went upon it, yet he thought neither of them too precious to put into the king of England's hands. Neither doth our king on the other side make any unfriendly interpretation of your king's sending of succours to the duke of Britain; for the king knoweth well that many things must be done of kings for satisfaction of their people; and it is not hard to discern what is a king's own. But this matter of Britain is now, by the act of God, ended and passed; and, as the king hopeth, like the way of a ship in the sea, without leaving any impression in either of the kings' minds; as he is sure for his part it hath not done in his.

"For the action of Flanders; as the former of Britain was a war of necessity, so this was a war of justice; which with a good king is of equal necessity with danger of estate, for else he should leave to be a king. The subjects of Burgundy are subjects in chief to the crown of France, and their duke the homager and vassal of France. They had wont to be good subjects, howsoever Maximilian hath of late distempered them. They fled to the king for justice and deliverance from oppression. Justice he could not deny; purchase he did not seek. This was good for Maximilian, if he could have seen it in people mutinied, to arrest fury, and prevent despair. My lords, it may be this I have said is needless, save that the king our master is tender in any thing, that may but glance upon the friendship of England. The amity between the two kings, no doubt, stands entire and inviolate; and that their subjects' swords have clashed, it is nothing unto the public peace of the crowns; it being a thing very usual in auxiliary forces of the best and straitest confederates to meet and draw blood in the field. Nay many times there be aids of the same nation on both sides, and yet it is not, for all that, a kingdom divided in itself.

"It resteth, my lords, that I impart unto you a matter, that I know your lordships all will much rejoice to hear; as that which importeth the christian common weal more, than any action that hath happened of long time. The king our master hath a purpose and determination to make war upon the kingdom of Naples; being now in the possession of a bastard slip of Arragon, but appertaining unto his Majesty by clear and undoubted right; which if he should not by just arms seek to recover, he could neither acquit his honour nor answer it to his people. But his noble and christian thoughts rest not here: for his resolution and hope is, to make the conquest of Naples but as a bridge to transport his forces into Grecia; and not to spare blood or treasure, if it were to the impawning of his crown, and dispeopling of France, till either he hath overthrown the empire of the Ottomans, or taken it in his way to paradise. The king knoweth well, that this is a design that could not arise in the mind of any king, that did not stedfastly look up unto God, whose quarrel this is, and from whom cometh both the will and the deed. But yet is agreeable to the person that he beareth, though unworthy, of the thrice christian king and the eldest son of the church. Whereunto he is also invited by the example, in more ancient time, of king Henry the fourth of England, the first renowned king of the house of Lancaster; ancestor, though not progenitor to your king; who had a purpose towards the end of his time, as you know better, to make an expedition into the Holy Land; and by the example also, present before his eyes, of that honourable and religious war which the king of Spain now maketh, and hath almost brought to perfection, for the recovery of the realm of Granada from the Moors. And although this enterprise may seem vast and unmeasured, for the king to attempt that by his own forces, wherein heretofore a conjunction of most of the christian princes hath found work enough; yet his Majesty wisely considereth, that sometimes smaller forces being united under one command, are more effectual in proof, though not so promising in opinion and fame, than much greater forces, variously compounded by associations and leagues, which commonly in a short time after their beginnings turn to dissociations and divisions. But, my lords, that which is as a voice from heaven, that calleth the king to this enterprise, is a rent at this time in the house of the Ottomans. I do not say but there hath been brother against brother in that house before, but never any that had refuge to the arms of the christians, as now hath Gemes, brother unto Bajazet that reigneth, the far braver man of the two, the other being between a monk and a philosopher, and better read in the Alcoran and Averroes, than able to wield the sceptre of so warlike an empire. This therefore is the king our master's memorable and heroical resolution for an holy war. And because he carrieth in this the person of a christian soldier, as well as of a great temporal monarch, he beginneth with humility, and is content for this cause to beg peace at the hands of other christian kings. There remaineth only rather a civil request than any essential part of our negotiation, which the king maketh to the king your sovereign. The king, as all the world knoweth, is lord in chief of the duchy of Britain. The marriage of the heir belongeth to him as guardian. This is a private patrimonial right, and no business of estate; yet nevertheless, to run a fair course with your king, whom he desires to make another himself, and to be one and the same thing with him, his request is that with the king's favour and consent he may dispose of her in marriage, as he thinketh good, and make void the intruded and pretended marriage of Maximilian, according to justice. This, my lords, is all that I have to say, desiring your pardon for my weakness in the delivery."

Thus did the French ambassadors with great show of their king's affection, and many sugared words,

seek to addulce all matters between the two kings, having two things for their ends; the one to keep the king quiet till the marriage of Britain was past; and this was but a summer fruit, which they thought was almost ripe, and would be soon gathered. The other was more lasting; and that was to put him into such a temper, as he might be no disturbance or impediment to the voyage for Italy. The lords of the council were silent; and said only, "That they knew the ambassadors would look for no answer, till they had reported to the king;" and so they rose from council. The king could not well tell what to think of the marriage of Britain. He saw plainly the ambition of the French king was to impatronize himself of the duchy; but he wondered he would bring into his house a litigious marriage, especially considering who was his successor. But weighing one thing with another he gave Britain for lost; but resolved to make his profit of this business of Britain, as a quarrel for war; and that of Naples, as a wrench and mean for peace; being well advertised, how strongly the king was bent upon that action. Having therefore conferred divers times with his council, and keeping himself somewhat close, he gave a direction to the chancellor, for a formal answer to the ambassadors, and that he did in the presence of his council. And after calling the chancellor to him apart, bad him speak in such language, as was fit for a treaty that was to end in a breach; and gave him also a special caveat, that he should not use any words to discourage the voyage of Italy. Soon after the ambassadors were sent for to the council, and the lord chancellor spake to them in this sort:

"My lords ambassadors, I shall make answer, by the king's commandment, unto the eloquent declaration of you, my lord prior, in a brief and plain manner. The king forgetteth not his former love and acquaintance with the king your master: but of this there needeth no repetition. For if it be between them as it was, it is well; if there be any alteration, it is not words that will make it up.

"For the business of Britain, the king findeth it a little strange that the French king maketh mention of it as a matter of well deserving at his hand: for that deserving was no more but to make him his instrument to surprise one of his best confederates. And for the marriage, the king would not meddle with it, if your master would marry by the book, and not by the sword.

"For that of Flanders, if the subjects of Burgundy had appealed to your king as their chief lord, at first by way of supplication, it might have had a show of justice: but it was a new form of process, for subjects to imprison their prince first, and to slay his officers, and then to be complainants. The king saith, That sure he is, when the French king and himself sent to the subjects of Scotland, that had taken arms against their king, they both spake in another style, and did in princely manner signify their detestation of popular attentates upon the person or authority of princes. But, my lords ambassadors, the king leaveth these two actions thus: that on the one side he hath not received any manner of satisfaction from you concerning them; and on the other, that he doth not apprehend them so deeply, as in respect of them to refuse to treat of peace, if other things may go hand in hand. As for the war of Naples, and the design against the Turk: the king hath commanded me expressly to say, that he doth wish with all his heart to his good brother the French king, that his fortunes may succeed according to his hopes and honourable intentions. And whensoever he shall hear that he is prepared for Grecia, as your master is pleased now to say that he beggeth a peace of the king, so the king will then beg of him a part in that war.

"But now, my lords ambassadors, I am to propound unto you somewhat on the king's part: the king your master hath taught our king what to say and demand. You say, my lord prior, that your king is resolved to recover his right to Naples, wrongfully detained from him. And that if he should not thus do, he could not acquit his honour, nor answer it to his people. Think, my lords, that the king our master saith the same thing over again to you touching Normandy, Guienne, Anjou, yea, and the kingdom of France itself. I cannot express it better than in your own words. If therefore the French king shall consent, that the king our master's title to France, at least tribute for the same, be handled in the treaty, the king is content to go on with the rest, otherwise he refuseth to treat."

The ambassadors, being somewhat abashed with this demand, answered in some heat: That they doubted not, but the king their sovereign's sword would be able to maintain his sceptre: and they assured themselves, he neither could nor would yield to any diminution of the crown of France either in territory or regality: but, howsoever, they were too great matters for them to speak of, having no commission. It was replied, that the king looked for no other answer from them, but would forthwith send his own ambassadors to the French king. There was a question also asked at the table; whether the French king would agree to have the disposing of the marriage of Britain with an exception and exclusion, that he should not marry her himself? To which the ambassadors answered; That it was so far out of their king's thoughts, as they had received no instructions touching the same. Thus were the ambassadors dismissed, all save the prior; and were followed immediately by Thomas, earl of Ormond, and Thomas Goldenston, prior of Christ-Church in Canterbury, who were presently sent over into France. In the mean space, Lionel, bishop of Concordia, was sent as nuncio from pope Alexander the sixth to both kings, to move a peace between them. For pope Alexander, finding himself pent and locked up by a league and association of the principal states of Italy, that he could not make his way for the advancement of his own house which he immoderately thirsted after, was desirous to trouble the waters in Italy, that he might fish the better; casting the net, not out of St. Peter's, but out of Borgia's bark. And doubting lest the fears from England might stay the French king's voyage into Italy, despatched this bishop, to compose all matters

between the two kings, if he could: who first repaired to the French king, and finding him well inclined, as he conceived, took on his journey towards England, and found the English ambassadors at Calais, on their way towards the French king. After some conference with them, he was in honourable manner transported over into England, where he had audience of the king. But notwithstanding he had a good ominous name to have made a peace, nothing followed: for in the mean time the purpose of the French king to marry the duchess, could be no longer dissembled. Wherefore the English ambassadors, finding how things went, took their leave, and returned. And the prior also was warned from hence to depart out of England. Who when he turned his back, more like a pedant than an ambassador, dispersed a bitter libel, in Latin verse, against the king; unto which the king, though he had nothing of a pedant, yet was content to cause an answer to be made in like verse; and that as speaking in his own person, but in a style of scorn and sport. About this time also was born the king's second son Henry, who afterwards reigned. And soon after followed the solemnization of the marriage between Charles and Anne duchess of Britain, with whom he received the duchy of Britain as her dowry, the daughter of Maximilian being a little before sent home. Which when it came to the ears of Maximilian, who would never believe it till it was done, being ever the principal in deceiving himself, though in this the French king did very handsomely second it, in tumbling it over and over in his thoughts, that he should at one blow, with such a double scorn, be defeated, both of the marriage of his daughter and his own, upon both which he had fixed high imaginations, he lost all patience, and casting off the respects fit to be continued between great kings, even when their blood is hottest, and most risen, fell to bitter invectives against the person and actions of the French king. And, by how much he was the less able to do, talking so much the more, spake all the injuries he could devise of Charles, saying: That he was the most perfidious man upon the earth, and that he had made a marriage compounded between an advowtry and a rape; which was done, he said, by the just judgment of God; to the end that, the nullity thereof being so apparent to all the world, the race of so unworthy a person might not reign in France. And forthwith he sent ambassadors as well to the king of England, as to the king of Spain, to incite them to war, and to treat a league offensive against France, promising to concur with great forces of his own. Hereupon the king of England, going nevertheless his own way, called a parliament, it being the seventh year of his reign; and the first day of opening thereof, sitting under his cloth of estate, spake himself unto his lords and commons in this manner:

"My lords, and you the commons, when I purposed to make a war in Britain, by my lieutenant, I made declaration thereof to you by my chancellor. But now that I mean to make a war upon France in person, I will declare it to you myself. That war was to defend another man's right, but this is to recover our own; and that ended by accident, but we hope this shall end in victory.

"The French king troubles the christian world: that which he hath is not his own, and yet he seeketh more. He hath invested himself of Britain: he maintaineth the rebels in Flanders: and he threateneth Italy. For ourselves, he hath proceeded from dissimulation to neglect; and from neglect to contumely. He hath assailed our confederates: he denieth our tribute: in a word, he seeks war: so did not his father, but sought peace at our hands; and so perhaps will he, when good counsel or time shall make him see as much as his father did.

"Meanwhile, let us make his ambition our advantage; and let us not stand upon a few crowns of tribute or acknowledgment, but, by the favour of Almighty God, try our right for the crown of France itself; remembering that there hath been a French king prisoner in England, and a king of England crowned in France. Our confederates are not diminished. Burgundy is in a mightier hand than ever, and never more provoked. Britain cannot help us, but it may hurt them. New acquests are more burden than strength. The malecontents of his own kingdom have not been base, popular, nor titulary impostors, but of a higher nature. The king of Spain, doubt ye not, will join with us, not knowing where the French king's ambition will stay. Our holy father the pope likes no Tramontanes in Italy. But howsoever it be, this matter of confederates is rather to be thought on than reckoned on. For God forbid but England should be able to get reason of France without a second.

"At the battles of Cressy, Poictiers, Agencourt, we were of ourselves. France hath much people, and few soldiers. They have no stable bands of foot. Some good horse they have; but those are forces which are least fit for a defensive war, where the actions are in the assailant's choice. It was our discords only that lost France; and, by the power of God, it is the good peace which we now enjoy, that will recover it. God hath hitherto blessed my sword. I have, in this time that I have reigned, weeded out my bad subjects, and tried my good. My people and I know one another, which breeds confidence: and if there should be any bad blood left in the kingdom, an honourable foreign war will vent it or purify it. In this great business let me have your advice and aid. If any of you were to make his son knight, you might have aid of your tenants by law. This concerns the knighthood and spurs of the kingdom, whereof I am father; and bound not only to seek to maintain it, but to advance it: but for matter of treasure let it not be taken from the poorest sort, but from those to whom the benefit of the war may redound. France is no wilderness: and I, that profess good husbandry, hope to make the war, after the beginnings, to pay itself. Go together in God's name, and lose no time; for I have called this parliament wholly for this cause."

Thus spake the king; but for all this, though he showed great forwardness for a war, not only to his parliament and court, but to his privy council likewise, except the two bishops and a few more,

yet nevertheless in his secret intentions he had no purpose to go through with any war upon France. But the truth was, that he did but traffic with that war, to make his return in money. He knew well that France was now entire and at unity with itself, and never so mighty many years before. He saw by the taste that he had of his forces sent into Britain, that the French knew well enough how to make war with the English, by not putting things to the hazard of a battle, but wearing them by long sieges of towns, and strong fortified encampings. James the third of Scotland, his true friend and confederate, gone; and James the fourth, that had succeeded, wholly at the devotion of France, and ill affected towards him. As for the conjunctions of Ferdinando of Spain and Maximilian, he could make no foundation upon them. For the one had power, and not will; and the other had will, and not power. Besides that, Ferdinando had but newly taken breath from the war with the Moors; and merchanded at this time with France for the restoring of the counties of Russignon and Perpignian, oppignorated to the French. Neither was he out of fear of the discontents and ill blood within the realm; which having used always to repress and appease in person, he was loth they should find him at a distance beyond sea, and engaged in war. Finding therefore the inconveniences and difficulties in the prosecution of a war, he cast with himself how to compass two things. The one, how by the declaration and inchoation of a war to make his profit. The other, how to come off from the war with the saving of his honour. For profit, it was to be made two ways; upon his subjects for the war, and upon his enemies for the peace; like a good merchant, that maketh his gain both upon the commodities exported, and imported back again. For the point of honour, wherein he might suffer for giving over the war; he considered well, that as he could not trust upon the aids of Ferdinando and Maximilian for supports of war; so the impuissance of the one, and the double proceeding of the other, lay fair for him for occasions to accept of peace. These things he did wisely foresee, and did as artificially conduct, whereby all things fell into his lap as he desired.

For as for the parliament, it presently took fire, being affectionate, of old, to the war of France; and desirous afresh to repair the dishonour they thought the king sustained by the loss of Britain. Therefore they advised the king, with great alacrity, to undertake the war of France. And although the parliament consisted of the first and second nobility, together with principal citizens and townsmen, yet worthily and justly respecting more the people, whose deputies they were, than their own private persons, and finding by the lord chancellor's speech the king's inclination that way; they consented that commissioners should go forth for the gathering and levying of a benevolence from the more able sort. This tax, called a benevolence, was devised by Edward the fourth, for which he sustained much envy. It was abolished by Richard the third by act of parliament, to ingratiate himself with the people; and it was now revived by the king, but with consent of parliament, for so it was not in the time of king Edward the fourth. But by this way he raised exceeding great sums. Insomuch as the city of London, in those days, contributed nine thousand pounds and better; and that chiefly levied upon the wealthier sort. There is a tradition of a *dilemma*, that bishop Morton the chancellor used, to raise up the benevolence to higher rates; and some called it his fork, and some his crotch. For he had couched an article in the instructions to the commissioners who were to levy the benevolence; "That if they met with any that were sparing, they should tell them, that they must needs have, because they laid up: and if they were spenders, they must needs have, because it was seen in their port and manner of living." So neither kind came amiss.

This parliament was merely a parliament of war; for it was in substance but a declaration of war against France and Scotland, with some statutes conducing thereunto: as the severe punishment of mort-pays, and keeping back of soldiers' wages in captains; the like severity for the departure of soldiers without licence; strengthening of the common law in favour of protections for those that were in the king's service; and the setting the gate open or wide for men to sell or mortgage their lands, without fines for alienation, to furnish themselves with money for the war; and lastly, the voiding of all Scottish men out of England. There was also a statute for the dispersing of the standard of the exchequer throughout England; thereby to size weights and measures; and two or three more of less importance.

After the parliament was broken up, which lasted not long, the king went on with his preparations for the war of France; yet neglected not in the mean time the affairs of Maximilian for the quieting of Flanders, and restoring him to his authority amongst his subjects. For at that time the lord of Ravenstein, being not only a subject rebelled, but a servant revolted, and so much the more malicious and violent, by the aid of Bruges and Gaunt, had taken the town and both the castles of Sluice; as we said before: and having, by the commodity of the haven, gotten together certain ships and barks, fell to a kind of piratical trade; robbing and spoiling, and taking prisoners the ships and vessels of all nations, that passed along that coast towards the mart of Antwerp, or into any part of Brabant, Zealand, or Friezeland; being ever well victualled from Picardy, besides the commodity of victuals from Sluice, and the country adjacent, and the avails of his own prizes. The French assisted him still underhand; and he likewise, as all men do that have been of both sides, thought himself not safe, except he depended upon a third person.

There was a small town some two miles from Bruges towards the sea, called Dam; which was a fort and approach to Bruges, and had a relation also to Sluice.

This town the king of the romans had attempted often, not for any worth of the town in itself, but because it might choke Bruges, and cut it off from

the sea, and ever failed. But therewith the duke of Saxony came down into Flanders, taking upon him the person of an umpire, to compose things between Maximilian and his subjects; but being, indeed, fast and assured to Maximilian. Upon this pretext of neutrality and treaty, he repaired to Bruges; desiring of the states of Bruges, to enter peaceably into their town, with a retinue of some number of men of arms fit for his estate; being somewhat the more, as he said, the better to guard him in a country that was up in arms: and bearing them in hand, that he was to communicate with them of divers matters of great importance for their good. Which having obtained of them, he sent his carriages and harbingers before him, to provide his lodging. So that his men of war entered the city in good array, but in peaceable manner, and he followed. They that went before inquired still for inns and lodgings, as if they would have rested there all night; and so went on till they came to the gate that leadeth directly towards Dam: and they of Bruges only gazed upon them, and gave them passage. The captains and inhabitants of Dam also suspected no harm from any that passed through Bruges; and discovering forces afar off, supposed they had been some succours that were come from their friends, knowing some dangers towards them. And so perceiving nothing but well till it was too late, suffered them to enter their town. By which kind of slight, rather than stratagem, the town of Dam was taken, and the town of Bruges shrewdly blocked up, whereby they took great discouragement.

The duke of Saxony, having won the town of Dam, sent immediately to the king to let him know, that it was Sluice chiefly, and the lord Ravenstein that kept the rebellion of Flanders in life: and that if it pleased the king to besiege it by sea, he also would besiege it by land, and so cut out the core of those wars.

The king, willing to uphold the authority of Maximilian, the better to hold France in awe, and being likewise sued unto by his merchants, for that the seas were much infested by the barks of the lord Ravenstein; sent straightways Sir Edward Poynings, a valiant man, and of good service, with twelve ships, well furnished with soldiers and artillery, to clear the seas, and to besiege Sluice on that part. The Englishmen did not only coop up the lord Ravenstein, that he stirred not, and likewise hold in strait siege the maritime part of the town, but also assailed one of the castles, and renewed the assault so for twenty days' space, issuing still out of their ships at the ebb, as they made great slaughter of them of the castle; who continually fought with them to repulse them, though of the English part also were slain a brother of the earl of Oxford's, and some fifty more.

But the siege still continuing more and more strait, and both the castles, which were the principal strength of the town, being distressed, the one by the duke of Saxony, and the other by the English; and a bridge of boats, which the lord of Ravenstein had made between both castles, whereby succours and relief might pass from the one to the other, being on a night set on fire by the English; he despairing to hold the town, yielded, at the last, the castles to the English, and the town to the duke of Saxony by composition. Which done, the duke of Saxony and Sir Edward Poynings treated with them of Bruges, to submit themselves to Maximilian their lord; which after some time they did, paying in some good part, the charge of the war, whereby the Almains and foreign succours were dismissed. The example of Bruges other of the revolted towns followed; so that Maximilian grew to be out of danger, but, as his manner was to handle matters, never out of necessity. And Sir Edward Poynings, after he had continued at Sluice some good while till all things were settled, returned unto the king, being then before Boloign.

Somewhat about this time came letters from Ferdinando and Isabella, king and queen of Spain, signifying the final conquest of Granada from the Moors; which action, in itself so worthy, king Ferdinando, whose manner was never to lose any virtue for the showing, had expressed and displayed in his letters at large, with all the particularities and religious punctos and ceremonies, that were observed in the reception of that city and kingdom: showing amongst other things, that the king would not by any means in person enter the city, until he had at first aloof seen the cross set up upon the greater tower of Granada, whereby it became christian ground. That likewise, before he would enter, he did homage to God above, pronouncing by a herald from the height of that tower, that he did acknowledge to have recovered that kingdom by the help of God Almighty, and the glorious Virgin, and the virtuous apostle Saint James, and the holy father Innocent the eighth, together with the aids and services of his prelates, nobles, and commons. That yet he stirred not from his camp, till he had seen a little army of martyrs, to the number of seven hundred and more christians, that had lived in bonds and servitude, as slaves to the Moors, pass before his eyes, singing a psalm for their redemption; and that he had given tribute unto God, by alms and relief extended to them all, for his admission into the city. These things were in the letters with many more ceremonies of a kind of holy ostentation.

The king, ever willing to put himself into the consort or quire of all religious actions, and naturally affecting much the king of Spain, as far as one king can affect another, partly for his virtues, and partly for a counterpoise to France; upon the receipt of these letters sent all his nobles and prelates that were about the court, together with the mayor and aldermen of London, in great solemnity to the church of Paul; there to hear a declaration from the lord chancellor, now cardinal. When they were assembled, the cardinal, standing upon the uppermost step, or half-pace, before the quire, and all the nobles, prelates, and governors of the city at the foot of the stairs, made a speech to them; letting them know, that they were assembled in that consecrated place, to sing unto God a new song. For that, said he, these many years the christians have not gained new ground or territory upon the infidels, nor en-

larged and set farther the bounds of the christian world. But this is now done by the prowess and devotion of Ferdinando and Isabella, kings of Spain; who have, to their immortal honour, recovered the great and rich kingdom of Granada, and the populous and mighty city of the same name, from the Moors, having been in possession thereof by the space of seven hundred years and more: for which this assembly and all christians are to render laud and thanks unto God, and to celebrate this noble act of the king of Spain; who in this is not only victorious but apostolical, in the gaining of new provinces to the christian faith. And the rather, for that this victory and conquest is obtained without much effusion of blood. Whereby it is to be hoped, that there shall be gained not only new territory, but infinite souls to the church of Christ, whom the Almighty, as it seems, would have live to be converted. Herewithal he did relate some of the most memorable particulars of the war and victory. And after his speech ended, the whole assembly went solemnly in procession, and *Te Deum* was sung.

Immediately after the solemnity, the king kept his May-day at his palace of Shene, now Richmond. Where, to warm the blood of his nobility and gallants against the war, he kept great triumphs of justing and tourney, during all that month. In which space it so fell out, that Sir James Parker, and Hugh Vaughan, one of the king's gentlemen ushers, having had a controversy touching certain arms that the king at arms had given Vaughan, were appointed to run some courses one against another. And by accident of a faulty helmet that Parker had on, he was stricken into the mouth at the first course, so that his tongue was borne unto the hinder part of his head, in such sort that he died presently upon the place. Which, because of the controversy precedent, and the death that followed, was accounted amongst the vulgar as a combat or trial of right. The king towards the end of this summer, having put his forces, wherewith he meant to invade France, in readiness, but so as they were not yet met or mustered together, sent Urswick, now made his almoner, and Sir John Risley, to Maximilian, to let him know that he was in arms, ready to pass the seas into France, and did but expect to hear from him, when and where he did appoint to join with him, according to his promise made unto him by Countebalt his ambassador.

The English ambassadors having repaired to Maximilian, did find his power and promise at a very great distance; he being utterly unprovided of men, money, and arms, for any such enterprise. For Maximilian, having neither wing to fly on, for that his patrimony of Austria was not in his hands, his father being then living, and on the other side, his matrimonial territories of Flanders being partly in dowry to his mother-in-law, and partly not serviceable, in respect of the late rebellions; was thereby destitute of means to enter into war. The ambassadors saw this well, but wisely thought fit to advertise the king thereof, rather than to return themselves, till the king's farther pleasure were known: the rather, for that Maximilian himself spake as great as ever he did before, and entertained them with dilatory answers: so as the formal part of their ambassage might well warrant and require their farther stay. The king hereupon, who doubted as much before, and saw through his business from the beginning, wrote back to the ambassadors, commending their discretion in not returning, and willing them to keep the state wherein they found Maximilian as a secret, till they heard farther from him: and meanwhile went on with his voyage royal for France, suppressing for a time this advertisement touching Maximilian's poverty and disability.

By this time was drawn together a great and puissant army into the city of London; in which were Thomas marquis Dorset, Thomas earl of Arundel, Thomas earl of Derby, George earl of Shrewsbury, Edmond earl of Suffolk, Edward earl of Devonshire, George earl of Kent, the earl of Essex, Thomas earl of Ormond, with a great number of barons, knights, and principal gentlemen; and amongst them Richard Thomas, much noted for the brave troops that he brought out of Wales. The army rising in the whole to the number of five and twenty thousand foot, and sixteen hundred horse; over which the king, constant in his accustomed trust and employment, made Jasper duke of Bedford, and John earl of Oxford, generals under his own person. The ninth of September, in the eighth year of his reign, he departed from Greenwich towards the sea; all men wondering that he took that season, being so near winter, to begin the war; and some thereupon gathering, it was a sign that the war would not be long. Nevertheless the king gave out the contrary, thus: "That he intending not to make a summer business of it, but a resolute war, without term prefixed, until he had recovered France, it skilled not much when he began it, especially having Calais at his back, where he might winter, if the season of the war so required." The sixth of October he embarked at Sandwich; and the same day took land at Calais, which was the rendezvous, where all his forces were assigned to meet. But in this his journey towards the sea-side, wherein, for the cause that we shall now speak of, he hovered so much the longer, he had received letters from the lord Cordes, who the hotter he was against the English in time of war, had the more credit in a negotiation of peace; and besides was held a man open and of good faith. In which letters there was made an overture of peace from the French king, with such conditions as were somewhat to the king's taste; but this was carried at the first with wonderful secrecy. The king was no sooner come to Calais, but the calm winds of peace began to blow. For first, the English ambassadors returned out of Flanders from Maximilian, and certified the king, that he was not to hope for any aid from Maximilian, for that he was altogether unprovided. His will was good, but he lacked money. And this was made known and spread through the army. And although the English were therewithal nothing dismayed, and that it be the manner of soldiers upon bad news to speak the more bravely; yet nevertheless it was a

kind of preparative to a peace. Instantly in the neck of this, as the king had laid it, came news that Ferdinando and Isabella, kings of Spain, had concluded a peace with king Charles; and that Charles had restored unto them the counties of Russignon and Perpignian, which formerly were mortgaged by John, king of Arragon, Ferdinando's father, unto France for three hundred thousand crowns: which debt was also upon this peace by Charles clearly released. This came also handsomely to put on the peace; both because so potent a confederate was fallen off, and because it was a fair example of a peace bought; so as the king should not be the sole merchant in this peace. Upon these airs of peace, the king was content that the bishop of Exeter, and the lord d'Aubigny, governor of Calais, should give a meeting unto the lord Cordes, for the treaty of a peace. But himself nevertheless and his army, the fifteenth of October, removed from Calais, and in four days' march sat him down before Boloign.

During this siege of Boloign, which continued near a month, there passed no memorable action, nor accident of war; only Sir John Savage, a valiant captain, was slain, riding about the walls of the town, to take a view. The town was both well fortified and well manned; yet it was distressed, and ready for an assault. Which, if it had been given, as was thought, would have cost much blood; but yet the town would have been carried in the end. Meanwhile a peace was concluded by the commissioners, to continue for both the kings' lives. Where there was no article of importance; being in effect rather a bargain than a treaty. For all things remained as they were, save that there should be paid to the king seven hundred forty-five thousand ducats in present, for his charges in that journey; and five and twenty thousand crowns yearly, for his charges sustained in the aid of the Britons. For which annual, though he had Maximilian bound before for those charges, yet he counted the alteration of the hand as much as the principal debt. And besides, it was left somewhat indefinitely when it should determine or expire; which made the English esteem it as a tribute carried under fair terms. And the truth is, it was paid both to the king and to his son king Henry the eighth, longer than it could continue upon any computation of charges. There was also assigned by the French king, unto all the king's principal counsellors, great pensions, besides rich gifts for the present. Which whether the king did permit, to save his own purse from rewards, or to communicate the envy of a business, that was displeasing to his people, was diversely interpreted. For certainly the king had no great fancy to own this peace. And therefore a little before it was concluded, he had underhand procured some of his best captains and men of war to advise him to a peace, under their hands, in an earnest manner, in the nature of a supplication. But the truth is, this peace was welcome to both kings. To Charles, for that it assured unto him the possession of Britain, and freed the enterprise of Naples. To Henry, for that it filled his coffers; and that he foresaw at that time a storm of inward troubles coming upon him, which presently after brake forth. But it gave no less discontent to the nobility and principal persons of the army, who had many of them sold or engaged their estates upon the hopes of the war. They stuck not to say, "That the king cared not to plume his nobility and people, to feather himself." And some made themselves merry with that the king had said in parliament; "That after the war was once begun, he doubted not but to make it pay itself;" saying, he had kept promise.

Having risen from Boloign, he went to Calais, where he stayed some time. From whence also he wrote letters, which was a courtesy that he sometimes used, to the mayor of London, and the aldermen his brethren; half bragging what great sums he had obtained for the peace; knowing well that full coffers of the king is ever good news to London. And better news it would have been, if their benevolence had been but a loan. And upon the seventeenth of December following he returned to Westminster, where he kept his Christmas.

Soon after the king's return, he sent the order of the garter to Alphonso duke of Calabria, eldest son to Ferdinando king of Naples. An honour sought by that prince to hold him up in the eyes of the Italians; who expecting the arms of Charles, made great account of the amity of England for a bridle to France. It was received by Alphonso with all the ceremony and pomp that could be devised, as things use to be carried that are intended for opinion. It was sent by Urswick; upon whom the king bestowed this ambassage to help him after many dry employments.

At this time the king began again to be haunted with spirits, by the magic and curious arts of the lady Margaret; who raised up the ghost of Richard duke of York, second son to king Edward the fourth, to walk and vex the king. This was a finer counterfeit stone than Lambert Simnel; better done, and worn upon greater hands; being graced after with the wearing of a king of France, and a king of Scotland, not of a duchess of Burgundy only. And for Simnel, there was not much in him, more than that he was a handsome boy, and did not shame his robes. But this youth, of whom we are now to speak, was such a mercurial, as the like hath seldom been known; and could make his own part, if at any time he chanced to be out. Wherefore this being one of the strangest examples of a personation that ever was in elder or later times; it deserveth to be discovered, and related at the full. Although the king's manner of showing things by pieces, and by dark lights, hath so muffled it, that it hath left it almost as a mystery to this day.

The lady Margaret, whom the king's friends called Juno, because she was to him as Juno was to Æneas, stirring both heaven and hell to do him mischief, for a foundation of her particular practices against him, did continually, by all means possible, nourish, maintain, and divulge the flying opinion, that Richard duke of York, second son to Edward the fourth, was not murdered in the Tower, as was given out, but saved alive. For that those who were employed in that barbarous fact, having destroyed

the elder brother, were stricken with remorse and compassion towards the younger, and set him privily at liberty to seek his fortune. This lure she cast abroad, thinking that this fame and belief together with the fresh example of Lambert Simnel, would draw at one time or other some birds to strike upon it. She used likewise a farther diligence, not committing all to chance; for she had some secret espials, like to the Turks' commissioners for children of tribute, to look abroad for handsome and graceful youths, to make Plantagenets, and dukes of York. At the last she did light on one, in whom all things met, as one would wish, to serve her turn for a counterfeit of Richard duke of York.

This was Perkin Warbeck, whose adventures we shall now describe. For first, the years agreed well. Secondly, he was a youth of fine favour and shape. But more than that, he had such a crafty and bewitching fashion, both to move pity, and to induce belief, as was like a kind of fascination and enchantment to those that saw him or heard him. Thirdly, he had been from his childhood such a wanderer, or, as the king called him, such a landloper, as it was extreme hard to hunt out his nest and parents. Neither again could any man, by company or conversing with him, be able to say or detect well what he was, he did so flit from place to place. Lastly, there was a circumstance, which is mentioned by one that wrote in the same time, that is very likely to have made somewhat to the matter: which is, that king Edward the fourth was his godfather. Which as it is somewhat suspicious for a wanton prince to become gossip in so mean a house, and might make a man think, that he might indeed have in him some base blood of the house of York; so at the least, though that were not, it might give the occasion to the boy, in being called king Edward's godson, or perhaps in sport king Edward's son, to entertain such thoughts into his head. For tutor he had none, for ought that appears, as Lambert Simnel had, until he came unto the lady Margaret who instructed him.

Thus therefore it came to pass: There was a townsman of Tournay, that had borne office in that town, whose name was John Osbeck, a convert jew, married to Catherine de Faro, whose business drew him to live for a time with his wife at London in king Edward the fourth's days. During which time he had a son by her, and being known in court, the king, either out of religious nobleness, because he was a convert, or upon some private acquaintance, did him the honour to be godfather to his child, and named him Peter. But afterwards, proving a dainty and effeminate youth, he was commonly called by the diminutive of his name, Peterkin, or Perkin. For as for the name of Warbeck, it was given him when they did but guess at it, before examinations had been taken. But yet he had been so much talked on by that name, as it stuck by him after his true name of Osbeck was known. While he was a young child, his parents returned with him to Tournay. Then was he placed in a house of a kinsman of his, called John Stenbeck, at Antwerp, and so roved up and down between Antwerp and Tournay, and other towns of Flanders, for a good time; living much in English company, and having the English tongue perfect. In which time, being grown a comely youth, he was brought by some of the espials of the lady Margaret into her presence. Who viewing him well, and seeing that he had a face and personage that would bear a noble fortune; and finding him otherwise of a fine spirit and winning behaviour; thought she had now found a curious piece of marble to carve out an image of the duke of York. She kept him by her a great while, but with extreme secrecy. The while she instructed him by many cabinet conferences. First, in princely behaviour and gesture; teaching him how he should keep state, and yet with a modest sense of his misfortunes. Then she informed him of all the circumstances and particulars that concerned the person of Richard duke of York, which he was to act; describing unto him the personages, lineaments, and features of the king and queen his pretended parents; and of his brother, and sisters, and divers others, that were nearest him in his childhood; together with all passages, some secret, some common, that were fit for a child's memory, until the death of king Edward. Then she added the particulars of the time from the king's death, until he and his brother were committed to the Tower, as well during the time he was abroad, as while he was in sanctuary. As for the times while he was in the Tower, and the manner of his brother's death, and his own escape; she knew they were things that a very few could control. And therefore she taught him only to tell a smooth and likely tale of those matters; warning him not to vary from it. It was agreed likewise between them, what account he should give of his peregrination abroad, intermixing many things which were true, and such as they knew others could testify, for the credit of the rest; but still making them to hang together with the part he was to play. She taught him likewise how to avoid sundry captious and tempting questions, which were like to be asked of him. But in this she found him of himself so nimble and shifting, as she trusted much to his own wit and readiness; and therefore laboured the less in it. Lastly, she raised his thoughts with some present rewards, and farther promises; setting before him chiefly the glory and fortune of a crown if things went well, and a sure refuge to her court, if the worst should fall. After such time as she thought he was perfect in his lesson, she began to cast with herself from what coast this blazing star should first appear, and at what time it must be upon the horizon of Ireland; for there had the like meteor strong influence before. The time of the apparition to be, when the king should be engaged into a war with France. But well she knew, that whatsoever should come from her, would be held suspected. And therefore, if he should go out of Flanders immediately into Ireland, she might be thought to have some hand in it. And besides, the time was not yet ripe; for that the two kings were then upon terms of peace. Therefore she wheeled about; and to put all suspicion afar off, and

loth to keep him any longer by her, for that she knew secrets are not long-lived, she sent him unknown into Portugal with the lady Brampton, an English lady, that embarked for Portugal at that time; with some *privado* of her own, to have an eye upon him; and there he was to remain, and to expect her farther directions. In the mean time she omitted not to prepare things for his better welcome and accepting, not only in the kingdom of Ireland, but in the court of France. He continued in Portugal about a year; and by that time the king of England called his parliament, as hath been said, and declared open war against France. Now did the sign reign, and the constellation was come, under which Perkin should appear. And therefore he was straight sent unto by the duchess to go for Ireland, according to the first designment. In Ireland he did arrive at the town of Cork. When he was thither come, his own tale was, when he made his confession afterwards, that the Irishmen, finding him in some good clothes, came flocking about him, and bare him down that he was the duke of Clarence that had been there before. And after that he was Richard the third's base son. And lastly, that he was Richard duke of York, second son of Edward the fourth. But that he, for his part, renounced all these things, and offered to swear upon the holy evangelists, that he was no such man; till at last they forced it upon him, and bad him fear nothing, and so forth. But the truth is, that immediately upon his coming into Ireland, he took upon him the said person of the duke of York, and drew unto him complices and partakers by all the means he could devise. Insomuch as he wrote his letters unto the earls of Desmond and Kildare, to come in to his aid, and be of his party; the originals of which letters are yet extant.

Somewhat before this time, the duchess had also gained unto her a near servant of king Henry's own, one Stephen Frion, his secretary for the French tongue; an active man, but turbulent and discontented. This Frion had fled over to Charles, the French king, and put himself into his service, at such time as he began to be in open enmity with the king. Now king Charles, when he understood of the person and attempts of Perkin, ready of himself to embrace all advantages against the king of England, instigated by Frion, and formerly prepared by the lady Margaret, forthwith despatched one Lucas and this Frion, in the nature of ambassadors to Perkin, to advertise him of the king's good inclination to him, and that he was resolved to aid him to recover his right against king Henry, an usurper of England, and an enemy of France; and wished him to come over unto him at Paris. Perkin thought himself in heaven now that he was invited by so great a king in so honourable a manner. And imparting unto his friends in Ireland for their encouragement, how fortune called him, and what great hopes he had, sailed presently into France. When he was come to the court of France, the king received him with great honour; saluted, and styled him by the name of the duke of York; lodged him, and accommodated him in great state. And the better to give him the representation and the countenance of a prince, assigned him a guard for his person, whereof the lord Congresall was captain. The courtiers likewise, though it be ill mocking with the French, applied themselves to their king's bent, seeing there was reason of state for it. At the same time there repaired unto Perkin divers Englishmen of quality; Sir George Neville, Sir John Taylor, and about one hundred more; and amongst the rest, this Stephen Frion, of whom we spake, who followed his fortune both then and for a long time after, and was indeed his principal counsellor and instrument in all his proceedings. But all this on the French king's part was but a trick, the better to bow king Henry to peace. And therefore upon the first grain of incense, that was sacrificed upon the altar of peace at Boloign, Perkin was smoked away. Yet would not the French king deliver him up to king Henry, as he was aboured to do, for his honour's sake, but warned him away and dismissed him. And Perkin on his part was as ready to be gone, doubting he might be caught up under-hand. He therefore took his way into Flanders, unto the duchess of Burgundy; pretending that having been variously tossed by fortune, he directed his course thither as to a safe harbour: no ways taking knowledge that he had ever been there before, but as if that had been his first address. The duchess, on the other part, made it as new and strange to see him; pretending, at the first, that she was taught and made wise by the example of Lambert Simnel, how she did admit of any counterfeit stuff; though even in that, she said, she was not fully satisfied. She pretended at the first, and that was ever in the presence of others, to pose him and sift him, thereby to try whether he were indeed the very duke of York or no. But seeming to receive full satisfaction by his answers, she then feigned herself to be transported with a kind of astonishment, mixt of joy and wonder, at his miraculous deliverance; receiving him as if he were risen from death to life: and inferring, that God, who had in such wonderful manner preserved him from death, did likewise reserve him for some great and prosperous fortune. As for his dismission out of France, they interpreted it, not as if he were detected or neglected for a counterfeit deceiver; but contrariwise, that it did show manifestly unto the world, that he was some great matter; for that it was his abandoning that, in effect, made the peace; being no more but the sacrificing of a poor distressed prince unto the utility and ambition of two mighty monarchs. Neither was Perkin, for his part, wanting to himself, either in gracious or princely behaviour, or in ready and apposite answers, or in contenting and caressing those that did apply themselves unto him, or in pretty scorn and disdain to those that seemed to doubt of him; but in all things did notably acquit himself; insomuch as it was generally believed, as well amongst great persons, as amongst the vulgar, that he was indeed duke Richard. Nay, himself, with long and continued counterfeiting, and with oft telling a lie, was turned by habit almost into the thing he seemed to be; and from a liar to a believer.

The duchess therefore, as in a case out of doubt, did him all princely honour, calling him always by the name of her nephew, and giving him the delicate title of the white rose of England: and appointed him a guard of thirty persons, halberdiers, clad in a party-coloured livery of murrey and blue, to attend his person. Her court likewise, and generally the Dutch and strangers, in their usage towards him, expressed no less respect.

The news hereof came blazing and thundering over into England, that the duke of York was sure alive. As for the name of Perkin Warbeck, it was not at that time come to light, but all the news ran upon the duke of York; that he had been entertained in Ireland, bought and sold in France, and was now plainly avowed, and in great honour in Flanders. These fames took hold of divers; in some upon discontent; in some upon ambition; in some upon levity and desire of change; in some few upon conscience and belief; but in most upon simplicity; and in divers out of dependence upon some of the better sort, who did in secret favour and nourish these bruits. And it was not long ere these rumours of novelty had begotten others of scandal and murmur against the king and his government, taxing him for a great taxer of his people, and discountenancer of his nobility. The loss of Britain, and the peace with France, were not forgotten. But chiefly they fell upon the wrong that he did his queen, in that he did not reign in her right. Wherefore they said that God had now brought to light a masculine branch of the house of York, that would not be at his courtesy, howsoever he did depress his poor lady. And yet, as it fareth in the things which are current with the multitude, and which they affect, these fames grew so general, as the authors were lost in the generality of speakers. They being like running weeds that have no certain root; or like footings up and down, impossible to be traced; but after a while these ill humours drew to a head, and settled secretly in some eminent persons; which were, Sir William Stanley, lord chamberlain of the king's household, the lord Fitzwalter, Sir Simon Mountfort, and Sir Thomas Thwaites. These entered into a secret conspiracy to favour duke Richard's title. Nevertheless none engaged their fortunes in this business openly, but two, Sir Robert Clifford, and master William Barley; who sailed over into Flanders, sent indeed from the party of the conspirators here, to understand the truth of those things that passed there, and not without some help of moneys from hence; provisionally to be delivered, if they found and were satisfied, that there was truth in these pretences. The person of Sir Robert Clifford, being a gentleman of fame and family, was extremely welcome to the lady Margaret. Who after she had conference with him, brought him to the sight of Perkin, with whom he had often speech and discourse. So that in the end, won either by the duchess to affect, or by Perkin to believe, he wrote back into England, that he knew the person of Richard duke of York, as well as he knew his own, and that this young man was undoubtedly he. By this means all things grew prepared to revolt and sedition here, and the conspiracy came to have a correspondence between Flanders and England.

The king on his part was not asleep; but to arm or levy forces yet, he thought would but show fear, and do this idol too much worship. Nevertheless the ports he did shut up, or at least kept a watch on them, that none should pass to or fro that was suspected: but for the rest, he chose to work by countermine. His purposes were two; the one, to lay open the abuse; the other, to break the knot of the conspirators. To detect the abuse, there were but two ways; the first, to make it manifest to the world that the duke of York was indeed murdered; the other, to prove that were he dead or alive, yet Perkin was a counterfeit. For the first, thus it stood. There were but four persons that could speak upon knowledge to the murder of the duke of York; Sir James Tirrel, the employed man from king Richard, John Dighton and Miles Forrest his servants, the two butchers or tormentors, and the priest of the Tower that buried them. Of which four Miles Forrest and the priest were dead, and there remained alive only Sir James Tirrel and John Dighton. These two the king caused to be committed to the Tower, and examined touching the manner of the death of the two innocent princes. They agreed both in a tale, as the king gave out, to this effect: That king Richard having directed his warrant for the putting of them to death to Brackenbury the lieutenant of the Tower, was by him refused. Whereupon the king directed his warrant to Sir James Tirrel, to receive the keys of the Tower from the lieutenant, for the space of a night, for the king's special service. That Sir James Tirrel accordingly repaired to the Tower by night, attended by his two servants aforenamed, whom he had chosen for that purpose. That himself stood at the stair-foot, and sent these two villains to execute the murder. That they smothered them in their bed; and, that done, called up their master to see their naked dead bodies, which they had laid forth. That they were buried under the stairs, and some stones cast upon them. That when the report was made to king Richard, that his will was done, he gave Sir James Tirrel great thanks, but took exception to the place of their burial, being too base for them that were king's children. Whereupon, another night, by the king's warrant renewed, their bodies were removed by the priest of the Tower, and buried by him in some place, which, by means of the priest's death soon after, could not be known. Thus much was then delivered abroad, to be the effect of those examinations; but the king, nevertheless, made no use of them in any of his declarations; whereby, as it seems, those examinations left the business somewhat perplexed. And as for Sir James Tirrel, he was soon after beheaded in the Tower-yard for other matters of treason. But John Dighton, who, it seemeth, spake best for the king, was forthwith set at liberty, and was the principal means of divulging this tradition. Therefore this kind of proof being left so naked, the king used the more diligence in

the latter, for the tracing of Perkin. To this purpose he sent abroad into several parts, and especially into Flanders, divers secret and nimble scouts and spies, some feigning themselves to fly over unto Perkin, and to adhere unto him; and some under other pretences, to learn, search, and discover all the circumstances and particulars of Perkin's parents, birth, person, travels up and down; and in brief, to have a journal, as it were, of his life and doings. He furnished these his employed men liberally with money to draw on and reward intelligences; giving them also in charge, to advertise continually what they found, and nevertheless still to go on. And ever as one advertisement and discovery called up another, he employed other new men, where the business did require it. Others he employed in a more special nature and trust, to be his pioneers in the main countermine. These were directed to insinuate themselves into the familiarity and confidence of the principal persons of the party in Flanders, and so to learn what associates they had, and correspondents, either here in England, or abroad; and how far every one engaged, and what new ones they meant afterwards to try or board. And as this for the persons, so for the actions themselves, to discover to the bottom, as they could, the utmost of Perkin's and the conspirators, their intentions, hopes, and practices. These latter best-be-trust spies had some of them farther instructions, to practise and draw off the best friends and servants of Perkin, by making remonstrance to them, how weakly his enterprise and hopes were built, and with how prudent and potent a king they had to deal; and to reconcile them to the king, with promise of pardon and good conditions of reward. And, above the rest, to assail, sap, and work into the constancy of Sir Robert Clifford; and to win him, if they could, being the man that knew most of their secrets, and who, being won away, would most appal and discourage the rest, and in a manner break the knot.

There is a strange tradition, that the king, being lost in a wood of suspicions, and not knowing whom to trust, had both intelligence with the confessors and chaplains of divers great men; and for the better credit of his espials abroad with the contrary side, did use to have them cursed at Paul's, by name, amongst the bead-roll of the king's enemies, according to the custom of those times. These espials plied their charge so roundly, as the king had an anatomy of Perkin alive; and was likewise well informed of the particular correspondent conspirators in England, and many other mysteries were revealed; and Sir Robert Clifford in especial won to be assured to the king, and industrious and officious for his service. The king therefore receiving a rich return of his diligence, and great satisfaction touching a number of particulars, first divulged and spread abroad the imposture and juggling of Perkin's person and travels, with the circumstances thereof, throughout the realm; not by proclamation, because things were yet in examination, and so might receive the more or the less, but by court-fames, which commonly print better than printed proclamations. Then thought he it also time to send an ambassage unto arch-duke Philip into Flanders, for the abandoning and dismissing of Perkin. Herein he employed Sir Edward Poynings, and Sir William Warham doctor of the canon law. The archduke was then young, and governed by his council; before whom the ambassadors had audience: and Dr. Warham spake in this manner:

"My lords, the king our master is very sorry, that England and your country here of Flanders, having been counted as man and wife for so long time; now this country of all others should be the stage, where a base counterfeit should play the part of a king of England: not only to his Grace's disquiet and dishonour, but to the scorn and reproach of all sovereign princes. To counterfeit the dead image of a king in his coin is a high offence by all laws, but to counterfeit the living image of a king in his person, exceedeth all falsifications except it should be that of a Mahomet, or an antichrist, that counterfeit divine honour. The king hath too great an opinion of this sage council, to think that any of you is caught with this fable, though way may be given by you to the passion of some, the thing in itself is so improbable. To set testimonies aside of the death of duke Richard, which the king hath upon record, plain and infallible, because they may be thought to be in the king's own power, let the thing testify for itself. Sense and reason no power can command. Is it possible, trow you, that king Richard should damn his soul, and foul his name with so abominable a murder, and yet not mend his case? Or do you think, that men of blood, that were his instruments, did turn to pity in the midst of their execution? Whereas in cruel and savage beasts, and men also, the first draught of blood doth yet make them more fierce and enraged. Do you not know, that the bloody executioners of tyrants do go to such errands with a halter about their neck; so that if they perform not, they are sure to die for it? And do you think that these men would hazard their own lives, for sparing another's? Admit they should have saved him; what should they have done with him? Turn him into London streets, that the watchmen, or any passenger that should light upon him, might carry him before a justice, and so all come to light? Or should they have kept him by them secretly? That surely would have required a great deal of care, charge, and continual fears. But, my lords, I labour too much in a clear business. The king is so wise, and hath so good friends abroad, as now he knoweth duke Perkin from his cradle. And because he is a great prince, if you have any good poet here, he can help him with notes to write his life; and to parallel him with Lambert Simnel, now the king's falconer. And therefore, to speak plainly to your lordships, it is the strangest thing in the world, that the lady Margaret, excuse us if we name her, whose malice to the king is both causeless and endless, should now when she is old, at the time when other women give over child-bearing, bring forth two such monsters; being not the births of nine or ten months, but of many years. And whereas other natural

mothers bring forth children weak, and not able to help themselves; she bringeth forth tall striplings, able soon after their coming into the world to bid battle to mighty kings. My lords, we stay unwillingly upon this part. We would to God, that lady would once taste the joys which God Almighty doth serve up unto her in beholding her niece to reign in such honour, and with so much royal issue, which she might be pleased to account as her own. The king's request unto the archduke, and your lordships, might be; that according to the example of king Charles, who hath already discarded him, you would banish this unworthy fellow out of your dominions. But because the king may justly expect more from an ancient confederate, than from a new reconciled enemy, he maketh his request unto you to deliver him up into his hands: pirates, and impostors of this sort, being fit to be accounted the common enemies of mankind, and no ways to be protected by the law of nations."

After some time of deliberation, the ambassadors received this short answer:

"That the archduke, for the love of king Henry, would in no sort aid or assist the pretended duke, but in all things conserve the amity he had with the king: but for the duchess dowager, she was absolute in the lands of her dowry, and that he could not let her to dispose of her own."

The king, upon the return of the ambassadors, was nothing satisfied with this answer. For well he knew, that a patrimonial dowry carried no part of sovereignty or command of forces. Besides, the ambassadors told him plainly, that they saw the duchess had a great party in the archduke's council; and that howsoever it was carried in a course of connivance, yet the archduke underhand gave aid and fartherance to Perkin. Wherefore, partly out of courage, and partly out of policy, the king forthwith banished all Flemings, as well their persons as their wares, out of his kingdom; commanding his subjects likewise, and by name his merchants adventurers, which had a residance at Antwerp, to return; translating the mart, which commonly followed the English cloth, unto Calais; and embarred also all farther trade for the future. This the king did, being sensible in point of honour, not to suffer a pretender to the crown of England to affront him so near at hand, and he to keep terms of friendship with the country where he did set up. But he had also a farther reach; for that he knew well, that the subjects of Flanders drew so great commodity from the trade of England, as by this embargo they would soon wax weary of Perkin; and that the tumult of Flanders had been so late and fresh, as it was no time for the prince to displease the people. Nevertheless for form's sake, by way of requital, the archduke did likewise banish the English out of Flanders; which in effect was done to his hand.

The king being well advertised, that Perkin did more trust upon friends and partakers within the realm than upon foreign arms, thought it behoved him to apply the remedy where the disease lay: and to proceed with severity against some of the principal conspirators here within the realm; thereby to purge the ill humours in England, and to cool the hopes in Flanders. Wherefore he caused to be apprehended, almost at an instant, John Ratcliffe lord Fitzwalter, Sir Simon Mountfort, Sir Thomas Thwaites, William D'Aubigney, Robert Ratcliffe, Thomas Cressenor, and Thomas Astwood. All these were arraigned, convicted, and condemned for high treason, in adhering and promising aid to Perkin. Of these the lord Fitzwalter was conveyed to Calais, and there kept in hold, and in hope of life, until soon after, either impatient or betrayed, he dealt with his keeper to have escaped, and thereupon was beheaded. But Sir Simon Mountfort, Robert Ratcliffe, and William D'Aubigney, were beheaded immediately after their condemnation. The rest were pardoned, together with many others, clerks and laics, amongst which were two Dominican friers, and William Worseley dean of Paul's; which latter sort passed examination, but came not to public trial.

The lord chamberlain at that time was not touched; whether it were that the king would not stir too many humours at once, but, after the manner of good physicians, purge the head last; or that Clifford, from whom most of these discoveries came, reserved that piece for his own coming over; signifying only to the king in the mean time, that he doubted there were some greater ones in the business, whereof he would give the king farther account when he came to his presence.

Upon Alhallows-day even, being now the tenth year of the king's reign, the king's second son Henry was created duke of York; and as well the duke, as divers others, noblemen, knights-bachelors, and gentlemen of quality, were made knights of the Bath, according to the ceremony. Upon the morrow after twelfth-day, the king removed from Westminster, where he had kept his Christmas, to the Tower of London. This he did as soon as he had advertisement that Sir Robert Clifford, in whose bosom or budget most of Perkin's secrets were laid up, was come into England. And the place of the Tower was chosen to that end, that if Clifford should accuse any of the great ones, they might, without suspicion, or noise, or sending abroad of warrants, be presently attached; the court and prison being within the cincture of one wall. After a day or two, the king drew unto him a selected council, and admitted Clifford to his presence; who first fell down at his feet, and in all humble manner craved the king's pardon; which the king then granted, though he were indeed secretly assured of his life before. Then commanded to tell his knowledge, he did amongst many others, of himself, not interrogated, impeach Sir William Stanley, the lord chamberlain of the king's household.

The king seemed to be much amazed at the naming of this lord, as if he had heard the news of some strange and fearful prodigy. To hear a man that had done him service of so high a nature, as to save his life, and set the crown upon his head; a man that enjoyed, by his favour and advancement, so great a fortune both in honour and riches; a man, that was tied unto him in so near a band of alliance, his brother having married the king's

mother; and lastly, a man to whom he had committed the trust of his person, in making him his chamberlain: that this man, no ways disgraced, no ways discontent, no ways put in fear, should be false unto him. Clifford was required to say over again and again, the particulars of his accusation; being warned, that in a matter so unlikely, and that concerned so great a servant of the king's, he should not in any wise go too far. But the king finding that he did sadly and constantly, without hesitation or varying, and with those civil protestations that were fit, stand to that that he had said, offering to justify it upon his soul and life, he caused him to be removed. And after he had not a little bemoaned himself unto his council there present, gave order that Sir William Stanley should be restrained in his own chamber where he lay before, in the square tower: and the next day he was examined by the lords. Upon his examination he denied little of that wherewith he was charged, nor endeavoured much to excuse or extenuate his fault: so that, not very wisely, thinking to make his offence less by confession, he made it enough for condemnation. It was conceived, that he trusted much to his former merits, and the interest that his brother had in the king. But those helps were overweighed by divers things that made against him, and were predominant in the king's nature and mind. First, an over-merit; for convenient merit, unto which reward may easily reach, doth best with kings. Next, the sense of his power; for the king thought, that he that could set him up, was the more dangerous to pull him down. Thirdly, the glimmering of a confiscation; for he was the richest subject for value in the kingdom: there being found in his castle of Holt forty thousand marks in ready money and plate, besides jewels, household-stuff, stocks upon his grounds, and other personal estate, exceeding great. And for his revenue in land and fee, it was three thousand pounds a year of old rent, a great matter in those times. Lastly, the nature of the time; for if the king had been out of fear of his own estate, it was not unlike he would have spared his life. But the cloud of so great a rebellion hanging over his head, made him work sure. Wherefore after some six weeks' distance of time, which the king did honourably interpose, both to give space to his brother's intercession, and to show to the world that he had a conflict with himself what he should do; he was arraigned of high treason, and condemned, and presently after beheaded.

Yet is it to this day left but in dark memory, both what the case of this noble person was, for which he suffered; and what likewise was the ground and cause of his defection, and the alienation of his heart from the king. His case was said to be this; That in discourse between Sir Robert Clifford and him he had said, "That if he were sure that that young man were king Edward's son, he would never bear arms against him." This case seems somewhat a hard case, both in respect of the conditional, and in respect of the other words. But for the conditional, it seemeth the judges of that time, who were learned men, and the three chief of them of the privy-council, thought it was a dangerous thing to admit ifs and ands, to qualify words of treason; whereby every man might express his malice, and blanch his danger. And it was like to the case, in the following times, of Elizabeth Barton, the holy maid of Kent; who had said, "That if king Henry the eighth did not take Catherine his wife again, he should be deprived of his crown, and die the death of a dog." And infinite cases may be put of like nature; which, it seemeth, the grave judges taking into consideration, would not admit of treasons on condition. And as for the positive words, "That he would not bear arms against king Edward's son;" though the words seem calm, yet it was a plain and direct overruling of the king's title, either by the line of Lancaster, or by act of parliament; which, no doubt, pierced the king more, than if Stanley had charged his lance upon him in the field. For if Stanley would hold that opinion, that a son of king Edward had still the better right, he being so principal a person of authority and favour about the king, it was to teach all England to say as much. And therefore, as those times were, that speech touched the quick. But some writers do put this out of doubt; for they say, that Stanley did expressly promise to aid Perkin, and sent him some help of treasure.

Now for the motive of his falling off from the king: it is true, that at Bosworth-field the king was beset, and in a manner enclosed round about by the troops of king Richard, and in manifest danger of his life; when this Stanley was sent by his brother, with three thousand men to his rescue, which he performed so, that king Richard was slain upon the place. So as the condition of mortal men is not capable of a greater benefit, than the king received by the hands of Stanley; being like the benefit of Christ, at once to save and crown. For which service the king gave him great gifts, made him his counsellor and chamberlain: and, somewhat contrary to his nature, had winked at the great spoils of Bosworth-field, which came almost wholly to this man's hands, to his infinite enriching. Yet nevertheless, blown up with the conceit of his merit, he did not think he had received good measure from the king, at least not pressing down and running over, as he expected. And his ambition was so exorbitant and unbounded, as he became suitor to the king for the earldom of Chester: which ever being a kind of appendage to the principality of Wales, and using to go to the king's son, his suit did not only end in a denial but in a distaste: the king perceiving thereby, that his desires were intemperate, and his cogitations vast and irregular, and that his former benefits were but cheap, and lightly regarded by him. Wherefore the king began not to brook him well. And as a little leaven of new distaste doth commonly sour the whole lump of former merits, the king's wit began now to suggest unto his passion, that Stanley at Bosworth-field, though he came time enough to save his life, yet he stayed long enough to endanger it. But yet having no matter against him, he continued him in his places until this his fall.

After him was made lord chamberlain Giles lord D'Aubigney, a man of great sufficiency and valour: the more because he was gentle and moderate.

There was a common opinion, that Sir Robert Clifford, who now was become the state informer, was from the beginning an emissary and spy of the king's; and that he fled over into Flanders with his consent and privity. But this is not probable; both because he never recovered that degree of grace which he had with the king before his going over; and chiefly, for that the discovery which he had made touching the lord chamberlain, which was his great service, grew not from any thing he learned abroad, for that he knew it well before he went.

These executions, and especially that of the lord chamberlain, which was the chief strength of the party, and by means of Sir Robert Clifford, who was the most inward man of trust amongst them, did extremely quail the design of Perkin and his complices, as well through discouragement as distrust. So that they were now, like sand without lime, ill bound together; especially as many as were English, who were at a gaze, looking strange one upon another, not knowing who was faithful to their side; but thinking, that the king, what with his baits, and what with his nets, would draw them all unto him that were any thing worth. And indeed it came to pass, that divers came away by the thread, sometimes one, and sometimes another. Barley, that was joint commissioner with Clifford, did hold out one of the longest, till Perkin was far worn; yet made his peace at the length. But the fall of this great man, being in so high authority and favour, as was thought, with the king; and the manner of carriage of the business, as if there had been secret inquisition upon him for a great time before; and the cause for which he suffered, which was little more than for saying in effect that the title of York was better than the title of Lancaster; which was the case of almost every man, at the least in opinion; was matter of great terror amongst all the king's servants and subjects; insomuch as no man almost thought himself secure, and men durst scarce commune or talk one with another, but there was a general diffidence every where: which nevertheless made the king rather more absolute than more safe. For "bleeding inwards, and shut vapours, strangle soonest, and oppress most."

Hereupon presently came forth swarms and volleys of libels, which are the gusts of liberty of speech restrained, and the females of sedition, containing bitter invectives and slanders against the king and some of the council: for the contriving and dispersing whereof, after great diligence of inquiry, five mean persons were caught up and executed.

Meanwhile the king did not neglect Ireland, being the soil where these mushrooms and upstart weeds, that spring up in a night, did chiefly prosper. He sent therefore from hence, for the better settling of his affairs there, commissioners of both robes, the prior of Lanthony, to be his chancellor in that kingdom; and Sir Edward Poynings, with a power of men, and a marshal commission, together with a civil power of his lieutenant, with a clause, that the earl of Kildare, then deputy, should obey him. But the wild Irish, who were the principal offenders, fled into the woods and bogs, after their manner; and those that knew themselves guilty in the pale fled to them. So that Sir Edward Poynings was enforced to make a wild chase upon the wild Irish: where, in respect of the mountains and fastnesses, he did little good. Which, either out of a suspicious melancholy upon his bad success, or the better to save his service from disgrace, he would needs impute unto the comfort that the rebels should receive underhand from the earl of Kildare; every light suspicion growing upon the earl, in respect of the Kildare that was in the action of Lambert Simnel, and slain at Stokefield. Wherefore he caused the earl to be apprehended, and sent into England; where, upon examination, he cleared himself so well, as he was replaced in his government. But Poynings, the better to make compensation of the meagreness of his service in the wars by acts of peace, called a parliament; where was made that memorable act, which at this day is called Poynings' law, whereby all the statutes of England were made to be of force in Ireland: for before they were not, neither are any now in force in Ireland, which were made in England since that time; which was the tenth year of the king.

About this time began to be discovered in the king that disposition, which afterwards, nourished and whet on by bad counsellors and ministers, proved the blot of his times: which was the course he took to crush treasure out of his subjects' purses, by forfeitures upon penal laws. At this men did startle the more at this time, because it appeared plainly to be in the king's nature, and not out of his necessity, he being now in float for treasure: for that he had newly received the peace-money from France, the benevolence-money from his subjects, and great casualties upon the confiscations of the lord chamberlain, and divers others. The first noted case of this kind was that of Sir William Capel, alderman of London; who, upon sundry penal laws, was condemned in the sum of seven and twenty hundred pounds, and compounded with the king for sixteen hundred: and yet after, Empson would have cut another chop out of him, if the king had not died in the instant.

The summer following, the king, to comfort his mother, whom he did always tenderly love and revere, and to make open demonstration to the world, that the proceedings against Sir William Stanley, which was imposed upon him by necessity of state, had not in any degree diminished the affection he bare to Thomas his brother, went in progress to Latham, to make merry with his mother and the earl, and lay there divers days.

During this progress, Perkin Warbeck, finding that time and temporizing, which, whilst his practices were covert and wrought well in England, made for him; did now, when they were discovered and defeated, rather make against him, for that when matters once go down the hill, they stay not without a new force; resolved to try his adventure in some exploit upon England: hoping still upon the affections of the common people towards the house of York. Which body of common people he thought was not to be practised upon, as persons of quality

are; but that the only practice upon their affections was to set up a standard in the field. The place where he should make his attempt, he chose to be the coast of Kent.

The king by this time was grown to such a height of reputation for cunning and policy, that every accident and event that went well, was laid and imputed to his foresight, as if he had set it before: as in this particular of Perkin's design upon Kent. For the world would not believe afterwards, but the king, having secret intelligence of Perkin's intention for Kent, the better to draw it on, went of purpose into the north afar off, laying an open side unto Perkin, to make him come to the close, and so to trip up his heels, having made sure in Kent beforehand.

But so it was, that Perkin had gathered together a power of all nations, neither in number, nor in the hardiness and courage of the persons, contemptible, but in their nature and fortunes to be feared, as well of friends as enemies; being bankrupts, and many of them felons, and such as lived by rapine. These he put to sea, and arrived upon the coast of Sandwich and Deal in Kent, about July.

There he cast anchor, and to prove the affections of the people, sent some of his men to land, making great boasts of the power that was to follow. The Kentish men, perceiving that Perkin was not followed by any English of name or account, and that his forces consisted but of strangers born, and most of them base people and freebooters, fitter to spoil a coast than to recover a kingdom; resorting unto the principal gentlemen of the country, professed their loyalty to the king, and desired to be directed and commanded for the best of the king's service. The gentlemen entering into consultation, directed some forces in good number to show themselves upon the coast; and some of them to make signs to entice Perkin's soldiers to land, as if they would join with them; and some others to appear from some other places, and to make semblance as if they fled from them, the better to encourage them to land. But Perkin, who by playing the prince, or else taught by secretary Frion, had learned thus much, that people under command do use to consult, and after to march in order, and rebels contrariwise run upon a head together in confusion, considering the delay of time, and observing their orderly and not tumultuary arming, doubted the worst. And therefore the wily youth would not set one foot out of his ship, till he might see things were sure. Wherefore the king's forces, perceiving that they could draw on no more than those that were formerly landed, set upon them and cut them in pieces, ere they could fly back to their ships. In which skirmish, besides those that fled and were slain, there were taken about a hundred and fifty persons. Which, for that the king thought, that to punish a few for example was gentleman's pay; but for rascal people, they were to be cut off every man, especially in the beginning of an enterprise: and likewise for that he saw, that Perkin's forces would now consist chiefly of such rabble and scum of desperate people, he therefore hanged them all for the greater terror. They were brought to London all railed in ropes, like a team of horses in a cart, and were executed some of them at London and Wapping, and the rest at divers places upon the sea-coast of Kent, Sussex, and Norfolk, for sea-marks or light-houses, to teach Perkin's people to avoid the coast. The king being advertized of the landing of the rebels, thought to leave his progress: but being certified the next day, that they were partly defeated, and partly fled, he continued his progress, and sent Sir Richard Guildford into Kent in message; who calling the country together, did much commend from the king their fidelity, manhood, and well handling of that service; and gave them all thanks, and, in private, promised reward to some particulars.

Upon the sixteenth of November, this being the eleventh year of the king, was holden the serjeants' feast at Ely-place, there being nine serjeants of that call. The king, to honour the feast, was present with his queen at the dinner; being a prince that was ever ready to grace and countenance the professors of the law; having a little of that, that as he governed his subjects by his laws, so he governed his laws by his lawyers.

This year also the king entered into league with the Italian potentates for the defence of Italy against France. For king Charles had conquered the realm of Naples, and lost it again, in a kind of felicity of a dream. He passed the whole length of Italy without resistance; so that it was true which pope Alexander was wont to say, That the Frenchmen came into Italy with chalk in their hands, to mark up their lodgings, rather than with swords to fight. He likewise entered and won, in effect, the whole kingdom of Naples itself, without striking stroke. But presently thereupon he did commit and multiply so many errors, as was too great a task for the best fortune to overcome. He gave no contentment to the barons of Naples, of the faction of the Angeovines; but scattered his rewards according to the mercenary appetites of some about him. He put all Italy upon their guard, by the seizing and holding of Ostia, and the protecting of the liberty of Pisa: which made all men suspect, that his purposes looked farther than his title of Naples. He fell too soon at differences with Ludovico Sfortia, who was the man that carried the keys which brought him in, and shut him out. He neglected to extinguish some relics of the war. And lastly, in regard of his easy passage through Italy without resistance, he entered into an overmuch despising of the arms of the Italians; whereby he left the realm of Naples at his departure so much the less provided. So that not long after his return, the whole kingdom revolted to Ferdinando the younger, and the French were quite driven out. Nevertheless Charles did make both great threats and great preparations to re-enter Italy once again. Wherefore at the instance of divers of the states of Italy, and especially of pope Alexander, there was a league concluded between the said pope, Maximilian king of the Romans, Henry king of England, Ferdinando and Isabella king and queen of Spain, for so they are constantly placed in the original treaty throughout, Augustino Barbadico duke of Venice, and Ludovico Sfortia

duke of Milan, for the common defence of their estates: wherein though Ferdinando of Naples was not named as principal, yet, no doubt, the kingdom of Naples was tacitly included as a fee of the church.

There died also this year Cecile duchess of York, mother to king Edward the fourth, at her castle of Barkhamsted, being of extreme years, and who had lived to see three princes of her body crowned, and four murdered. She was buried at Foderingham by her husband.

This year also the king called his parliament, where many laws were made of a more private and vulgar nature, than ought to detain the reader of a history. And it may be justly suspected by the proceedings following, that as the king did excel in good commonwealth laws, so nevertheless he had, in secret, a design to make use of them, as well for collecting of treasure, as for correcting of manners; and so meaning thereby to harrow his people, did accumulate them the rather.

The principal law that was made this parliament, was a law of a strange nature; rather just than legal; and more magnanimous than provident. This law did ordain; That no person that did assist in arms, or otherwise, the king for the time being, should after be impeached therefore, or attainted, either by the course of the law, or by act of parliament. But if any such act of attainder did happen to be made, it should be void and of none effect; for that it was agreeable to reason of estate, that the subject should not inquire of the justness of the king's title, or quarrel; and it was agreeable to good conscience, that, whatsoever the fortune of the war were, the subject should not suffer for his obedience. The spirit of this law was wonderful pious and noble, being like, in matter of war, unto the spirit of David in matter of plague; who said, "If I have sinned, strike me; but what have these sheep done?" Neither wanted this law parts of prudent and deep foresight; for it did the better take away occasion for the people to busy themselves to pry into the king's title; for that howsoever it fell, their safety was already provided for. Besides, it could not but greatly draw unto him the love and hearts of the people, because he seemed more careful for them than for himself. But yet nevertheless it did take off from his party that great tie and spur of necessity, to fight and go victors out of the field; considering their lives and fortunes were put in safety and protected, whether they stood to it or ran away. But the force and obligation of this law was in itself illusory, as to the latter part of it, by a precedent act of parliament to bind or frustrate a future. For a supreme and absolute power cannot conclude itself, neither can that which is in nature revocable be made fixed, no more than if a man should appoint or declare by his will, that if he made any latter will it should be void. And for the case of the act of parliament, there is a notable precedent of it in king Henry the eighth's time; who doubting he might die in the minority of his son, procured an act to pass, That no statute made during the minority of a king, should bind him or his successors, except it were confirmed by the king under his great seal at his full age. But the first act that passed in king Edward the sixth's time, was an act of repeal of that former act; at which time nevertheless the king was minor. But things that do not bind, may satisfy for the time.

There was also made a shoaring or under-propping act for the benevolence: to make the sums which any person had agreed to pay, and nevertheless were not brought in, to be leviable by course of law. Which act did not only bring in the arrears, but did indeed countenance the whole business, and was pretended to be made at the desire of those that had been forward to pay.

This parliament also was made that good law, which gave the attaint upon a false verdict between party and party, which before was a kind of evangile, and irremediable. It extends not to causes capital, as well because they are for the most part at the king's suit; as because in them, if they be followed in course of indictment, there passeth a double jury, the indictors, and the triers; and so not twelve men, but four and twenty. But it seemeth that was not the only reason; for this reason holdeth not in the appeal. But the great reason was, lest it should tend to the discouragement of jurors in cases of life and death; if they should be subject to suit and penalty, where the favour of life maketh against them. It extendeth not also to any suit, where the demand is under the value of forty pounds; for that in such cases of petty value it would not quit the charge, to go about again.

There was another law made against a branch of ingratitude in women, who having been advanced by their husbands, or their husbands' ancestors, should alien, and thereby seek to defeat the heirs, or those in remainder, of the lands, whereunto they had been so advanced. The remedy was, by giving power to the next, to enter for a forfeiture.

There was also enacted that charitable law, for the admission of poor suitors *in forma pauperis*, without fee to counsellor, attorney, or clerk, whereby poor men became rather able to vex than unable to sue. There were divers other good laws made that parliament, as we said before; but we still observe our manner, in selecting out those, that are not of a vulgar nature.

The king this while, though he sat in parliament, as in full peace, and seemed to account of the designs of Perkin, who was now returned into Flanders, but as a may-game; yet having the composition of a wise king, stout without, and apprehensive within, had given order for the watching of beacons upon the coasts, and erecting more where they stood too thin, and had a careful eye where this wandering cloud would break. But Perkin, advised to keep his fire, which hitherto burned as it were upon green wood, alive with continual blowing, sailed again into Ireland, whence he had formerly departed, rather upon the hopes of France, than upon any unreadiness or discouragement he found in that people. But in the space of time between, the king's diligence and Poynings's commission had so settled things there, as there was nothing left for Perkin, but the bluster-

ing affection of wild and naked people. Wherefore he was advised by his council, to seek aid of the king of Scotland, a prince young and valorous, and in good terms with his nobles and people, and ill affected to king Henry. At this time also both Maximilian and Charles of France began to bear no good will to the king: the one being displeased with the king's prohibition of commerce with Flanders; the other holding the king for suspect, in regard of his late entry into league with the Italians. Wherefore, besides the open aids of the duchess of Burgundy, which did with sails and oars put on and advance Perkin's designs, there wanted not some secret tides from Maximilian and Charles, which did farther his fortunes: insomuch as they, both by their secret letters and messages, recommended him to the king of Scotland.

Perkin therefore coming into Scotland upon those hopes, with a well-appointed company, was by the king of Scots, being formerly well prepared, honourably welcomed, and soon after his arrival admitted to his presence, in a solemn manner: for the king received him in state in his chamber of presence, accompanied with divers of his nobles. And Perkin well attended, as well with those that the king had sent before him, as with his own train, entered the room where the king was, and coming near to the king, and bowing a little to embrace him, he retired some paces back, and with a loud voice, that all that were present might hear him, made his declaration in this manner:

"High and mighty king, your Grace, and these your nobles here present, may be pleased benignly to bow your ears, to hear the tragedy of a young man, that by right ought to hold in his hand the ball of a kingdom; but by fortune is made himself a ball, tossed from misery to misery, and from place to place. You see here before you the spectacle of a Plantagenet, who hath been carried from the nursery to the sanctuary; from the sanctuary to the direful prison; from the prison to the hand of the cruel tormentor; and from that hand to the wide wilderness, as I may truly call it, for so the world hath been to me. So that he that is born to a great kingdom, hath not ground to set his foot upon, more than this where he now standeth by your princely favour. Edward the fourth, late king of England, as your Grace cannot but have heard, left two sons, Edward, and Richard duke of York, both very young. Edward the eldest succeeded their father in the crown, by the name of king Edward the fifth: but Richard duke of Gloucester, their unnatural uncle, first thirsting after the kingdom, through ambition, and afterwards thirsting for their blood, out of desire to secure himself, employed an instrument of his, confident to him, as he thought, to murder them both. But this man that was employed to execute that execrable tragedy, having cruelly slain king Edward, the eldest of the two, was moved partly by remorse, and partly by some other means, to save Richard his brother; making a report nevertheless to the tyrant, that he had performed his commandment to both brethren. This report was accordingly believed, and published generally: so that the world hath been possessed of an opinion, that they both were barbarously made away; though ever truth hath some sparks that fly abroad, until it appear in due time, as this hath had. But Almighty God, that stopped the mouth of the lion, and saved little Joash from the tyranny of Athaliah, when she massacred the king's children; and did save Isaac, when the hand was stretched forth to sacrifice him; preserved the second brother. For I myself, that stand here in your presence, am that very Richard, duke of York, brother of that unfortunate prince, king Edward the fifth, now the most rightful surviving heir male to that victorious and most noble Edward, of that name the fourth, late king of England. For the manner of my escape, it is fit it should pass in silence, or, at least, in a more secret relation; for that it may concern some alive, and the memory of some that are dead. Let it suffice to think, that I had then a mother living, a queen, and one that expected daily such a commandment from the tyrant, for the murdering of her children. Thus in my tender age escaping by God's mercy out of London, I was secretly conveyed over sea: where after a time the party that had me in charge, upon what new fears, change of mind, or practice, God knoweth, suddenly forsook me. Whereby I was forced to wander abroad, and to seek mean conditions for the sustaining of my life. Wherefore distracted between several passions, the one of fear to be known, lest the tyrant should have a new attempt upon me; the other of grief and disdain to be unknown, and to live in that base and servile manner that I did; I resolved with myself to expect the tyrant's death, and then to put myself into my sister's hands, who was next heir to the crown. But in this season it happened one Henry Tudor, son to Edmund Tudor, earl of Richmond, to come from France and enter into the realm, and by subtile and foul means to obtain the crown of the same, which to me rightfully appertained: so that it was but a change from tyrant to tyrant. This Henry, my extreme and mortal enemy, so soon as he had knowledge of my being alive, imagined and wrought all the subtile ways and means he could, to procure my final destruction; for my mortal enemy hath not only falsely surmised me to be a feigned person, giving me nick-names, so abusing the world; but also, to defer and put me from entry into England, hath offered large sums of money to corrupt the princes and their ministers, with whom I have been retained; and made importune labours to certain servants about my person, to murder or poison me, and others to forsake and leave my righteous quarrel, and to depart from my service, as Sir Robert Clifford, and others. So that every man of reason may well perceive that Henry, calling himself king of England, needed not to have bestowed such great sums of treasure, nor so to have busied himself with importune and incessant labour and industry, to compass my death and ruin, if I had been such a feigned person. But the truth of my cause being so manifest, moved the most christian king Charles, and the lady duchess dowager of Burgundy, my most dear aunt, not only to

acknowledge the truth thereof, but lovingly to assist me. But it seemeth that God above, for the good of this whole island, and the knitting of these two kingdoms of England and Scotland in a strait concord and amity, by so great an obligation, hath reserved the placing of me in the imperial throne of England for the arms and succours of your Grace. Neither is it the first time that a king of Scotland hath supported them that were bereft and spoiled of the kingdom of England, as of late, in fresh memory, it was done in the person of Henry the sixth. Wherefore, for that your Grace hath given clear signs, that you are in no noble quality inferior to your royal ancestors; I, so distressed a prince, was hereby moved to come and put myself into your royal hands, desiring your assistance to recover my kingdom of England; promising faithfully to bear myself towards your Grace no otherwise, than if I were your own natural brother; and will, upon the recovery of mine inheritance, gratefully do you all the pleasure that is in my utmost power."

After Perkin had told his tale, king James answered bravely and wisely; "That whatsoever he were, he should not repent him of putting himself into his hands." And from that time forth, though there wanted not some about him, that would have persuaded him that all was but an illusion; yet notwithstanding, either taken by Perkin's amiable and alluring behaviour, or inclining to the recommendation of the great princes abroad, or willing to take an occasion of a war against king Henry, he entertained him in all things, as became the person of Richard duke of York; embraced his quarrel; and, the more to put it out of doubt, that he took him to be a great prince, and not a representation only, he gave consent, that this duke should take to wife the lady Catharine Gordon, daughter to the earl of Huntley, being a near kinswoman to the king himself, and a young virgin of excellent beauty and virtue.

Not long after, the king of Scots in person, with Perkin in his company, entered with a great army, though it consisted chiefly of borderers, being raised somewhat suddenly, into Northumberland. And Perkin, for a perfume before him as he went, caused to be published a proclamation * of this tenor following, in the name of Richard duke of York, true inheritor of the crown of England:

"It hath pleased God, who putteth down the mighty from their seat, and exalteth the humble, and suffereth not the hopes of the just to perish in the end, to give us means at the length to show ourselves armed unto our lieges and people of England. But far be it from us to intend their hurt or damage, or to make war upon them, otherwise than to deliver ourselves and them from tyranny and oppression. For our mortal enemy Henry Tudor, a false usurper of the crown of England, which to us by natural and lineal right appertaineth, knowing in his own heart our undoubted right, we being the very Richard duke of York, younger son, and now surviving heir male of the noble and victorious Edward the fourth, late king of England, hath not only deprived us of our kingdom, but likewise by all foul and wicked means sought to betray us, and bereave us of our life. Yet if his tyranny only extended itself to our person, although our royal blood teacheth us to be sensible of injuries, it should be less to our grief. But this Tudor, who boasteth himself to have overthrown a tyrant, hath, ever since his first entrance into his usurped reign, put little in practice, but tyranny and the feats thereof.

"For king Richard, our unnatural uncle, although desire of rule did blind him, yet in his other actions, like a true Plantagenet, was noble, and loved the honour of the realm, and the contentment and comfort of his nobles and people. But this our mortal enemy, agreeable to the meanness of his birth, hath trodden under foot the honour of this nation: selling our best confederates for money, and making merchandise of the blood, estates, and fortunes of our peers and subjects, by feigned wars, and dishonourable peace, only to enrich his coffers. Nor unlike hath been his hateful misgovernment and evil deportments at home. First, he hath, to fortify his false quarrel, caused divers nobles of this our realm, whom he held suspect and stood in dread of, to be cruelly murdered; as our cousin Sir William Stanley, lord chamberlain, Sir Simon Mountfort, Sir Robert Ratcliffe, William D'Aubigny, Humphrey Stafford, and many others, besides such as have dearly bought their lives with intolerable ransoms: some of which nobles are now in the sanctuary. Also he hath long kept, and yet keepeth in prison, our right entirely well-beloved cousin, Edward, son and heir to our uncle duke of Clarence, and others; withholding from them their rightful inheritance, to the intent they should never be of might and power to aid and assist us at our need, after the duty of their legiances. He also married by compulsion certain of our sisters, and also the sister of our said cousin the earl of Warwick, and divers other ladies of the royal blood, unto certain of his kinsmen and friends of simple and low degree; and putting apart all well disposed nobles, he hath none in favour and trust about his person, but bishop Fox, Smith, Bray, Lovel, Oliver King, David Owen, Risely, Tubervile, Tiler, Chomley, Empson, James Hobart, John Cut, Garth, Henry Wyat, and such other caitiffs and villains of birth, which by subtile inventions, and pilling of the people, have been the principal finders, occasioners, and counsellors of the misrule and mischief now reigning in England.

"We remembering these premises, with the great and execrable offences daily committed and done by our foresaid great enemy and his adherents, in breaking the liberties and franchises of our mother the holy church, upon pretences of wicked and heathenish policy, to the high displeasure of Almighty God, besides the manifold treasons, abominable murders, manslaughters, robberies, extortions, and daily pilling of the people by dismes, taxes, tallages, benevolences, and other unlawful impositions, and grievous exactions, with many other

* The original of this proclamation remaineth with Sir Robert Cotton, a worthy preserver and treasurer of rare antiquities; from whose manuscripts I have had much light for the furnishing of this work.

heinous effects, to the likely destruction and desolation of the whole realm: shall by God's grace, and the help and assistance of the great lords of our blood, with the counsel of other sad persons, see that the commodities of our realm be employed to the most advantage of the same; the intercourse of merchandise betwixt realm and realm to be ministered and handled as shall more be to the common weal and prosperity of our subjects; and all such dismes, taxes, tallages, benevolences, unlawful impositions, and grievous exactions, as be above rehearsed, to be foredone and laid apart, and never from henceforth to be called upon, but in such cases as our noble progenitors, kings of England, have of old time been accustomed to have the aid, succour, and help of their subjects, and true liege-men.

"And farther, we do, out of our grace and clemency, hereby as well publish and promise to all our subjects remission and free pardon of all by-past offences whatsoever, against our person or estate, in adhering to our said enemy, by whom we know well they have been misled, if they shall within time convenient submit themselves unto us. And for such as shall come with the foremost to assist our righteous quarrel, we shall make them so far partakers of our princely favour and bounty, as shall be highly for the comfort of them and theirs, both during their life and after their death: as also we shall, by all means which God shall put into our hands, demean ourselves to give royal contentment to all degrees and estates of our people, maintaining the liberties of holy church in their entire, preserving the honours, privileges, and pre-eminences of our nobles, from contempt and disparagement according to the dignity of their blood. We shall also unyoke our people from all heavy burdens and endurances, and confirm our cities, boroughs, and towns, in their charters and freedoms, with enlargement where it shall be deserved; and in all points give our subjects cause to think, that the blessed and debonair government of our noble father king Edward, in his last times, is in us revived.

"And forasmuch as the putting to death, or taking alive of our said mortal enemy, may be a mean to stay much effusion of blood, which otherwise may ensue, if by compulsion or fair promises he shall draw after him any number of our subjects to resist us, which we desire to avoid, though we be certainly informed, that our said enemy is purposed and prepared to fly the land, having already made over great masses of the treasure of our crown, the better to support him in foreign parts, we do hereby declare, that whosoever shall take or distress our said enemy, though the party be of never so mean a condition, he shall be by us rewarded with a thousand pound in money, forthwith to be laid down to him, and a hundred marks by the year of inheritance; besides that he may otherwise merit, both toward God and all good people, for the destruction of such a tyrant.

"Lastly, we do all men to wit, and herein we take also God to witness, that whereas God hath moved the heart of our dearest cousin, the king of Scotland, to aid us in person in this our righteous quarrel; it is altogether without any pact or promise, or so much as demand of any thing that may prejudice our crown or subjects: but contrariwise, with promise on our said cousin's part, that whensoever he shall find us in sufficient strength to get the upper hand of our enemy, which we hope will be very suddenly, he will forthwith peaceably return into his own kingdom; contenting himself only with the glory of so honourable an enterprise, and our true and faithful love and amity: which we shall ever by the grace of Almighty God, so order, as shall be to the great comfort of both kingdoms."

But Perkin's proclamation did little edify with the people of England; neither was he the better welcome for the company he came in. Wherefore the king of Scotland seeing none came in to Perkin, nor none stirred any where in his favour, turned his enterprise into a road; and wasted and destroyed the country of Northumberland with fire and sword. But hearing that there were forces coming against him, and not willing that they should find his men heavy and laden with booty, he returned into Scotland with great spoils, deferring farther prosecution till another time. It is said, that Perkin, acting the part of a prince handsomely, when he saw the Scottish fell to waste the country, came to the king in a passionate manner, making great lamentation, and desired, that that might not be the manner of making the war; for that no crown was so dear to his mind, as that he desired to purchase it with the blood and ruin of his country. Whereunto the king answered half in sport, that he doubted much he was careful for that that was none of his, and that he should be too good a steward for his enemy, to save the country to his use.

By this time, being the eleventh year of the king, the interruption of trade between the English and the Flemish began to pinch the merchants of both nations very sore: which moved them by all means they could devise, to affect and dispose their sovereigns respectively, to open the intercourse again; wherein time favoured them. For the archduke and his council began to see, that Perkin would prove but a runagate and citizen of the world; and that it was the part of children to fall out about babies. And the king on his part, after the attempts upon Kent and Northumberland, began to have the business of Perkin in less estimation; so as he did not put it to account in any consultation of state. But that that moved him most was, that being a king that loved wealth and treasure, he could not endure to have trade sick, nor any obstruction to continue in the gate vein, which disperseth that blood. And yet he kept state so far, as first to be sought unto. Wherein the merchant adventurers likewise being a strong company at that time, and well under-set with rich men, and good order, did hold out bravely; taking off the commodities of the kingdom, though they lay dead upon their hands for want of vent. At the last, commissioners met at London to treat: on the king's part, bishop Fox, lord privy seal, viscount Wells, Kendal prior of Saint John's, Warham master of the rolls, who began to gain much upon the king's

opinion; Urswick, who was almost ever one; and Riseley: on the archduke's part, the lord Bevers his admiral, the lord Verunsel president of Flanders, and others. These concluded a perfect treaty, both of amity and intercourse, between the king and the archduke; containing articles both of state, commerce, and free fishing. This is that treaty which the Flemings call at this day *intercursus magnus;* both because it is more complete than the precedent treaties of the third and fourth year of the king; and chiefly to give it a difference from the treaty that followed in the one and twentieth year of the king, which they call *intercursus malus.* In this treaty, there was an express article against the reception of the rebels of either prince by other; purporting, That if any such rebel should be required, by the prince whose rebel he was, of the prince confederate, that forthwith the prince confederate should by proclamation command him to avoid the country: which if he did not within fifteen days, the rebel was to stand proscribed, and put out of protection. But nevertheless in this article Perkin was not named, neither perhaps contained, because he was no rebel. But by this means his wings were clipt of his followers that were English. And it was expressly comprised in the treaty, that it should extend to the territories of the duchess dowager. After the intercourse thus restored, the English merchants came again to their mansion at Antwerp, where they were received with procession and great joy.

The winter following, being the twelfth year of his reign, the king called again his parliament; where he did much exaggerate both the malice, and the cruel predatory war lately made by the king of Scotland: That that king, being in amity with him, and no ways provoked, should so burn in hatred towards him, as to drink of the lees and dregs of Perkin's intoxication, who was every where else detected and discarded: and that when he perceived it was out of his reach to do the king any hurt, he had turned his arms upon unarmed and unprovided people, to spoil only and depopulate, contrary to the laws both of war and peace, concluding, that he could neither with honour, nor with the safety of his people, to whom he did owe protection, let pass these wrongs unrevenged. The parliament understood him well, and gave him a subsidy, limited to the sum of one hundred and twenty thousand pounds, besides two fifteens: for his wars were always to him as a mine of treasure of a strange kind of ore; iron at the top, and gold and silver at the bottom. At this parliament, for that there had been so much time spent in making laws the year before, and for that it was called purposely in respect of the Scottish war, there were no laws made to be remembered. Only there passed a law, at the suit of the merchant adventurers of England against the merchant adventurers of London, for monopolizing and exacting upon the trade: which it seemeth they did a little to save themselves, after the hard time they had sustained by want of trade. But those innovations were taken away by parliament.

But it was fatal to the king to fight for his money; and though he avoided to fight with enemies abroad, yet he was still enforced to fight for it with rebels at home: for no sooner began the subsidy to be levied in Cornwall, but the people there began to grudge and murmur. The Cornish being a race of men, stout of stomach, mighty of body and limb, and that lived hardly in a barren country, and many of them could, for a need, live under ground, that were tinners. They muttered extremely, that it was a thing not to be suffered, that for a little stir of the Scots, soon blown over, they should be thus grinded to powder with payments: and said, it was for them to pay that had too much, and lived idly. But they would eat their bread that they got with the sweat of their brows, and no man should take it from them. And as in the tides of people once up, there want not commonly stirring winds to make them more rough; so this people did light upon two ringleaders or captains of the rout. The one was Michael Joseph, a blacksmith or farrier of Bodmin, a notable talking fellow, and no less desirous to be talked of. The other was Thomas Flammock, a lawyer, who, by telling his neighbours commonly upon any occasion that the law was on their side, had gotten great sway amongst them. This man talked learnedly, and as if he could tell how to make a rebellion, and never break the peace. He told the people, that subsidies were not to be granted, nor levied in this case; that is, for wars of Scotland: for that the law had provided another course, by service of escuage, for those journeys; much less when all was quiet, and war was made but a pretence to poll and pill the people. And therefore that it was good they should not stand like sheep before the shearers, but put on harness, and take weapons in their hands. Yet to do no creature hurt; but go and deliver the king a strong petition, for the laying down of those grievous payments, and for the punishment of those that had given him that counsel; to make others beware how they did the like in time to come. And said, for his part he did not see how they could do the duty of true Englishmen, and good liege-men, except they did deliver the king from such wicked ones, that would destroy both him and the country. Their aim was at archbishop Morton and Sir Reginald Bray, who were the king's skreens in this envy.

After that these two, Flammock and the blacksmith, had by joint and several pratings found tokens of consent in the multitude, they offered themselves to lead them, until they should hear of better men to be their leaders, which they said would be ere long: telling them farther, that they would be but their servants, and first in every danger; but doubted not but to make both the west-end and the east-end of England to meet in so good a quarrel; and that all, rightly understood, was but for the king's service. The people, upon these seditious instigations, did arm, most of them with bows, and arrows, and bills, and such other weapons of rude and country people, and forthwith under the command of their leaders, which in such cases is ever at pleasure, marched out of Cornwall through Devonshire unto Taunton in Somersetshire, without any slaughter, violence, or spoil of the country. At Taunton they killed in fury

an officious and eager commissioner for the subsidy, whom they called the provost of Perin. Thence they marched to Wells, where the lord Audley, with whom their leaders had before some secret intelligence, a nobleman of an ancient family, but unquiet and popular, and aspiring to ruin, came in to them, and was by them, with great gladness and cries of joy, accepted as their general; they being now proud that they were led by a nobleman. The lord Audley led them on from Wells to Salisbury, and from Salisbury to Winchester. Thence the foolish people, who, in effect, led their leaders, had a mind to be led into Kent, fancying that the people there would join with them; contrary to all reason or judgment, considering the Kentish men had showed great loyalty and affection to the king so lately before. But the rude people had heard Flammock say, that Kent was never conquered, and that they were the freest people of England. And upon these vain noises, they looked for great matters at their hands, in a cause which they conceited to be for the liberty of the subject. But when they were come into Kent, the country was so well settled, both by the king's late kind usage towards them, and by the credit and power of the earl of Kent, the lord Abergavenny, and the lord Cobham, as neither gentleman nor yeoman came in to their aid; which did much damp and dismay many of the simpler sort; insomuch as divers of them did secretly fly from the army, and went home: but the sturdier sort, and those that were most engaged, stood by it, and rather waxed proud, than failed in hopes and courage. For as it did somewhat appal them, that the people came not in to them; so it did no less encourage them, that the king's forces had not set upon them, having marched from the west unto the east of England. Wherefore they kept on their way, and encamped upon Blackheath, between Greenwich and Eltham; threatening either to bid battle to the king, for now the seas went higher than to Morton and Bray, or to take London within his view; imagining with themselves, there to find no less fear than wealth.

But to return to the king. When first he heard of this commotion of the Cornish men occasioned by the subsidy, he was much troubled therewith; not for itself, but in regard of the concurrence of other dangers that did hang over him at that time. For he doubted lest a war from Scotland, a rebellion from Cornwall, and the practices and conspiracies of Perkin and his partakers, would come upon him at once: knowing well, that it was a dangerous triplicity to a monarchy, to have the arms of a foreigner, the discontents of subjects, and the title of a pretender to meet. Nevertheless the occasion took him in some part well provided. For as soon as the parliament had broken up, the king had presently raised a puissant army to war upon Scotland. And king James of Scotland likewise, on his part, had made great preparations, either for defence, or for new assailing of England. But as for the king's forces, they were not only in preparation, but in readiness presently to set forth, under the conduct of D'Aubigny the lord chamberlain. But as soon as the king understood of the rebellion of Cornwall, he stayed those forces, retaining them for his own service and safety. But therewithal he despatched the earl of Surrey into the north, for the defence and strength of those parts, in case the Scots should stir. But for the course he held towards the rebels, it was utterly differing from his former custom and practice: which was ever full of forwardness and celerity to make head against them, or to set upon them as soon as ever they were in action. This he was wont to do. But now, besides, that he was attempered by years, and less in love with dangers, by the continued fruition of a crown; it was a time when the various appearance to his thoughts of perils of several natures, and from divers parts, did make him judge it his best and surest way, to keep his strength together in the seat and centre of his kingdom: according to the ancient Indian emblem, in such a swelling season, to hold the hand upon the middle of the bladder, that no side might rise. Besides, there was no necessity put upon him to alter his counsel. For neither did the rebels spoil the country, in which case it had been dishonour to abandon his people: neither on the other side did their forces gather or increase, which might hasten him to precipitate and assail them before they grew too strong. And lastly, both reason of estate and war seemed to agree with this course: for that insurrections of base people are commonly more furious in their beginnings. And by this means also he had them the more at vantage, being tired and harassed with a long march; and more at mercy, being cut off far from their country, and therefore not able by any sudden flight to get to retreat, and to renew the troubles.

When therefore the rebels were encamped on Blackheath upon the hill, whence they might behold the city of London, and the fair valley about it; the king knowing well, that it stood him upon, by how much the more he had hitherto protracted the time in not encountering them, by so much the sooner to despatch with them, that it might appear to have been no coldness in fore-slowing, but wisdom in choosing his time; resolved with all speed to assail them, and yet with that providence and surety, as should leave little to venture or fortune. And having very great and puissant forces about him, the better to master all events and accidents, he divided them into three parts; the first was led by the earl of Oxford in chief, assisted by the earls of Essex and Suffolk. These noblemen were appointed, with some cornets of horse, and bands of foot, and good store of artillery, wheeling about to put themselves beyond the hill where the rebels were encamped; and to beset all the skirts and descents thereof, except those that lay towards London; thereby to have these wild beasts, as it were, in a toil. The second part of his forces, which were those that were to be most in action, and upon which he relied most for the fortune of the day, he did assign to be led by the lord chamberlain, who was appointed to set upon the rebels in front, from that side which is towards London. The third part of his forces, being likewise great and brave forces, he retained about himself, to be ready upon all events to restore the fight, or consummate the victory; and meanwhile to

secure the city. And for that purpose he encamped in person in Saint George's Fields, putting himself between the city and the rebels. But the city of London, especially at the first, upon the near encampment of the rebels, was in great tumult: as it useth to be with wealthy and populous cities, especially those which for greatness and fortune are queens of their regions, who seldom see out of their windows, or from their towers, an army of enemies. But that which troubled them most, was the conceit, that they dealt with a rout of people, with whom there was no composition or condition, or orderly treating, if need were; but likely to be bent altogether upon rapine and spoil. And although they had heard that the rebels had behaved themselves quietly and modestly by the way as they went; yet they doubted much that would not last, but rather make them more hungry, and more in appetite to fall upon spoil in the end. Wherefore there was great running to and fro of people, some to the gates, some to the walls, some to the waterside: giving themselves alarms and panic fears continually. Nevertheless both Tate the lord mayor, and Shaw and Haddon the sheriffs, did their part stoutly and well, in arming and ordering the people. And the king likewise did adjoin some captains of experience in the wars, to advise and assist the citizens. But soon after, when they understood that the king had so ordered the matter, that the rebels must win three battles, before they could approach the city, and that he had put his own person between the rebels and them, and that the great care was, rather how to impound the rebels that none of them might escape, than that any doubt was made to vanquish them; they grew to be quiet and out of fear; the rather for the confidence they reposed, which was not small, in the three leaders, Oxford, Essex, and D'Aubigny; all men well famed and loved amongst the people. As for Jasper duke of Bedford, whom the king used to employ with the first in his wars, he was then sick, and died soon after.

It was the two and twentieth of June, and a Saturday, which was the day of the week the king fancied, when the battle was fought: though the king had, by all the art he could devise, given out a false day, as if he prepared to give the rebels battle on the Monday following, the better to find them unprovided, and in disarray. The lords that were appointed to circle the hill, had some days before planted themselves, as at the receit, in places convenient. In the afternoon, towards the decline of the day, which was done, the better to keep the rebels in opinion that they should not fight that day, the lord D'Aubigny marched on towards them, and first beat some troops of them from Deptford-bridge, where they fought manfully; but, being in no great number, were soon driven back, and fled up to their main army upon the hill. The army at that time, hearing of the approach of the king's forces, were putting themselves in array, not without much confusion. But neither had they placed, upon the first high ground towards the bridge, any forces to second the troops below, that kept the bridge; neither had they brought forwards their main battle, which stood in array far into the heath, near to the ascent of the hill. So that the earl with his forces mounted the hill, and recovered the plain without resistance. The lord D'Aubigny charged them with great fury; insomuch as it had like, by accident, to have branded the fortune of the day: for, by inconsiderate forwardness in fighting at the head of his troops, he was taken by the rebels, but immediately rescued and delivered. The rebels maintained the fight for a small time, and for their persons showed no want of courage; but being ill armed, and ill led, and without horse or artillery, they were with no great difficulty cut in pieces, and put to flight. And for their three leaders, the lord Audley, the blacksmith, and Flammock, as commonly the captains of commotions are but half-couraged men, suffered themselves to be taken alive. The number slain on the rebels' part were some two thousand men; their army amounting, as it is said, unto the number of sixteen thousand. The rest were, in effect, all taken; for that the hill, as was said, was encompassed with the king's forces round about. On the king's part there died about three hundred, most of them shot with arrows, which were reported to be of the length of a tailor's yard; so strong and mighty a bow the Cornish-men were said to draw.

The victory thus obtained, the king created divers bannerets, as well upon Blackheath, where his lieutenant had won the field, whither he rode in person to perform the said creation, as in St. George's Fields, where his own person had been encamped. And for matter of liberality, he did, by open edict, give the goods of all the prisoners unto those that had taken them; either to take them in kind, or compound for them, as they could. After matter of honour and liberality, followed matter of severity and execution. The lord Audley was led from Newgate to Tower-hill, in a paper coat painted with his own arms; the arms reversed, the coat torn, and he at Tower-hill beheaded. Flammock and the blacksmith were hanged, drawn, and quartered at Tyburn: the blacksmith taking pleasure upon the hurdle, as it seemeth by words that he uttered, to think that he should be famous in after times. The king was once in mind to have sent down Flammock and the blacksmith to have been executed in Cornwall, for the more terror: but being advertised that the country was yet unquiet and boiling, he thought better not to irritate the people farther. All the rest were pardoned by proclamation, and to take out their pardons under seal, as many as would. So that, more than the blood drawn in the field, the king did satisfy himself with the lives of only three offenders, for the expiation of this great rebellion.

It was a strange thing to observe the variety and inequality of the king's executions and pardons: and a man would think it, at the first, a kind of lottery or chance. But, looking into it more nearly, one shall find there was reason for it, much more, perhaps, than after so long a distance of time we can now discern. In the Kentish commotion, which was but a handful of men, there were executed to the number of one hundred and fifty: and in this so mighty a rebellion but three. Whether it were

that the king put to account the men that were slain in the field, or that he was not willing to be severe in a popular cause, or that the harmless behaviour of this people, that came from the west of England to the east, without mischief almost, or spoil of the country, did somewhat mollify him, and move him to compassion; or lastly, that he made a great difference between people that did rebel upon wantonness, and them that did rebel upon want.

After the Cornish-men were defeated, there came from Calais to the king an honourable ambassage from the French king, which had arrived at Calais a month before, and there was stayed in respect of the troubles, but honourably entertained and defrayed. The king, at their first coming, sent unto them, and prayed them to have patience, till a little smoke, that was raised in his country, were over, which would soon be: slighting, as his manner was, that openly, which nevertheless he intended seriously.

This ambassage concerned no great affair, but only the prolongation of days for payment of moneys, and some other particulars of the frontiers. And it was, indeed, but a wooing ambassage, with good respects to entertain the king in good affection; but nothing was done or handled to the derogation of the king's late treaty with the Italians.

But during the time that the Cornish-men were in their march towards London, the king of Scotland, well advertised of all that passed, and knowing himself sure of a war from England, whensoever those stirs were appeased, neglected not his opportunity; but thinking the king had his hands full, entered the frontiers of England again with an army, and besieged the castle of Norham in person, with part of his forces, sending the rest to forage the country. But Fox, bishop of Duresme, a wise man, and one that could see through the present to the future, doubting as much before, had caused his castle of Norham to be strongly fortified, and furnished with all kind of munition; and had manned it likewise with a very great number of tall soldiers, more than for the proportion of the castle, reckoning rather upon a sharp assault than a long siege. And for the country likewise, he had caused the people to withdraw their cattle and goods into fast places, that were not of easy approach; and sent in post to the earl of Surrey, who was not far off, in Yorkshire, to come in diligence to the succour. So as the Scottish king both failed of doing good upon the castle, and his men had but a catching harvest of their spoils: and when he understood that the earl of Surrey was coming on with great forces, he returned back into Scotland. The earl, finding the castle freed, and the enemy retired, pursued with all celerity into Scotland, hoping to have overtaken the Scottish king, and to have given him battle; but, not attaining him in time, sat down before the castle of Aton, one of the strongest places, then esteemed, between Berwick and Edinburgh, which in a small time he took. And soon after, the Scottish king retiring farther into his country, and the weather being extraordinary foul and stormy, the earl returned into England. So that the expeditions on both parts were, in effect, but a castle taken, and a castle distressed; not answerable to the puissance of the forces, nor to the heat of the quarrel, nor to the greatness of the expectation.

Amongst these troubles, both civil and external, came into England from Spain, Peter Hialas, some call him Elias, surely he was the forerunner of the good hap that we enjoy at this day: for his ambassage set the truce between England and Scotland; the truce drew on the peace; the peace the marriage; and the marriage the union of the kingdoms; a man of great wisdom, and, as those times were, not unlearned; sent from Ferdinando and Isabella, kings of Spain, unto the king, to treat a marriage between Catherine, their second daughter, and prince Arthur. This treaty was by him set in a very good way, and almost brought to perfection. But it so fell out by the way, that upon some conference which he had with the king touching this business, the king, who had a great dexterity in getting suddenly into the bosom of the ambassadors of foreign princes, if he liked the men; insomuch as he would many times communicate with them of his own affairs, yea, and employ them in his service, fell into speech and discourse incidently, concerning the ending of the debates and differences with Scotland. For the king naturally did not love the barren wars with Scotland, though he made his profit of the noise of them. And he wanted not in the council of Scotland, those that would advise their king to meet him at the half way, and to give over the war with England; pretending to be good patriots, but indeed favouring the affairs of the king. Only his heart was too great to begin with Scotland for the motion of peace. On the other side, he had met with an ally of Ferdinando of Arragon, as fit for his turn as could be. For after that king Ferdinando had, upon assured confidence of the marriage to succeed, taken upon him the person of a fraternal ally to the king, he would not let, in a Spanish gravity, to counsel the king in his own affairs. And the king on his part, not being wanting to himself, but making use of every man's humours, made his advantage of this in such things as he thought either not decent, or not pleasant to proceed from himself; putting them off as done by the council of Ferdinando. Wherefore he was content that Hialas, as in a matter moved and advised from Hialas himself, should go into Scotland, to treat of a concord between the two kings. Hialas took it upon him, and coming to the Scottish king, after he had with much art brought king James to hearken to the more safe and quiet counsels, wrote unto the king, that he hoped that peace would with no great difficulty cement and close, if he would send some wise and temperate counsellor of his own, that might treat of the conditions. Whereupon the king directed bishop Fox, who at that time was at his castle of Norham, to confer with Hialas, and they both to treat with some commissioners deputed from the Scottish king. The commissioners of both sides met. But after much dispute upon the articles and conditions of peace, propounded upon either part, they could not conclude a peace. The chief impediment thereof was the demand of the king to have

Perkin delivered into his hands, as a reproach to all kings, and a person not protected by the law of nations. The king of Scotland, on the other side, peremptorily denied so to do, saying, that he, for his part, was no competent judge of Perkin's title; but that he had received him as a suppliant, protected him as a person fled for refuge, espoused him with his kinswoman, and aided him with his arms, upon the belief that he was a prince; and therefore that he could not now with his honour so unrip, and, in a sort, put a lie upon all that he had said and done before, as to deliver him up to his enemies. The bishop likewise, who had certain proud instructions from the king, at the least in the front, though there were a pliant clause at the foot, that remitted all to the bishop's discretion, and required him by no means to break off in ill terms, after that he had failed to obtain the delivery of Perkin, did move a second point of his instructions, which was, that the Scottish king would give the king an interview in person at Newcastle. But this being reported to the Scottish king, his answer was, that he meant to treat a peace, and not to go a begging for it. The bishop also, according to another article of his instructions, demanded restitution of the spoils taken by the Scottish, or damages for the same. But the Scottish commissioners answered that that was but as water spilt upon the ground, which could not be gotten up again; and that the king's people were better able to bear the loss, than their master to repair it. But in the end, as persons capable of reason, on both sides they made rather a kind of recess than a breach of treaty, and concluded upon a truce for some months following. But the king of Scotland, though he would not formally retract his judgment of Perkin, wherein he had engaged himself so far; yet in his private opinion, upon often speech with the Englishmen, and divers other advertisements, began to suspect him for a counterfeit. Wherefore in a noble fashion he called him unto him, and recounted the benefits and favours that he had done him in making him his ally, and in provoking a mighty and opulent king by an offensive war in his quarrel, for the space of two years together; nay more, that he had refused an honourable peace, whereof he had a fair offer, if he would have delivered him; and that, to keep his promise with him, he had deeply offended both his nobles and people, whom he might not hold in any long discontent: and therefore required him to think of his own fortunes, and to choose out some fitter place for his exile: telling him withal, that he could not say, but the English had forsaken him before the Scottish, for that, upon two several trials, none had declared themselves on his side; but nevertheless he would make good what he said to him at his first receiving, which was, that he should not repent him for putting himself into his hands; for that he would not cast him off, but help him with shipping and means to transport him where he should desire. Perkin, not descending at all from his stage-like greatness, answered the king in few words, that he saw his time was not yet come; but whatsoever his fortunes were, he should both think and speak honour of the king. Taking his leave, he would not think of Flanders, doubting it was but hollow ground for him since the treaty of the archduke, concluded the year before; but took his lady, and such followers as would not leave him, and sailed over into Ireland.

This twelfth year of the king, a little before this time, pope Alexander, who loved best those princes that were furthest off, and with whom he had least to do, taking very thankfully the king's late entrance into league for the defence of Italy, did remunerate him with an hallowed sword and cap of maintenance sent by his nuncio. Pope Innocent had done the like, but it was not received in that glory: for the king appointed the mayor and his brethren to meet the pope's orator at London bridge, and all the streets between the bridge foot, and the palace of Paul's, where the king then lay, were garnished with the citizens, standing in their liveries. And the morrow after, being Allhallows day, the king, attended with many of his prelates, nobles, and principal courtiers, went in procession to Paul's, and the cap and sword were borne before him. And after the procession, the king himself remaining seated in the quire, the lord archbishop, upon the greece of the quire, made a long oration: setting forth the greatness and eminency of that honour which the pope, in these ornaments and ensigns of benediction, had done the king; and how rarely, and upon what high deserts, they used to be bestowed: and then recited the king's principal acts and merits, which had made him appear worthy, in the eyes of his holiness, of this great honour.

All this while the rebellion of Cornwall, whereof we have spoken, seemed to have no relation to Perkin; save that perhaps Perkin's proclamation had stricken upon the right vein, in promising to lay down exactions and payments, and so had made them now and then have a kind thought on Perkin. But now these bubbles by much stirring began to meet, as they used to do upon the top of water. The king's lenity, by that time the Cornish rebels, who were taken and pardoned, and, as it was said, many of them sold by them that had taken them, for twelve pence and two shillings apiece, were come down into their country, had rather imboldened them, than reclaimed them; insomuch as they stuck not to say to their neighbours and countrymen, that the king did well to pardon them, for that he knew he should leave few subjects in England, if he hanged all that were of their mind: and began whetting and inciting one another to renew the commotion. Some of the subtilest of them, hearing of Perkin's being in Ireland, found means to send to him to let him know, that if he would come over to them, they would serve him.

When Perkin heard this news, he began to take heart again, and advised upon it with his council, which were principally three; Herne a mercer, that had fled for debt; Skelton a tailor, and Astley a scrivener; for secretary Frion was gone. These told him, that he was mightily overseen, both when he went into Kent, and when he went into Scotland; the one being a place so near London, and

under the king's nose; and the other a nation so distasted with the people of England, that if they had loved him never so well, yet they would never have taken his part in that company. But if he had been so happy as to have been in Cornwall at the first, when the people began to take arms there, he had been crowned at Westminster before this time. For these kings, as he had now experience, would sell poor princes for shoes. But he must rely wholly upon people; and therefore advised him to sail over with all possible speed into Cornwall: which accordingly he did; having in his company four small barks, with some sixscore or sevenscore fighting men. He arrived in September at Whitsand-Bay, and forthwith came to Bodmin, the blacksmith's town; where there assembled unto him to the number of three thousand men of the rude people. There he set forth a new proclamation, stroking the people with fair promises, and humouring them with invectives against the king and his government. And as it fareth with smoke, that never loseth itself till it be at the highest; he did now before his end raise his style, entitling himself no more Richard duke of York, but Richard the fourth, king of England. His council advised him by all means to make himself master of some good walled town; as well to make his men find the sweetness of rich spoils, and to allure to him all loose and lost people, by like hopes of booty; as to be a sure retreat to his forces, in case they should have any ill day, or unlucky chance in the field. Wherefore they took heart to them, and went on, and besieged the city of Exeter, the principal town for strength and wealth in those parts.

When they were come before Exeter, they forbare to use any force at the first, but made continual shouts and outcries to terrify the inhabitants. They did likewise in divers places call and talk to them from under the walls, to join with them, and be of their party; telling them, that the king would make them another London, if they would be the first town that should acknowledge him. But they had not the wit to send to them, in any orderly fashion, agents or chosen men, to tempt them, and to treat with them. The citizens on their part showed themselves stout and loyal subjects: neither was there so much as any tumult or division amongst them, but all prepared themselves for a valiant defence, and making good the town. For well they saw, that the rebels were of no such number or power, that they needed to fear them as yet; and well they hoped, that before their numbers increased, the king's succours would come in. And, howsoever, they thought it the extremest of evils, to put themselves at the mercy of those hungry and disorderly people. Wherefore setting all things in good order within the town, they nevertheless let down with cords, from several parts of the walls privily, several messengers, that if one came to mischance, another might pass on, which should advertise the king of the state of the town, and implore his aid. Perkin also doubted that succours would come ere long; and therefore resolved to use his utmost force to assault the town. And for that purpose having mounted scaling ladders in divers places upon the walls, made at the same instant an attempt to force one of the gates. But having no artillery nor engines, and finding that he could do no good by ramming with logs of timber, nor by the use of iron bars, and iron crows, and such other means at hand, he had no way left him but to set one of the gates on fire, which he did. But the citizens well perceiving the danger, before the gate could be fully consumed, blocked up the gate, and some space about it on the inside, with faggots and other fuel, which they likewise set on fire, and so repulsed fire with fire; and in the mean time raised up rampiers of earth, and cast up deep trenches, to serve instead of wall and gate. And for the scaladoes, they had so bad success, as the rebels were driven from the walls with the loss of two hundred men.

The king, when he heard of Perkin's siege of Exeter, made sport with it, and said to them that were about him, that the king of rake-hells was landed in the west, and that he hoped now to have the honour to see him, which he could never yet do. And it appeared plainly to those that were about the king, that he was indeed much joyed with the news of Perkin's being in English ground, where he could have no retreat by land; thinking now, that he should be cured of those privy stitches, which he had long had about his heart, and at some times broken his sleeps, in the midst of all his felicity. And to set all men's hearts on fire, he did by all possible means let it appear, that those that should now do him service to make an end of these troubles, should be no less accepted of him, than he that came upon the eleventh hour, and had the whole wages of the day. Therefore now, like the end of a play, a great number came upon the stage at once. He sent the lord chamberlain, and the lord Brook, and Sir Rice ap Thomas, with expedite forces to speed to Exeter, to the rescue of the town, and to spread the fame of his own following in person with a royal army. The earl of Devonshire, and his son, with the Carews, and the Fulfordes, and other principal persons of Devonshire, uncalled from the court, but hearing that the king's heart was so much bent upon this service, made haste with troops that they had raised, to be the first that should succour the city of Exeter, and prevent the king's succours. The duke of Buckingham likewise, with many brave gentlemen, put themselves in arms, not staying either the king's or the lord chamberlain's coming on, but making a body of forces of themselves, the more to endear their merit; signifying to the king their readiness, and desiring to know his pleasure. So that according to the proverb, in the coming down, every saint did help.

Perkin, hearing this thunder of arms, and preparations against him from so many parts, raised his siege, and marched to Taunton; beginning already to squint one eye upon the crown and another upon the sanctuary; though the Cornish-men were become like metal often fired and quenched, churlish, and that would sooner break than bow; swearing and vowing not to leave him, till the uttermost drop of their blood were spilt. He was at his rising

from Exeter between six and seven thousand strong, many having come unto him after he was set before Exeter, upon fame of so great an enterprise, and to partake of the spoil; though upon the raising of the siege some did slip away. When he was come near Taunton, he dissembled all fear, and seemed all the day to use diligence in preparing all things ready to fight. But about midnight, he fled with three-score horse to Bewdley in the New Forest, where he and divers of his company registered themselves sanctuary men, leaving his Cornish-men to the four winds; but yet thereby easing them of their vow, and using his wonted compassion, not to be by when his subjects' blood should be spilt. The king, as soon as he heard of Perkin's flight, sent presently five hundred horse to pursue and apprehend him, before he should get either to the sea, or to that same little island, called a sanctuary. But they came too late for the latter of these. Therefore all they could do, was to beset the sanctuary, and to maintain a strong watch about it, till the king's pleasure were farther known. As for the rest of the rebels, they, being destitute of their head, without stroke stricken, submitted themselves unto the king's mercy. And the king, who commonly drew blood, as physicians do, rather to save life than to spill it, and was never cruel when he was secure; now he saw the danger was past, pardoned them all in the end, except some few desperate persons, which he reserved to be executed, the better to set off his mercy towards the rest. There were also sent with all speed some horse to Saint Michael's mount in Cornwall, where the lady Catharine Gordon was left by her husband, whom in all fortunes she entirely loved; adding the virtues of a wife to the virtues of her sex. The king sent in the greater diligence, not knowing whether she might be with child, whereby the business would not have ended in Perkin's person. When she was brought to the king, it was commonly said that the king received her not only with compassion, but with affection; pity giving more impression to her excellent beauty. Wherefore comforting her to serve as well his eye as his fame, he sent her to his queen, to remain with her; giving her a very honourable allowance for the support of her estate, which she enjoyed both during the king's life, and many years after. The name of the White-rose, which had been given to her husband's false title, was continued in common speech to her true beauty.

The king went forwards on his journey, and made a joyful entrance into Exeter, where he gave the citizens great commendations and thanks; and taking the sword he wore from his side, he gave it to the mayor, and commanded it should be ever after carried before him. There also he caused to be executed some of the ringleaders of the Cornish-men, in sacrifice to the citizens whom they had put in fear and trouble. At Exeter the king consulted with his council, whether he should offer life to Perkin if he would quit the sanctuary, and voluntarily submit himself. The council were divided in opinion: some advised the king to take him out of sanctuary per force, and to put him to death, as in a case of necessity, which in itself dispenseth with consecrated places and things: wherein they doubted not also but the king should find the pope tractable to ratify his deed, either by declaration, or, at least, by indulgence. Others were of opinion, since all was now safe, and no farther hurt could be done, that it was not worth the exposing of the king to new scandal and envy. A third sort fell upon the opinion, that it was not possible for the king ever, either to satisfy the world well touching the imposture, or to learn out the bottom of the conspiracy, except by promise of life and pardon, and other fair means, he should get Perkin into his hands. But they did all in their preambles much bemoan the king's case, with a kind of indignation at his fortune; that a prince of his high wisdom and virtue, should have been so long and so oft exercised and vexed with idols. But the king said, that it was the vexation of God Almighty himself to be vexed with idols, and therefore that that was not to trouble any of his friends; and that for himself, he always despised them; but was grieved that they had put his people to such trouble and misery. But in conclusion, he leaned to the third opinion, and so sent some to deal with Perkin: who seeing himself prisoner, and destitute of all hopes, having tried princes and people, great and small, and found all either false, faint, or unfortunate, did gladly accept of the condition. The king did also, while he was at Exeter, appoint the lord Darcy, and others commissioners, for the finding of all such as were of any value, and had any hand or partaking in the aid of Perkin, or the Cornish-men, either in the field or in the flight.

These commissioners proceeded with such strictness and severity, as did much obscure the king's mercy in sparing of blood, with the bleeding of so much treasure. Perkin was brought into the king's court, but not to the king's presence; though the king, to satisfy his curiosity, saw him sometimes out of a window, or in passage. He was in show at liberty, but guarded with all care and watch that was possible, and willed to follow the king to London. But from his first appearance upon the stage, in his new person of a sycophant or juggler, instead of his former person of a prince, all men may think how he was exposed to the derision not only of the courtiers, but also of the common people, who flocked about him as he went along; that one might know afar off where the owl was, by the flight of birds, some mocking, some wondering, some cursing, some prying and picking matter out of his countenance and gesture to talk of: so that the false honour and respects which he had so long enjoyed, was plentifully repaid in scorn and contempt. As soon as he was come to London, the king gave also the city the solace of this May-game; for he was conveyed leisurely on horseback, but not in any ignominious fashion, through Cheapside and Cornhill, to the Tower; and from thence back again to Westminster, with the * churm of a thousand taunts and reproaches. But to amend the show, there followed a little distance off Perkin, an inward counsellor of

* Cum choro.

his, one that had been sergeant farrier to the king. This fellow, when Perkin took sanctuary, chose rather to take a holy habit than a holy place, and clad himself like a hermit, and in that weed wandered about the country, till he was discovered and taken. But this man was bound hand and foot upon the horse, and came not back with Perkin, but was left at the Tower, and within few days after executed. Soon after, now that Perkin could tell better what himself was, he was diligently examined; and after his confession taken, an extract was made of such parts of them, as were thought fit to be divulged, which was printed and dispersed abroad: wherein the king did himself no right: for as there was a laboured tale of particulars, of Perkin's father and mother, and grandsire and grandmother, and uncles and cousins, by names and surnames, and from what places he travelled up and down; so there was little or nothing to purpose of any thing concerning his designs, or any practices that had been held with him; nor the duchess of Burgundy herself, that all the world did take knowledge of, as the person that had put life and being into the whole business, so much as named or pointed at. So that men missing of that they looked for, looked about for they knew not what, and were in more doubt than before: but the king chose rather not to satisfy, than to kindle coals. At that time also it did not appear by any new examination or commitments, that any other person of quality was discovered or appeached, though the king's closeness made that a doubt dormant.

About this time a great fire in the night-time suddenly began at the king's palace of Shene, near unto the king's own lodgings, whereby a great part of the building was consumed, with much costly household stuff; which gave the king occasion of building from the ground that fine pile of Richmond, which is now standing.

Somewhat before this time also, there fell out a memorable accident: There was one Sebastian Gabato, a Venetian, dwelling in Bristol, a man seen and expert in cosmography and navigation. This man seeing the success, and emulating perhaps the enterprise of Christophorus Columbus in that fortunate discovery towards the south-west, which had been by him made some six years before, conceited with himself, that lands might likewise be discovered towards the north-west. And surely it may be he had more firm and pregnant conjectures of it, than Columbus had of this at the first. For the two great islands of the old and new world, being, in the shape and making of them, broad towards the north, and pointed towards the south; it is likely, that the discovery first began where the lands did nearest meet. And there had been before that time a discovery of some lands, which they took to be islands, and were indeed the continent of America, towards the north-west. And it may be that some relation of this nature coming afterwards to the knowledge of Columbus, and by him suppressed, (desirous rather to make his enterprise the child of his science and fortune, than the follower of a former discovery,) did give him better assurance, that all was not sea, from the west of Europe and Africa unto Asia, than either Seneca's prophecy or Plato's antiquities, or the nature of the tides and land-winds, and the like, which were the conjectures that were given out, whereupon he should have relied: though I am not ignorant, that it was likewise laid unto the casual and wind-beaten discovery, a little before, of a Spanish pilot, who died in the house of Columbus. But this Gabato bearing the king in hand, that he would find out an island endued with rich commodities, procured him to man and victual a ship at Bristol, for the discovery of that island: with whom ventured also three small ships of London merchants, fraught with some gross and slight wares, fit for commerce with barbarous people. He sailed, as he affirmed at his return, and made a chart thereof, very far westwards, with a quarter of the north, on the north side of Terra de Labrador, until he came to the latitude of sixty-seven degrees and a half, finding the seas still open. It is certain also, that the king's fortune had a tender of that great empire of the West-Indies. Neither was it a refusal on the king's part, but a delay by accident, that put by so great an acquest: for Christophorus Columbus, refused by the king of Portugal, who would not embrace at once both east and west, employed his brother Bartholomæus Columbus unto king Henry, to negotiate for his discovery: and it so fortuned, that he was taken by pirates at sea, by which accidental impediment he was long ere he came to the king: so long, that before he had obtained a capitulation with the king for his brother, the enterprise by him was achieved, and so the West-Indies by providence were then reserved for the crown of Castile. Yet this sharpened the king so, that not only in this voyage, but again in the sixteenth year of his reign, and likewise in the eighteenth thereof, he granted forth new commissions for the discovery and investing of unknown lands.

In this fourteenth year also, by God's wonderful providence, that boweth things unto his will, and hangeth great weights upon small wires, there fell out a trifling and untoward accident, that drew on great and happy effects. During the truce with Scotland, there were certain Scottish young gentlemen that came into Norham town, and there made merry with some of the English of the town: and having little to do, went sometimes forth, and would stand looking upon the castle. Some of the garrison of the castle, observing this their doing twice or thrice, and having not their minds purged of the late ill blood of hostility, either suspected them, or quarelled them for spies; whereupon they fell at ill words, and from words to blows; so that many were wounded of either side, and the Scottish-men, being strangers in the town, had the worst; insomuch that some of them were slain, and the rest made haste home. The matter being complained on, and often debated before the wardens of the marches of both sides, and no good order taken; the king of Scotland took it to himself, and being much kindled, sent a herald to the king to make protestation, that if reparation were not done, according to the conditions of the truce, his king did denounce

war. The king, who had often tried fortune, and was inclined to peace, made answer, that what had been done, was utterly against his will, and without his privity; but if the garrison soldiers had been in fault, he would see them punished, and the truce in all points to be preserved. But this answer seemed to the Scottish king but a delay, to make the complaint breathe out with time; and therefore it did rather exasperate him than satisfy him. Bishop Fox, understanding from the king that the Scottish king was still discontent and impatient, being troubled that the occasion of breaking of the truce should grow from his men, sent many humble and deprecatory letters to the Scottish king to appease him. Whereupon king James, mollified by the bishop's submissive and eloquent letters, wrote back unto him, that though he were in part moved by his letters, yet he should not be fully satisfied, except he spake with him, as well about the compounding of the present differences, as about other matters that might concern the good of both kingdoms. The bishop, advising first with the king, took his journey for Scotland. The meeting was at Melross, an abbey of the Cistercians, where the king then abode. The king first roundly uttered unto the bishop his offence conceived for the insolent breach of truce, by his men of Norham castle; whereunto bishop Fox made such humble and smooth answer, as it was like oil unto the wound, whereby it began to heal: and this was done in the presence of the king and his council. After, the king spake with the bishop apart, and opened himself unto him, saying, that these temporary truces and peaces were soon made and soon broken, but that he desired a straiter amity with the king of England; discovering his mind, that if the king would give him in marriage the lady Margaret, his eldest daughter, that indeed might be a knot indissoluble. That he knew well what place and authority the bishop deservedly had with his master: therefore, if he would take the business to heart, and deal in it effectually, he doubted not but it would succeed well. The bishop answered soberly, that he thought himself rather happy than worthy to be an instrument in such a matter, but would do his best endeavour. Wherefore the bishop returning to the king, and giving account what had passed, and finding the king more than well disposed in it, gave the king advice; first to proceed to a conclusion of peace, and then to go on with the treaty of marriage by degrees. Hereupon a peace was concluded, which was published a little before Christmas, in the fourteenth year of the king's reign, to continue for both the kings' lives, and the over-liver of them, and a year after. In this peace there was an article contained, that no Englishman should enter into Scotland, and no Scottishman into England, without letters commendatory from the kings of either nation. This at the first sight might seem a means to continue a strangeness between the nations; but it was done to lock in the borderers.

This year there was also born to the king a third son, who was christened by the name of Edmund, and shortly after died. And much about the same time came news of the death of Charles the French king, for whom there were celebrated solemn and princely obsequies.

It was not long but Perkin, who was made of quicksilver, which is hard to hold or imprison, began to stir. For deceiving his keepers, he took him to his heels, and made speed to the sea-coast. But presently all corners were laid for him, and such diligent pursuit and search made, as he was fain to turn back, and get him to the house of Bethlehem, called the priory of Shene, (which had the privilege of sanctuary,) and put himself into the hands of the prior of that monastery. The prior was thought a holy man, and much reverenced in those days. He came to the king, and besought the king for Perkin's life only, leaving him otherwise to the king's discretion. Many about the king were again more hot than ever, to have the king to take him forth and hang him. But the king, that had a high stomach, and could not hate any that he despised, bid, "Take him forth and set the knave in the stocks;" and so promising the prior his life, he caused him to be brought forth. And within two or three days after, upon a scaffold set up in the palace court at Westminster, he was fettered and set in the stocks for the whole day. And the next day after, the like was done by him at the cross in Cheapside, and in both places he read his confession, of which we made mention before: and was from Cheapside conveyed and laid up in the Tower. Notwithstanding all this, the king was, as was partly touched before, grown to be such a partner with fortune, as nobody could tell what actions the one and what the other owned. For it was believed generally, that Perkin was betrayed, and that this escape was not without the king's privity, who had him all the time of his flight in a line; and that the king did this, to pick a quarrel to him to put him to death, and to be rid of him at once: but this is not probable. For that the same instruments who observed him in his flight, might have kept him from getting into sanctuary.

But it was ordained, that this winding-ivy of a Plantagenet should kill the true tree itself. For Perkin, after he had been a while in the Tower, began to insinuate himself into the favour and kindness of his keepers, servants to the lieutenant of the Tower, Sir John Digby, being four in number; Strangeways, Blewet, Astwood, and Long Roger. These varlets, with mountains of promises, he sought to corrupt, to obtain his escape; but knowing well, that his own fortunes were made so contemptible, as he could feed no man's hopes, and by hopes he must work, for rewards he had none, he had contrived with himself a vast and tragical plot; which was to draw into his company Edward Plantagenet earl of Warwick, then prisoner in the Tower; whom the weary life of a long imprisonment, and the often and renewing fears of being put to death, had softened to take any impression of counsel for his liberty. This young prince he thought the servants would look upon, though not upon himself: and therefore, after that by some message by one or two of them, he had tasted of the earl's consent; it was agreed that these four should murder their master the lieutenant secretly in the night, and make their

best of such money and portable goods of his, as they should find ready at hand, and get the keys of the Tower, and presently let forth Perkin and the earl. But this conspiracy was revealed in time, before it could be executed. And in this again the opinion of the king's great wisdom did surcharge him with a sinister fame, that Perkin was but his bait, to entrap the earl of Warwick. And in the very instant while this conspiracy was in working, as if that also had been the king's industry, it was fatal, that there should break forth a counterfeit earl of Warwick, a cordwainer's son, whose name was Ralph Wilford; a young man taught and set on by an Augustin frier, called Patrick. They both from the parts of Suffolk came forwards into Kent, where they did not only privily and underhand give out that this Wilford was the true earl of Warwick, but also the frier, finding some light credence in the people, took the boldness in the pulpit to declare as much, and to incite the people to come in to his aid. Whereupon they were both presently apprehended, and the young fellow executed, and the frier condemned to perpetual imprisonment. This also happening so opportunely, to represent the danger to the king's estate from the earl of Warwick, and thereby to colour the king's severity that followed; together with the madness of the frier so vainly and desperately to divulge a treason, before it had gotten any manner of strength; and the saving of the frier's life, which nevertheless was, indeed, but the privilege of his order; and the pity in the common people, which if it run in a strong stream, doth ever cast up scandal and envy, made it generally rather talked than believed that all was but the king's device. But howsoever it were, hereupon Perkin, that had offended against grace now the third time, was at the last proceeded with, and by commissioners of oyer and terminer, arraigned at Westminster, upon divers treasons committed and perpetrated after his coming on land within this kingdom, for so the judges advised, for that he was a foreigner, and condemned, and a few days after executed at Tyburn; where he did again openly read his confession, and take it upon his death to be true. This was the end of this little cockatrice of a king, that was able to destroy those that did not espy him first. It was one of the longest plays of that kind that hath been in memory, and might perhaps have had another end, if he had not met with a king both wise, stout, and fortunate.

As for Perkin's three counsellors, they had registered themselves sanctuary men when their master did; and whether upon pardon obtained, or continuance within the privilege, they came not to be proceeded with.

There were executed with Perkin, the mayor of Cork and his son, who had been principal abettors of his treasons. And soon after were likewise condemned eight other persons about the Tower conspiracy, whereof four were lieutenant's men: but of those eight but two were executed. And immediately after was arraigned before the earl of Oxford, then for the time high steward of England, the poor prince, the earl of Warwick; not for the attempt to escape simply, for that was not acted; and besides, the imprisonment not being for treason, the escape by law could not be treason, but for conspiring with Perkin to raise sedition, and to destroy the king: and the earl confessing the indictment, had judgment, and was shortly after beheaded on Tower-hill.

This was also the end, not only of this noble and commiserable person Edward the earl of Warwick, eldest son to the duke of Clarence; but likewise of the line male of the Plantagenets, which had flourished in great royalty and renown, from the time of the famous king of England, king Henry the second. Howbeit it was a race often dipped in their own blood. It hath remained since only transplanted into other names, as well of the imperial line, as of other noble houses. But it was neither guilt of crime, nor reason of state, that could quench the envy that was upon the king for this execution: so that he thought good to export it out of the land, and to lay it upon his new ally, Ferdinando king of Spain. For these two kings understanding one another at half a word, so it was that there were letters showed out of Spain, whereby in the passages concerning the treaty of the marriage, Ferdinando had written to the king in plain terms, that he saw no assurance of his succession as long as the earl of Warwick lived; and that he was loth to send his daughter to troubles and dangers. But hereby, as the king did in some part remove the envy from himself; so he did not observe, that he did withal bring a kind of malediction and infausting upon the marriage, as an ill prognostic: which in event so far proved true, as both prince Arthur enjoyed a very small time after the marriage, and the lady Catharine herself, a sad and a religious woman, long after, when king Henry the eighth his resolution of a divorce from her was first made known to her, used some words, that she had not offended, but it was a judgment of God, for that her former marriage was made in blood; meaning that of the earl of Warwick.

This fifteenth year of the king, there was a great plague both in London and in divers parts of the kingdom. Wherefore the king, after often change of places, whether to avoid the danger of the sickness, or to give occasion of an interview with the archduke, or both, sailed over with his queen to Calais. Upon his coming thither, the archduke sent an honourable ambassage unto him, as well to welcome him into those parts, as to let him know, that if it pleased him, he would come and do him reverence. But it was said withal, that the king might be pleased to appoint some place, that were out of any walled town or fortress, for that he had denied the same upon like occasion to the French king: and though, he said, he made a great difference between the two kings, yet he would be loth to give a precedent, that might make it after to be expected at his hands, by another whom he trusted less. The king accepted of the courtesy, and admitted of his excuse, and appointed the place to be at Saint Peter's church without Calais. But withal he did visit the archduke with ambassadors sent from himself, which were the lord St. John, and the secretary; unto whom the archduke did the honour, as, going

to mass at Saint Omer's, to set the lord St. John on his right hand, and the secretary on his left, and so to ride between them to church. The day appointed for the interview the king went on horseback some distance from Saint Peter's church, to receive the archduke: and upon their approaching, the archduke made haste to light, and offered to hold the king's stirrup at his alighting; which the king would not permit, but descending from horseback, they embraced with great affection; and withdrawing into the church to a place prepared, they had long conference, not only upon the confirmation of former treaties, and the freeing of commerce, but upon cross marriages, to be had between the duke of York, the king's second son, and the archduke's daughter; and again between Charles, the archduke's son and heir, and Mary, the king's second daughter. But these blossoms of unripe marriages were but friendly wishes, and the airs of loving entertainment; though one of them came afterwards to conclusion in treaty, though not in effect. But during the time that the two princes convened and communed together in the suburbs of Calais, the demonstrations on both sides were passing hearty and affectionate, especially on the part of the archduke: who, besides that he was a prince of an excellent good nature, being conscious to himself how drily the king had been used by his council in the matter of Perkin, did strive by all means to recover it in the king's affection. And having also his ears continually beaten with the counsels of his father and father-in-law, who, in respect of their jealous hatred against the French king, did always advise the archduke to anchor himself upon the amity of king Henry of England; was glad upon this occasion to put in ure and practise their precepts, calling the king patron and father, and protector, these very words the king repeats, when he certified of the loving behaviour of the archduke to the city, and what else he could devise, to express his love and observance to the king. There came also to the king, the governor of Picardy, and the bailiff of Amiens, sent from Lewis the French king to do him honour, and to give him knowledge of his victory, and winning of the duchy of Milan. It seemeth the king was well pleased with the honours he received from those parts, while he was at Calais; for he did himself certify all the news and occurrents of them in every particular, from Calais, to the mayor and aldermen of London, which, no doubt, made no small talk in the city. For the king, though he could not entertain the good will of the citizens, as Edward the fourth did; yet by affability and other princely graces, did ever make very much of them, and apply himself to them.

This year also died John Morton, archbishop of Canterbury, chancellor of England, and cardinal. He was a wise man, and eloquent, but in his nature harsh and haughty: much accepted by the king, but envied by the nobility, and hated of the people. Neither was his name left out of Perkin's proclamation for any good will, but they would not bring him in amongst the king's casting counters, because he had the image and superscription upon him of the pope, in his honour of cardinal. He won the king with secrecy and diligence, but chiefly because he was his old servant in his less fortunes: and also for that, in his affections, he was not without an inveterate malice against the house of York, under whom he had been in trouble. He was willing also to take envy from the king, more than the king was willing to put upon him: for the king cared not for subterfuges, but would stand envy, and appear in any thing that was to his mind; which made envy still grow upon him more universal, but less daring. But in the matter of exactions, time did after show, that the bishop in feeding the king's humour did rather temper it. He had been by Richard the third committed, as in custody, to the duke of Buckingham, whom he did secretly incite to revolt from king Richard. But after the duke was engaged, and thought the bishop should have been his chief pilot in the tempest, the bishop was gotten into the cockboat, and fled over beyond seas. But whatsoever else was in the man, he deserveth a most happy memory, in that he was the principal mean of joining the two roses. He died of great years, but of strong health and powers.

The next year, which was the sixteenth year of the king, and the year of our Lord one thousand five hundred, was the year of jubile at Rome. But pope Alexander, to save the hazard and charges of men's journeys to Rome, thought good to make over those graces by exchange, to such as would pay a convenient rate, seeing they could not come to fetch them. For which purpose was sent into England, Jasper Pons, a Spaniard, the pope's commissioner, better chosen than were the commissioners of pope Leo afterwards employed for Germany: for he carried the business with great wisdom, and semblance of holiness; insomuch as he levied great sums of money within this land to the pope's use, with little or no scandal. It was thought the king shared in the money. But it appeareth by a letter which cardinal Adrian, the king's pensioner, wrote to the king from Rome some few years after, that this was not so. For this cardinal, being to persuade pope Julius, on the king's behalf, to expedite the bull of dispensation for the marriage between prince Henry and the lady Catharine, finding the pope difficile in granting thereof, doth use it as a principal argument concerning the king's merit towards that see, that he had touched none of those deniers which had been levied by Pons in England. But that it might the better appear, for the satisfaction of the common people, that this was consecrated money, the same nuncio brought unto the king a brief from the pope, wherein the king was exhorted and summoned to come in person against the Turk: for that the pope, out of the care of an universal father, seeing almost under his eyes the successes and progresses of that great enemy of the faith, had had in the conclave, and with the assistance of the ambassadors of foreign princes, divers consultations about a holy war, and a general expedition of christian princes against the Turk: wherein it was agreed and thought fit, that the Hungarians, Polonians, and Bohemians, should make a war upon Thracia; the French and Spaniards upon Græcia; and that the pope, willing to sacrifice

himself in so good a cause, in person, and in company of the king of England, the Venetians, and such other states as were great in maritime power, would sail with a puissant navy through the Mediterranean unto Constantinople. And that to this end, his holiness had sent nuncios to all christian princes; as well for a cessation of all quarrels and differences amongst themselves, as for speedy preparations and contributions of forces and treasure for this sacred enterprise.

To this the king, who understood well the court of Rome, made an answer rather solemn than serious: signifying,

"That no prince on earth should be more forward and obedient, both by his person, and by all his possible forces and fortunes, to enter into this sacred war, than himself. But that the distance of place was such, as no forces that he should raise for the seas, could be levied or prepared but with double the charge, and double the time, at the least, that they might be from the other princes, that had their territories nearer adjoining. Besides, that neither the manner of his ships, having no galleys, nor the experience of his pilots and mariners, could be so apt for those seas as theirs. And therefore that his holiness might do well to move one of those other kings, who lay fitter for the purpose, to accompany him by sea. Whereby both all things would be sooner put in readiness, and with less charge, and the emulation and division of command, which might grow between those kings of France and Spain, if they should both join in the war by land upon Græcia, might be wisely avoided: and that for his part he would not be wanting in aids and contribution. Yet notwithstanding, if both these kings should refuse, rather than his holiness should go alone, he would wait upon him as soon as he could be ready: always provided, that he might first see all differences of the christian princes amongst themselves fully laid down and appeased, as for his own part he was in none, and that he might have some good towns upon the coast in Italy put into his hands, for the retreat and safeguard of his men."

With this answer Jasper Pons returned, nothing at all discontented: and yet this declaration of the king, as superficial as it was, gave him that reputation abroad, as he was not long after elected by the knights of Rhodes protector of their order: all things multiplying to honour in a prince, that had gotten such high estimation for his wisdom and sufficiency.

There were these two last years some proceedings against heretics, which was rare in this king's reign, and rather by penances, than by fire. The king had, though he were no good schoolman, the honour to convert one of them by dispute at Canterbury.

This year also, though the king were no more haunted with sprites, for that by the sprinkling, partly of blood, and partly of water, he had chased them away; yet nevertheless he had certain apparitions that troubled him, still showing themselves from one region, which was the house of York. It came so to pass, that the earl of Suffolk, son to Elizabeth eldest sister to king Edward the Fourth, by John duke of Suffolk, her second husband, and brother to John earl of Lincoln, that was slain at Stokefield, being of a hasty and choleric disposition, had killed a man in his fury; whereupon the king gave him his pardon. But, either willing to leave a cloud upon him, or the better to make him feel his grace, produced him openly to plead his pardon. This wrought in the earl, as in a haughty stomach it useth to do; for the ignominy printed deeper than the grace. Wherefore he being discontent, fled secretly into Flanders unto his aunt the duchess of Burgundy. The king startled at it; but, being taught by troubles to use fair and timely remedies, wrought so with him by messages, the lady Margaret also growing, by often failing in her alchemy, weary of her experiments; and partly being a little sweetened, for that the king had not touched her name in the confession of Perkin, that he came over again upon good terms, and was reconciled to the king.

In the beginning of the next year, being the seventeenth of the king, the lady Catharine, fourth daughter of Ferdinando and Isabella, king and queen of Spain, arrived in England at Plymouth the second of October, and was married to prince Arthur in Paul's the fourteenth of November following; the prince being then about fifteen years of age, and the lady about eighteen. The manner of her receiving, the manner of her entry into London, and the celebrity of the marriage, were performed with great and true magnificence, in regard of cost, show, and order. The chief man that took the care was bishop Fox, who was not only a grave counsellor for war or peace, but also a good surveyor of works, and a good master of ceremonies, and any thing else that was fit for the active part, belonging to the service of the court or state of a great king. This marriage was almost seven years in treaty, which was in part caused by the tender years of the marriage couple, especially of the prince: but the true reason was, that these two princes, being princes of great policy and profound judgment, stood a great time looking one upon another's fortunes, how they would go; knowing well, that in the mean time the very treaty itself gave abroad in the world a reputation of a strait conjunction and amity between them, which served on both sides to many purposes, that their several affairs required, and yet they continued still free. But in the end, when the fortunes of both the princes did grow every day more and more prosperous and assured, and that looking all about them they saw no better conditions, they shut it up.

The marriage money the princess brought, which was turned over to the king by act of renunciation, was two hundred thousand ducats; whereof one hundred thousand were payable ten days after the solemnization, and the other hundred thousand at two payments annual; but part of it to be in jewels and plate, and a due course set down to have them justly and indifferently prized. The jointure or advancement of the lady, was the third part of the principality of Wales, and of the dukedom of Cornwall, and of the earldom of Chester, to be after set forth in severalty; and in case she came to be queen of England, her advancement was left indefinite, but

thus; that it should be as great as ever any former queen of England had.

In all the devices and conceits of the triumphs of this marriage, there was a great deal of astronomy: the lady being resembled to Hesperus, and the prince to Arcturus, and the old king Alphonsus, that was the great astronomer of kings, and was ancestor to the lady, was brought in, to be the fortune-teller of the match. And whosoever had those toys in compiling, they were not altogether pedantical: but you may be sure, that king Arthur the Britain, and the descent of the lady Catharine from the house of Lancaster, was in no wise forgotten. But as it should seem, it is not good to fetch fortunes from the stars: for this young prince, that drew upon him at that time, not only the hopes and affections of his country, but the eyes and expectation of foreigners, after a few months, in the beginning of April, deceased at Ludlow castle, where he was sent to keep his resiance and court, as prince of Wales. Of this prince, in respect he died so young, and by reason of his father's manner of education, that did cast no great lustre upon his children, there is little particular memory: only thus much remaineth, that he was very studious and learned, beyond his years, and beyond the custom of great princes.

There was a doubt ripped up in the times following, when the divorce of king Henry the eighth from the lady Catharine did so much busy the world, whether Arthur was bedded with his lady or no, whereby that matter in fact, of carnal knowledge, might be made part of the case. And it is true, that the lady herself denied it, or at least her counsel stood upon it, and would not blanch that advantage, although the plenitude of the pope's power of dispensing was the main question. And this doubt was kept long open, in respect of the two queens that succeeded, Mary and Elizabeth, whose legitimations were incompatible one with another, though their succession was settled by act of parliament. And the times that favoured queen Mary's legitimation would have it believed, that there was no carnal knowledge between Arthur and Catharine. Not that they would seem to derogate from the pope's absolute power, to dispense even in that case; but only in point of honour, and to make the case more favourable and smooth. And the times that favoured queen Elizabeth's legitimation, which were the longer and the latter, maintained the contrary. So much there remaineth in memory, that it was half a year's time between the creation of Henry prince of Wales and prince Arthur's death, which was construed to be, for to expect a full time, whereby it might appear, whether the lady Catharine were with child by prince Arthur, or no. Again, the lady herself procured a bull, for the better corroboration of the marriage, with a clause of *vel forsan cognitam*, which was not in the first bull. There was given in evidence also, when the cause of the divorce was handled, a pleasant passage, which was; that in a morning prince Arthur, upon his up-rising from bed with her, called for drink, which he was not accustomed to do, and finding the gentleman of his chamber that brought him the drink to smile at it, and to note it, he said merrily to him; that he had been in the midst of Spain, which was a hot region, and his journey had made him dry; and that if the other had been in so hot a clime, he would have been drier than he. Besides, the prince was upon the point of sixteen years of age when he died, and forward, and able in body.

The February following, Henry duke of York was created prince of Wales, and earl of Chester and Flint: for the dukedom of Cornwall devolved to him by statute. The king also being fast-handed, and loth to part with a second dowry, but chiefly being affectionate both by his nature, and out of politic considerations to continue the alliance with Spain, prevailed with the prince, though not without some reluctation, such as could be in those years, for he was not twelve years of age, to be contracted with the princess Catharine: the secret providence of God ordaining that marriage to be the occasion of great events and changes.

The same year were the espousals of James king of Scotland with the lady Margaret the king's eldest daughter; which was done by proxy, and published at Paul's cross, the five and twentieth of January, and Te Deum solemnly sung. But certain it is, that the joy of the city thereupon showed, by ringing of bells and bonfires, and such other incense of the people, was more than could be expected, in a case of so great and fresh enmity between the nations, especially in London, which was far enough off from feeling any of the former calamities of the war: and therefore might be truly attributed to a secret instinct and inspiring which many times runneth not only in the hearts of princes, but in the pulse and veins of people, touching the happiness thereby to ensue in time to come. This marriage was in August following consummated at Edinburgh: the king bringing his daughter as far as Colliweston on the way, and then consigning her to the attendance of the earl Northumberland; who with a great troop of lords and ladies of honour brought her into Scotland, to the king her husband.

This marriage had been in treaty by the space of almost three years, from the time that the king of Scotland did first open his mind to bishop Fox. The sum given in marriage by the king, was ten thousand pounds: and the jointure and advancement assured by the king of Scotland, was two thousand pounds a year, after king James his death, and one thousand pounds a year in present, for the lady's allowance or maintenance. This to be set forth in lands, of the best and most certain revenue. During the treaty, it is reported that the king remitted the matter to his council; and that some of the table, in the freedom of counsellors, the king being present, did put the case; that if God should take the king's two sons without issue, that then the kingdom of England would fall to the king of Scotland, which might prejudice the monarchy of England. Whereunto the king himself replied; that if that should be, Scotland would be but an accession to England, and not England to Scotland, for that the greater would draw the less: and that it was a safer union for

England than that of France. This passed as an oracle, and silenced those that moved the question.

The same year was fatal, as well for deaths as marriages, and that with equal temper. For the joys and feasts of the two marriages were compensed with the mournings and funerals of prince Arthur, of whom we have spoken, and of queen Elizabeth, who died in childbed in the Tower, and the child lived not long after. There died also that year Sir Reginald Bray, who was noted to have had with the king the greatest freedom of any counsellor; but it was but a freedom the better to set off flattery. Yet he bare more than his just part of envy for the exactions.

At this time the king's estate was very prosperous: secured by the amity of Scotland, strengthened by that of Spain, cherished by that of Burgundy, all domestic troubles quenched, and all noise of war, like a thunder afar off, going upon Italy. Wherefore nature, which many times is happily contained and refrained by some bands of fortune, began to take place in the king; carrying, as with a strong tide, his affections and thoughts unto the gathering and heaping up of treasure. And as kings do more easily find instruments for their will and humour, than for their service and honour; he had gotten for his purpose, or beyond his purpose, two instruments, Empson and Dudley, whom the people esteemed as his horse-leeches and shearers, bold men and careless of fame, and that took toll of their master's grist. Dudley was of a good family, eloquent, and one that could put hateful business into good language. But Empson, that was the son of a sieve-maker, triumphed always upon the deed done, putting off all other respects whatsoever. Those two persons being lawyers in science, and privy counsellors in authority, as the corruption of the best things is the worst, turned law and justice into wormwood and rapine. For first, their manner was to cause divers subjects to be indicted of sundry crimes, and so far forth to proceed in form of law; but when the bills were found, then presently to commit them; and nevertheless not to produce them in any reasonable time to their answer, but to suffer them to languish long in prison, and by sundry artificial devices and terrors to extort from them great fines and ransoms, which they termed compositions and mitigations.

Neither did they, towards the end, observe so much as the half-face of justice, in proceeding by indictment; but sent forth their precepts to attach men and convent them before themselves, and some others, at their private houses, in a court of commission; and there used to shuffle up a summary proceeding by examination, without trial of jury; assuming to themselves there to deal both in pleas of the crown, and controversies civil.

Then did they also use to inthral and charge the subjects' lands with tenures *in capite*, by finding false offices, and thereby to work upon them for wardships, liveries, premier seizins, and alienations, being the fruits of those tenures, refusing, upon divers pretexts and delays, to admit men to traverse those false offices according to the law. Nay, the king's wards, after they had accomplished their full age, could not be suffered to have livery of their lands, without paying excessive fines, far exceeding all reasonable rates. They did also vex men with informations of intrusion, upon scarce colourable titles.

When men were outlawed in personal actions, they would not permit them to purchase their charters of pardon, except they paid great and intolerable sums; standing upon the strict point of law, which upon outlawries giveth forfeiture of goods; nay, contrary to all law and colour, they maintained the king ought to have the half of men's lands and rents, during the space of full two years, for a pain in case of outlawry. They would also ruffle with jurors, and enforce them to find as they would direct, and if they did not, convent them, imprison them, and fine them.

These and many other courses, fitter to be buried than repeated, they had of preying upon the people; both like tame hawks for their master, and like wild hawks for themselves; insomuch as they grew to great riches and substance: but their principal working was upon penal laws, wherein they spared none, great nor small; nor considered whether the law were possible or impossible, in use or obsolete: but raked over all old and new statutes, though many of them were made with intention rather of terror than of rigour, having ever a rabble of promoters, questmongers, and leading jurors at their command, so as they could have any thing found either for fact or valuation.

There remaineth to this day a report, that the king was on a time entertained by the earl of Oxford, that was his principal servant both for war and peace, nobly and sumptuously, at his castle at Henningham: and at the king's going away, the earl's servants stood, in a seemly manner, in their livery coats, with cognisances, ranged on both sides, and made the king a lane. The king called the earl to him, and said, "My lord, I have heard much of your hospitality, but I see it is greater than the speech: these handsome gentlemen and yeomen, which I see on both sides of me, are sure your menial servants." The earl smiled, and said, "It may please your Grace, that were not for mine own ease: they are most of them my retainers, that are come to do me service at such a time as this, and chiefly to see your Grace." The king started a little, and said, "By my faith, my lord, I thank you for my good cheer, but I may not endure to have my laws broken in my sight; my attorney must speak with you." And it is part of the report, that the earl compounded for no less than fifteen thousand marks. And to show farther the king's extreme diligence, I do remember to have seen long since a book of accompt of Empson's, that had the king's hand almost to every leaf by way of signing, and was in some places postilled in the margin with the king's hand likewise, where was this remembrance.

> "Item, Received of such a one five marks, for a pardon to be procured; and if the pardon do not pass, the money to be repaid: except the party be some other ways satisfied."

And over against this *Memorandum*, of the king's own hand,

"Otherwise satisfied."

Which I do the rather mention, because it shows in the king a nearness, but yet with a kind of justness. So these little sands and grains of gold and silver, as it seemeth, helped not a little to make up the great heap and bank.

But meanwhile to keep the king awake, the earl of Suffolk, having been too gay at prince Arthur's marriage, and sunk himself deep in debt, had yet once more a mind to be a knight-errant, and to seek adventures in foreign parts; and taking his brother with him, fled again into Flanders. That, no doubt, which gave him confidence, was the great murmur of the people against the king's government: and being a man of a light and rash spirit, he thought every vapour would be a tempest. Neither wanted he some party within the kingdom: for the murmur of people awakes the discontents of nobles; and again, that calleth up commonly some head of sedition. The king resorting to his wonted and tried arts, caused Sir Robert Curson, captain of the castle at Hammes, being at that time beyond sea, and therefore less likely to be wrought upon by the king, to fly from his charge, and to feign himself a servant of the earl's. This knight, having insinuated himself into the secrets of the earl, and finding by him upon whom chiefly he had either hope or hold, advertised the king thereof in great secresy; but nevertheless maintained his own credit and inward trust with the earl. Upon whose advertisements, the king attached William Courtney, earl of Devonshire, his brother-in-law, married to the lady Catharine, daughter to king Edward the fourth; William de la Pole, brother to the earl of Suffolk; Sir James Tirrel, and Sir John Windham, and some other meaner persons, and committed them to custody. George lord Abergavenny, and Sir Thomas Green, were at the same time apprehended; but as upon less suspicion, so in a freer restraint, and were soon after delivered. The earl of Devonshire, being interested in the blood of York, that was rather feared than nocent; yet as one that might be the object of others' plots and designs, remained prisoner in the Tower, during the king's life. William de la Pole was also long restrained, though not so straitly. But for Sir James Tirrel, against whom the blood of the innocent princes, Edward the fifth and his brother, did still "cry from under the altar," and Sir John Windham, and the other meaner ones, they were attainted and executed: the two knights beheaded. Nevertheless, to confirm the credit of Curson, who belike had not yet done all his feats of activity, there was published at Paul's cross, about the time of the said executions, the pope's bull of excommunication and curse against the earl of Suffolk and Sir Robert Curson, and some others by name; and likewise in general against all the abettors of the said earl: wherein it must be confessed, that heaven was made too much to bow to earth, and religion to policy. But soon after, Curson when he saw the time, returned into England, and withal into wonted favour with the king, but worse fame with the people. Upon whose return the earl was much dismayed, and seeing himself destitute of hopes, the lady Margaret also, by tract of time and bad success, being now become cool in those attempts, after some wandering in France and Germany, and certain little projects, no better than squibs of an exiled man, being tired out, retired again into the protection of the archduke Philip in Flanders, who by the death of Isabella was at that time king of Castile, in the right of Joan his wife.

This year, being the nineteenth of his reign, the king called his parliament; wherein a man may easily guess how absolute the king took himself to be with his parliament, when Dudley, that was so hateful, was made speaker of the house of commons. In this parliament there were not made any statutes memorable touching public government. But those that were, had still the stamp of the king's wisdom and policy.

There was a statute made for the disannulling of all patents of lease or grant, to such as came not upon lawful summons to serve the king in his wars, against the enemies or rebels, or that should depart without the king's licence; with an exception of certain persons of the long robe: providing nevertheless that they should have the king's wages from their house, till their return home again. There had been the like made before for offices, and by this statute it was extended to lands. But a man may easily see by many statutes made in this king's time, that the king thought it safest to assist martial law by law of parliament.

Another statute was made, prohibiting the bringing in of manufactures of silk wrought by itself, or mixt with any other thread. But it was not of stuffs of whole piece, for that the realm had of them no manufacture in use at that time, but of knit silk, or texture of silk; as ribbons, laces, cauls, points, and girdles, &c. which the people of England could then well skill to make. This law pointed at a true principle; "That where foreign materials are but superfluities, foreign manufactures should be prohibited." For that will either banish the superfluity, or gain the manufacture.

There was a law also of resumption of patents of gaols, and the reannexing of them to the sheriffwicks; privileged officers being no less an interruption of justice, than privileged places.

There was likewise a law to restrain the by-laws, or ordinances of corporations, which many times were against the prerogative of the king, the common law of the realm, and the liberty of the subject, being fraternities in evil. It was therefore provided, that they should not be put in execution, without the allowance of the chancellor, treasurer, and the two chief justices, or three of them, or of the two justices of circuit where the corporation was.

Another law was, in effect, to bring in the silver of the realm to the mint, in making all clipped, minished, or impaired coins of silver, not to be current in payments; without giving any remedy of weight, but with an exception only of reasonable wearing, which was as nothing in respect of the

uncertainty; and so, upon the matter, to set the mint on work, and to give way to new coins of silver, which should be then minted.

There likewise was a long statute against vagabonds, wherein two things may be noted: the one, the dislike the parliament had of gaoling of them, as that which was chargeable, pesterous, and of no open example. The other, that in the statutes of this king's time, for this of the nineteenth year is not the only statute of that kind, there are ever coupled the punishment of vagabonds, and forbidding of dice and cards, and unlawful games, unto servants and mean people, and the putting down and suppressing of alehouses, as strings of one root together, and as if the one were unprofitable without the other.

As for riot and retainers, there passed scarce any parliament in this time without a law against them: the king ever having an eye to might and multitude.

There was granted also that parliament a subsidy, both from the temporality and the clergy. And yet nevertheless, ere the year expired, there went out commissions for a general benevolence, though there were no wars, no fears. The same year the city gave five thousand marks, for confirmation of their liberties; a thing fitter for the beginnings of kings' reigns, than the latter ends. Neither was it a small matter that the mint gained upon the late statute, by the recoinage of groats and half-groats, now twelve-pences and six-pences. As for Empson and Dudley's mills, they did grind more than ever: so that it was a strange thing to see what golden showers poured down upon the king's treasury at once: the last payments of the marriage-money from Spain; the subsidy; the benevolence; the recoinage; the redemption of the city's liberties; the casualties. And this is the more to be marvelled at, because the king had then no occasions at all of wars or troubles. He had now but one son and one daughter unbestowed. He was wise; he was of a high mind; he needed not to make riches his glory; he did excel in so many things else; save that certainly avarice doth ever find in itself matter of ambition. Belike he thought to leave his son such a kingdom, and such a mass of treasure, as he might choose his greatness where he would.

This year was also kept the serjeants' feast, which was the second call in this king's days.

About this time Isabella queen of Castile deceased; a right noble lady, and an honour to her sex and times, and the corner-stone of the greatness of Spain that hath followed. This accident the king took not for news at large, but thought it had a great relation to his own affairs; especially in two points: the one for example, the other for consequence. First, he conceived that the case of Ferdinando of Aragon, after the death of queen Isabella, was his own case after the death of his own queen; and the case of Joan the heir unto Castile, was the case of his own son prince Henry. For if both of the kings had their kingdoms in the right of their wives, they descended to the heirs, and did not accrue to the husbands. And although his own case had both steel and parchment more than the other, that is to say, a conquest in the field, and an act of parliament, yet notwithstanding, that natural title of descent in blood did, in the imagination even of a wise man, breed a doubt, that the other two were not safe nor sufficient. Wherefore he was wonderful diligent to inquire and observe what became of the king of Aragon, in holding and continuing the kingdom of Castile; and whether he did hold it in his own right, or as administrator to his daughter; and whether he were like to hold it in fact, or to be put out by his son-in-law. Secondly, he did revolve in his mind, that the state of christendom might by this late accident have a turn. For whereas before time, himself, with the conjunction of Aragon and Castile, which then was one, and the amity of Maximilian and Philip his son the archduke, was far too strong a party for France; he began to fear, that now the French king, who had great interest in the affections of Philip the young king of Castile, and Philip himself, now king of Castile, who was in ill terms with his father-in-law about the present government of Castile, and thirdly, Maximilian, Philip's father, who was ever variable, and upon whom the surest aim that could be taken was, that he would not be long as he had been last before, would all three, being potent princes, enter into some strait league and confederation amongst themselves: whereby though he should not be endangered, yet he should be left to the poor amity of Aragon. And whereas he had been heretofore a kind of arbiter of Europe, he should now go less, and be over-topped by so great a conjunction. He had also, as it seems, an inclination to marry, and bethought himself of some fit conditions abroad; and amongst others he had heard of the beauty and virtuous behaviour of the young queen of Naples, the widow of Ferdinando the younger, being then of matronal years of seven and twenty; by whose marriage he thought that the kingdom of Naples, having been a goal for a time between the king of Aragon and the French king, and being but newly settled, might in some part be deposited in his hands, who was so able to keep the stakes. Therefore he sent in ambassage or message three confident persons, Francis Marsin, James Braybrooke, and John Stile, upon two several inquisitions rather than negotiations. The one touching the person and condition of the young queen of Naples. The other touching all particulars of estate, that concerned the fortunes and intentions of Ferdinando. And because they may observe best, who themselves are observed least, he sent them under colourable pretexts; giving them letters of kindness and compliment from Catharine the princess, to her aunt and niece, the old and young queen of Naples, and delivering to them also a book of new articles of peace; which notwithstanding it had been delivered unto doctor de Puebla, the lieger ambassador of Spain here in England, to be sent; yet for that the king had been long without hearing from Spain, he thought good those messengers, when they had been with the two queens, should likewise pass on to the court of Ferdinando, and take a copy of the book with them. The instructions touching the queen of Naples were so curious and exquisite, being as arti-

cles whereby to direct a survey, or framing a particular of her person, for complexion, favour, feature, stature, health, age, customs, behaviour, conditions, and estate, as, if the king had been young, a man would have judged him to be amorous; but, being ancient, it ought to be interpreted, that sure he was very chaste, for that he meant to find all things in one woman, and so to settle his affections without ranging. But in this match he was soon cooled, when he heard from his ambassadors, that this young queen had had a goodly jointure in the realm of Naples, well answered during the time of her uncle Frederick, yea and during the time of Lewis the French king, in whose division her revenue fell; but since the time that the kingdom was in Ferdinando's hands, all was assigned to the army and garrisons there, and she received only a pension or exhibition out of his coffers.

The other part of the inquiry had a grave and diligent return, informing the king at full of the present state of king Ferdinando. By this report it appeared to the king, that Ferdinando did continue the government of Castile, as administrator unto his daughter Joan, by the title of queen Isabella's will, and partly by the custom of the kingdom, as he pretended. And that all mandates and grants were expedited in the name of Joan his daughter, and himself as administrator, without mention of Philip her husband. And that king Ferdinando, howsoever he did dismiss himself of the name of king of Castile, yet meant to hold the kingdom without account, and in absolute command.

It appeareth also, that he flattered himself with hopes, that king Philip would permit unto him the government of Castile during his life; which he had laid his plot to work him unto, both by some counsellors of his about him, which Ferdinando had at his devotion, and chiefly by promise, that in case Philip gave not way unto it, he would marry some young lady, whereby to put him by the succession of Aragon and Granada, in case he should have a son; and lastly, by representing unto him that the government of the Burgundians, till Philip were by continuance in Spain made as natural of Spain, would not be endured by the Spaniards. But in all those things, though wisely laid down and considered, Ferdinando failed; but that Pluto was better to him than Pallas.

In the same report also, the ambassadors being mean men, and therefore the more free, did strike upon a string which was somewhat dangerous; for they declared plainly, that the people of Spain, both nobles and commons, were better affected unto the part of Philip, so he brought his wife with him, than to Ferdinando; and expressed the reason to be, because he had imposed upon them many taxes and tallages: which was the king's own case between him and his son.

There was also in this report a declaration of an overture of marriage, which Amason the secretary of Ferdinando had made unto the ambassadors in great secret, between Charles prince of Castile and Mary the king's second daughter; assuring the king that the treaty of marriage then on foot for the said prince and the daughter of France would break; and that she the said daughter of France should be married to Angolesme, that was the heir apparent of France.

There was a touch also of a speech of marriage between Ferdinando and madame de Fois, a lady of the blood of France, which afterwards indeed succeeded. But this was reported as learned in France, and silenced in Spain.

The king by the return of this ambassage, which gave great light unto his affairs, was well instructed, and prepared how to carry himself between Ferdinando king of Aragon and Philip his son-in-law king of Castile; resolving with himself to do all that in him lay, to keep them at one within themselves; but howsoever that succeeded, by a moderate carriage, and bearing the person of a common friend, to lose neither of their friendships; but yet to run a course more entire with the king of Aragon, but more laboured and officious with the king of Castile. But he was much taken with the overture of marriage with his daughter Mary; both because it was the greatest marriage of christendom, and for that it took hold of both allies.

But to corroborate his alliance with Philip, the winds gave him an interview: for Philip choosing the winter season, the better to surprise the king of Aragon, set forth with a great navy out of Flanders for Spain, in the month of January, the one and twentieth year of the king's reign. But himself was surprised with a cruel tempest, that scattered his ships upon the several coasts of England. And the ship wherein the king and queen were, with two other small barks only, torn and in great peril, to escape the fury of the weather, thrust into Weymouth. King Philip himself, having not been used, as it seems, to sea, all wearied and extreme sick, would needs land to refresh his spirits, though it was against the opinion of his council, doubting it might breed delay, his occasions requiring celerity.

The rumour of the arrival of a puissant navy upon the coast, made the country arm. And Sir Thomas Trenchard, with forces suddenly raised, not knowing what the matter might be, came to Weymouth. Where understanding the accident, he did in all humbleness and humanity invite the king and queen to his house; and forthwith despatched posts to the court. Soon after came Sir John Carew likewise, with a great troop of men well armed; using the like humbleness and respects towards the king, when he knew the case. King Philip doubting that they being but subjects, durst not let him pass away again without the king's notice and leave, yielded to their entreaties to stay till they heard from the court. The king, as soon as he heard the news, commanded presently the earl of Arundel to go to visit the king of Castile, and let him understand that as he was very sorry for his mishap, so he was glad that he had escaped the danger of the seas, and likewise of the occasion himself had to do him honour; and desiring him to think himself as in his own land; and that the king made all haste possible to come and embrace him. The earl came to him in great magnificence, with a brave troop of

three hundred horse; and, for more state, came by torch-light. After he had done the king's message, king Philip seeing how the world went, the sooner to get away, went upon speed to the king at Windsor, and his queen followed by easy journeys. The two kings at their meeting used all the caresses and loving demonstrations that were possible. And the king of Castile said pleasantly to the king, "That he was now punished for that he would not come within his walled town of Calais, when they met last." But the king answered, "That walls and seas were nothing where hearts were open; and that he was here no otherwise but to be served." After a day or two's refreshing, the kings entered into speech of renewing the treaty; the kings saying, that though king Philip's person were the same, yet his fortunes and state were raised: in which case a renovation of treaty was used amongst princes. But while these things were in handling, the king choosing a fit time, and drawing the king of Castile into a room, where they two only were private, and laying his hand civilly upon his arm, and changing his countenance a little from a countenance of entertainment, said to him, "Sir, you have been saved upon my coast, I hope you will not suffer me to wreck upon yours." The king of Castile asked him what he meant by that speech? "I mean it," saith the king, "by that same harebrain wild fellow, my subject, the earl of Suffolk, who is protected in your country, and begins to play the fool, when all others are weary of it." The king of Castile answered, "I had thought, Sir, your felicity had been above those thoughts: but if it trouble you, I will banish him." The king replied, "Those hornets were best in their nest, and worst when they did fly abroad; and that his desire was to have him delivered to him." The king of Castile herewith a little confused, and in a study, said, "That can I not do with my honour, and less with yours; for you will be thought to have used me as a prisoner." The king presently said, "Then the matter is at an end, for I will take that dishonour upon me, and so your honour is saved." The king of Castile, who had the king in great estimation, and besides remembered where he was, and knew not what use he might have of the king's amity, for that himself was new in his estate of Spain, and unsettled both with his father-in-law and with his people, composing his countenance, said, "Sir, you give law to me, but so will I to you. You shall have him, but, upon your honour, you shall not take his life." The king embracing him said, "Agreed." Saith the king of Castile, "Neither shall it dislike you, if I send to him in such a fashion, as he may partly come with his own good will." The king said, "It was well thought of; and if it pleased him, he would join with him, in sending to the earl a message to that purpose." They both sent severally, and meanwhile they continued feasting and pastimes. The king being, on his part, willing to have the earl sure before the king of Castile went; and the king of Castile being as willing to seem to be enforced. The king also, with many wise and excellent persuasions, did advise the king of Castile to be ruled by the counsel of his father-in-law Ferdinando; a prince so prudent, so experienced, so fortunate. The king of Castile, who was in no very good terms with his said father-in-law, answered, "That if his father-in-law would suffer him to govern his kingdoms, he should govern him."

There were immediately messengers sent from both kings, to recall the earl of Suffolk; who upon gentle words used to him was soon charmed, and willing enough to return; assured of his life, and hoping of his liberty. He was brought through Flanders to Calais, and thence landed at Dover, and with sufficient guard delivered and received at the Tower of London. Meanwhile king Henry, to draw out the time, continued his feastings and entertainments, and after he had received the king of Castile into the fraternity of the Garter, and for a reciprocal had his son the prince admitted to the order of the Golden Fleece, he accompanied king Philip and his queen to the city of London; where they were entertained with the greatest magnificence and triumph, that could be upon no greater warning. And as soon as the earl of Suffolk had been conveyed to the Tower, which was the serious part, the jollities had an end, and the kings took leave. Nevertheless during their being here, they in substance concluded that treaty, which the Flemings term "intercursus malus," and bears date at Windsor: for there be some things in it, more to the advantage of the English, than of them; especially, for that the free-fishing of the Dutch upon the coasts and seas of England, granted in the treaty of "undecimo," was not by this treaty confirmed. All articles that confirm former treaties being precisely and warily limited and confirmed to matter of commerce only, and not otherwise.

It was observed, that the great tempest which drove Philip into England, blew down the golden eagle from the spire of Paul's, and in the fall it fell upon a sign of the black eagle, which was in Paul's church-yard, in the place where the school-house now standeth, and battered it, and brake it down: which was a strange stooping of a hawk upon a fowl. This the people interpreted to be an ominous prognostic upon the imperial house, which was, by interpretation also, fulfilled upon Philip the emperor's son, not only in the present disaster of the tempest, but in that that followed. For Philip arriving into Spain, and attaining the possession of the kingdom of Castile without resistance, insomuch as Ferdinando, who had spoke so great before, was with difficulty admitted to the speech of his son-in-law, sickened soon after, and deceased. Yet after such time, as there was an observation by the wisest of that court, that if he had lived, his father would have gained upon him in that sort, as he would have governed his councils and designs, if not his affections. By this all Spain returned into the power of Ferdinando in state as it was before; the rather, in regard of the infirmity of Joan his daughter, who loving her husband, by whom she had many children, dearly well, and no less beloved of him, howsoever her father, to make Philip ill-beloved of the people of Spain, gave out that Philip used her not well.

was unable in strength of mind to bear the grief of his decease, and fell distracted of her wits. Of which malady her father was thought no ways to endeavour the cure, the better to hold his legal power in Castile. So that as the felicity of Charles the eighth was said to be a dream; so the adversity of Ferdinando was said likewise to be a dream, it passed over so soon.

About this time the king was desirous to bring into the house of Lancaster celestial honour, and became suitor to pope Julius, to canonize king Henry the sixth for a saint; the rather, in respect of that his famous prediction of the king's own assumption to the crown. Julius referred the matter, as the manner is, to certain cardinals, to take the verification of his holy acts and miracles: but it died under the reference. The general opinion was, that pope Julius was too dear, and that the king would not come to his rates. But it is more probable, that that pope, who was extremely jealous of the dignity of the see of Rome, and of the acts thereof, knowing that king Henry the sixth was reputed in the world abroad but for a simple man, was afraid it would but diminish the estimation of that kind of honour, if there were not a distance kept between innocents and saints.

The same year likewise there proceeded a treaty of marriage between the king and the lady Margaret duchess dowager of Savoy, only daughter to Maximilian, and sister to the king of Castile; a lady wise, and of great good fame. This matter had been in speech between the two kings at their meeting, but was soon after resumed; and therein was employed for his first piece the king's then chaplain, and after the great prelate, Thomas Wolsey. It was in the end concluded, with great and ample conditions for the king, but with promise *de futuro* only. It may be the king was the rather induced unto it, for that he had heard more and more of the marriage to go on between his great friend and ally Ferdinando of Aragon, and madame de Fois, whereby that king began to piece with the French king, from whom he had been always before severed. So fatal a thing it is, for the greatest and straitest amities of kings at one time or other, to have a little of the wheel: nay, there is a farther tradition in Spain, though not with us, that the king of Aragon, after he knew that the marriage between Charles the young prince of Castile and Mary the king's second daughter went roundly on, which though it was first moved by the king of Aragon, yet it was afterwards wholly advanced and brought to perfection by Maximilian, and the friends on that side, entered into a jealousy, that the king did aspire to the government of Castilia, as administrator during the minority of his son-in-law; as if there should have been a competition of three for that government; Ferdinando, grandfather on the mother's side; Maximilian, grandfather on the father's side; and king Henry, father-in-law to the young prince. Certainly it is not unlike, but the king's government, carrying the young prince with him, would have been perhaps more welcome to the Spaniards than that of the other two. For the nobility of Castilia, that so lately put out the king of Aragon in favour of king Philip, and had discovered themselves so far, could not be but in a secret distrust and distaste of that king. And as for Maximilian, upon twenty respects he could not have been the man. But this purpose of the king's seemeth to me, considering the king's safe courses, never found to be enterprising or adventurous, not greatly probable, except he should have had a desire to breathe warmer, because he had ill lungs. This marriage with Margaret was protracted from time to time, in respect of the infirmity of the king, who now in the two and twentieth of his reign began to be troubled with the gout: but the defluxion taking also into his breast, wasted his lungs, so that thrice in a year, in a kind of return, and especially in the spring, he had great fits and labours of the phthisic: nevertheless, he continued to intend business with as great diligence, as before in his health: yet so, as upon this warning he did likewise now more seriously think of the world to come, and of making himself a saint, as well as king Henry the sixth, by treasure better employed, than to be given to pope Julius: for this year he gave greater alms than accustomed, and discharged all prisoners about the city, that lay for fees or debts under forty shillings. He did also make haste with religious foundations; and in the year following, which was the three and twentieth, finished that of the Savoy. And hearing also of the bitter cries of his people against the oppressions of Dudley and Empson, and their complices; partly by devout persons about him, and partly by public sermons, the preachers doing their duty therein, he was touched with great remorse for the same. Nevertheless Empson and Dudley, though they could not but hear of these scruples in the king's conscience; yet, as if the king's soul and his money were in several offices, that the one was not to intermeddle with the other, went on with as great rage as ever. For the same three and twentieth year was there a sharp prosecution against Sir William Capel now the second time; and this was for matters of misgovernment in his mayoralty: the great matter being, that in some payments he had taken knowledge of false moneys, and did not his diligence to examine and beat it out, who were the offenders. For this and some other things laid to his charge, he was condemned to pay two thousand pounds; and being a man of stomach, and hardened by his former troubles, refused to pay a mite; and belike used some untoward speeches of the proceedings, for which he was sent to the Tower, and there remained till the king's death. Knesworth likewise, that had been lately mayor of London, and both his sheriffs, were for abuses in their offices questioned, and imprisoned, and delivered upon one thousand four hundred pounds paid. Hawis, an alderman of London, was put in trouble, and died with thought and anguish, before his business came to an end. Sir Lawrence Ailmer, who had likewise been mayor of London, and his two sheriffs, were put to the fine of one thousand pounds. And Sir Lawrence, for refusing to make payment, was committed to prison, where he stayed till Empson himself was committed in his place.

It is no marvel, if the faults were so light, and the rates so heavy, that the king's treasure of store, that he left at his death, most of it in secret places, under his own key and keeping, at Richmond, amounted, as by tradition it is reported to have done, unto the sum of near eighteen hundred thousand pounds sterling; a huge mass of money even for these times.

The last act of state that concluded this king's temporal felicity, was the conclusion of a glorious match between his daughter Mary, and Charles prince of Castile, afterwards the great emperor, both being of tender years: which treaty was perfected by bishop Fox, and other his commissioners at Calais, the year before the king's death. In which alliance, it seemeth, he himself took so high contentment, as in a letter which he wrote thereupon to the city of London, commanding all possible demonstrations of joy to be made for the same, he expresseth himself, as if he thought he had built a wall of brass about his kingdom: when he had for his sons-in-law, a king of Scotland, and a prince of Castile and Burgundy. So as now there was nothing to be added to this great king's felicity, being at the top of all worldly bliss, in regard of the high marriages of his children, his great renown throughout Europe, and his scarce credible riches, and the perpetual constancy of his prosperous successes, but an opportune death, to withdraw him from any future blow of fortune: which certainly (in regard of the great hatred of his people, and the title of his son, being then come to eighteen years of age, and being a bold prince and liberal, and that gained upon the people by his very aspect and presence) had not been impossible to have come upon him.

To crown also the last year of his reign, as well as his first, he did an act of piety, rare, and worthy to be taken into imitation. For he granted forth a general pardon: as expecting a second coronation in a better kingdom. He did also declare in his will, that his mind was, that restitution should be made of those sums which had been unjustly taken by his officers.

And thus this Solomon of England, for Solomon also was too heavy upon his people in exactions, having lived two and fifty years, and thereof reigned three and twenty years, and eight months, being in perfect memory, and in a most blessed mind, in a great calm of a consuming sickness passed to a better world, the two and twentieth of April 1508, at his palace of Richmond, which himself had built.

This king, to speak of him in terms equal to his deserving, was one of the best sort of wonders; a wonder for wise men. He had parts, both in his virtues and his fortune, not so fit for a common-place, as for observation. Certainly he was religious, both in his affection and observance. But as he could see clear, for those times, through superstition, so he would be blinded, now and then, by human policy. He advanced churchmen: he was tender in the privilege of sanctuaries, though they wrought him much mischief. He built and endowed many religious foundations, besides his memorable hospital of the Savoy; and yet was he a great almsgiver in secret; which showed, that his works in public were dedicated rather to God's glory than his own.

He professed always to love and seek peace; and it was his usual preface in his treaties, that when Christ came into the world, peace was sung; and when he went out of the world, peace was bequeathed. And this virtue could not proceed out of fear or softness, for he was valiant and active, and therefore, no doubt, it was truly christian and moral. Yet he knew the way to peace was not to seem to be desirous to avoid wars: therefore would he make offers and fames of wars, till he had mended the conditions of peace. It was also much, that one that was so great a lover of peace, should be so happy in war. For his arms, either in foreign or civil wars, were never unfortunate; neither did he know what a disaster meant. The war of his coming in, and the rebellions of the earl of Lincoln, and the lord Audley, were ended by victory. The wars of France and Scotland, by peaces sought at his hands. That of Britain, by accident of the duke's death. The insurrection of the lord Lovel, and that of Perkin at Exeter, and in Kent, by flight of the rebels before they came to blows. So that his fortune of arms was still inviolate: the rather sure, for that in the quenching of the commotions of his subjects, he ever went in person: sometimes reserving himself to back and second his lieutenants, but ever in action; and yet that was not merely forwardness, but partly distrust of others.

He did much maintain and countenance his laws; which, nevertheless, was no impediment to him to work his will: for it was so handled, that neither prerogative nor profit went to diminution. And yet as he would sometimes strain up his laws to his prerogative, so would he also let down his prerogative to his parliament. For mint, and wars, and martial discipline, things of absolute power, he would nevertheless bring to parliament. Justice was well administered in his time, save where the king was party; save also, that the council-table intermeddled too much with *meum* and *tuum*. For it was a very court of justice during his time, especially in the beginning; but in that part both of justice and policy, which is the durable part, and cut, as it were, in brass or marble, which is the making of good laws, he did excel. And with his justice, he was also a merciful prince: as in whose time, there were but three of the nobility that suffered; the earl of Warwick, the lord chamberlain, and the lord Audley: though the first two were instead of numbers, in the dislike and obloquy of the people. But there were never so great rebellions expiated with so little blood, drawn by the hand of justice, as the two rebellions of Blackheath and Exeter. As for the severity used upon those which were taken in Kent, it was but upon a scum of people. His pardons went ever both before and after his sword. But then he had withal a strange kind of interchanging of large and unexpected pardons, with severe executions; which, his wisdom considered, could not be imputed to any inconstancy or inequality;

but either to some reason which we do not now know, or to a principle he had set unto himself, that he would vary, and try both ways in turn. But the less blood he drew, the more he took of treasure. And as some construed it, he was the more sparing in the one, that he might be the more pressing in the other; for both would have been intolerable. Of nature assuredly he coveted to accumulate treasure, and was a little poor in admiring riches. The people, into whom there is infused, for the preservation of monarchies, a natural desire to discharge their princes, though it be with the unjust charge of their counsellors and ministers, did impute this unto cardinal Morton and Sir Reginald Bray, who, as it after appeared, as counsellors of ancient authority with him, did so second his humours, as nevertheless they did temper them. Whereas Empson and Dudley that followed, being persons that had no reputation with him, otherwise than by the servile following of his bent, did not give way only, as the first did, but shape him way to those extremities, for which himself was touched with remorse at his death, and which his successor renounced, and sought to purge. This excess of his had at that time many glosses and interpretations. Some thought the continual rebellions wherewith he had been vexed, had made him grow to hate his people: some thought it was done to pull down their stomachs, and to keep them low: some, for that he would leave his son a golden fleece: some suspected he had some high design upon foreign parts: but those perhaps shall come nearest the truth, that fetch not their reasons so far off; but rather impute it to nature, age, peace, and a mind fixed upon no other ambition or pursuit. Whereunto I should add, that having every day occasion to take notice of the necessities and shifts for money of other great princes abroad, it did the better, by comparison, set off to him the felicity of full coffers. As to his expending of treasure, he never spared charge which his affairs required; and in his buildings was magnificent, but his rewards were very limited: so that his liberality was rather upon his own state and memory, than upon the deserts of others.

He was of a high mind, and loved his own will, and his own way; as one that revered himself, and would reign indeed. Had he been a private man, he would have been termed proud. But in a wise prince, it was but keeping of distance, which indeed he did towards all; not admitting any near or full approach, either to his power, or to his secrets, for he was governed by none. His queen, notwithstanding she had presented him with divers children, and with a crown also, though he would not acknowledge it, could do nothing with him. His mother he reverenced much, heard little. For any person agreeable to him for society, such as was Hastings to king Edward the fourth, or Charles Brandon after to king Henry the eighth, he had none: except we should account for such persons, Fox, and Bray, and Empson, because they were so much with him; but it was but as the instrument is much with the workman. He had nothing in him of vain-glory, but yet kept state and majesty to the height; being sensible, that majesty maketh the people bow, but vain-glory boweth to them.

To his confederates abroad he was constant and just, but not open. But rather such was his inquiry, and such his closeness, as they stood in the light towards him, and he stood in the dark to them. Yet without strangeness, but with a semblance of mutual communication of affairs. As for little envies, or emulations upon foreign princes, which are frequent with many kings, he had never any; but went substantially to his own business. Certain it is, that though his reputation was great at home, yet it was greater abroad. For foreigners that could not see the passages of affairs, but made their judgments upon the issues of them, noted that he was ever in strife, and ever aloft. It grew also from the airs which the princes and states abroad received from their ambassadors and agents here; which were attending the court in great number: whom he did not only content with courtesy, reward, and privateness; but, upon such conferences as passed with them, put them in admiration, to find his universal insight into the affairs of the world: which though he did suck chiefly from themselves, yet that which he had gathered from them all, seemed admirable to every one. So that they did write ever to their superiors in high terms, concerning his wisdom and art of rule: nay, when they were returned, they did commonly maintain intelligence with him. Such a dexterity he had to impropriate to himself all foreign instruments.

He was careful and liberal to obtain good intelligence from all parts abroad: wherein he did not only use his interest in the liegers here, and his pensioners, which he had both in the court of Rome, and other the courts of christendom; but the industry and vigilance of his own ambassadors in foreign parts. For which purpose his instructions were ever extreme curious and articulate; and in them more articles touching inquisition, than touching negotiation: requiring likewise from his ambassadors an answer, in particular distinct articles, respectively to his questions.

As for his secret spials, which he did employ both at home and abroad, by them to discover what practices and conspiracies were against him, surely his case required it; he had such moles perpetually working and casting to undermine him. Neither can it be reprehended; for if spials be lawful against lawful enemies, much more against conspirators and traitors. But indeed to give them credence by oaths or curses, that cannot be well maintained; for those are too holy vestments for a disguise. Yet surely there was this farther good in his employing of these flies and familiars; that as the use of them was cause that many conspiracies were revealed, so the fame and suspicion of them kept, no doubt, many conspiracies from being attempted.

Towards his queen he was nothing uxorious, nor scarce indulgent; but companiable and respective, and without jealousy. Towards his children he was full of paternal affection, careful of their education, aspiring to their high advancement, regular to see that they should not want of any due honour

and respect, but not greatly willing to cast any popular lustre upon them.

To his council he did refer much, and sat oft in person; knowing it to be the way to assist his power, and inform his judgment. In which respect also he was fairly patient of liberty, both of advice, and of vote, till himself were declared. He kept a strait hand on his nobility, and chose rather to advance clergymen and lawyers, which were more obsequious to him, but had less interest in the people; which made for his absoluteness, but not for his safety. Insomuch as, I am persuaded, it was one of the causes of his troublesome reign; for that his nobles, though they were loyal and obedient, yet did not co-operate with him, but let every man go his own way. He was not afraid of an able man, as Lewis the eleventh was: but contrariwise, he was served by the ablest men that were to be found; without which his affairs could not have prospered as they did. For war, Bedford, Oxford, Surrey, D'Aubigny, Brooke, Poynings: for other affairs, Morton, Fox, Bray, the prior of Lanthony, Warham, Urswick, Hussey, Frowick, and others. Neither did he care how cunning they were that he did employ; for he thought himself to have the master-reach. And as he chose well, so he held them up well; for it is a strange thing, that though he were a dark prince, and infinitely suspicious, and his times full of secret conspiracies and troubles; yet in twenty-four years' reign, he never put down, or discomposed counsellor, or near servant, save only Stanley the lord chamberlain. As for the disposition of his subjects in general towards him, it stood thus with him; that of the three affections, which naturally tie the hearts of the subjects to their sovereigns, love, fear, and reverence, he had the last in height, the second in good measure, and so little of the first, as he was beholden to the other two.

He was a prince, sad, serious, and full of thoughts, and secret observations, and full of notes and memorials of his own hand, especially touching persons. As, whom to employ, whom to reward, whom to inquire of, whom to beware of, what were the dependencies, what were the factions, and the like; keeping, as it were, a journal of his thoughts. There is to this day a merry tale; that his monkey, set on as it was thought by one of his chamber, tore his principal note-book all to pieces, when by chance it lay forth: whereat the court, which liked not those pensive accounts, was almost tickled with sport.

He was indeed full of apprehensions and suspicions; but as he did easily take them, so he did easily check them and master them; whereby they were not dangerous, but troubled himself more than others. It is true, his thoughts were so many, as they could not well always stand together; but that which did good one way, did hurt another. Neither did he at sometimes weigh them aright in their proportions. Certainly, that rumour which did him so much mischief, that the duke of York should be saved, and alive, was, at the first, of his own nourishing; because he would have more reason not to reign in the right of his wife. He was affable, and both well and fair spoken; and would use strange sweetness and blandishments of words, where he desired to effect or persuade any thing that he took to heart. He was rather studious than learned; reading most books that were of any worth, in the French tongue, yet he understood the Latin, as appeareth in that cardinal Hadrian and others, who could very well have written French, did use to write to him in Latin.

For his pleasures, there is no news of them; and yet by his instructions to Marsin and Stile, touching the queen of Naples, it seemeth he could interrogate well touching beauty. He did by pleasures, as great princes do by banquets, come and look a little upon them, and turn away. For never prince was more wholly given to his affairs, nor in them more of himself: insomuch as in triumphs of justs and tourneys, and balls, and masks, which they then called disguises, he was rather a princely and gentle spectator, than seemed much to be delighted.

No doubt, in him, as in all men, and most of all in kings, his fortune wrought upon his nature, and his nature upon his fortune. He attained to the crown, not only from a private fortune, which might endow him with moderation; but also from the fortune of an exiled man, which had quickened in him all seeds of observation and industry. And his times being rather prosperous than calm, had raised his confidence by success, but almost marred his nature by troubles. His wisdom, by often evading from perils, was turned rather into a dexterity to deliver himself from dangers, when they pressed him, than into a providence to prevent and remove them afar off. And even in nature, the sight of his mind was like some sights of eyes; rather strong at hand, than to carry afar off. For his wit increased upon the occasion: and so much the more, if the occasion were sharpened by danger. Again, whether it were the shortness of his foresight, or the strength of his will, or the dazzling of his suspicions, or what it was; certain it is, that the perpetual troubles of his fortunes, there being no more matter out of which they grew, could not have been without some great defects and main errors in his nature, customs, and proceedings, which he had enough to do to save and help with a thousand little industries and watches. But those do best appear in the story itself. Yet take him with all his defects, if a man should compare him with the kings his concurrents in France, and Spain, he shall find him more politic than Lewis the twelfth of France, and more entire and sincere than Ferdinando of Spain. But if you shall change Lewis the twelfth for Lewis the eleventh, who lived a little before, then the consort is more perfect. For that Lewis the eleventh, Ferdinando, and Henry, may be esteemed for the *tres magi* of kings of those ages. To conclude, if this king did no greater matters, it was long of himself: for what he minded he compassed.

He was a comely personage, a little above just stature, well and straight limbed, but slender. His countenance was reverend, and a little like a churchman: and as it was not strange or dark, so neither was it winning or pleasing, but as the face of one

well disposed. But it was to the disadvantage of the painter, for it was best when he spake.

His worth may bear a tale or two, that may put upon him somewhat that may seem divine. When the lady Margaret his mother had divers great suitors for marriage, she dreamed one night, that one in the likeness of a bishop in pontifical habit did tender her Edmund earl of Richmond, the king's father, for her husband, neither had she ever any child but the king, though she had three husbands. One day when king Henry the sixth, whose innocency gave him holiness, was washing his hands at a great feast, and cast his eye upon king Henry, then a young youth, he said; "This is the lad that shall possess quietly that, that we now strive for." But that, that was truly divine in him, was that he had the fortune of a true christian, as well as of a great king, in living exercised, and dying repentant: so as he had a happy warfare in both conflicts, both of sin, and the cross.

He was born at Pembroke castle, and lieth buried at Westminster, in one of the stateliest and daintiest monuments of Europe, both for the chapel, and for the sepulchre. So that he dwelleth more richly dead, in the monument of his tomb, than he did alive in Richmond, or any of his palaces. I could wish he did the like in this monument of his fame.

THE HISTORY OF THE REIGN

OF

KING HENRY THE EIGHTH.

After the decease of that wise and fortunate king, Henry the seventh, who died in the height of his prosperity, there followed, as useth to do, when the sun setteth so exceeding clear, one of the fairest mornings of a kingdom that hath been known in this land, or any where else. A young king, about eighteen years of age, for stature, strength, making, and beauty, one of the goodliest persons of his time. And though he were given to pleasure, yet he was likewise desirous of glory; so that there was a passage open in his mind, by glory, for virtue. Neither was he unadorned with learning, though therein he came short of his brother Arthur. He had never any the least pique, difference, or jealousy with the king his father, which might give any occasion of altering court or council upon the change; but all things passed in a still. He was the first heir of the white and red rose; so that there was no discontented party now left in the kingdom, but all men's hearts turned towards him: and not only their hearts, but their eyes also; for he was the only son of the kingdom. He had no brother; which though it be a comfortable thing for kings to have, yet it draweth the subjects' eyes a little aside. And yet being a married man in those young years, it promised hope of speedy issue to succeed in the crown. Neither was there any queen mother, who might share any way in the government, or clash with his counsellors for authority, while the king intended his pleasure. No such thing as any great and mighty subject, who might any way eclipse or overshade the imperial power. And for the people and state in general, they were in such lowness of obedience, as subjects were like to yield, who had lived almost four and twenty years under so politic a king as his father; being also one who came partly in by the sword; and had so high a courage in all points of regality; and was ever victorious in rebellions and seditions of the people. The crown extremely rich and full of treasure, and the kingdom like to be so in a short time. For there was no war, no dearth, no stop of trade, or commerce; it was only the crown which had sucked too hard, and now being full, and upon the head of a young king, was like to draw less. Lastly, he was inheritor of his father's reputation, which was great throughout the world. He had strait alliance with the two neighbour states, an ancient enemy in former times, and an ancient friend, Scotland and Burgundy. He had peace and amity with France, under the assurance, not only of treaty and league, but of necessity and inability in the French to do him hurt, in respect that the French king's designs where wholly bent upon Italy; so that it may be truly said, there had scarcely been seen, or known, in many ages, such a rare concurrence of signs and promises, and of a happy and flourishing reign to ensue, as were now met in this young king, called after his father's name, Henry the eighth.

THE BEGINNING

OF THE

HISTORY OF GREAT BRITAIN.

By the decease of Elizabeth, queen of England, the issues of king Henry the eighth failed, being spent in one generation, and three successions. For that king, though he were one of the goodliest persons of his time, yet he left only by his six wives three children; who reigning successively, and dying childless, made place to the line of Margaret, his eldest sister, married to James the fourth king of Scotland. There succeeded therefore to the kingdom of England, James the sixth, then king of Scotland, descended of the same Margaret both by father and mother: so that by a rare event in the pedigrees of kings, it seemed as if the Divine Providence, to extinguish and take away all envy and note of a stranger, had doubled upon his person, within the circle of one age, the royal blood of England, by both parents. This succession drew towards it the eyes of all men, being one of the most memorable accidents that had happened a long time in the christian world. For the kingdom of France having been reunited in the age before in all the provinces thereof formerly dismembered; and the kingdom of Spain being, of more fresh memory, united and made entire, by the annexing of Portugal in the person of Philip the second; there remained but this third and last union, for the counterpoising of the power of these three great monarchies; and the disposing of the affairs of Europe thereby to a more assured and universal peace and concord. And this event did hold men's observations and discourses the more, because the island of Great Britain, divided from the rest of the world, was never before united in itself under one king, notwithstanding the people be of one language, and not separate by mountains or great waters; and notwithstanding also that the uniting of them had been in former times industriously attempted both by war and treaty. Therefore it seemed a manifest work of Providence, and a case of reservation for these times; insomuch that the vulgar conceived that now there was an end given, and a consummation to superstitious prophecies, the belief of fools, but the talk sometimes of wise men, and to an ancient tacit expectation, which had by tradition been infused and inveterated into men's minds. But as the best divinations and predictions are the politic and probable foresight and conjectures of wise men, so in this matter the providence of king Henry the seventh was in all men's mouths; who being one of the deepest and most prudent princes of the world, upon the deliberation concerning the marriage of his eldest daughter into Scotland, had, by some speech uttered by him, showed himself sensible and almost prescient of this event.

Neither did there want a concurrence of divers rare external circumstances, besides the virtues and condition of the person, which gave great reputation to this succession. A king in the strength of his years, supported with great alliances abroad, established with royal issue at home, at peace with all the world, practised in the regiment of such a kingdom, as might rather enable a king by variety of accidents, than corrupt him with affluence or vainglory; and one that besides his universal capacity and judgment, was notably exercised and practised in matters of religion and the church: which in these times, by the confused use of both swords, are become so intermixed with considerations of estate, as most of the counsels of sovereign princes or republics depend upon them: but nothing did more fill foreign nations with admiration and expectation of his succession, than the wonderful and, by them, unexpected consent of all estates and subjects of England, for the receiving of the king without the least scruple, pause, or question. For it had been generally dispersed by the fugitives beyond the seas, who, partly to apply themselves to the ambition of foreigners, and partly to give estimation and value to their own employments, used to represent the state of England in a false light, that after queen Elizabeth's decease there must follow in England nothing but confusions, interreigns, and perturbations of estate, likely far to exceed the ancient calamities of the civil wars between the houses of Lancaster and York, by how much more the dissensions were like to be more mortal and bloody, when foreign competition should be added to domestical; and divisions for religion to matter of title to the crown. And in special, Parsons the Jesuit, under a disguised name, had not long before published an express treatise, wherein, whether his malice made him believe his own fancies, or whether he thought it the fittest way to move sedition, like evil spirits, which seem to foretell the tempest they mean to move; he laboured to display and give colour to all the vain pretences and dreams of succession which he could imagine; and thereby had possessed many abroad that knew not the affairs here with those his vanities. Neither wanted there here within this realm, divers persons both wise and well affected, who, though they doubted not of the undoubted right, yet setting before themselves the waves of people's hearts, guided no less by sudden and temporary winds, than by the natural course and motion of the waters, were not without fear what might be the event. For queen Elizabeth being a princess of extreme caution, and yet one that loved admiration

above safety; and knowing the declaration of a successor might in point of safety be disputable, but in point of admiration and respect assuredly to her disadvantage; had from the beginning set it down for a maxim of estate, to impose a silence touching succession. Neither was it only reserved as a secret of estate, but restrained by severe laws, that no man should presume to give opinion, or maintain argument touching the same: so, though the evidence of right drew all the subjects of the land to think one thing; yet the fear of danger of law made no man privy to others' thought. And therefore it rejoiced all men to see so fair a morning of a kingdom, and to be thoroughly secured of former apprehensions; as a man that awaketh out of a fearful dream. But so it was, that not only the consent, but the applause and joy was infinite, and not to be expressed, throughout the realm of England upon this succession: whereof the consent, no doubt, may be truly ascribed to the clearness of the right; but the general joy, alacrity, and gratulation, were the effects of differing causes. For queen Elizabeth, although she had the use of many both virtues and demonstrations, that might draw and knit unto her the hearts of her people; yet nevertheless carrying a hand restrained in gift, and strained in points of prerogative, could not answer the votes either of servants, or subjects to a full contentment; especially in her latter days, when the continuance of her reign, which extended to five and forty years, might discover in people their natural desire and inclination towards change: so that a new court and a new reign were not to many unwelcome. Many were glad, and especially those of settled estate and fortune, that the fears and uncertainties were overblown, and that the die was cast. Others, that had made their way with the king, or offered their service in the time of the former queen, thought now the time was come for which they had prepared: and generally all such as had any dependence upon the late earl of Essex, who had mingled the service of his own ends with the popular pretence of advancing the king's title, made account their cause was amended. Again, such as might misdoubt they had given the king any occasion of distaste, did contend by their forwardness and confidence to show, it was but their fastness to the former government, and that those affections ended with the time. The papists nourished their hopes, by collating the case of the papists in England, and under queen Elizabeth, and the case of the papists in Scotland under the king: interpreting that the condition of them in Scotland was the less grievous, and divining of the king's government here accordingly; besides the comfort they ministered to themselves from the memory of the queen his mother. The ministers, and those which stood for the presbytery, thought their cause had more sympathy with the discipline of Scotland than the hierarchy of England, and so took themselves to be a degree nearer their desires. Thus had every condition of persons some contemplation of benefit, which they promised themselves; over-reaching perhaps, according to the nature of hope, but yet not without some probable ground of conjecture. At which time also there came forth in print the king's book, entitled, Βασιλικὸν Δῶρον: containing matter of instruction to the prince his son touching the office of a king: which book falling into every man's hand, filled the whole realm, as with a good perfume or incense, before the king's coming in; for being excellently written, and having nothing of affectation, it did not only satisfy better than particular reports touching the king's disposition, but far exceeded any formal or curious edict or declaration, which could have been devised of that nature, wherewith princes in the beginning of their reigns do use to grace themselves, or at least express themselves gracious in the eyes of their people. And this was for the general the state and constitution of men's minds upon this change: the actions themselves passed in this manner.

. . . . . .

The rest is wanting.
